96 MAIDEN LANE NEW YORK

THE MASTER SCULPTORS, drawing inspiration from Nature, from history and the classics, have transfixed immortal conceptions in the finest of Marbles.

That which is meant for the eye alone often evades the limitations of verbal expression. Suffice it to say that Fancy Pieces in the happiest vein are wrought with the lightest and deftest touch. Characters from the classics, heroes of history and romance. Notable subjects from the Louvre and the splendid Florentine exhibits.

In some pieces the delicate Patina Tint imparts a vein of color.

## ıantic Origin and History of the Famous Thuringen Pottery.

AST year's interesting exhibition of old Thüringen porcelain, which, as lovers of ceramic treasures will remem- was held in Leipsic, has had the effect stimulating the collector's acquisitive- s with respect to this particular kind of ıa, which, of course, has a very differ- value from the bulk of the modern e upon the production of which the iringen factories now largely depend. It ı local industry that from tentative be- nings has now blossomed into one of at mercantile importance, both as to the ne trade and that done overseas, for, eed, the bulk of modern Thüringen is v specially manufactured for export, rmous quantities being annually destined the United States.

A certain romance attaches to the first tory set up amid this inland forest ge. A kind of semi-porcelain appears have been made about 1750 at Gera in s district, and it was not until 10 years r that one Georg Heinrich Macheleid covered the right kind of earth for the nufacture of true porcelain. Macheleid s a student of theology. His father, wever, was an herbalist and dealer in mples," a circumstance which very prob- y gave the son a leaning toward experi- ntal work. Little, in fact, is known the man's earlier life, but he is reported have "tired of theology" by the time he d "preached his 99th sermon," and with- t even troubling to "round off the cen- y" young Macheleid went back to the rk that had so absorbing a fascination r him—the mixing of various earths and bstances in the hopes of ultimately pro- cing a clay which should, when baked, ove to be porcelain.

His home was at Sitzendorf, near Ru- lstadt, in the lovely Schwarzburg dis- ct, and here he persevered doggedly in s work, without, however, the slightest sult, until one day when a country- oman happened to bring him a small antity of fine sand, such as was in those ys used to strew over writing to dry e ink. This young Macheleid made use for his favorite experiment, and found his joy that the right ingredient had at last en come by, but the quantity was so small t be quite insufficient for any practical rpose, while the woman had been a total ranger to that countryside, and he had nitted to inquire where the precious find had come from. In desperation Macheleid tramped the hills and valleys far and wide, coming, when starved and faint, with hope well nigh deserting him, upon a cleft in the hillside, not far from the romantic Königsee, where this sand—the one thing wanting to crown his efforts with success—was revealed in abundance. Such is the little history, still told in the district, of how Macheleid, the erstwhile theologian, turned manufacturer, for the concession to erect workshops in the neighboring village of Volkstedt was granted him by the then reigning Prince, while a second factory was later erected by Prince Friedrich Wilhelm at Hildberghausen. Gotthelf Greiner followed suit with the Wallendorf factory, and may likewise be reckoned one of the earliest porcelain manufacturers in the Thüringian district—a boldly scrawled "W" being the mark by which to recognize this old ware.

Among the places now famous for the brisk trade done in "half china" are Blankenhain, Limbach, Rauenstein, Pössneck, Gotha, Eisenberg, and a few of minor importance in addition to the first three already mentioned—and the idyllic surroundings of the forest factories should make it well worth the tourists' while to step aside from the better known pleasure resorts to take cognizance of these busy hives, as full of interest for the amateur as for the business man. There are indeed no less than 112 china factories now extant amid the pine woods of Thüringia, many of which have sprung up and become flourishing concerns within the last 50 years only, while the value of their annual product is now estimated at 51,257,137 marks, of which quite 33,634,000 marks worth represents the export trade, destined for Denmark, Holland, Switzerland, the States and this country.

For many years these hardy Thüringians were a thorn in the flesh to the manufacturers of Meissen in neighboring Saxony, the later complaining—and with some reason, too—of the use made of their trade marks upon "inferior ware," and this matter was, we believe, finally adjusted by the Leipsic authorities toward the end of the 18th century, and with rather a high hand, too, for the Thüringen ware was "confiscated" without more ado at the great annual fair. This lesson, however, had a salutary effect, and in future "Thüringen" was no longer palmed off as "'real Meissener." Not but what much good work is done in the woodland factories, such as may well enable it to stand on its own merits, the hand made porcelain (taught at a special school of art, where the artists are prepared for the Wallendorf and Lichte factories) is often of great excellence, modeling being also a branch of study to which close attention is given. Holy images and copies of the antique are here largely dealt with. So much for the work done nowadays, but the "Old Thüringen," beloved of the connoisseur, possesses a quainter individuality of its own.—*Pall Mall Gazette.*

## The Late Marchese Ginori.

THE Marchese Ginori, of Florence, who died at Munich recently, was the proprietor of the Ginori-Richard manufactory, founded by an ancestor of his in the 17th century, which has been in the hands of the family ever since. The productions of the works are, and always have been, artistic pottery of a high order and with striking characteristics of their own. Pottery on similar lines is manufactured on the Continent and in this country, but "Ginori" ware has an individuality which cannot be mistaken.

The Marchese Ginori was a Senator, and at one time was Deputy for Florence, but he never took active part in politics. He was the owner of the Island of Monte Cristo, which, however, he had leased to the King of Italy. He was fond of sport, and was celebrated as a swordsman. He was what would be called in this country comparatively young—only 54. The production of his works, however, are familiar to dealers all over the world.

## Tariff Decision on Cut Glass Bottles.

THE following decision by the Board of United States General Appraisers, New York, in relation to the duties on cut glass bottles, was announced last week by the Treasury Department:

CUT GLASS BOTTLES.—Protest of P. W. Engs & Sons' Co. against the assessment of duty by the Collector at New York. The goods consisted of glass bottles, cut or otherwise ornamented or decorated, held to have been properly classified under Par. 100, Tariff Act of 1897.

Wm. Creerman, who was arrested last April for attempting to steal a tray of diamonds from the store of C. F. Richards, 720 First Ave., Seattle, Wash., has been sentenced to one year's imprisonment.

# THE COMMENTATOR

## HIS VIEWS AND CRITICISMS

### Characteristics of Japanese Art Products.

THE belligerent Japanese have had the center of the stage. The sword of the samurai has seemed to put into temporary eclipse the chisel and brush of the artists of Nippon. It may reasonably be assumed that the advent of peace will open the way to interesting developments, not only in the industrial, but also in the fine arts. For Japanese products of the latter class there is an appreciable demand in the United States; though one may venture the opinion, perhaps, that this demand is based as much upon a sort of pro-Japanese sentiment as upon superior artistic qualities possessed by the goods. It may not be inopportune at this time to review some of the salient characteristics of Japanese craftsmanship.

One of the first things that cannot fail to impress the observer is the element of grotesqueness that characterizes so much of the art work of Japan. Wherever life is represented, whether in a painted dish or an ivory carving, it is represented grotesquely. The figures are thrown into strained, ungainly and unnatural positions. Often the subjects themselves appear as strange and capricious as the treatment given them by the artists. Curiously enough, these quaint pieces are often designed to express ethical ideas. For example, three monkeys are seated back to back, in what you might call a kind of triangular formation. One monkey has his paws pressed over his mouth; the second, over his ears, and the third holds his paws over his eyes. Expressed in words this is all supposed to mean, "No evil will I speak; no evil will I hear; no evil will I see." A commendable sentiment truly, though rather of the copy book order—but why monkeys to preach it? Query: Is the grotesque truly artistic? There are arguments pro and con; we will not stop to discuss the point here—think it out to suit yourself. Before leaving this phase of J- anese art work it may be added that s element of grotesqueness is incidental the earlier stages of artistic developmen f any nation. Witness the carved "deit innumerable which people have made r themselves as objects of worship, most f which are consummate creations of ugli s

Again, one is struck with the emph s which the Japanese put on detail as tinguished from general effect. They not impressionists. They want to s every scale on a fish and every feathe a bird. Heretofore this painstaking at tion to detail has satisfied itself wit surface of things. The sculptor or pa might know nothing of the precise anat of man or bird or fish. He would ge proportions wrong; they would be "au drawing." The rapid development o efficient educational system in Japan hardly fail to lead the native craftsme include perfect anatomy among their de This faithfulness to minute and what m be thought insignificant features, is unq tionably an element of great strength in Japanese character. It is not a pose of artists, but is a fiber of the national life won the battles of the war. They were content to omit anything, to leave anyt out of calculation. So it is in art, in in education, in everything.

Another fact worth mentioning is all materials look alike to the Japanese. is only a rather colloquial way of saying with them the design is first and foren while the substance in which it is wr is of secondary importance. We have goldsmiths and silversmiths, our sculp in marble or bronze, our specialists who fine themselves to this or that material. so in Japan. There the smith is equal home with any material that will carry design—ivory or bronze, copper or iron ver or gold, it is all the same to him. ertheless the Japanese metal workers and always have been, among the most ful in the world. We have heard more a the sword of the samurai as a symbo prowess than as an object of art; but many of these swords and sword gu has been lavished a wealth of artistic t ment; and the native armorers and sw makers have been craftsmen of the hi

THE EXCLUSIVE ART GOODS HOUSE

# A Symphony in Color.

A remarkable display of Sevres, incomparable in its exquisite beauty, conceived in the opulent imagination of the accomplished painters of art-loving France, and executed with their rare and singular skill. Admirable pieces in **"Pâte Tendre"** in new forms and decorations, a new departure being the **"Bird Decors"** and **"Treillis de Roses"**—lattice effect in rose decoration on a white ground—exceedingly handsome and bound to arouse the admiration of all lovers of Sèvres. Vases for narrow mantels, exposing a broad surface for decoration but of shallow depth; large vases, small vases, urns, etc. The most extensive line shown in this country.

**"Grès Flammé,"** distinctly new in form and decoration, shown this season for the first time; vases, urns and "brule-parfums"—highly classical shapes in deep red, blue, green, jasper and soft blends—heavy gold bronze mountings, worthy of the best jewelers' craftsmanship. Truly magnificent pieces that will appeal to all who admire harmony of decoration—selected for the very highest class of trade. To neglect seeing this ware is to miss a golden opportunity.

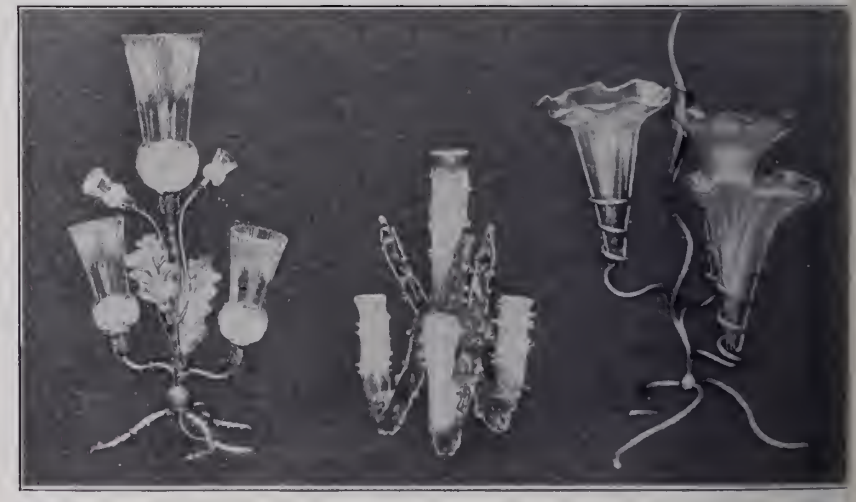
39 UNION SQUARE, N. Y.

order. Here we touch the birthplace, the genesis of Japanese art. It sprung, not from the artisan, but from the aristocrat. Princes, priests and nobles, warriors and leading men wrought and painted, not for gain, but for the love of it. It was not until later that the avenues for artistic work were available to the people at large.

From what has been said as to the supreme regard being for design rather than substance, one might infer that from the point of view of material Japanese art products in certain lines would be inferior to those of Europe. Such is, indeed, the case. Consider, for example, the matter of ceramics and pottery. While it is not denied that there is a certain unique appeal in Japanese designs and an effectiveness in the soft reds and blues so largely employed, yet, considered as porcelains, they are inferior as a whole to the products of Europe and even to those of China. The reader is, of course, aware that the latter country is the birthplace of porcelain, as it is of so many of the arts. As to pottery, the so-called Satsuma is regarded by critics as an inferior product. In enamel, metal work and ivory, however, the Japanese are probably unexcelled. It is not germane to the present article to consider Japanese products in detail, as the object is merely to point out national tendencies and characteristics.

Japanese art products reflect to a remarkable degree the national developments and characteristics. They are what they are, not so much because they are art as because they are Japanese. What is the future of it all to be? In taking up the manners and customs, the habits of thought and civilizations of other nations, will the Japanese lose their distinct identity, and their art lose its characteristic qualities? We think not, and certainly hope not. Developments, improvements and higher achievements there are likely to be; but the native genius can hardly be lost. THE COMMENTATOR.

### Old Silver at Auction.



OLD silver has been for a long time w more than gold, and the sale at C tie's June 28 proved this again, as fu proof was necessary. Two Elizab rosewater flagons and covers, gilt all 12¼ in. high, with the London hall- for 1597, fetched $17,500. They we 72 ozs., and were sold for $2,250 25 ago. The decoration of these flagons sisted chiefly of large shells, chased matted surface, with fishes between, bands of dolphins round the lip and of each; the covers molded as shells.

A 16th century tankard and cover, brought only $245 at the Percy Doyle 1887, went for $1,052 ($50 per oz.). a Henry VIII. chalice, 6 in. high, and 5⅛ in. diameter (London hall-mark, 1 weighing 16 ozs., and engraved in bla ter with the sacred monogram alter with E.P.S. (episcopus), not T.P.S., ac ing to the catalogue, sold for $4,500.

A Henry VIII. mazer bowl, 5¾ in. ter, with silver-gilt mounts and boss i ter the latter deeply engraved with and foliage filled with blue and gree amel, London hall-mark, 1527, br $2,500, and a James II. two-handled cu cover of unusual size, weighing 98 ozs. in. high, made by Benjamin Pyne, Lo 1685, realized $6,000. The decoration fine cup was simply broad bands of m with two cartouches bearing the in tions.

An Elizabethan tiger-ware jug, for the property of Mrs. Frances Jefferson silver-gilt mounts (London hall-mark, brought $2,500. The "set" of 12 Cha apostle spoons (London, 1637), m mark, R.C., lacking the S. Matthew fetched $4,050. It will be remembere a complete "set" of 13, 100 years (1536), brought the startling sum of $ July 16, 1903.

# THE RAMBLER'S NOTES

**BEAUTIFUL EFFECTS IN ROYAL COPENHAGEN.**

VISITORS to the salesrooms of Christian Scherfig, representing the Royal Copenhagen Porcelain Co., Irving building, at Chambers and Hudson Sts., New York, have admired a comprehensive and beautiful display of vases in shapes almost beyond counting, and with equal variety in color effects. This line comes in subdued shades of blue and gray painted on the clear white background of china. Marvelous results are accomplished by the Danish artists in the blending, modification and contrast of these shades. The effects of sea and air in the marine views are especially fine, and as you look at one of these pictures in underglaze there seems to be miles and miles of water, while one almost feels that he could breathe the atmosphere. There are fish and game effects, water lilies and other floral conceptions, besides landscape suggestions. A line of plates is finished in similar tones, and is meeting with considerable favor in the trade. Although the samples are already varied, new ones are arriving every now and then, as the company does not believe in resting on its past laurels. Several groups of this Danish ware were noticed in the display of china at the opening of Tiffany & Co.'s new building.

*

**RICH VASES IN SEVRES STYLES**

A NUMBER of beautiful Sèvres vases, recently received by Harris & Harrington, 12 Barclay St., New York, have been admired by Fall visitors. The vases are of large size and urnlike shape with covers, and some have handles. The bases and tops are in cobalt blue, richly overlaid with gold. Each vase is ornamented with effective hunting, pastoral or coast scenes executed by artists of high rank in this line of work. The richness of the decorative designs in the borders and handles is especially notable.

*

**ART IN DOMESTIC JARDINIERES**

IN the new line of art pottery received at S. A. Weller's salesrooms, 7 Park Place, New York, are a remarkable assortment of jardinieres in dull finish, with ornamental figures in relief. This ware comes in several subdued shades of green, red and purple, the coloring being especially neat and attractive. The ornamental figures are artistically modeled and all indicate originality in conception as well as cleverness in execution. The design weave into the ornamentation cherubs, vines, sprays of plants, flowers and animal figures. On one of the largest of the jardinieres a life-like frog is climbing from vine over the top, and there is a touch of humor in the posing of the little animal as if he were peeping into the mouth of the vessel. Another design shows a hungry looking hawk about to descend upon several thoroughly frightened barnyard fowl. A gladiatorial figure in full relief and in almost full-relief is represented on another jardiniere. There is a wide variety of vases, pitchers and other smaller articles made up in the same mat finish and with ornamentation somewhat similar to that of the jardinieres.

TH YEAR. NEW YORK AND CHICAGO, WEDNESDAY, OCTOBER 11, 1905. VOL. LI. No. 11.

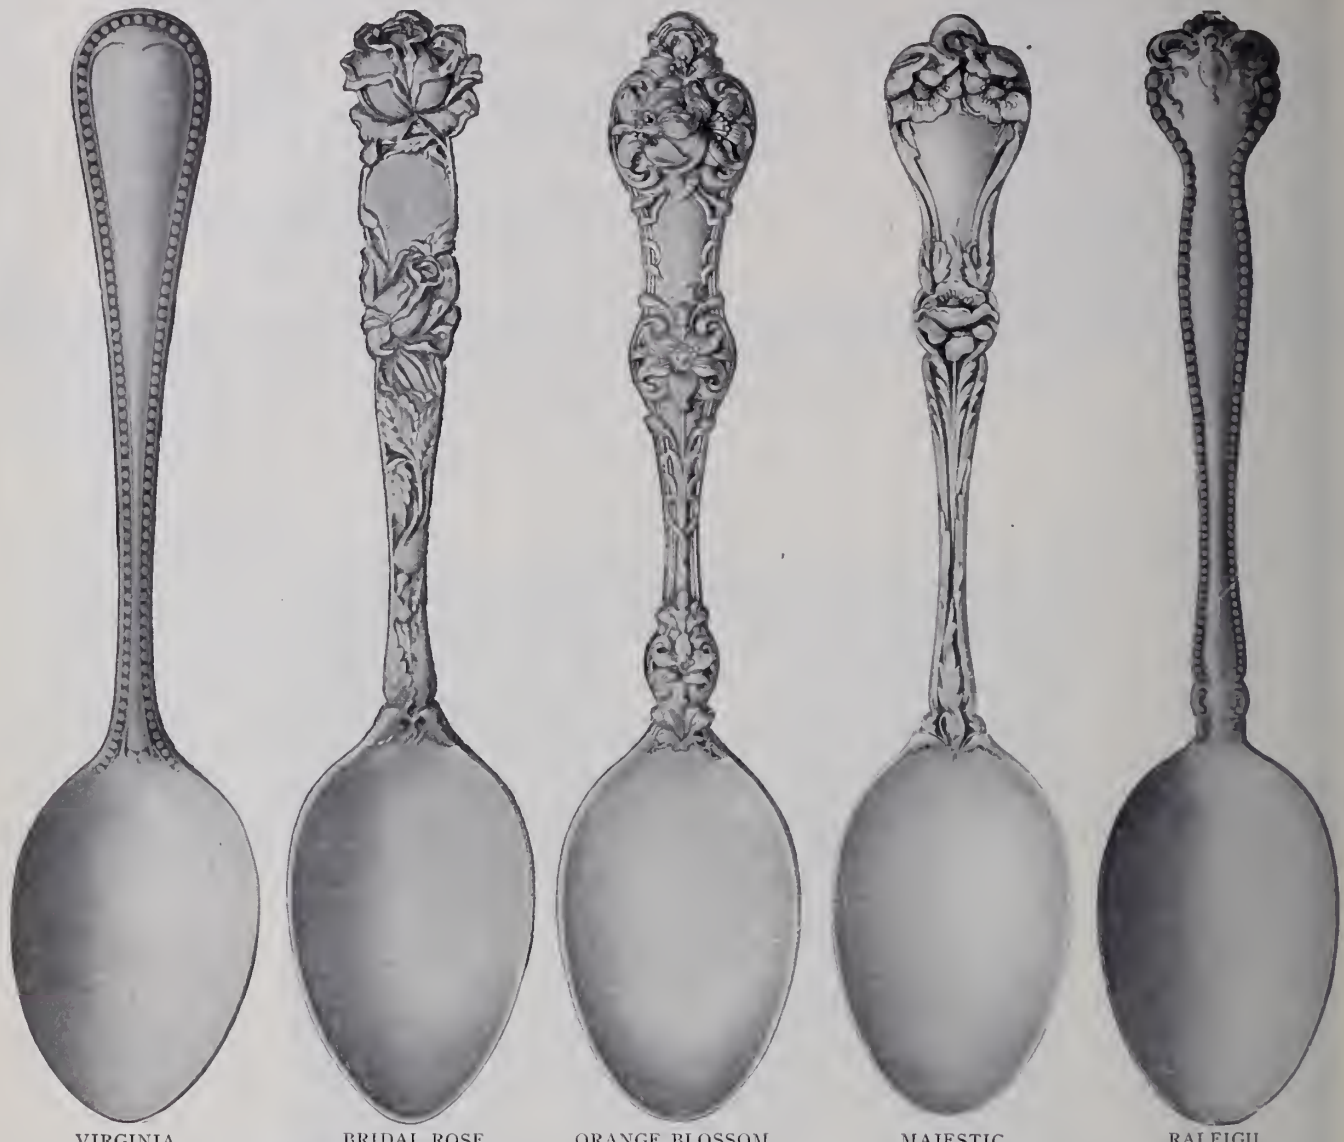
## ISTORICAL EVENTS BEAUTIFULLY TYPIFIED IN A MILITARY TROPHY.

HE leading events in almost a century of nerican history are emlied in the design of a ndsome silver cup preıted to the 71st Regiment ıtional Guard of the ıte of New York by nry P. Martin, Brook-, N. Y., who was the lonel commanding the st Regiment in the years 61 and 1862, and who is own as the "Father of Regiment." Col. Mar- in making this presentan, desired to emphasize triotic ideals and to proıte interest in marksmanip. He personally prered suggestions as to the deling and ornamentan of the cup, and these re carefully followed by e designers and manufacrers.

In general form the cup of the classical Greek yle, but in decoration and rkmanship it is quite dern. The bottom of the wl rests on the branches id trunk of an oak tree, autifully chased and erced, which represents e Northern States of the nion. Around the tree e grouped on a platean ree equestrian figures, acırate miniature copies of atues of Gens. Grant, herman and Sheridan, the mous horse Winchester ing introduced with the tter General. This part of ıe cup emphasizes the ivil War period in Ameriın history.

Around the neck of the up re four laurel wreaths hased in relief, one encirling the head of George Washington, underneath hich are the figures, "1776;" another, Andrew Jackson, "1812;" the others, Winfield Scott and Zachary Taylor, both 1846. This part of the cup recalls the early wars in American history, and the Generals who led the American arms.

TROPHY PRESENTED BY COL. HENRY P. MARTIN TO 71ST REGIMENT.



On the front of the cup, directly above the figure of Gen. Grant, is a finely etched portrait of Abraham Lincoln, with cloud effects about the head and on either side the figures, "1861" and "1865." Two artistically chased shields ornament the sides of the cup. The panels are enameled in red, white and blue, and are flanked on each side with branches of pine and hickory in high relief, these trees representing the south and west. Above, in bronze, is an American eagle, forming the handles of the cup. Stars and wreaths of victory form a band about the foot of the cup. The silver structure rests on four bronze eagles, each clutching a ball, and these in turn are supported on an ebony base.

On the front of the cup appears the following inscription: "The Martin Cup, Presented to the 71st Regiment, N.G.N.Y., American Guard, by Col. Henry P. Martin, Commanding 71st Regiment, 1861-1862. To Promote Interest in Small Arms Practice, Oct. 1, 1905." On the reverse side is an etched scene of the Creedmoor range, with men at practice.

The trophy is 23 inches high, exclusive of the base, and weighs 276 ounces. It

# J. R. WOOD & SONS

By Every Test
They're Proven BEST.
And there are good reasons for it. If there is any advantage in a half-century's experience at ring making, if there is any advantage in having the most improved machinery, the most skilled workmen, if there is any advantage in adopting the most advanced methods of manufacturing, and the most economical method of selling, then our rings ought to be the best—and they are. We court comparison with others—quality and price.
Let us send you samples and judge for yourself.

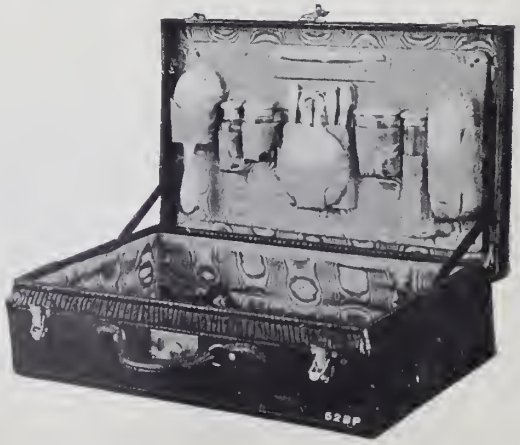
# Presentation Offerings
## —A Timely Suggestion.

EVERY JEWELER at this season must prepare to answer for his customers the question, "What shall I give?"

The question is answered most satisfactorily by offering Traveling Bags for men and women, selections from which are here shown.



Fittings are in Sterling Silver, also Ebony and Silver, as well as Ivory and Silver. The variety of fittings is not less notable than their high quality.

The very large demand for these products is the best endorsement that discriminating appreciation can give.

Moderate prices furnish the final argument.

Makers of Gold and Platinum Diamond Jewelry

28 EAST 22d ST., NEW YORK

STRONG ASSERTIONS have been made in this space emphasizing the superior workmanship and artistic qualities of Schickerling Jewelry. It would be futile to make such claims unless the goods absolutely came up to the stated standards, and the Trade would be very quick to notice any disparity between the representations and the facts. Holding this principle in mind we do not hesitate to announce that in our special department of PLATINUM DIAMOND JEWELRY the products are in the fore-front of their class. The craftsmen employed are expert diamond workers and handle the brilliant stone in a brilliant manner. The range of prices varies according to the nature, size and quality of the pieces. Exclusive designs in all the finer pieces.

# Not How Cheap, But How Perfect,

**IS THE PRINCIPLE ON WHICH**

# The Sternau Coffee Machine

**IS CONSTRUCTED.**

No. 642/1807.
Consists of Coffee Machine, Wind Shield, Alcohol Flagon, Cream Pitcher, Sugar Bowl and Tray.

A cheap coffee pot which makes poor coffee is in reality an expensive article for household use, in comparison with The Sternau Coffee Machine. which always produces perfect coffee.

The Sternau is sold at a popular price, uses less coffee than ordinary pots, is practically indestructible and is therefore actually cheaper in the end.

Jewelers find The Sternau a ready seller, and particularly so when they themselves know its many advantages from personal use and are thus able to talk these advantages intelligently and convincingly to their customers.

If **you** haven't The Sternau in stock, we will fill your sample order for one for personal trial, and if you don't decide that it is the best coffee machine on the market, always making perfect coffee, you may return it at our expense.

During the fall and holiday seasons The Sternau Coffee Machine and The Sternau Coffee Machine Sets are two of the Jewelers' best selling specialties. Both are attractive in appearance, and command the attention of every one.

Life Studies of Larter Workmen

ILLUSTRATION NUMBER EIGHT

THE FINISHER

¶ The last step in Modern Ring Making, but not the least important, is to put upon each ring the finish the pattern requires to bring out all of its fine points.

¶ It is money wasted to have fine designs and carefully cut dies unless the ring is finished so that none of its beauty is lost.

¶ Our Finisher, who has had many years' experience in our own factory, treats each pattern with such care that the finish is one of the characteristics of the Larter Rings.

¶ Made for Man, Woman and Child.

## *ELSIE BEE'S FASHIONS.*

NOVELTIES SEEN IN A LADY'S RAMBLES AMONG THE JEWELERS.

VERY handsome are the large diamond brooches, in strictly conventional treatment, which are principally fanc scroll patterns in a variety of artistic ar rangements, the designs being based o somewhat triangular forms.

*

Some small easel clocks have prett frames of silver.

*

Pearl pavé work is employed in a ver simple but charming cross.

*

A pyramidal emerald, in almost invisibl gold setting, forms the top of a uniqu ring.

*

An attractive scarf pin is in the shape a crescent composed of alternate rubies an diamonds.

*

Pink coral of a beautiful shade set i rose gold filigree is used in a dainty ope collarette.

*

A cat's-eye flanked by a diamond o either side ornaments a man's heavy rin in rose gold.

*

A silver egg cup with loop handle has circular base with a tiny salt and pepp castor on the side.

*

Five short chains connected at top an bottom by handsomely chased bars of go form a rather odd fob.

*

For oyster cocktails little forks havin pretty, slender handles, terminate in tw prongs about an inch long.

*

The acorn in full relief, the clover blo som and the grape vine furnish *motifs* f new and taking designs in embelishing se eral lines of silverware.

*

Extremely decorative are some lar silver flagons and vases, in plain or orn mental finish that attract attention by th tall and graceful outlines.

*

A novel design in a stock pin shows conventionalized thistle, the bloom sim lated by an amethyst with upright stalk, gold and green, between two leaves in g and green enamel.

*

For the convenience of the trave there is a little leather jewel case, lin with chamois and made to accommod rings, stick pins, a brooch, or watch a hold the same in place.

*

Little articles of jewelry in whi enamels are now employed show the m delightful color effects, producing a h monious blending of soft and shaded to that to a refined taste are most pleasing.

*

Opera glasses with handles come in v attractive mountings of pearl, shell a enamel with or without ornamentation gold. Elaborate gold bead embroidery seen on opera bags of white silk and gr

white bead bags are decorated with con-ntional patterns in gold beads.

*

Beautiful and costly rings are displayed some very smart styles, as a marquise-ped brown diamond edged with white monds; a yellow topaz heart framed in monds, and a large canary diamond con-sting with a large white diamond on a ld hoop. Rubies with diamonds form h rings.

*

In a unique and charming little watch mistletoe has its presentment in rose d, of open pattern, on a surface of green d, with tiny pearl berries grouped at in-vals. Another exquisite watch has a ochon opal filling a diamond rim, with chatelaine pin formed of two outspread mond wings connected at the base with ght open-work topped with diamonds. me of the large, very thin watches are ished in plain, bright gold. Magnificent mond tiaras are in elaborate designs of erlacing, fancy ovals finished with points t are topped with diamonds.

ELSIE BEE.

### Interesting Contest Among Engravers and What Came of it.

WHEN A. G. Smith, employed as an engraver by Gurney Bros., retail velers, Brockton, Mass., engraved the en-e alphabet on the head of a pin, the feat s regarded a wonderful piece of the en-aver's art. Soon afterwards a Philadel-ia jeweler succeeded in engraving two habets on the same space, and, to up-ld his reputation as the champion en-aver, Mr. Smith was obliged to inscribe ee alphabets, 78 letters, on a pin head, a cord which he claims stands unequaled.

Recently Mr. Smith received a small ckage, accompanied by a letter, from oses Joy, a New Haven jeweler, contain-g one of the most interesting and curious amples of the jeweler's fine art. In a mmon cherry stone, the interior of which easures a trifle over one-eighth of an inch, r. Joy had succeeded in placing 24 dozen id silver spoons, and without crowding em, either. The top of the stone un-ews and shaking the minute receptacle, o gross of perfectly formed spoons fell t. It does not even require a strong glass see that they are spoons, but the perfec-n of the workmanship may be seen best viewing them under a magnifying glass. e bowls are of uniform depth, the handles ve the conventional curve and all are ghly polished. The smallest Liliputian en-untered in "Gulliver's Travels" would rve if obliged to eat with these.

Mr. Joy has spent considerable time in ing to equal Mr. Smith's feat, and, al-ough the work is of a different nature, r. Smith admits that it is wonderful, but going Mr. Joy one better by engraving s name and address on one of the spoons d then will send it to him at New Haven.

Albert Swink, Quincy, Ill., has as a guest s oldest son, now in business in St. Louis, o.

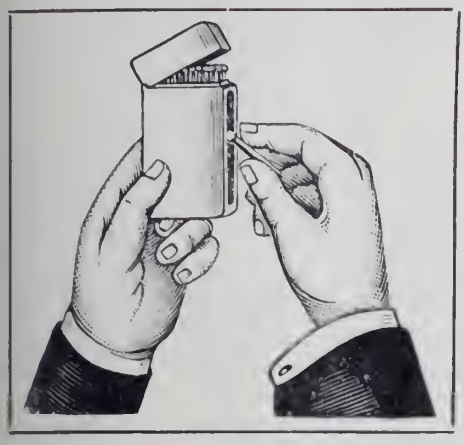
## Negro Who Attempted to Steal Diamonds From Maiden Lane Firm Caught After a Chase.

Diamond jewelry, valued at $15,000, wa within reach of a stockily built young co ored man, who entered the store of Cro & Beguelin, importers of diamonds and jol bers, 17 Maiden Lane, New York, abo noon, last Thursday, with the evident i tention of robbery. That he did not su ceed in his purpose was due to the plu of one of the clerks, Oscar Windorf.

E. H. Valle, who, in the absence of W. Durfey, was in charge of the diamo room, which is at the right of the entran to the store, and close to the door, stepp outside for a few moments on an erran The negro, who afterward gave the na of Louis Brown, just then walked into t store, and through the door of the di mond room. A counter stretches acro this room, and behind this were the ca of diamond jewelry. Mr. Windorf, w happened to pass by this little room, n ticed the negro, who was vaulting over t counter in the direction of the jewelry

"What are you doing here?" demand Mr. Windorf, and the negro, taken by s prise, jumped back across the counter, a trying to explain that he was waiting i the "gemman with the glasses," thus scribing Mr. Valle.

Mr. Windorf ordered the intruder to main seated on a stool until he came ba at the same time calling some other cler to hold the prisoner while he went for an officer. As soon as Windorf w gone the negro drew a pocket knife. As slashed at the young clerks they drew ba and he ran out to the street. He started ward Broadway, and almost ran into Windorf, who had not yet found an offic The clerk gave chase, and the negro, w drawn knife, dashed along the street, acr Broadway and down Cortlandt St. He l gone only a few steps on the latter str when the clerk, who is of slender bu and a fair sprinter, caught up with the fu tive, throwing him to the ground. The n struggled for a while, nobody interfer and no officers in sight. The ne slashed with his knife across young W dorf's abdomen, cutting his clothes, not penetrating his flesh. As the cler hold was loosened the colored man on his feet in an instant and again in flig Down Cortlandt St. the fugitive rush with Windorf once more in pursuit T turned north on Greenwich St., and at corner of Fulton St. three policemen ca into sight just as Windorf again grabb Brown.



The colored man was taken to Po Headquarters, where he was identified police say that he was released not l ago from the Kings County Penitenti and was formerly an inmate of the mira Reformatory. His picture is in Rogues' Gallery. When arraigned in Police Court before Magistrate Poole was held in $1,000 bail for assault wit knife, and $500 bail for unlawful en The prisoner scowled and remarked, "I had a gun that little clerk would not where he is now."

The first impression was that Brown one of the porters employed from time time by various houses in that vicinity

# The Standard Patent Safety Pocket Match Box.

carry sample cases and trunks. The porters thus employed are naturally in and out of stores in the vicinity. No special attention would have been paid to Brown if the clerk had not noticed him jumping over the counter. It seems, however, that Brown has not been one of the porters so employed. He was a stranger in Cross & Beguelins, and people in several other stores who looked at him say that they had never seen him before. Whether or not he is a friend of one or more of the porters is not known. There is a possibility that in planning the robbery he had information from some source as to the location of the diamond room and the habits of the clerks.

Naturally the fact that the crook had tried to operate in Maiden Lane caused considerable excitement in the jewelry district. More than a year ago an effort was made to steal a diamond ring from Cross & Beguelin, but such occurrences were for many years almost unknown in this part of the city.

### Thomas Bros., West, Tex., Give a Deed of Trust Under State Laws.

WEST, Tex., Oct. 6.—Thomas Bros., dealers in jewelry and drugs, who conducted business here under the style of the West Jewelry Co., have given a deed of trust under the laws of this State, for the benefit of their creditors. No official statement of the assets and the liabilities has as yet been made public, but the trustee, now in possession, will probably be in a position to give definite information within a few days.

The partnership is made up of J. H. and W. Lucian Thomas, both young men, the former being but 30 and the latter 27 years old. They began business here in March, 1903, succeeding the firm of Chambers & Brooks. Mr. Chambers, of the firm, remained with them as manager and watch maker, and Mr. Brooks for a while was a member of the concern. The drug business was conducted under the style of Thomas Bros., and the jewelry department under the style of the West Jewelry Co. Both members are well thought of in the jewelry trade and mercantile circles here, and it is generally hoped that their embarrassment is but a temporary matter and that they will be able to resume.

### Death of Harry A. Reed.

PITTSBURG, Pa., Oct. 4.—It was with regret that the members of the trade here learned of the death, Sunday, at Greensburg, Pa., of Harry A. Reed, a prominent young jeweler at that place. Mr. Reed is survived by a widow and one child.

The deceased, who was a native of Pennsylvania, was in his 30th year at the time of his death, but had been in the jewelry trade for a long time. He was formerly in the employ of R. Fisher, and in Oct., 1901, started in business for himself. Being a practical man of ability, he was successful from the first, and in his four years in business had built up a good trade. He had many friends in Greensburg, and in this city, who deeply mourn his death.

Mrs. Helen I. Oliver, Des Moines, Ia., has been succeeded by Oliver & Brown.

## De Beers Consolidated Mines Lose Suits Over Income Tax.

Recent issues of newspapers published in the South African diamond field devoted considerable space to the arguments and decisions of the De Beers income tax cases, which have been pending at Cape Town and in London. According to these reports the company has been defeated both in England and in the colony, so that it will now have to pay, unless the decisions are reversed by higher tribunals, the full income tax both in England and in South Africa on all the profits made in both countries, or in other words, a double tax.

Several New York diamond merchants to whose attention these decisions have been called, smiled grimly and remarked that the action of the courts may give the company an excuse for further advancing prices.

The decision at Cape Town was delivered by the Spreme Court "in the matter of the Colonial Government against the De Beers Consolidated Mines, Ltd." A lengthy opinion was delivered by the Acting Chief Justice, Sir John Buchanan. He reviewed the proceedings of the lower tribunals. It appeared from the records that the company had paid its income tax for the year ending June, 1904, upon all the assessed income of £4,918,567, except the sum of £162,709 upon which it claimed exemption. The question here concerned the income tax claimed by the Government on this £162,709, the tax amounting to £8,135 9s. In explaining the reason why it excepted from the total amount of the income a certain proportion as not taxable, the company set forth the terms of its contract with the syndicate of eight firms of diamond merchants of London, who purchase the company's entire output of rough diamonds. A fixed sum is payable to the company on the sale of these diamonds in Kimberley, and an adjustable sum is to be paid, the latter amount to be fixed after the sale of the diamonds in London by valuators appointed for the purpose.

The company also takes one-half of the net profit made by the syndicate on realization or dealing; all risks being on joint account, and borne by the company and the syndicate in equal shares. The question to be decided was whether the company should pay income tax upon its share of the profits thus made.

The Commissioner of Taxes contended before the Court of Review that those additional payments were part of the purchase price for which the company disposed of its diamonds to the syndicate, while the company contended that the profits made abroad were a distinct transaction, and formed no part of the purchase price.

The Court of Review held that the dealings with the diamonds by the syndicate in London must be treated as distinct from the transactions in Kimberley, that the profits received in connection with the syndicate's transactions formed no part of the purchase price, and that the company was not liable to pay income tax on such profit.

In reversing the decision in the Court of Review, Sir John Buchanan said of the London profits: "These receipts are part of the company's income, derived from a source within the colony, and to reach that income it is immaterial whether or not

B&B

# "Ring-Leaders"

October is the Ring month of the year; a month of thirty-one days for the Jobber to reap his profits. Present prospects point to one of the most successful seasons in years. ***All orders are receiving prompt attention;*** the "side-tracking" process is not in order here. You as a buyer of "selling" goods will appreciate what ***that*** means.

## Ostby & Barton Company

New York

103 State Street
Chicago

the business of the company be wholly or in part carried on by any other person than the company itself." The Justice said that he could not agree with the counsel for the company in the claim that there is a sort of partnership between the company in South Africa and the syndicate in London. He said that he did not find in the contract sufficient ground for the conclusion that the company and the syndicate had intended to amalgamate into one body, but on the contrary all through the agreement the two intended to keep themselves distinct. The Chief Justice said that if the agreement was anything more than a contract to sell and purchase it might better be construed as creating a relationship of factor and principal rather than of co-partnership.

In England the Court of Appeals has decided that all profits of the company both in the Colony and in London, must be assessed for an income tax, and the company will now appeal to the House of Lords, which will be the last resort. The Court of Appeals in England, in stating their opinion, said that the mining operations carried on in Kimberley are all of quite secondary, not to say of trivial, importance, and that the real and only business of the De Beers Co. is as diamond merchants in London. The Court said: "The real financial operation, the real conduct of the adventure, is entirely in London, and it does not matter from where the subject matter upon which those are exercised comes under the circumstances. It might be drawn from Africa, or anywhere else in the world, but the real business is, in my judgment, carried on in London."

### Oliver J. Rousseau, Fall River, Mass., Put in Bankruptcy on Petition of Creditors.

FALL RIVER, Mass., Oct. 6.—O. J. Rousseau, of this city, was recently placed in bankruptcy on the petition of several creditors represented by the Jewelers' Association and Board of Trade, New York. The bankrupt made an assignment about four months ago and then made an offer of settlement which the creditors did not deem proper to accept.

Prior to his assignment Rousseau made a statement that he had been robbed of a considerable amount of money. This story was at the time disbelieved and an investigation was begun. After sufficient evidence had been obtained against him Rousseau admitted that there was no truth in the robbery story and turned back the goods alleged to have been stolen. He will be subject to a rigid examination, and interesting developments are looked forward to.

Rousseau began business in December, 1897. Up to the time of his failure he operated a store at 1217 Pleasant St.

C. J. Chyrklund's store in Pine River, Minn., was recently destroyed by fire.

### Customs Decisions by General Appraisers on Imitation Precious Stones and Metal Vases.

A decision by the Board of United States General Appraisers, last week, sustained the complaint filed by Loeb & Co., New York, it being held that imitation precious stones in the shape of heads of hat and bonnet pins are dutiable at the rate of 20 per cent. ad valorem and not at 45 per cent.

The Board sustained, last week, the claim of Bloomingdale Bros., that imitation pearls composed of paste, pierced through and temporarily strung on cotton cords, were dutiable at 45 per cent. ad valorem. under Par. 112. The Collector's decision was sustained, however, in the case of an imitation pearl necklace, on which he assessed 60 per cent. duty.

Among the protests sustained, last week by the Board was that of Albert Lorsch & Co., involving the duty on imitations of precious stones. Imitation precious stones not decorated, and less than one inch in dimension, are held to be dutiable at 20 per cent. ad valorem under Par. 435. The same kind of imitations exceeding one inch in diameter are dutiable at 45 per cent. ad valorem under Par. 112.

Metal vases imported by James E. Caldwell & Co., Philadelphia, Pa., were held by the Board to be dutiable as manufactures of gun metal under Par. 193, as claimed by the importers.

# The "Bryant" Rings.

Elk goods a specialty.

### Bankrupt Estate of L. C. Reisner & Co. to Pay Over Twenty Per Cent.

LANCASTER, Pa., Oct. 6.—In the bankruptcy case of L. C. Reisner & Co. the trustee's account has been filed, showing balance in his hands of $11,101.41, and the account will be confirmed and dividend ordered on Oct. 20. The dividend will not actually be received until about 15 days from that date. The indebtedness allowed against the estate is about $50,000, as the $15,000 filed by the bankrupt's wife and family has been eliminated by reason of the action of the attorney for the Jewelers Association and Board of Trade.

There are still some book accounts to be collected. It is estimated that the amount in the hands of the trustee will pay a 20 per cent. dividend, but, according to the Bankruptcy act, only about half, or 10 per cent., will probably be declared as a first dividend, and a second dividend will be declared in about three months from the date of the first.

The odds and ends, consisting of gold pins, samples, etc., that had accumulated in the jewelry department, were sold at a slight advance from the price at which they were assayed at the mint.

It is expected that the power station of the National Self-Winding Clock Co.'s plant, Champaign, Ill., will be in operation by Nov. 1.

Max Dawedoff, El Paso, Tex., has admitted his son into the business and the firm will hereafter be known as Max Dawedoff & Son.

### Production of Diamonds in the Transvaal and Orange River Colony.

According to a recent issue of the *Diamond Fields Advertiser,* Kimberley, South Africa, the productions of diamonds in the Transvaal in the year ending June 30 amount to 995,002 carats, valued at £1,198,530.

The reports of the Orange River colony mining industry contain the following figures with reference to the diamond output for July:

Loads washed, 339,264; carats won, 28,819; value, £84,059; yield per 100 loads, 849 carats; value per carat, 58s. 4d.; value of the yield per load, 4s. 11¼d.

The labor employed in the Orange Colony diamond mines was 518 whites and 4,978 natives.

The average monthly pay of the white men employed in the diamond mines and in prospecting in this colony has been £20 7s. 7d. The natives earn on an average of £3 1s. 6d. a month.

---

Doyle Dayton, Mason, Mich., has discontinued business.

The Ideal Cut Glass Co. has moved its plant from Corning, N. Y., to Canastota. C. E. Rose, the company's manager, who recently bought out the interests of the other stockholders, says that tempting inducements were offered by Canostota people and he decided to go there in order to enjoy the advantages that are offered. The machinery, tools and stock are being moved and the working force is to be increased from 25 to 50 men.

### William H. Driscoll, Portland, Me., Makes a General Assignment.

PORTLAND, Me., Oct. 5.—Wm. H. Driscoll, doing business as William H Driscoll & Co., who conducted a small jewelry store and did a repair business in this city, has made a general assignment under State laws to W. W. Mansfield. The assignee is now in possession and is at work upon the inventory preparing a full schedule of the assets and liabilities.

Mr. Driscoll, who is an expert jewelry repairer, started in business in 1900 as a member of the firm of Driscoll & Soule The firm dissolved in 1901 and since that time Mr. Driscoll continued in business under the style of William H. Driscoll & Co. He has a small store at 20 Monument Sq. For some time he has been hard pressed for ready cash, and this is believed to be the reason for the assignment.

---

The United States Electro-Chemical Co., 80 Elm St., New York, has issued a booklet descriptive of its automatic electroplating machine, which has been designed especially for the use of smaller manufacturers and retail dealers. It is explained that the machine is portable and easily operated. It may be placed on a shelf or in any suitable place and the wires strung along the wall, as is done with a plating dynamo. Pictures of the machine and its several parts are given and explicit directions for its operation. The machine, it is added, fulfils all the requirements necessary to do successful plating, including new and repair work.

## Col. S. O. Bigney Nominated for the Governor's Executive Council of Massachusetts.

ATTLEBORO, Mass., Oct. 9.—At a harmonious convention in Boston last week Col S. O. Bigney, of S. O. Bigney & Co., was nominated by the Republicans for the governor's executive council. In offering his name to the convention Delegate W. H Pond, of North Attleboro, told of Col. Bigney's rise from the jewelry shop bench to his present important place in the industry and referred to his activity in the interest

COL. SIDNEY O. BIGNEY.

of tariff protection for the American jewelers.

After his acceptance of the unanimous nomination, Col. Bigney was presented with a basket of flowers, and he entertained the delegates with a banquet.

Friends of George W. Frost, Irvington, N. J., prepared an amusing comedietta, which, at its production, last Thursday evening, he was the central figure. Earlier in the evening Policeman Edward Battan called at the jewelry store and, looking solemn, said that Mr. Frost must go to Police Headquarters, as stolen jewelry had been located in the store. The jeweler, amazed and indignant, did not notice that he was being taken to Pfeiffer's Hall. The instant he got inside, however, he realized how he had been deceived, for he came face to face with all the members of the Irvington Police Department. They had gathered to give him a surprise and reception and for several hours after the situation was explained to him there was the jolliest kind of a time, the features being dinner and informal speechmaking. Mr. Frost is a special favorite with the members of the Police Department. Each year at Christmas time he gives every man a small present and in return he has been made the guest of honor at the Summer outings of the bluecoats. This year there was no outing and the reception was planned to take its place.

## National Law Popular.

### Jewelers in All Sections Favor Measure Against False Marking of Gold and Silver.

CLEVELAND, O., Oct. 2.—Jewelers here are heartily in favor of the enactment of THE CIRCULAR-WEEKLY'S bill into a law. They say that nothing has ever been done that would prevent the deception in the business that this bill strikes at. State laws have been passed, but they have not accomplished the purpose, and the barter of spuriously marked merchandise goes on. Most of them feel that the prevention of this deceptive method of stamping goods cannot injure the business of any honest, reputable jeweler; on the other hand, any other kind of men ought to be forced out, that people may be free from them. Following are the opinions of some of the houses:

J. H. Danforth, secretary and treasurer of the Cowell & Hubbard Co.: "We are always in favor of any measure that will protect people against unscrupulous men or concerns. Every reputable jeweler in the country will, no doubt, feel the same way. Legitimate jewelers have suffered at the hands of untruthful men in the business. The results of their work often make our representations look ridiculous to people who do not understand the situation. The honest jeweler is willing to have his goods put to the test and have his customers know what they are, and we feel that a law that will protect him in his business will be an excellent thing."

Capt. R. E. Burdick, president of the Bowler & Burdick Co.: "I have read the bill through carefully and think that it should be enacted into a law. Nothing but a national law would produce the desired results. We have tried State laws, having secured the passage of one in this State, but they have not been effective. A national la would protect all from fraudulent stamping goods. If it were possible, it seems to me that th adoption of a system something like the Englis Hall mark, would be a good thing. Then the cu tomer would always know what he is getting."

The Scribner & Loehr Co.: "The bill should made a law. You know that without the askin All reputable jewelers will favor having goo stamped to show what they are and not otherwis A law like this would be a great protection to t reputable jeweler, as well as to people who kn nothing about the fineness of goods, except wh they are told by the jeweler or the person fr whom they make their purchases."

The Sigler Bros. Co.: "The enactment of this b into a national law would be an excellent thi for both the jewelers and their customers. course, jewelers well up in their business know h to test metals, but at that an article 10 karats fi should not be stamped 18. There are retail who would take advantage of the manufacture deception and dupe the public. The people shou be protected, because the majority of them unable to tell anything about jewelry and m depend upon the word of the merchant."

COMMENTS FROM OMAHA, NEBR., JEWELERS.

T. L. Combs, of T. L. Combs & Co.: "Any that will compel all our merchandise to be stamp properly as to quality, will be a great boom to business, and will help all dealers to establish permanent feeling of confidence."

Sol. Bergman, of the Sol. Bergman Jewelry C "It is a law that should have been passed ye ago, as it will not only benefit the dealers but consumers as well. It is a good law and ou to pass."

C. L. Shook, of Shook Mfg. Co.: "I am hear in favor of the bill and want to see legislation vent manufacturers from stamping an article w it is not. I could cite you an instance wher customer bought a silver ring stamped sterli and upon examination found it to be nothing brass. This is only one case out of a thous found all over the United States."

C. B. Brown, of Brown & Borsheim: "I strongly in favor of a national stamping law.

Camp and Orchard Streets, Newark, N. J.

the character proposed. It will not only be a great benefit to the jeweler but a safeguard to the customer."

Albert Edholm: "The bill is one that has long been needed and should have been brought before Congress long before this. Every honest jeweler should do everything he can to have it passed."

S. W. Lindsay: "I consider this stamping law a good thing, as it is a protection to those who want to be honest."

Geo. W. Ryan, of Mawhinney & Ryan Co.: "This bill is a fine act and should have been enacted long ago, but we now should thank THE CIRCULAR WEEKLY for making such a strenuous effort to have such a bill passed. It would not only protect the dealer but the customer, and would do away with the dishonest jeweler and selling of inferior goods. We hope Congress will pass the bill."

Fred Brodegaard, of Fred Brodegaard & Co.: "I sincerely endorse this bill and know it will be a great help to the jeweler and public to have such a law enacted."

Joseph P. Frenzer: "I most certainly am heartily in favor of the law becoming a national one. Consumers should be protected from unscrupulous makers and dealers. THE CIRCULAR-WEEKLY deserves a great deal of credit for pushing this matter, and I hope it will succeed in having it passed."

Henry Copley: "If such a bill can be passed by Congress it will be of great benefit to all."

Jacob L. Jacobson: "The bill proposed by THE CIRCULAR-WEEKLY is the most just measure that could be enacted. My opinion is that there is not a class of goods manufactured or sold that is so badly misrepresented by being wrongly and unjustly stamped as articles of jewelry, gold and silver. It is a wonder that Congress has not stepped in long ago and enacted a law to correct this dishonesty."

## Chicago Jobbers Foil Plot to Rob Them by Arresting Employe and His Confederate.

CHICAGO, Oct. 7.—Hyman Telles, 1 years old, for the past year and a half i the employ of Gordon & Morrison, jewelry jobbers, at 199 E. Madison St., an Fred. Langwell, a jewelry dealer, are under arrest at the Chicago Ave. police station charged with larceny and conspirac to rob Gordon and Morrison.

The police were notified of the plot t rob the firm about two weeks before th arrest of the culprits by a Mrs. Kate Williams, in whose house Langwell lived. Th police say that Langwell made Mrs. Williams his confidante, that the two had quarrel and that the woman divulged th plans from spite.

According to confessions made by bo the arrested parties Langwell proposed Telles to steal as many watches as he coul These he was to turn over to Langwe who intended to do a mail-order wat business. Paying virtually nothing for th goods, Langwell was to advertise them cut prices and in order to disarm susp cion the advertisements were to state th the watches were second hand and we bought from different jewelers with who they were left to be repaired and sold f charges.

Telles has been under surveillance f some time and when Mr. Morrison sa that Telles knew he was being watched called him out into the office and charg him with theft. Telles, he says, then co fessed his guilt.

Previous to his last employment Tell was for three years with Mandel Bros.

Prior to their arraignment on Oct. both men were taken to the county j under bonds of $6,000 each. The watch stolen were mostly cheap Swiss ones five and 10-year cases and amount to few hundred dollars in value.

### Death of Fred L. Bellows.

ATTLEBORO, Mass., Oct. 7.—At the suicide of Fred L. Bellows in Boston yesterday there passed a large, genial, wholesouled man, who was a few years ago the best-known traveling salesman carrying a grip out of Attleboro.

Mr. Bellows started in business as a retail fish dealer in this town, but was ambitious for better activity and entered the employ of McRae & Keeler. The latter firm discovered quickly that it possessed a salesman of exceptional ability. He was given the grip, and an extensive advertising campaign organized, which soon marked Mr. Bellows as the most conspicuous and one of the most successful salesmen from the town. He left this concern to start in business on his own account, and, with Bernard Simms, became a partner in Bellows & Simms.

Thinking he saw a more glowing opportunity in the west, Mr. Bellows went to Chicago to open a commission house, to handle goods of many manufacturers. Here he was attacked with rheumatism, which crippled his feet and legs for a long time, taking him from business for so long he felt unable to carry it on further.

He returned east, and then went to Europe to try the experiment of handling American jewelry there. The result was not encouraging, and he came back to this country. Since his return he has been in several enterprises, living lately in Boston.

Early Friday morning Mr. and Mrs. Bellows were at the United States Hotel, Boston, and, without a word of warning of his intention he sent a bullet into his brain. The assigned cause is despondency over increased difficulty from rheumatism and assurances that it might never be cured.

### Solomon Wachstein, Savannah, Ga., Files a Voluntary Petition in Bankruptcy.

SAVANNAH, Ga., Oct. 4.—Solomon Wachstein, 240 Broughton St., this city, yesterday filed a voluntary petition in bankruptcy A meeting of creditors has been called for Oct. 16. The unsecured liabilities aggregate $4,000 and the assets amount to $2,000 The latter consist of $200 in cash and a stock of goods. A claim of Ranzen & Bro. of this city, is secured by jewelry valued a $598.

The unsecured creditors for amounts o $100 or more are: National Bank o Savannah, $150; E. Hochman (borrowe money), $130; Wm. I. Rosenfeld, $315 David Mayer, $234.45; Chas. M. Levy $160.25; Jules Ascheim, $507.89; I. Ollendorff, $111.90; C. P. Goldsmith & Co $410.05; L. H. Keller & Co., $175.75; Kosuth-Marx Jewelry Co., $816.72; L. A. Epenstein & Co., Chicago, $149.53; Queen City Ring Mfg. Co., Buffalo, N. Y., $150 Heintz Bros., Buffalo, N. Y., $143.85.

John Walter Ash, of Ash Bros., jeweler Elmira, N. Y., and Miss Lelia May Lovell Brown, also of Elmira, were married recently in Zion Episcopal Church, Windsor, N. Y., by Rev. J. B. Andrews.

### Samuel D. Levy Files a Voluntary Bankruptcy Petition at New York.

Samuel D. Levy, a jeweler, who lives at 62 E. 116th St., New York, filed a voluntary petition in bankruptcy in the United States District Court, Oct. 4. He formerly lived at 1703 Madison Ave., and had his place of business there. In his petition he says that his liabilities amount to $2,102, and he has no assets.

Among the creditors are: Eaton & Glover Co. (notes), $65; J. Busch, $109; Nordman Bros., $116; E. W. Reynolds, $128; Walden Knife Co., $314; Charles Weiland, $151; J. R. Wood & Sons, $223; Townsend Mandell, $230.

David W. Rockmore is the petitioner's attorney. The court appointed Wm. Allen as referee.

Mr. Levy was at one time in business at New Mexico, and subsequently in Arizona. In 1895 he came to New York, and opened a sales store at 2150 Third Ave., leaving there in January, 1901, without paying all his debts, and returning to Arizona, where he engaged in business at Clifton. After a short time he came back to New York, and sold jewelry to private trade.

---

R. C. Bernau has purchased the interests of J. B. Ellington, of the firm of Bernau & Ellington, Greensboro, N. C. The business will be continued at the same location by Mr. Bernau alone. Mr. Ellington will remain in Greensboro, where it is reported he will engage in business on his own account in the near future.

### Two Diamond Rings Cleverly Stole from Brooklyn, N. Y., Jeweler.

Two diamond rings valued at $100 ar $150, respectively, were stolen, last Satu day, from the store of L. M. Piccard, 7 Fulton St., Brooklyn, by a well-dresse young man, whom the jeweler had nev seen before. The thief, pretending that h wished to buy a ring, looked over the tw which seemed to please him, and then call for a third, which was in the show case. the jeweler reached for the third ring t young man seized the two at which he h been looking and ran to the street. M Piccard followed, but a young woman, w opened the door just at this time, got his way, and this retarded him just l enough to give the fugitive a sufficient st to escape.

Mr. Piccard notified the police, but th far no arrests have been made. He s pects that the young woman may ha been an accomplice, who intentiona opened the door for the thief, to delay pursuit.

---

F. R. Johnson, Brockton, Mass., wh safe has been closed since he lost t key, several weeks ago, on Tuesday last week had a Mosler safe expert op ate on the door, with the result that opened. Pry bars and jimmies w used, as were cold chisels and sledg and then the safe expert "cracked crib." It was easy work for him, and use of nitro-glycerine was not resorted The damage to the safe door was c siderable.

## North Attleboro

Donald Le Stage is home from a western trip in the interest of the H. D. Merritt Co.

George S. Semple, New York representative of the W. & S. Blackinton Co., was in town Sunday and Monday.

George L. Paine, of the G. L. Paine Co., arrived home, Saturday, from a long western trip in the interests of his concern. It was his initial trip.

It is estimated by manufacturing jewelers that there is ample opportunity for work for at least 300 more hands in the shops in town. It has been weeks since there has been an unsolicited application for a position.

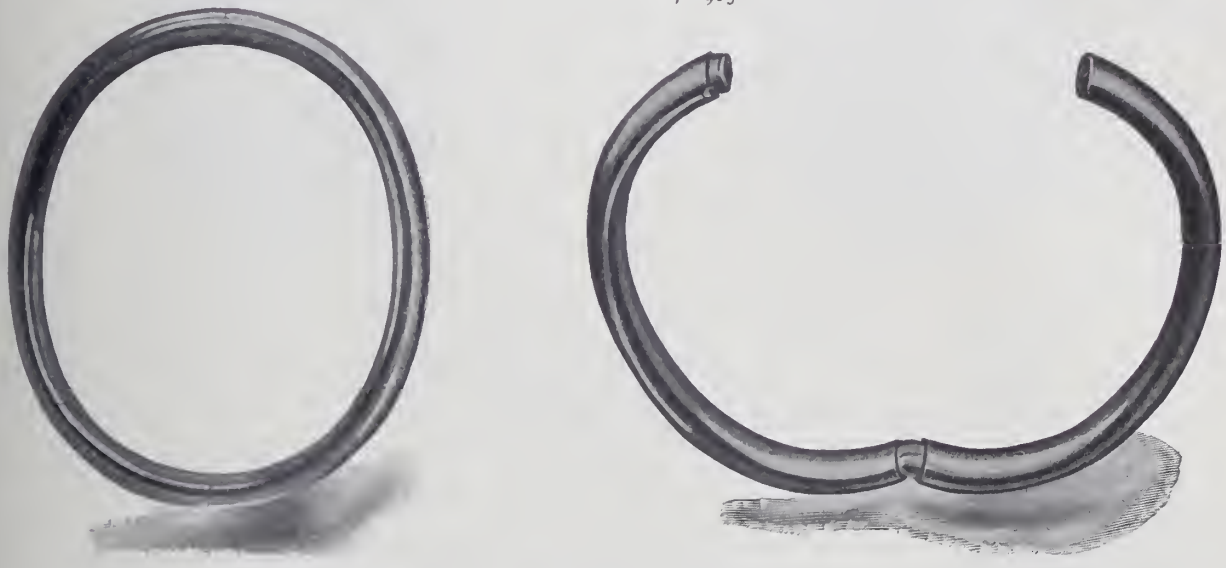
There was a small fire at the Straker & Freeman factory Wednesday morning. A spark from a fire in the engine room ignited the woodwork about the place, which burned fiercely for a brief period. Extinguishers were pressed into commission and the flames soon put out.

In the tax list just made known by the assessors of Plainville the following jewelry firms and corporations will pay more than $100: Willis M. Fuller, $240.97; Plainville Stock Co., $384.90; Scofield, Melcher & Scofield, $253.50; Whiting & Davis, $152.10; James D. Lincoln, $249.70; Woodbury Melcher, $138.58; Edward Payson Bennett, $143.23; Albert W. Burton, $164.44.

Whiting & Davis, Plainville, have opened a branch factory at Franklin, Mass., where a specialty will be made of purses. The concern intends to stay there, and promises to have plenty of work; only girls or women will be employed. Work was commenced Thursday with a large number of hands who are being instructed in the work. The force will be daily increased until 2 or more girls shall be employed.

Inspector Ellis, of the State Police, paid an unexpected visit to several of the jewelry factories Friday evening, and in one of two shops found minors and girls working in violation of the law. Judging from the manner in which the inspector talked he has received letters from some women in this town, complaining that the law was being violated and that many of the shops were allowing girls and minors to work after hours. It is not probable that any of the manufacturers will be summoned to appear in court as a result of the visit, but they were given warning by the inspector that if he had occasion to come to town in the future and found that the law was again being violated he would prosecute the offenders.

Following were the results of the games played this week by the teams of the Jewelers' Shop Bowling League:



| | | |
|---|---|---|
| Oct. 2, F. S. Gilbert | 416 | 417 |
| *vs.* Riley, French & Heffron | 411 | 418 |
| Oct. 3, G. L. Paine Co. | 417 | 441 |
| *vs.* T. J. Smith Co. | 368 | 414 |
| Oct. 4, H. F. Barrows Co. | 446 | 399 |
| *vs.* Scofield, Melcher & Scofield | 421 | 434 |

Some time ago the American Waltham Watch Co., Waltham, Mass., reached 1,000,000 in watch numbers, and because of the superstitious figures kept that watch as a mascot. A few days afterward movement No. 13,013,013 was reached, and the company presented it to Newton Dexter, New Haven, editor of the *Goldsmith and Silversmith*.

## Baltimore.

H. Bealmear was in New York last week.

Mamie Kaufman and Marie Bittner, two young girls who have many charges of shoplifting to answer to, are also charged with "lifting" a diamond ring from the store of Benjamin D. Nuitz, on N. Eutaw St. Both were committed for the action of the Grand Jury by Justice Soden, last week.

The handsome silver testimonial that was recently presented to Henry O. Boehm by members of the Breton's Bowling League, was made by Jacobi & Jenkins. The piece consisted of a large ten-pin resting on three duck-pin balls, supported by an ebony base.

John F. Hunzinger and John Gioberge, two young men who claim New York as their home, were arrested last week on suspicion and are being held pending an investigation. They were seen loitering about the center of the city late at night, and were also seen trying the cellar doors.

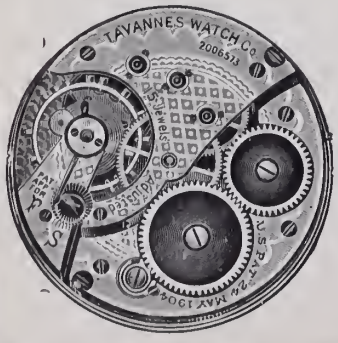
Word has been received by the local police from several cities stating that James R. Reed, whose picture appeared in THE CIRCULAR-WEEKLY last week with an account of his swindling operations in Baltimore, was wanted by the authorities of those cities. The Pinkertons identify him as Cornelius J. Donovan, ex-convict, who is wanted by the New York police. The superintendent of the Buffalo police also telegraphed he is wanted there. The police of Youngstown, O., also want him.

The time ball service of the hydrographic office was put into operation Oct. 5, for the first time since the old service was destroyed by the great fire. The new service has been installed on the roof of the new *American* building. Promptly at noon the ball dropped. It is of especial benefit to the shipping interests. The time is received over the Western Union wire direct from the Naval Observatory in Washington. The new ball is 47 inches in diameter and is a hollow sphere of spring brass covered with canvas and painted black. It weighs 60 pounds and drops 27 feet into an open steel tank, which acts as a cushion.

## Rochester.

Judgments were taken by default last week in Municipal Court by Frank Tarrant against Solomon S. Weeks, $17; and by D. E. Danks against Fred Marshall, $7.65, and against Francis Burke, $8.

Philip Present, who recently spent several days at his store at Buffalo, has reported that he has installed C. C. Norris, Indianapolis, to take the place of A. B. Henshel, as manager of the store. Mr. Norris was until recently with the Shepard Mfg. Co.



An important deal was concluded last week when a new corporation, to be known as the Henry C. Wisner Co., was incorporated, with a capital stock of $100,000. Articles of incorporation were filed in the Monroe County Clerk's office Friday. The new company will deal in glassware, silverware, chinaware, pottery and other articles of artistic merit. The corporation will rent the entire Wisner building and will take over the business of the late Henry C. Wisner. New York men prominently identified with the business will be brought to Rochester to manage the store, which will be considerably enlarged. The store is now closed while inventory is being taken. The incorporators of the new company are: Thornton Robbins, Baltimore, Md., 800 shares; Henry C. Wisner, Rochester, 620 shares; Charles M. Wolcott, New York, 472 shares; Henry B. Stagg, Hackensack, N. J., 400 shares; Theodore E. Townsend, New Brunswick, N. J., 240 shares; Frank P. Wisner, New York, 208 shares; William B. Tetamore, New York, 200 shares; E. T. Wisner, New York, 200 shares; E. L. Wisner, Rochester, 200 shares; Albert E. Eastwood, Rochester, 200 shares; William E. Sloan, Rochester, 200 shares; Francis Macomber, Rochester, 200 shares; Geo. C. F. Haas, New York, 2 shares; John M. Campbell, New York, 2 shares; Geo. W. Granger, New York, 2 shares, and David H. McIlvain, New York, eight shares. The stockholders held the first meeting in New York last Monday.

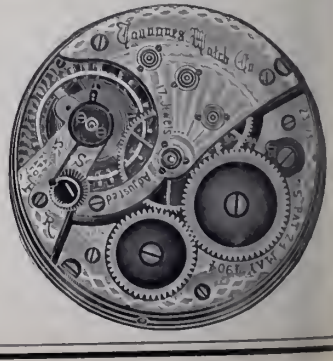
YOUR FALL STOCK, DON'T FORGET TO ORDER

# TAVANNES WATCHES



BY THEIR ACCURATE AND CONSISTENT PERFORMANCE THEY HAVE MADE A PLACE FOR THEMSELVES IN THE FOREMOST RANKS OF THE WATCH WORLD.

**Tavannes Watch Co.,**

**2 & 4 Maiden Lane, New York.**

For Sale Through the Jobbing Trade.

# Quality.

It's the quality of our sixteen size movements that has to a great extent given us the reputation for manufacturing reliable timepieces. The fact that we are behind our orders on all grades of sixteen size is the best evidence that the trade is willing to pay a little more for movements which they can recommend with confidence.

ILLINOIS WATCH COMPANY,

SPRINGFIELD.

# MR. RETAILER:

You can lead a horse to water, but—you can't make a woman buy something she doesn't want.

When a lady is looking for a gold watch and says: "Oh! Mr. Retailer, I just noticed the dearest little watch in Mr. So and So's window, and my heart is set on one." It's no use, you must either get one like it, or lose a customer.

Now, "ten chances to one," she saw a Solidarity Gold Watch in that window. Why don't you get a few Solidarity Gold Cases? They have the true value, real merit, and they are very fetching.

Order them through your Jobber.

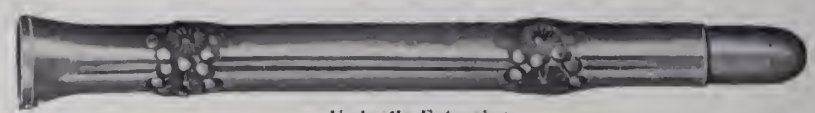
TRADE CONDITIONS.

There has been an awakening of trade durit the past week, and jewelers are beginning to se out their Fall orders. The biggest demand just present is for wedding rings, and the trade belie the people's confidence in general cond.tion is ma fest, and see a prospect for a big increase in bu ness. The yellow fever is each day losing hold on the city, and the citizens who went aw to avoid a chance of infection are returning their homes in great numbers. This means a b terment of conditions in all lines. Jewelers, wh best customers have been absent during the sca will be among the first to reap the benefit of t change.

J. Julius Weinfurter took a few da of last week and went to the Ozone Be on the other side of Lake Pontcharta for rest and recreation.

Leonard Krower has donated to the D mond Festival a very handsome f which is now on exhibition at the L. Grui wald music house, to be given to the la selling the second highest number of tick for the above festival. Mr. Krower a sent in his check to Hart D. Newm for $20 for tickets for the employes of establishment.



Mrs. T. Hausmann, of T. Hausmann Sons, accompanied by her daughter, M Bettie Hausmann Kron and her two gra children, Henry Kron and Henry Ha mann, will arrive in New York Oct. homeward bound, from a several m n European trip. Mrs. Hausmann and relatives will remain several days in N York before taking up the journey t N Orleans.

For the first time since yellow fe started its most objectionable revels. the quarantines began a drummer riske jump into New Orleans last week. stranger who dropped in at all the l ing jewelry stores proved to be Cha Forsyth, representing the Meriden Cut Co., and everywhere he went he greeted like a long lost brother, eve he didn't sell a bill of goods with e hand-shake. Mr. Forsyth came fro lanta, and said that he was surprise find conditions in New Orleans so g After making a thorough canvass of trade in New Orleans, Mr. Forsyth proceed to New York by steamer weeks the jewelers have been bemoa the fact that no drummers come this and that they had to send in their or without seeing samples. Mr. Forsy visit was accordingly a welcome surp

---

The store of Sol Silverstein, San Antonio, Tex., was entered by burglars one night about a week ago and stock valued at about $300 was stolen. The loot includes several watches, two cases of rings, several stick pins and watch charms. Entrance was gained through a rear door, the thieves being obliged to climb down from the roof of an adjoining building. The panel of the door was cut away just enough to admit a hand and the bolt was drawn. There is no clue to the thieves.

*If You need one or more Diamonds, loose or mounted, write us for a Selection Package.*

**We have received large shipments of Diamonds from Amsterdam, which we had cut there from "Rough," bought by us previous to the late advance in prices. We offer these goods at prices which must prove attractive to Jewelers, and we invite examination of our stock.**

## News Gleanings.

H. J. McMinn, Garrett, Pa., has sold out.

J. A. Anderson, Sawyer, Wis., has gone out of business.

O. M. Morris, Rockwall, Tex., has discontinued business.

C. H. Harris, Portsmouth, O., has been succeeded by J. F. Carr.

R. Randall Davidson, Ansonia, Conn., has gone out of business.

John A. France, Blue River, Wis., is now at Viola, in the same State.

Cohen & Leibowitz, Jersey City, N. J., have moved to New York.

Peter Fullwood, Wellsboro, Pa., is now at Galeton, in the same State.

W. A. Cohn has purchased the business of D. L. Nielson, Vermilion, O.

H. J. Becker has succeeded to the business of S. W. Hurst, Tipton, Mo.

W. R. Pfefflerle, Ada, O., moved, recently, to Dunkirk, in the same State.

Ivory H. Crabtree, Eastport, Me., has sold out his stock to R. A. Burn.

The Star Drug Store Co., Wilton Junction, Ia., has discontinued business.

Benjamin W. Sands, Lamar, Mo., has been succeeded by Austin J. Sands.

T. J. Dilts, of Dilts & Jones, Summitville, Ind., died recently at that place.

Harrison & Co. have succeeded to the business of W. W. Francis, Ardmore, Pa.

W. S. Norton, Tahoka, Tex., moved, recently, to Lubbock, in the same State.

A. S. Smith, Birmingham, Ala., will shortly move to a new store on Third Ave.

J. D. Raper, Chariton, Ia., has moved his store to the Smythe building, at that place.

Fred. H. Towne, Sisseton, S. Dak., has sold out to the Peever-Gorham Mfg. Co., Inc.

Nicholas Van Kammen has purchased the business of C. L. Dresbach, San Mateo, Cal.

Henry W. Taylor, Rockwall, Tex., has disposed of his business interests, at that place.

E. M. Kneeland, Bangor, Me., is closing out his stock at auction and intends to go west.

George W. Durkee, formerly of Brown City, Mich., is now at Lapeer, in the same State.

A. T. Malmberg, Webster, S. Dak., has disposed of his business interests to J. L. Blank.

Kennon Mott, Brunswick, Ga., has reopened his store and is making improvements.

J. L. Buchanan, Henryette, Ind. T., has sold out his jewelry business to I. L. McElhannon.

Charles J. Ward, Andalusia, Ala., has been succeeded by the Ward Blaum Jewelry Co.

Robbers recently broke into a store at Minco, Ind. T., and took all the jewelry in sight.

H. A. Bump, Oklahoma City, Okla., has moved to 23 N. Broadway.

V. R. Mellon, formerly of Ephraim, O., is now located in his new territory in Quaker City, O.

W. J. McKinney & Sons, East Liverpool, O., was incorporated, last week, as the W. J. McKinney Jewelry Co., with an authorized capital stock of $10,000.

Ladds & Co., Oil City, Pa., have dissolved, and the business will be carried on by J. C. Ladds alone.

S. Joseph & Sons will remodel and improve their store in the Kirkwood Hotel block, Des Moines, Ia.

Gottlieb Krebs & Co., is the firm style of the business formerly conducted by Gottlieb Krebs, Canal Dover, O.

Winger & Gerstenberg, Milwaukee, Wis., have dissolved, and the business will be continued by Frank Winger.

The store of S. J. Pearson, Bennettsville, S. C., was burned recently. The loss is partly covered by insurance.

The firm of Fisher & Arthur, Petersburg, Tenn., has dissolved and the business will be continued by E. B. Arthur.

Robert L. Hause, Toledo, O., has admitted a partner, and the firm hereafter will be known as Hause & Roulet.

Butrynowicz & Co., Green Bay, Wis., have dissolved, and the business will be conducted by Vincent Butrynowicz alone.

Charles M. Prior, 1683 Madison Ave., New York, who makes a specialty of fine etching on silver, has mailed announcements to the trade to the effect that all goods of whatever description which are in his hands for etching or other work are fully insured against loss by burglary or fire.

Two men made an unsuccessful effort one day last week to rob the jewelry store of A. L. Dickman, 113 Ohio St., Sedalia, Mo. Mr. Dickman had stepped across the street to the barber shop when the men entered the store. One of them attracted the attention of the clerk while the other opened the show case window and grabbed several watch cases. Arthur Graham, the 16-year-old clerk, seized a club and made a rush for the man, who dropped the cases and with his companion ran toward the Missouri Pacific Railroad tracks. The men escaped from the town.

Charges of fraud and misrepresentation were preferred, last week, by Stollenwerk Bros. O. E. Klug & Co., Wm. Grosjean and Henry F. Casten, all of Milwaukee, Wis., against Lewis E. Lyon and Milvert L. Price, who conduct a business in Iowa City, Ia., under the firm name of the Puritan Mfg. Co. Each of these firms has been sued to recover $380 on an alleged contract for an invoice of jewelry which it is claimed has been ordered through a representative of the plaintiff company. Signatures to the contracts, the defendants claim, were obtained by representing that the invoice was to be sent on consignment, payment for same to be made after the sale of goods at stipulated intervals. The dealers claim that they were informed that an exclusive agency for the sale of jewelry, made by the Puritan company was given in each individual instance, and that no other representation would be appointed in the city. In its complaint the company holds to a strict interpretation of its contract with each of the defendants, claiming that any oral agreement entered into between their agent and the defendants was not binding upon the company. The terms of the contract provide for the payment of the invoice by the signer of the contract, after the expiration of a certain stipulated time, with discount inducements if paid before the time limit

## Gems that have Permanent Value.

When gems are cut according to mathematical principles, the true angle of light is secured.

Such cutting means a greater loss in weight, but the increased brilliancy far outweighs this loss, and the result is perfection.

## The Diamond Markets.

ANTWERP, Sept. 26.—Business continued excellent in the diamond trade during the past fortnight, and without doubt the principal reason therefor was the great number of foreign buyers who appeared from all parts of the world. Brilliants of all sizes and colors find a ready market at high prices, while very fine and white varieties of "six faces" at 80 to 85 francs per carat were sold heavily to French buyers. Pear shape roses find a demand in Switzerland.

Among the buyers who visited Antwerp recently were: Mr. Ginsberg, Berlin; Messrs. Frier and Frankel, Frankfort-on-Main; Messrs. B. Rapoport, M. Slabotsky, Eknayan, Sloog, Levy Trmaos, Scheff, Levy, De Haan, Nacera, La Russó, Paris; Mr Goretti, Rome; Messrs. Braun, Koningsberg, B. Figdor, Guttenberg, W. Kohn, Vienna; Messrs. Hekster, Pardo, Amsterdam; Mr. Maiselsohn, Tiflis; Mr. Kekati, Beyrouth; Mr. Regenold, Phorzheim; Messrs. Piner and Grossbard, Warsaw, Messrs. Lunzer, Broekhuyzen and Gallop, London; Mr. Silberherr, Odessa; Mr. Reicyn, Rostoff; Mr. Kahn, Stuttgart; Mr Alexandroff, Moscow.

A branch of the new Paris firm of Habib, Nahas & Co. has been opened at 50 Rue du Pelican.

AMSTERDAM, Sept. 27.—Constant increase has been noted in the prices of two-grain brilliants as well as large goods for the past month. Mêlée is very high, and there is also a demand for light brown rough.

Among the prominent merchants here recently were: Mr. Schwarzstein, St. Petersburg; Cohen & Son, Birmingham; Messrs. M. L. Strasburger and Marchand, Paris.

The polishers of rose diamonds here who asked an increase in salaries amounting to 40 per cent., have received an advance of 25 per cent., and a corresponding increase in the price of roses is generally expected.

PARIS, Sept. 27.—As was generally predicted, the month of September showed excellent business in all lines of the precious stone trade, the sales being even beyond expectations. The best business was, of course, done in brilliants, but roses and "six faces" have followed the general lead, and a large demand still exists for these and mêlée of about 200 francs per carat.

Habib, Nahas & Co. is the name of a new firm just formed, with offices in the Rue de la Chaussee d'Antin. The firm will continue the precious stone business of the old house of Selim Habib, Philippe Habib and Elie J. Nahas. The partners are Mrs. Wm Selim Habib, Louis Selim Habib, Elio J Nahas, Philippe Habib and Alexander Habib.

# BIRTHDAY SPOONS

*in* STERLING SILVER

·R·WALLACE·&·SONS·MFG·CO·

·WALLINGFORD · CONN·

Branches:

NEW YORK
CHICAGO
SAN FRANCISCO
LONDON

THE PROVERBIAL STORK brings 6,000 babies into the United States every day in the year. At least 15% of these children are born, metaphorically speaking, with silver spoons in their mouths. It's up to you to supply the spoons for those born in your town.

There are no end of birthday spoons put out each year by various silversmiths, but the percentage of meritorious ones is wretchedly small. The spoons we show here are infinitely superior to any we have seen, for they are built by "Wallace" craftsmanship, and have all the weight and beauty peculiar to the "Wallace" products.

The spoon on this page is full size, those opposite being shown on a reduced scale. The price is $10.50 a dozen, net. $1.00 a dozen extra for gilt bowls.

# THE GORHAM BUILDING

## AN INVITATION.

¶ The Gorham Building is the largest and most architecturally notable of any in the world devoted to the display and sale of the products of one concern.

¶ The aggregation of the Gorham Manufactures contained in it is by far the most extensive and most comprehensive showing of sterling silverware ever gathered together under one roof.

¶ But the fact upon which the Gorham Mfg. Co. desire to lay particular stress is rather the cordiality of the invitation extended to the Jewelers of the United States to make the Building their headquarters whenever they visit New York.

¶ The Wholesale Salesroom and Offices occupy the entirety of the Fourth, Fifth and Sixth Floors.

### An Indication of Prosperity.

NO better indication of the prosperity of the jewelry trade is wanted than the condition now existing in practically all manufacturing centers, as shown by the "want" columns of the local papers. It may be safely said that there is hardly a city or town where jewelry and allied lines are made to-day in which there is not a demand for skilled help that far exceeds the supply; and manufacturers have been pressed as never before to obtain sufficient hands to fill the orders that are coming in upon them from all sections of the country. In Attleboro, North Attleboro and Providence not only is every available jewelry worker supplied with a situation, but men and women who had retired from the trade have been induced to go back temporarily to their old work to accommodate the manufacturers, and green hands from the farming districts have been pressed into service in every kind of work at which it was possible to set them.

In many sections night work is the rule instead of the exception, and wheels are humming throughout the jewelry industry in a way that has not been seen in the past 15 or 20 years.

### Use and Abuse of Memorandum.

WITH the beginning of the Fall season and the approach of the holidays there is always an increase in the so-called memorandum transactions in the jewelry trade, and if reports from New York and a few other wholesale centers indicate a general condition, then memorandum transactions are, this year, greater in number than usual and bid fair to increase to a very large extent. It is, therefore, to the interest of the jeweler, whether manufacturer, jobber or retailer, to bear carefully in mind the essential elements which make up the memorandum transactions, if he wishes to keep these distinct from either credit or conditional sales—that is, if he wishes to entrust his goods in a way that he will keep his title to them, permit him to recover the articles in case they shall be improperly disposed of, and at the same time give him the right of criminal action against those who swindle him by means of such transactions.

A clear memorandum transaction consists merely in the entrusting of an article by the owner thereof to another for a particular purpose (mainly for the purpose of displaying it to a customer), without power being given to the second party to make a sale of or pass title in any way. Such a transaction under the common law is what is known as bailment, and the bailee or party to whom the merchandise is entrusted has no right to do anything with the articles in his care beyond the specific acts for which it was given to him. He has no right to allow the article to go out of his possession, nor can he pass title in any way to another. Where the principle of the law is adhered to strictly, a sale must be made between the owner and the bailee before the latter can turn the article over to a third party. As a matter of practice, however, most jewelers permit the party taking goods on memorandum to return the value of the article taken, in lieu of the article itself, when reporting upon the transaction, and even in these transactions, under the agreement, the dealer may retain his right to prosecute the bailee criminally in case he defaults. But often, by the acts of the transaction, which he sanctions, he will cut off his right to obtain such articles back from a pledgee or innocent third party, into whose hands they may be put by a defaulting bailee.

As business increases in volume there is a corresponding increase in carelessness or laxness of merchants in enforcing the terms of the memorandum agreement. Frequently they will permit the bailee to sell the articles outright as if they were his own, as well as pass title in other ways, and never question his right to do so as long as he makes payment for the merchandise so procured. In fact, many merchants, although they will refuse to give a man credit, will permit him to take goods on memorandum (as they call it), and then acquiesce in his treatment of the merchandise as if it were his own stock, allowing him to act in regard to their property in a way totally outside of the scope of his rights under the memorandum agreement. Though these merchants ask for no accounting of their property so long as payments are made regularly, they will immediately seek to enforce the conditions of the memorandum agreement the moment payment ceases. In a number of instances recently where the merchant has resorted to the courts to get back his property from parties to whom it was pledged or sold, and also to prosecute the bailee for a violation of the memorandum agreement, the owners have found to their dismay that they had no remedy except to start a civil action against the man to whom they entrusted their goods, the judges holding that the merchants had in effect sold their goods on credit; that no matter what they called the transaction their own acts, in a series of such transactions, had shown that they treated them as sales, and they had practically parted with title to their property. There being no bailment, there was no larceny, and the criminal courts could not take jurisdiction. It is needless to say that the complainants felt aggrieved and wanted to know where the memorandum transaction protected them, not seeing that they were as much a party to the violation of the agreement as was the man or men who swindled them.

A Magistrate in New York once briefly summed up the situation, when he said: "You jewelers 'want to have your cake and eat it.' You want to sell you goods and at the same time be able to use the criminal courts to punish the debtor should he default in his payments. You can't use this court to collect your debts."

There is no doubt that the increase in memorandum business in recent years has done much more harm than good to the jewelry trade at large, and the sooner something is done to check the extension of the practice, the better off will be the wholesale and retail trade. That this custom is founded on and is the result of a necessity, felt at times by all jewelers, there is no doubt, and within legitimate lines memorandum transactions aid both the manufacturer and his customers; but in the way that they are now conducted curtailment and revision of the practice have surely become necessary.

## New York Notes.

Andrew P. Nahmens, 262 W. 125th St., is a member of the October Grand Jury.

Charles Lindenmann has moved from 249 Cleveland St. to 242 Ashford St., Brooklyn.

N. B. Barton, of the Ostby & Barton Co., Providence, R. I., visited the New York office last Friday.

Hugo Oppenheim, of Oppenheim & Strauss, sailed for Europe yesterday on the *Kaiser Wilhelm II.*

Henry Bohm, of the Bohm-Bristol Co., San Francisco, Cal., and of the Bohm-Allen Jewelry Co., Denver, Colo., is in the city.

Herman A. Metz, the Democratic candidate for Comptroller, is the son of a jeweler, who was formerly in business on the east side.

A. F. Wise, of William Wise & Son, Flatbush Ave. and Fulton St., Brooklyn, recently returned on the *Caronia* from a European trip.

F. Kronenberger has moved from 1008 Westchester Ave., Bronx, to the store at 1022 Westchester Ave., near the Prospect Ave. subway station.

Several jewelers were present at the auction sale conducted last Wednesday at the United States Appraiser' Stores. The quantity of jewelry sold was not extensive.

Charles Schneider, a clerk at 181 Eighth Ave., New York, who was formerly a jeweler, received last week his discharge in bankruptcy from liabilities amounting to $697.

C. Wellington Hayes, formerly secretary of W. H. Sturgeon & Co., Detroit, Mich., is now associated with Chester Billings & Son in their new retail store at Fifth Ave. and 34th St.

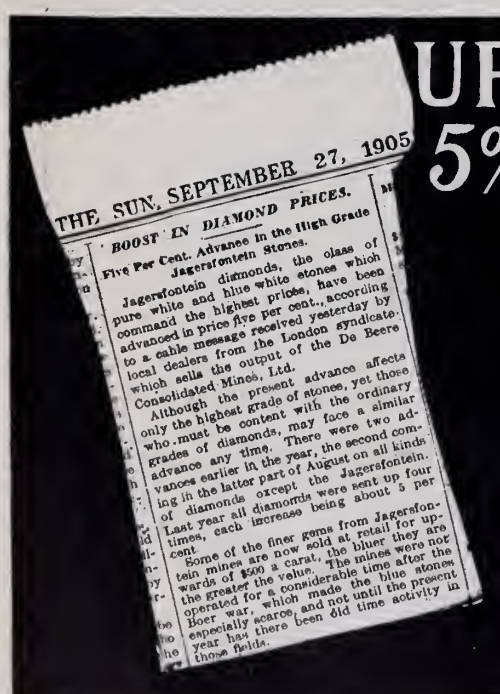
The Whiting Mfg. Co. has moved from Broadway and 18th St., where it has been long established, to the building at Broadway and 19th St., occupied until recently by the Gorham Mfg. Co.

Among the visitors to the office of THE CIRCULAR-WEEKLY last week were: A. H. Richards, El Paso, Tex.; R. C. Bernau, of Bernau & Ellington, Greensboro, N. C.; E. P. Sundberg, of E. P. Sundberg & Co., Fargo, N. Dak.; A. Hahn, Durango, Colo., and H. Y. Burlingham, Sherburne, N. Y.

Moses Pearlman, of Surf Ave., Coney Island, was summoned to the police court last week on the complaint of George Barbee, who said that four years ago he gave the watchmaker a watch valued at $125 to be repaired, and that it had not been returned. Pearlman said that the watch had been stolen from him, and on his agreeing to give to the complainant a timepiece of equal value, he was discharged.

A. Martin, Inc., is the name of a new corporation which filed its certificate last week at Albany, and will take over the optical business heretofore conducted by Alexander Martin at 17 W. 28th St., New York, and also his stores in Philadelphia, Pa., and Brooklyn, N. Y. The capital of the new company is $50,000; directors, Alexander Martin and F. B. Marchant, New York; Elizabeth Boulden, Philadelphia.

Isidor Lindner, 2328 Third Ave., celebrated on Tuesday of last week the 30th anniversary of his engaging in business at the above address. Since the date in October 1875, when he opened this store, he has seen the vast growth of Harlem and shared in its prosperity. Besides owning the property in which his store is located, he now has the satisfaction of calling himself owner of the adjourning property, 2330 Third Ave.



In relation to the report from London that Dr. C. V. Burton has a new method of manufacturing diamonds, not involving high pressure, Dr. G. F. Kunz, of Tiffany & Co., said yesterday: "Experiments in producing artificial diamonds have a scientific interest only. This can be realized by recalling that as a result of several hundred experiments not more than a half carat of diamond was produced. The cost is high and the product has practically no value, not even as dust or bort."

Reports have been received here from Paris that the Rev. Jeremiah Zimmerman, Syracuse, N. Y., the well-known numismatist and Egyptologist, was the victim of thieves in Paris, who stole the entire collection of ancient coins, medals and cameos obtained by him during his Egyptian tour and which were destined for the Metropolitan Museum of Art at New York. The value of the collection is estimated at $200,000. An Englishman stopping at the same hotel has been arrested on suspicion.

John Lipman, who has a second-hand store at 600 Broadway, Brooklyn, was placed on trial, last Thursday, before Judge Crane, in the County Court in that borough, on the charge of receiving jewelry stolen from Arthur Heaney, pawnbroker at 214 Atlantic Ave. Michael J. Ryan testified that a diamond brooch valued at $1,500 and pawned at Heaney's for $500 had been sold to Lipman for $300. Ryan's aunt has confessed that she stole numerous pledged articles from the pawnshop, where she was employed as a cleaner. She gave them to her nephew, who disposed of them in second-hand stores and elsewhere.

One of the prominent city pawnbrokers said yesterday that seldom in his experience have there been reported so many burglaries in which jewelry and silverware have been stolen from stores and flats as of late. The police, assuming that a large part of the booty ultimately goes to second-hand stores and pawnshops, keep some of the pawnbrokers quite busy these days answering questions and giving what information they can as to articles that are offered as pledges. It is said that the more conscientious lenders are unusually careful in granting loans because of the amount of stolen property that is being offered.

Lee Reichman, of Joseph H. Fink & Co., who returned from Europe recently after spending some time in the diamond markets of London and Antwerp, comes back with pronounced views as to the upward tendency of the diamond market. He says that never before in his experience did he have as much difficulty as on this trip in finding the sizes and quality of diamonds that the American market demands. He says that the foreign brokers in showing stock offer more "salty" goods than in any previous year, the reason being that they have not sufficient quantities of the better grades of stones. The total production of diamonds, Mr. Reichman says, may not be decreasing, but the world's demand has grown that the supply no longer reached

THE SUN, SEPTEMBER 27, 1905.

BOOST IN DIAMOND PRICES.

Five Per Cent. Advance in the High Grade Jagersfontein Stones.

Jagersfontein diamonds, the class of pure white and blue white stones which command the highest prices, have been advanced in price five per cent., according to a cable message received yesterday by local dealers from the London syndicate which sells the output of the De Beers Consolidated Mines, Ltd.

Although the present advance affects only the highest grade of stones, yet those who must be content with the ordinary grades of diamonds, may face a similar advance any time. There were two advances earlier in the year, the second coming in the latter part of August on all kinds of diamonds except the Jagersfontein. Last year all diamonds were sent up four times, each increase being about 5 per cent.

Some of the finer gems from Jagersfontein mines are now sold at retail for upwards of $500 a carat, the bluer they are the greater the value. The mines were not operated for a considerable time after the Boer war, which made the blue stones especially scarce, and not until the present year has there been did time activity in those fields.

UP 5%

WE TOLD YOU SO!

We don't say it in the spirit of braggadocio, but haven't we been telling you so for several months past? And it's lucky for you that our foresight has enabled us to provide against just such a contingency.

WE SHALL CONTINUE TO SELL DIAMONDS AT OUR OLD PRICES WHILE PRESENT STOCK LASTS.

And you know that our old prices were always lower than you could obtain elsewhere.

Send in your order NOW if you want Diamonds for the Holiday Trade.

We will gladly send you a memo. package of diamonds, mounted or unmounted, upon request.

CROSS & BEGUELIN,

*Importers and Cutters of Diamonds and Precious Stones.*

ound as well as it did. The European yers, he says, are constantly in the mar- t and are eagerly taking all desirable ferings that they can get. Mr. Reichman id he made some fair-sized purchases, it had all kinds of trouble in finding ones of the desired standard.

Burglars recently employed a novel de- ce to rifle the store of M. Naftal at 744 xth Ave. They obtained about $3,000 orth of gold jewelry, among which were me valuable antiques. The men left trace except a hole in the wall be- een the store and the hallway, which is ed as an entrance to upper stories of the ilding. The robbery took place at about A. M., when this part of the city was not any means deserted. An accomplice, ving rented a room from a Mrs. Goff, ring on the top floor, had received a key the front door, which was a means of mitting the burglars to the hallway. ere they worked undisturbed, although rs. Goff says that she heard noises. Two the antiques which Mr. Naftal is par- ularly anxious to regain are described as watch set with rose diamonds, sapphires d emeralds, suspended from a chate- ine pin resembling a snake, also set with amonds and emeralds. The second ar- cle is a carved reproduction of a deer in ttural colors in a carved gold frame, hich is about 1½x3 inches in dimensions id is set with diamonds. This piece is id to be more than 200 years old. Al- ough both the Pinkerton and city de- ctives are working on the case, the rob- rs have not been found.

Three men arrested by the police, last unday, are said to have robbed scores of its, and to have sold the plunder to pawn- okers, jewelers and others, at least some of whom are supposed to have entered into a conspiracy with the thieves. It is also said that a Nassau St. house was engaged by the men to remove inscriptions and engraving from silverware and otherwise facilitate the disposition of the spoils without detection, but the name of this house has not been made public by the police. Benjamin Berkman, 1637 Lexington Ave., and S. D. Levy, 62 E. 116th St., are two jewelers who are charged with receiving a portion of the stolen property. The burglars, who have confessed, are Wm. Hall, also known as Call and as Mulcaire, Fred Martin and Stephen Hazen. Hall was the leader of the men. It is said Martin drove the carriage in which the plunder was taken away from the flats. Hazen is said to be the nephew of the owner of a storage warehouse in Harlem. The police expect to recover much of the plunder. Mr. Levy, the accused jeweler, last week filed a voluntary petition in bankruptcy, as told in another column. His lawyer, D. W. Rockmore, said: "Mr. Levy buys old gold and silver. He bought some last week from Mr. Berkman, who is in the business, not knowing that it was stolen."

The fashionable retail jewelry district of Fifth Ave. received another worthy addition last Monday, when the store of Chester Billings & Son, on the southeast corner of 34th St. and Fifth Ave., was opened. To introduce beauty, novelty and dignified simplicity was the difficulty which confronted the architects and designers of the new store. The result of their efforts is a most artistic embodiment of all these qualities. There is much to admire in the exterior, prominent in the perspective being the beautifully designed bronze and glass awning which extends along the entire front and side of the store, broken only by two massive marquises shading the mahogany portals on Fifth Ave. and also on 34th St. The elaborately carved Circassian walnut show window fittings conform to the style of Louis XV., and are the only ones of their kind in this country. Fine mahogany show cases and interior fittings display to advantage the precious wares. Care is shown in the neat and symmetrical arrangement of these fixtures, conspicuous among which is the watch show case built in graceful curves to conform to the space assigned to it. The chandeliers reflect credit on the decorators, having been chosen from designs submitted by the most famous manufacturers in the country. This new establishment, where the purchaser may obtain anything in jewelry lines from fine gems to rare bronzes, is in charge of Harry Billings.

In relation to a recent robbery of a safe in a Third Ave. jewelry store an officer of the Jewelers Security Alliance said the other day that the warning given by THE CIRCULAR-WEEKLY against placing safes in partitions, as was done in this case, was opportune. The jeweler whose safe was broken was not a member of this association. "If he had been included in our membership," said the officer, "he would have received a card on which advice is given as to the proper placing of a safe. It is natural for a jeweler as well as for other business men to put it in an out-of-the-way place, where it will not take up much room. When the safe is in such a position that the front is in the store and the back extends through a partition into an inside room, there is special danger. The front of the safe is seen plainly from the street at night if a light is burning, but the back room affords the burglars every con-

OUR MOTTO is still—NOT HOW CHEAP, BUT HOW GOOD!

This does not mean fancy prices, but it does mean genuine

venience to carry on their operations successfully and without detection, as they can break into the back of a safe as well as through its face. A worse arrangement than this can scarcely be advised. Quite a number of years ago a safe so placed was robbed by burglars, and at that time attention was called prominently to the danger. If the safe is sunk in a brick side wall there are not the same opportunities for the burglars. The best way, however, is to have all portions of the safe exposed to view, and we advise that this be done whenever possible.

### Another New York Jeweler's Safe Robbed of $4,000 Worth of Stock.

Burglars broke into the jewelry factory of Nathan Anusewitz, 37 Clinton St., New York, last Saturday morning, and took a portion of his stock which he values at $4,000. The cracksmen obtained an entrance to the building through the hallway adjoining the store; then they forced the door leading into the cellar, where they cut a hole in the floor of the store, directly behind the safe, which stands out some distance from the rear wall. Thus they were enabled to work in a portion of the store that is not visible from the street, being partially hidden by the safe itself. They ripped the steel back off the safe, tore out the cement and helped themselves to the contents.

Mr. Anusewitz valued his entire stock at $10,000, and after making an inventory gave out his loss as $4,000. Among the articles which he missed are 25 diamond rings, 20 gold chains, 4 dozen gold watches, 1 dozen gold bracelets, 3 dozen gold pins, 12 pairs of diamond earrings, 4 dozen diamond set lockets, 2 dozen scarf pins, 2 dozen silver watches, 3 dozen brooches and 1 dozen stick pins. The imitation and filled jewelry were left in the safe, also several of the tools with which the burglars worked.

Mr. Anusewitz lives in the flat over the store, but no noise was heard during the night. He said that two poorly dressed men obtained entrance to the cellar a day or two before the robbery, by representing that they were gas inspectors, and he suspects that they were the burglars.

The police the next day arrested Max Price and Simon Lichtenstein, accusing them of the burglary, and they were held in the Essex Market Court in $1,000 bail each for examination.

L. Hoffman, Dawson, Yukon Territory, Alaska, has bought the stock of the Klodt Jewelry Co., Seattle, Wash.

The Southern Loan & Jewelry Co., Birmingham, Ala., has filed notice in the probate office of its change of name to the Southern Loan & Investment Co. The company now consists of S. E. Brown, E. P. Parker, Alex. C. Birch and S. F. Brown.

### Settlement in Bankruptcy of Morgan & Hawley Co., Dallas, Tex.

DALLAS, Tex., Oct. 4.—The settlement in the bankruptcy of the Morgan & Hawley Co., wholesale and retail jewelers of this city, is now practically complete. Referee in Bankruptcy Eugene Marshall last week directed the trustee, C. J. Green, to turn over to the corporation the assets, valued at something over $150,000. In the composition made with the creditors and confirmed by the court, the settlement calls for the payment of 100 cents on the dollar in notes of the corporation, due in three, six, nine and 12 months.

The corporation, after receiving the assets, in accordance with the agreement with the creditors, executed a deed of trust, turning over the title to the stock to a trustee to secure the notes given. The business will be continued without any change, and it is expected the concern will have no difficulty in meeting its obligations when they fall due.

The bankruptcy of this company was not precipitated by insolvency, but by a dispute between Messrs. Morgan and Hawley which resulted in an application for a receiver, in the suit under the State laws To save the assets from being dissipated and to protect all creditors, an involuntary petition in bankruptcy was filed and the corporation was formally adjudicated bankrupt.

## Chicago Notes.

H. P. Cutter, who was injured in an accident on the Pere Marquette Railroad, is recovering slowly. He is expected at his office this week.

For the purpose of making eye tests and studying conditions under which train signals are displayed eye specialists will be placed on the engines of the fast trains on the C., M. & St. P. Railroad.

In the matter of the Marquardt & Scott Co., bankrupts, a first dividend of 12 per cent. has been declared. The second dividend, estimated at 17 per cent., will be declared in about three months.

Elmer Weichel, an employe in the escape room of the Elgin National Watch Co.'s factory, while out hunting one day last week, was seriously injured by the accidental discharge of the gun which he was carrying.

The case of Dr. Oliver B. Hart, the physician accused of killing 10-year-old Irene Klokow by the use of drugs, is attracting some interest here, as the dead girl's father, who died in Kankakee about a year ago, was at one time in the jewelry business at Austin.

Harry L. Weisbaum, wholesale dealer in hardware specialties at 240 E. Madison St., has leased a store next to his present quarters and has opened a jobbing jewelry department. Louis Lamm, formerly buyer for the N. Shure Co., will buy for and manage this department.

Creditors of the Madson & Steele Co. have just received a second and final dividend of 7.7 per cent. The first dividend was 8 per cent. and the total 15.7 per cent. The original offer of a settlement was for 20 cents, but was not carried through on account of the opposition of creditors.

A fire broke out at 130 Franklin St., the factory of the Dennison Mfg. Co., Saturday, with the result that the stock was damaged by water. Mr. Talbot, manager for the Dennison branch in this city, said the loss would not amount to $15,000, and that there would be very little delay in filling orders.

C. J. Dodgshun was busy all last week receiving the congratulations of his many friends on his lucky escape from serious injury by the accident which recently befell him, as told in the last issue of The Circular-Weekly. Mr. Dodgshun is at his desk every day, but is suffering slightly from the shock he received.

Oscar Mehto, a tailor, has returned to James W. Clark, trading as the Marquardt & Scott Co., a diamond ring valued at $200, which Mehto claimed he received in part payment for clothes made for Messrs. Marquardt and Renich. The mortgage on the ring was not destroyed and Clark pressed for payment. G. W. Luck, another tailor, who obtained rings in a similar way, is fighting his case. He claims he bought the two rings at $195 each and he more than paid for them in clothes.

Elmer E. Rich has been sued by D. M. Bernstein, proprietor of the United States Loan Bank, for $25,000. Bernstein claims this as damages resulting from his arrest on a warrant by Rich wherein the latter charged Bernstein with knowingly concealing stolen property. The suit is an aftermath of the transactions with Mrs. Louis H. Berg, wherein Mrs. Berg got $2,000 worth of jewelry from Rich on memorandum and pawned it with various brokers. It will take over two years before the case will come to trial.

Henry Hoffman and Lena Werner, who, with L. J. Bohl, were arrested for smuggling and who are now in jail awaiting the action of the Federal Grand Jury, have become implicated in robberies aggregating nearly $50,000. They are accused of robbing the house of Isaac F. Lloyd, of New York, of $30,000 worth of jewelry, and also robbing New York and London hotels. It is claimed that it was the practice of the woman to hire herself out as a domestic and rob her employers. Mr. Lloyd was here last week and identified about $2,000 worth of jewelry as belonging to him. This was found in the woman's room when she was arrested by the United States authorities as an accomplice of Hoffman.

For the benefit of retail jewelers who are as yet unacquainted with the plan and scope of the Retail Jewelers' Association of Cook County the following facts have been submitted: The association was started April 28, and the following officers were elected: Wm. Lambrecht, president, 1576 Milwaukee Ave.; A. W. Johanson, treasurer, 270 Wells St.; B. T. Hoffmann, secretary, 121 Fullerton Ave. The association meets the second and fourth Friday in each month at room 912 in the Masonic Temple at 10 A. M. The object of the society is the mutual benefit and advancement of its members. At the meetings experiences are exchanged, prices and discounts on various lines are compared and much valuable information is gathered and disseminated. The members of the association do not buy from jewelry jobbers who are known to sell at retail. The Retail Jewelers' Protective Association is an offshoot of the Retail Jewelers' Association. At the next meeting it is thought the two will be combined. The protective association aims to create a fund for the prosecution and conviction of jewelry robbers, burglars, window smashers and hold-up men. The plan is to work in conjunction with a reliable detective agency and push the cases against criminals who make jewelers their special prey. At their last meeting $100 was voted A. W. Johanson to assist him in prosecuting Ely, who robbed the latter's store of $3,000 worth of jewelry. To J. M. Johnson a citizen, who captured Ely, a gold medal will be given by the association. The idea of assisting in the prosecution of jewelry robbers is an excellent one. It will stir things up a little. Jewelry thieves and thugs have a habit of getting many witnesses to prove an alibi. A little private investigation in the future may serve to make alibis unpopular.

## Pacific Coast Notes.

R. L. Robinson, Denver, Colo., spent last week in Santa Fe, N. Mex.

P. Christian, Santa Clara, Cal., was in San Francisco, Cal., last week.

L. A. Dollner's store, at Visalia, Cal., was completely destroyed by fire, Sept. 30.

George Peterson, 246 Clement St., Richmond, Cal., has added a line of photograph supplies to his stock.

A new jewelry store has been opened at 38 Pacific Ave., Santa Cruz, Cal., by E. C. King, formerly of Tekoa, Wash.

K. Falk, Los Angeles, Cal., died suddenly at the house of an acquaintance, Sept. 2. He lived only a few seconds after entering the house.

Manson & Bay, Redlands, Cal., have just installed in their store an official time regulator, which takes the time directly into the office as it comes over the wires from St. Louis each day.

## Minneapolis and St. Paul.

Nils Olson was married recently to Miss Minnie Younglove.

Fred O. Fisk, of Fisk Bros., has been ill for a couple of weeks.

Peter Sandager, formerly with T. A. Shirley, St. Paul, is now with the Twin City Jewelry Co., also of St. Paul.

James E. McCarthy, St. Paul, has secured the contract to furnish clocks required for the Board of Education of that place.

F. A. Anderson, formerly with M. Thouren Mfg. Co., has engaged in business for himself as a manufacturing jeweler, with quarters at 44 S. 4th St.

John D. Bodfors, Minneapolis, has acquired the other half of the store at 44 4th St. S., and refitted the establishment in a very attractive manner. New fixtures and an increased stock are now exhibited. Mr. Bodfors started in this location three years ago with but a small repair business. A special department, with new machinery for the manufacture of jewelry, is one of the features of the new store.

The new jewelry firm which has been announced to open in St. Paul Nov. 1, is composed of C. S. Morseman, of Los Angeles, Cal., and G. E. Feagans, Joliet, Ill. Mr. Morseman will be the resident manager. A handsome set of fixtures are to be installed between now and Nov. 1, and will include a number of departures and novelties in electrical fixtures and equipment, making the store one of the most attractive in the city.

## Pacific Northwest.

E. Nelson has opened a store on Canyon St., Canyon City, Ore.

Charles Campbell, Scio, Ore., was a recent visitor to Lebanon, Ore.

A. Rice, Bandon, Ore., recently returned home from a week's vacation at Portland.

Orland Heacock, formerly of Newberg, Ore., has just opened a retail jewelry store at Moro, Ore.

George E. Holmes, Lock Haven, Pa., is disposing of his stock at auction, prior to discontinuing business.

Albert H. Allen has bought the jewelry department of Catlin Bros., druggists, Barnesville, Minn., and will continue the business.

## San Francisco.

TRADE CONDITIONS.

The general tone of business is excellent and the outlook for the holiday season is as good as could be desired. Everything indicates prosperity. Money is plentiful and owing to a widely prevalent feeling of confidence, is circulating freely. Jobbers report that country dealers are liberally anticipating their future wants, and retailers are very optimistic in their expressions regarding the outlook for the approaching holiday season.

Earl Sturgis, of Phelps & Adams, has joined the ranks of the benedicts.

J. Gordino, Salinas, Cal., was in this city, last week, placing orders for holiday specialties.

G. C. Wilkins, Red Bluff, Cal., has just left the city after a brief visit to the jobbing trade.

Mr. Brickelmaier, Guamas, Mex., was here, last week, making selections of holiday specialties for his stock.

Walter A. Green, of Carrau & Green, is expected back from his European diamond purchasing trip about Oct. 15.

Mr. Barker, who has been on the Coast for some time, representing Mandeville, Carrow & Crane, has left for the east.

H. C. Zapf, Grass Valley, Cal., was here last week, calling on the wholesalers and making "fill-in" selections for his stock.

H. C. Van Ness, of H. C. Van Ness & Co., manufacturers' agents, is expected to return shortly from a trip to Los Angeles.

J. A. R. Vierria, Honolulu, H. I., has just left San Francisco on the return trip to Honolulu. He spent several days in this city, replenishing stock.

C. M. Hanf, San Bernardino, Cal., has just left San Francisco, where he spent some time making suitable selections for his newly remodeled store.

Gus A. Fleissner, president of the Fleissner-Marshall Co., has just completed and moved into a fine modern residence, which will be his permanent home in the future.

R. H. Schwartzkopp, manufacturers' agent, returned, last week, from his Fall trip through the Western States and reports the biggest business he has ever had.

Julius Auerbach, who represents M. Adelsdorfer, manufacturers' agent, 220 Sutter St., started on his Fall trip through the North Oct. 7. Mr. Auerbach had been ill for several weeks.

Charles Branstadt, of Hammersmith & Field, is expected to return from the east Nov. 1. Mr. Branstadt was obliged to temporarily give up his position and go east on account of ill health.

Mr. Peterson, of Phelps & Adams, has taken the position as outside city salesman, recently left vacant by the sudden death of William E. Meadows, who had been with the firm for a number of years.

Henry Bohm, of the Bohm-Bristol Co., has left Denver, where he had been for some time looking after his store, for a trip to New York, where he will buy new goods for the San Francisco store.

Walter A. Lord, Goldfield, Nev., was in San Francisco, last week, buying goods for the holiday trade. He anticipates a good season on account of the improved transportation facilities which have been added to that section.

Shreve & Co. are now displaying in their window the Macdonough Cup, won by the yacht *Nixie*, and made by the concern. The cup is of hand-chased silver and has engraved on one side a graceful yacht, with sails set. The work is attracting much attention.

## Detroit.

TRADE CONDITIONS.

Business with the retail jewelers has begun to increase. Inquiries for holiday goods are already being made, and traveling men are placing some very desirable orders.

L. Black & Co. are making extensive alterations to the rear of their store at 156 Woodward Ave. When the improvements are completed the firm will have more store space for its increasing business.

Henry M. Wright, of Wright, Kay & Co., who has been quite ill during the last three or four weeks, is at Atlantic City, N. J., where he will rest and get into condition for the holiday business.

A pathetic appeal for a new trial has been made by the mother of Harry Parker, one of the murderers of Pawnbroker Joseph Moyer. Parker is serving a life sentence in Marquette prison. His attorney has written to her stating there is no hope for another trial.

The local police last week arrested W. H. T. Crouch, an alleged diamond thief

ESTABLISHED 1854. INCORPORATED 1893

23-25 Looijersgracht Amsterdam, Holland.

who resided at Brighton, Eng., and who is well known in Montreal and Toronto, Can., where he is wanted on the charge of stealing about $600 worth of gems and watches. He was arrested in Weiss' pawn shop. Weiss grew suspicious and pushed the "buzzer" which has been placed in every pawn shop since the Moyer murder. Officer Shepherd arrested Crouch, who kicked his captor in the ankle and tried to escape, but failed. Pawn tickets from Montreal, Toronto and Buffalo were found on his person. He is in jail under $2,000 bonds.

## Omaha.

S. W. Lindsay has returned from Chicago.

C. A. Nordhaus was here, last week, buying stock for his new store at Wall Lake, Ia.

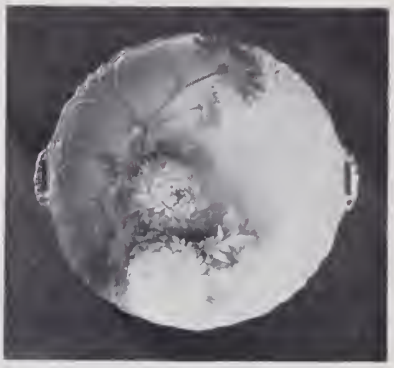
A. Holingren, Chicago, has taken a position as watchmaker with S. W. Lindsay.

G. L. Cormany, who has just opened a store in Bonesteel, S. Dak., bought his opening stock in this city, last week.

P. Wiese, who recently opened a new store in Deshler, Nebr., was in Omaha buying his opening stock, last week.

B. B. Combs, of T. L. Combs & Co., accompanied by his family, has returned from a trip through the Rocky Mountains.

Mrs. J. C. Hunt and daughter, Superior, Nebr., are visiting in this city. Mrs. Hunt is taking a course in optics with Dr. Tarbox while here.



E. T. Jones, who has been in the employ of S. W. Lindsay for several years as watchmaker, will leave shortly for Kansas City, Mo., where he has taken a position with Harry B. Carswell.

C. W. Bawlby, dealer in watch materials and optical goods, and Griffith & Hall, who have occupied separate rooms in the Rainge block, have both moved to 417 S. 15th St., where they have leased the ground floor.

The Dennison case, in which Tom Dennison is charged with complicity in the Pollock diamond robbery, which was scheduled to come up at this term of the Montgomery County (Ia.) District Court, was thought at first to be continued until December, but Pardon Secretary Garrett, of Des Moines, Ia., has received a subpoena whereby the prosecution for a second trial will take place at Red Oak, Ia., Oct. 23.

The following out-of-town jewelers were in this city during the past week purchasing stock and taking in the "Ak-Sar-Ben" Fall festivities: F. E. Holsten, Alliance; D. E. Stouter, Palmer; J. E. Smith, Albion; F. C. Calhoun, Pawnee City; C. Byshoul, Prague; M. C. Bressler, Clearwater; Louis Brandt, Lawrence; J. H. Waples, Shelton; G. Mueller, Arapahoe; Snyder & Co., Plattsmouth; P. W. Napier, Decatur; B. E. Jolls and wife, St. Paul; H. S. Welch and wife, Windside; J. B. Johnson, Ord; E. J. Tucker, Pender; Mrs. J. C. Hunt and daughter, Superior; Robert Malcolm, Imperial; Hilmer Anderson, U. S. Hefflinger, Fremont; Ed. Ingham, Coleridge; Ed. McComas, Broken Bow; Adolph Zastera, Wilber; Wm. Smith, West Point; H. G. Heald, Ponca; J. W. Berquist, Shickley; J. A. Renling, Wymore; H. C. Anderson, Lavons; C. A. Leach, McCook; C. S. Clinton, North Platte; C. S. Myers, Butte; E. Hinemeyer, Clarks; J. A. Anderson, Stromsburg; C. F. Collins, Dunbar; W. T. Hoover, Kenesaw; C. A. Tucker, Lincoln; T. C. Kubik, Rising City; C. L. Furnald, Carroll, Ia.; J. E. Tusker, Coon Rapids, Ia.; J. P. Hayden, Blencoe, Ia.; George Marsh, Atlantic, Ia.; J. W. Kegrice, Ida Grove, Ia.; W. H. Reeves, Moudamin, Ia.; W. C. Nichols, Pierson, Ia.; J. E. Peterson, Elkhorn, Ia.; M. Barnes, Avoca, Ia.; Chas. Reed, Woodbine, Ia.; G. L. Cormany, Bonesteel, S. Dak.; C. H. Brassfield, Ness City, Kans.; J. W. Edmunds, Overland, Kans.; R. L. Powers, Grant City, Mo.; J. H. Riffe, Craig, Mo.; D. Smith, Pipe Stone, Minn.

The stores of O. C. Boelte, Jones & Roberts, and John Erb, Columbus, Wis., were recently entered by burglars. At Erb's the catch was forced from the front door lock. The safe had been left unlocked, and Mr. Erb lost $35. Valuable papers were also taken, and a lot of souvenir coins. At Boelte's the double glass window at the rear was opened, a pane being taken from the outside sash, and the inside glass broken so as to move up the sash. The money drawer was broken open, and a small amount of cash was secured. Miss Boelte's purse, in a handbag, containing about $5.50, was also taken. At Jones & Roberts' entrance was effected through a rear basement window. The store was searched, and the safe door tried, but it was locked, and no attempt was made to force it. So far as known no stock, which was within easy reach, was taken from any of the stores.

## Cincinnati.

E. Gutmann, of L. Gutmann & Sons, is in the south.

Joseph E. Smith, Lockland, O., is enlarging his store.

Edward F. Kaelin, 1823 Vine St., has enlarged his quarters.

Jonas Wise, of Frohman & Co., has left on his regular trip north.

William Bichman, Pomeroy, O., is reported as seriously ill with typhoid fever.

Mr. and Mrs. William Owen have returned from a business and pleasure trip spent in the east.

A. Herman, of Herman & Loeb, is in Virginia and Lee Loeb, of this firm, is making a western trip.

Mr. Metzger, of King & Metzger, Lexington, Ky., was here last week buying fixtures for his new store.

Wallenstein, Meyer & Co., 16 W. 3d St., have added J. M. Kirkland, Knoxville, Tenn., to their road force.

H. D. Mears, of the Philadelphia Watch Case Co. and also the Keystone Watch Case Co., was a visitor here last week.

Joseph Noterman, of Joseph Noterman & Co., has been elected chaplain of Rosebud Chapter of the Covington Order of Eastern Star.

James H. Bovard, Newcastle, Ky., has come to this city to study engraving with Charles Newbaurer, Perin building.

C. V. Stephens, of Carthage, Ind., has sold out his business to Elmer May and is now associated with J. L. Whisler, Marion, Ind.

David Gradison, Emery Arcade, is now devoting his energies to solid gold and silver jewelry only, having disposed of his plated stock.

Frank Gruen, son of D. Gruen, of D. Gruen, Sons & Co., with his bride, paid a visit to their father on their return from a wedding trip in the east, last week.

F. E. Stinson, Kenton, O., who was burned out a few months ago, is now moving into his new store, which he will have ready for business Nov. 1.

William S. P. Oskamp, of the Oskamp Jewelry Co., with his family, sailed from Genoa, Italy, recently for America, after spending the Summer abroad.

Mr. Neal, son of O. V. Neal, Parkersburg, W. Va., was here for a few days last week, as were Mr. and Mrs. Schlenker, Hickman, Ky., who stopped over here on their return from Eaton, O.

Among the out of town jewelers who visited Cincinnati during the past week, not elsewhere mentioned, were: W. M. Northrop & Sons, North Baltimore, O.; E. F. Starks, New Point, Ind.; E. Burt & Son, Cardington, O.; James H. Bovard, Newcastle, Ky.; A. Clooney, Maysville, Ky.; H. H. Harris, Columbia, Tenn.; E. Johnson, Norwood, O.; Mr. Henn, of Henn & Haynes, Chillicothe, O.; Mr. McWaters, Somerset, Ky.; R. J. Litschert, Winchester, Ind.; L. W. Ensey, Troy, O.; C. L. Mellott, Woodsfield, O.; Ben Kruckemeyer, Evansville, Ind.; M. Aron, Springfield, O.; B. Zimmerman, Bainbridge, O.; J. E. Zimmerman, New Holland, O.; Joe Hesse, Mt. Pleasant, Tenn.; J. M. Sherwood, Brooksville, Ky.; G. H. Hall, Sumner, Ill.; A. Le Bron, Montgomery, Ala.; F. W. John, Rockport, Ind.; Joseph E. Smith, Lockland, O.; A. B. Wilson, Greenfield, O.; G. H. Hansgen, Bethel, O.; W. R. Jackson, Franklin, Ky.

## Cleveland.

Albert Zang, Alliance, came to this city in his automobile last week and made the return trip in good time.

C. C. Nowen, Collinwood, a short distance from this city, has refitted his store and made many improvements.

W. B. Grigsby has moved into a room in the new Wade building, on Euclid Ave., at Lake View, in the eastern end of the city.

W. H. Packard and wife, Uhrichsville, stopped off in this city last week while on their way home from a vacation spent at Toronto, Can., and other northern points.

Adolph Eberhardt, a jeweler on Ontario St., has been restrained by Judge Stone from visiting his house or interfering in any way with his wife, whom he is suing for divorce.

Frank T. Blackford, of the Scribner & Loehr Co., has returned from a trip through Pennsylvania and reports excellent business conditions. He found the retail merchants all expecting a most satisfactory holiday trade.

The following out-of-town jewelers were in the city the past week: Mr. and Mrs. W. C. Fisher, Lorain; Mr. and Mrs. E. E. Critz, Elyria; Mrs. E. N. Davis, Kent, and D. Leonheiser, Huron.

C. F. Keim, secretary and treasurer of the Scribner & Loehr Co., and his family have returned from the Catskill Mountains. Clarence Scribner, son of G. W. Scribner, of this house, has gone to Asheville, N. C., to attend school.

George Tipling, with the Sigler Bros. Co., is the possessor of a little mare named "Diamond Girl" that has won in all the matinée races on the Glenville track this Summer. Mr. Tipling is never quite so well contented as when riding behind her.

Thaddeus Ackley, Jr., son of Thaddeus Ackley, at Warren, O., died a few days ago of typhoid fever, after having been brought home from Terre Haute. Ackley was a violinist and had been with the Emma Abbott Co., Baker Opera Co. and at the Grand Opera House in New York. Young Ackley had shown much ability as a musician and for six years was a teacher in the Dana Institute in his home town.

Judge Taylor, of the United States District Court, has ordered United States Marshal Chandler to sell at auction a lot of jewelry that formerly belonged to Mrs. Cassie Chadwick. The sale will take place on the afternoon of Oct. 19 and will be conducted by Mr. Chandler personally. The goods are valued at about $12,000 and consist of pieces that were gathered up from friends of the woman to whom she had given them as presents and on which the duty had not been paid. The original amount on which duty had not been paid was about $75,000, but many of the persons preferred to pay the duty and a small penalty rather than give them up.

F. C. Grover, Snohomish, Wash., has formed a partnership with a Mr. Dunn, and will put in a stock of drugs with his jewelry.

O. E. Virum, Milwaukee, Wis., has bought the fixtures of Louis Diestelhorst at Sheboygan, Wis., and will conduct a jewelry business.

## Indianapolis.

TRADE CONDITIONS.

Merchants are exhibiting Christmas stock and they report that the holiday trade has already opened up. Business for the first week of October was brisk and retailers are encouraged. Preparations are being made for an unprecedented holiday rush. Manufacturers are working overtime in an effort to keep up with orders. Collections are reported satisfactory.

Carl F. Walk is in New York, buying Christmas novelties for Julius C. Walk & Son.

Chris Bernloehr, of Chris Bernloehr & Bros., has returned from a three months' tour of Europe.

Charles Lauer, senior member of C. W. Lauer & Co., has returned from a two months' visit to California.

The Indianapolis Clock Co., of which O. F. Pell is manager, has moved from 932 Ft. Wayne Ave. to 304 Hansen Ave.

As president of the local Aerie of Eagles, J. P. Mullally presided at an entertainment given by the order in the English Opera House, Sunday afternoon.

Horace Comstock is a member of the Columbia Club's bowling team, which is in the Indianapolis City League. Mr. Comstock is one of the most enthusiastic bowlers in the city.

L. F. Kiefer & Son have taken temporary quarters at 114 E. Ohio St. When the new Pythian Temple building at Pennsylvania and Massachusetts Aves. is completed the firm will have permanent quarters in one of the ground floor rooms.

Cracksmen last week entered the store of John J. Harrison, Clayton, nine miles from here, and blew open the safe. No stock was taken, but cash to the sum of $150 was secured. Residents of the village heard the explosion and surrounded the building, but the robbers escaped. The interior of the room was wrecked and the safe was demolished.

Out of town jewelers who visited the local jobbers and manufacturers last week included: J. Hummel, Jr., Muncie; C. W. Neal, Franklin; H. F. Bennett, Lapel; E. C. Collins, Franklin; F. C. Sheldon, Shelbyville; P. C. Seaton, Clayton; A. W. Owens, Greenwood; D. S. Whittaker, Lebanon; J. M. Washburn, Anderson; A. Pursel, Noblesville; J. A. Meissen, Cicero; George L. Spahr, Lebanon; Bernard Maier, Edinburg; George W. Clemons, Greenwood; J. Henry Smith, Greenfield, and Leslie E. Heaps, Spencer.

Securely handcuffed and shackled, Bert Riggins, said to be a clever diamond thief, was taken to Danville, Ill., last week, to answer the charge of stealing several valuable stones from the firm of Frank Schario. It is alleged that, in company with Thomas Morgan and Harry Jones, Riggins entered the store and while examining diamonds substituted bogus stones. Morgan and Jones were arrested, but Riggins escaped to this city, where he was captured.

D. W. Langdon, an Eastern buyer, was in this city, last week, exhibiting a pearl which he had bought from a fisherman near Vincennes, who had found it in the bed of the Wabash River. The price paid was large. This is believed to be the most valuable pearl ever found in the neighborhood of Vincennes, although recent finds there have inspired hundreds of persons to engage in mussel shell digging. Within the last seven weeks C. F. Newman has found 560 pearls, ranging in value from 50 cents to $100. Ten eastern houses have representatives on the ground to buy up the pearls as rapidly as they are found by the diggers.

## Columbus, O.

Solomon Rousculp, of Thornville, O., was in Columbus buying goods, last week.

A new jewelry store which will be opened within a few weeks will be located at 11 S. High St. Its proprietor will be J. L. Siebert, who was recently at Dayton, O.

Frank B. Ross, formerly secretary, treasurer and buyer of the Bonnet & Ross Co., will soon go into business for himself. He will occupy a room which is now being fitted up for him on the ground floor of the Columbus Savings & Trust Co.'s new skyscraper, next to the Long St. entrance. Mr. Ross has not been connected with the Bonnet & Ross Co. for about two years.

C. E. Loos, formerly of the firm of Loos & Loos, 1015 Mt. Vernon Ave., has opened a store at 180 E. Main St., in the Hub district, which he is conducting under the name of "The Hub Jewelry Co." The firm of Loos & Loos has dissolved, and Alvin B. Loos, the other member and brother of C. E. Loos, will continue to conduct the business at 1015 Mt. Vernon Ave., under the firm name of Loos & Co.

W. W. Murdock, who has worked for various Columbus opticians and has also been in business for himself during the past 12 years, was arrested Saturday night on a charge of embezzlement, preferred by John A. Lloyd, a tailor. The amount involved is $17.50 and an optician's trial case, which it is alleged Murdock pawned. Some time ago Murdock had trouble with the White-Haines Optical Co., but was not arrested. He borrowed a trial case and did not return it. The company heard it had been pawned, and asked a city detective to look into the matter. The detective gave Murdock 24 hours to straighten the matter up, which he did, returning the case on time.

## Kansas City.

TRADE CONDITIONS.

The past week has been a very busy one wit the wholesale jewelers of this city, owing to th fact that so many of their customers came t town to see the carnival sights. Jobbers state th there were probably not so many of the old je elers as usual, at this time of year, but a gre many new ones were in the city, and the buyir was decidedly heavy. Reports from the countr indicate that the wheat crop is practically a planted in this trade territory, and the wheat coming up, as far north as central Kansas. Co gatbering has commenced in Oklahoma and sout ern Kansas.

Arthur West has purchased the busine of H. B. Mack, Galena, Kans.

C. F. Bass, Huntsville, Mo., has sold o to Beddow & Rafter and moved to Louis ana, Mo., where he will again engage business.

E. E. Richards, manager of the loc house of the Rogers Silver Plate Co., w in St. Paul again last week in the interes of his firm.

Louis Meyer, head of the Meyer Jewel Co., who has been ill for the past few da has gone to Hot Springs, Ark., for t benefit of his health.

The Jaccard Jewelry Corporation is g ting out the cup for the Anheuser-Bus Brewing Co., which is to be presented at t forthcoming show in this city.

E. G. Alber, 1327 Grand Ave., has s out to D. H. Abney, who has been in t jewelry business several times in this c and is well known to the trade. Of l Mr. Abney has been devoting his ent

*Little Journeys—No. 5.*

*To the Home of Bags.*

THE cut shows one of Fashion's latest Decrees, a sterling or G. S. bag with perfectly plain frame, fine ring mesh, with or without white kid lining, Roman finish and made in a variety of sizes. We make them also with the frame studded with stones.

The most complete line of bags in the market. our jobber has them.

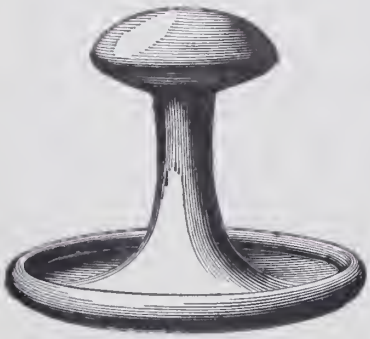
*NOTICE.—Our New York Office is now located at 7 Maiden Lane. Complete line of samples always there for your inspection.*



attention to pushing the sale of the Abney belt coupler.

Among the out of town jewelers who called on the trade here during the past week were: Louis Hoffman, Leavenworth, Kans.; Frank Wuerth, of J. H. Wuerth & Son, Leavenworth, Kans.; Ross C. Libby, Weir, Kans.; J. B. Bryant, Mound City, Kans.; E. A. Durflinger, Burrton, Kans.; I. E. Griffin, Elk City, Kans.; C. E. Dickinson, Garden City, Mo.; E. B. Vanness, Mound City, Kans.; F. M. Dillon, Bonner Springs, Kans.; G. E. Dunn, of Dunn & Co., St. Francis, Kans.; George P. Venable, Lexington, Mo.; E. A. Church, Claremore, Ind. T.; L. T. McHugh, Sheridan, Mo.; R. W. Folsom, Waterville, Mo.; L. J. Davis, Atchison, Mo.; H. F. Moore, of Moore Bros., Vandalia, Mo.; W. J. Hindman, Hutchinson, Kans.; Walter Starcke, Junction City, Kans.; Dr. J. W. Phillips, Chanute, Kans.; R. H. Morehouse, Topeka, Kans.; P. J. Thomas, Fredonia, Kans.; R. V. Kumm, Pittsburg, Kans.; B. A. Mason, Frankfort, Kans.; A. F. Kendle, Syracuse, Nebr; O. T. Chapman, Cedarvale, Kans.; W. F. Ash, Haven, Kans.; C. W. Thompson, Durham, Kans.; Fred Bailey, Blue Mound, Kans.; W. W. Spaulding, Eskridge, Kans.; J. L. Stoner, Lincoln, Kans.; G. B. Reynolds, Ottumwa, Ia.; J. T. Atterbury, Tahlequah, Ind. T.; W. G. Coplin and wife, Paola, Kans.; L. C. Kisling, Osborne, Kans.; G. M. Miller, with George Weisgerber, Salina, Kans.; G. R. Thomason, Cuba, Kans.; W. A. Gaines, of Ellis & Gaines, Butler, Mo.; A. E. Delanty, Parkville, Mo.; I. E. Griffin, Logan, Kans.; E. A. Church, Claremore, Ind. T.; F. E. Pirtle, Council Grove, Kans.; Mr. Pontius, in charge of the F. E. Pirtle & Co. store, Anthony, Kans.; O. A. Karnes, Overbrook, Kans.; E. J. Barrett, Ponca, Okla.; T. G. Allen, Miami, Ind. T.; W. E. Lacey, Moran, Kans.; Fred Pell, Eureka Springs, Ark.; L. J. Wendel, Creston, Ia.; W. L. Salmon, Tarkio, Mo.; J. B. Bryant, Mound City, Kans.; A. Smith, Admire, Kans.; H. Smith, Logansport, Ind.; C. C. Wedel, Mound Ridge, Kans.; J. L. Potts, Marceline, Mo.; W. A. McDonald, of Rhodes & Scott, Lamar, Mo.; C. H. Burdette, Ava, Mo.; C. F. Bass, Huntsville, Mo.; H. B. Kennedy, Lamar, Mo.; C. W. Fleming, Lincoln, Nebr.; H. Keil, Clinton, Mo.; Mr. Beddow, of Beddow & Rafter, Huntsville, Mo.; John Gilles, Fort Scott, Kans.; W. V. Steele, Gentry, Ark.; R. J. Lewis, Home, Kans.; G. A. Lawson, Adrian, Mo.; J. B. McDearmon, Carterville, Mo.; L. P. H. Hatch, Goodland, Kans.; F. G. Mitchell, Marshall, Mo.; J. W. Bishop, Chelsea, Ind. T.; Ed. Rhodes, Neodesha, Kans.; Jay Baker, Moline, Kans.; W. E. Crellin, Chillicothe, Mo.; Otto Burkland, Osawatomie, Kans.; Henry Tholen, Victoria, Kans.; D. M Davies, Nelson, Nebr.; W. L. Speer, Olathe, Kans.; J. M. Phillips, Glen Elder, Kans.; C. A. Stevens, Nickerson, Kans.; F. W. Jordan, Minneapolis, Kans.; C. F. Richards, Seattle, Wash.; L. D. Willitt, Hiawatha, Kans.; A. D. Clinton, North Platte, Nebr.

Frank S. Smith, of G. E. Smith & Sons, Parkersburg, W. Va., last week purchased a parcel of real estate at that place for $3,500. Mr. Smith has of late made several investments in local real estate.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

# WHY?

*Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had **FREE** for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

All Krementz Collar Buttons—of every quality—
are manufactured by

# MEYEROWITZ BROS.,

IMPORTERS OF **DIAMONDS,**

37-39 MAIDEN LANE, NEW YORK CITY.

**A New and Complete Line of Reconstructed Rubies and Sapphires at Interesting Prices.**

## Lancaster, Pa.

Frank D. Bowers will soon go to Indianapolis to open a retail store.

John J. Bowman, of Ezra F. Bowman's Sons, spent last week in Philadelphia.

Arthur Kinney returned home last week after a week spent in Boston on business.

Ezra F. Bowman's Sons are improving their establishment by putting in new fixtures.

Joel Fisher is home from a trip to the Bermudas, taken for the benefit of his health.

Francis G. Kemper, a retired jeweler of Pittsburg, is spending a few weeks in Lancaster.

Miss Mary G. Neece, of Williamsport, is taking a course in engraving at the Ezra F. Bowman Technical School.

Elmer P. Shertzer, with T. Wilson Dubbs, was severely burned Oct. 3 by hot cement which blew out of a hair brush he was repairing.

Walter Bansman, formerly of Lancaster, late of Pittsburg, is in this city, and leaves next week for Cleveland to engage in business for himself.

Jared Kemper, formerly of Marietta, now engaged in watchmaking in Pittsburg, is visiting Columbia friends, and he may possibly locate there.

F. Lichtenstein has been conducting a clearance sale preparatory to moving back to his remodeled store in the Snyder building, on N. Queen St.

The watch hospital in the Northern Bank building, of which A. H. Sensenig is manager, was, Wednesday night, robbed of watches, rings and bracelets.

S. Kurtz Zook let the contract for handsome show windows to replace the blank wall at present on the side of his jewelry store at N. Queen and Orange Sts.

Henry Weeber is home after taking a course at a college of optics in Philadelphia. He is about to add a complete optical department to his W. King St. store.

The employes of H. M. Musser's silver plating works held a banquet Wednesday evening at the rooms of the Iroquois Club. A concert was also given.

Samuel Hostetter, watchmaker for Wm. Hunt, Uniontown, Pa., was in Lancaster last week closing out his interest in a Lancaster County farm, which he has inherited.

Edward Spering, Bristol, Pa., who attended the late Old Home Week celebration at Columbia, recently, was in Lancaster last week, his first visit to his old home in 19 years.

Among the jewelers visiting Lancaster last week were Albert T. Heberling, Parkesburg; Cyrus Novinger, Halifax; John R. Woland, Harrisburg; J. H. Miller, Mercersburg; Abram Sharich, Millersville; George L. Hepp, Lititz; Nelson Pinkerton, Manheim.

---

The Jaffe Jewelry & Loan Co., Birmingham, Ala., has moved from 1925 Second Ave. to 2009 Second Ave.

A quantity of Ceylon rubies, crystals, sapphires and other precious stones were seized one day last week at San Antonio, Tex., by the customs authorities from an Englishman accused of smuggling them from Mexico.

FALL, 1905 FALL, 1905

## Philadelphia

Ed Sharp, for some years buyer for William G. Earle, 11 N. 9th St., has resigned his position.

The United States mint resumed coinage last week after an enforced idleness of three months.

George Ware, with J. B. Bechtel & Co., has started on his last trip of the year through the coal regions.

Blaine Wehrly, a student at the Philadelphia College of Horology, has returned to his home at Salamonia, Ind.

D. C. Hart, with F. B. Wallen, 405 Broadway, Camden, has returned from a sojourn at his old home, Emmaville, Pa.

Otto T. Moock, 809 Sansom St., has the sympathy of the trade extended to him on account of the critical illness of his wife.

Thomas Smedley, 920 Broadway, Camden, N. J., who has been ill some weeks, is so far recovered as to be partially able to resume business.

Robert Turner, for five years watchmaker for the late Frank H. Fry, Burlington, N. J., matriculated last week at the Medico Chirurgical Hospital to study medicine.

The announcement was made last week of the betrothal of Miss Henrietta Pfaelzer, daughter of Morris Pfaelzer, a wealthy retired jeweler, to Horace Stern, a lawyer.

Mrs. D. L. Hopper, widow of Samuel M. Hopper, who many years ago was a jeweler on Chestnut St., below 3d St., died last week at her residence, 120 N. 17th St.

Charles Oelschlager, engraver, has closed up his establishment at 706 Chestnut St. and is prepared to start for Washington State, where he proposes to start up in another business.

A new watchmaker in Salem, W. Va., is D. J. Davis, who graduated last week from the Philadelphia College of Horology, and returned there to start in business. B. W. Lockner, Richmond, Va., entered the school.

The store of Jacob Landow, 332-4 N. 2d St., is believed to have been one of the places robbed by Jacob Carson, a 17-year-old thief, who was arrested last week for a number of robberies.

Col. John L. Shepherd, of the Keystone Watch Case Co.'s New York office, was in this city, last week, visiting the main office of the company and renewing old acquaintance with the trade. J. M. Cutter, of the Trenton Watch Co., and W. H. Kinna, of the Elgin National Watch Co. were also here.

T. S. Hoffman, Derry Station, Pa., who made his first visit to the local trade since he left here in 1854, prolonged his stay two weeks and only returned home Saturday. As an old volunteer fireman and a native, Mr. Hoffman found much to interest him and was given a cordial welcome.

Out of town retailers visiting local jobbers last week included: John Merz, Hopewell, N. J.; M. K. Laudenslager, Souderton, Pa.; J. B. Heckler, Mainland; Theodor Kampmann, Bethlehem; C. F. Rudolph, Wilmington, Del.; D. H. Krause, North Wales, and E. K. Bean, Sansdale.

Philadelphia jewelers have sent their congratulations to William Woodrow, of Cross & Beguelin, New York, for his courageous exertions in capturing a colored man who attempted to rob their store. Mr. Woodrow's act was particularly commented upon here, since he until a year or so ago was well known as a salesman and bookkeeper for M. Sickles & Sons.

The trade was interested last week in the publication in the local papers of a report that Carl Gill, a diamond salesman, 216 N. 6th St., gave away his automobile Oct. 3 to a man named Charles Bennett, of Millville, N. J. To give away an auto, even if it has broken down and its owner gets disgusted with it, is unusual; yet, according to Mr. Gill, it was the natural result of disgust and disappointment over

PLATINUM DIAMOND MOUNTINGS.

COMBINATION BRACELETS AND COLLARETTES.

14 K. POCKET KNIVES. NECK CHAINS AND LA VALLIERES.

JOHN SCHUMACHER,
64 FULTON STREET, NEW YORK.

ie way the machine had acted every time e took it out.

Louis Jagielky, a manufacturing jeweler t 807 Sansom St., is involved in a suit or $10,000 damages, brought last week by Irs. Bertha Jagielky, who says she is his ife and was deserted in New York by im eight years ago, against a woman who as been living with Jagielky under his ame. The latter has been arrested and eld in $1,000 bail. According to Mrs. Jaielky, the jeweler married her in New ork in 1884. They lived 13 years in rooklyn and had four children. When he iet the defendant, the latter, she says, aliciously alienated and destroyed his love r his wife and his home, and that finally e abandoned her.

## Pittsburg.

Abraham Lewis, 207 Fifth Ave., who has een ill of typhoid fever, is recovering.

Mr Loftis, of Loftis Bros. & Co., spent few days of last week in Pittsburg, stopng off here on his way to Chicago from ie east.

Anthony Olson, a man who is supposed o be demented and who is said to be an narchist, chased Hugh Hamilton, of reensboro, Pa., into the store of the Royal ewelry Co., 8 Smithfield St., shortly beore noon, Oct. 3, and fired a number of hots at Hamilton in the jewelry store. wo of the shots entered Hamilton's body.

The following out of town merchants last eek visited Pittsburg: L. L. Swan, New astle; J. V. Rosendahl, Irwin; T. H. McJary, Washington; Harry Furtwangler, reensburg; W. F. Eyles, South Sharon; om Tomlinson, Charleroi; J. R. Thorn, arentum; H. R. Shinger, Wellsville; eorge Eckert, Jeanette; H. L. Stotz, Bellerood; N. L. Marsh, Sistersville.

It is now almost one year since Albert rafner, of Grafner Bros., disappeared from Pittsburg and nothing has been heard of him since that time, although there is a reward offered of $500 for information regarding his whereabouts. It is one of the strangest cases on record in this city. The remaining brothers have made every effort to locate the man, but without avail.

W. S. Pipes, through the aid of the Sheriff of Allegheny County, has secured from the Pittsburg police the diamond ring which figured in the recent trial of L. J. Marks, who was charged with receiving stolen goods. The diamond in this ring is the one for which Marks gave in exchange a stone, a watch and $50 in money. The diamond, it is alleged, was stolen from Pipes by a man now serving time at Milwaukee. Marks was acquitted of the charge against him. The police had the diamond in their possession and Pipes secured it by proper proceedings.

Joseph Bain, a son of John Bain, a jeweler of 1014 Wylie Ave., shot Milo Selter, of Benton Harbor, Mich., Oct. 3, while both were examining a revolver at the Pittsburg Exposition. The bullet entered Selter's abdomen and the wound may prove fatal. The shooting was accidental. Selter was removed to the Homeopathic Hospital. Bain, who did the shooting, is 18 years old, and Selter is 22. Both young men were employed by exhibitors at the exposition, and the shooting, which occurred about 8 o'clock, caused a great deal of excitement. Bain was arrested, but was released on bail.

John F. Hughes, Newark, N. J., employed as a silversmith, at the Tiffany works, Forest Hill, N. J., was held, last Friday, in $1,000 for trial on the charge of highway robbery. He is accused of participating in the hold-up at Newark of Edward Sally, and a young woman companion, who identified Hughes as the man who robbed them. Hughes denies the charge, and several business men testify to his good character.

New York.

TRADE K MARK

THE GOLD CHAIN HOUSE

1850 ✕ 1905

¶ The Koy-lo Company, of No. 7 Broadway, New York City, beg to offer to the trade their new *patented*

**KOY-LO REVOLVING SPIRAL HAT PIN.**

¶ The head of the Koy-lo pin is swiveled on to the spiral stem. Thus, when the pin is inserted into the hat, the spiral revolves automatically. There are no hidden springs, and nothing to get out of order. The Koy-lo is used in precisely the same manner as an ordinary straight hat pin. It is as superior to a straight hat pin as a screw is to a nail, or as an automatic screw-driver is to the old kind. It is the only practical device at present in existence which will hold the hat firmly and comfortably. It will not work loose when in the hat.

¶ The Koy-lo pin is made up in a variety of popular styles at from $9.00 per gross to $75.00 per dozen, to retail at from 10c. to $10.00 each. Each pin carded separately. Terms: 1%, 10 days; net, 30 days, f. o. b. New York City.

¶ As the Koy-lo Company's salesmen will not, for the present, call on the trade outside of New York City, out-of-town dealers who desire to see samples should make application by mail to

## Providence.

TRADE CONDITIONS.

Seldom have the local manufacturers had a busier season than they are at present enjoying. Many of the shops are running nights until 9 o'clock, and in all there is a scramble to get out the orders. General prosperity is given as the cause for the boom, which is said to be of larger proportions than the expected Fall rush. There is considerable difficulty being experienced in getting hands, one manufacturer putting it: "There are about two jobs for every man available."

At the annual election of officers of St. John's Commandery, Knights Templar, last week, Joseph P. Burlingame was chosen Master of Ceremonies.

Among the imports at the Port of Providence last week were several packages of imitation precious stones from Bremen, one of clocks from Hamburg and one of imitation pearls from Havre.

George E. Darling, owner of the catboat *Molem*, which had won many prizes in competition in races on Narragansett Bay and elsewhere, has purchased the sloop *Corneta*. The yacht is 45 feet over all.

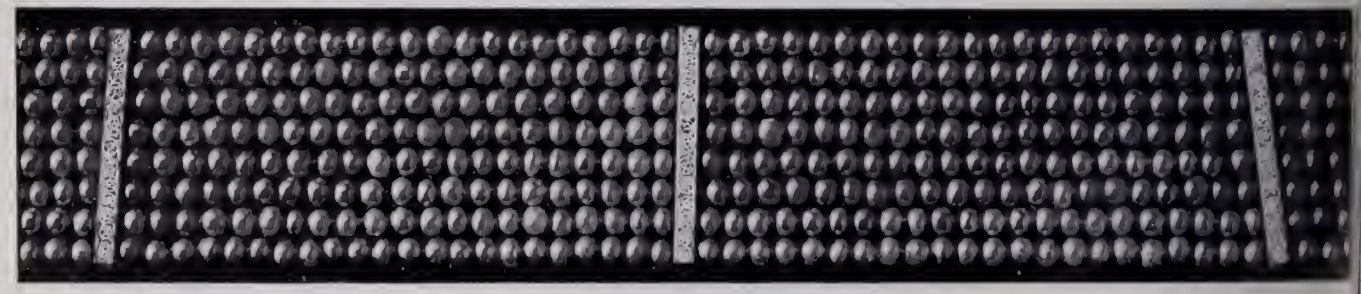
E. H. Jennison, an employe of the Wightman & Hough Co., was struck by an electric car while walking the track on the Buttonwoods line, Thursday night, receiving injuries which resulted in his death.

B. L. Colvin & Co. have removed from 14 Blount St. to 111-113 Point St. Another removal is that of Waite, Mathewson & Co., from 140 Orange St. to the Irons & Russell building, Chestnut and Clifford Sts.

Creditors of Sommer & Kotter received cash and notes in settlement of their claims, last week. It is understood that the basis was 25 per cent. cash and the balance in notes to fall due four, eight and 12 months from date.

Among the buyers at the local hotels last week were: D. Harris, Albany; E. Sickles, Philadelphia; B. Hillman, Miss H. Gelder, M. R. Wineman, Chicago; S. Margolis and S. Springer, New York; F. Warriner, Springfield.

C. W. Flagg, for many years one of the leading jewelers in Woonsocket, has retired, and the stock, fixtures and good will of his jewelry store at 118 Main St. have been purchased by Charles E. Dallman, who for 23 years had been one of his clerks.



Albert Raynor, while at work in a jewelry shop on Eddy St., Friday, was struck by a flying bit of steel, which entered his eye. He was treated at the Emergency Hospital. On the same day Ethel Fielding who is employed by the George W. Dove Co., was struck on the right hand by a heavy steel drop. Her hand was severely injured and was dressed at the Emergency Hospital.

Frank King, Past Exalted Ruler of the local lodge of Elks, went to Boston, Saturday, to take charge of the body of Fred E. Bellows, who shot himself while in the United States Hotel in that city. Bellows who had been a traveling salesman for a manufacturing jewelry concern and who at one time lived in Attleboro, left a letter in which he requested that the local lodge of Elks, of which he was a member, take charge of his body and bury it in Elk Rest, recently dedicated in this city. His request will be complied with.

Thomas G. Munster, one of the oldest engravers in this city, died suddenly Friday at his home, valvular heart trouble being the cause of death. Mr. Munster was born in Norway, but his parents came to this country when he was but three years of age, and he had since made his home here. When he was 12 years of age he was apprenticed to Robert Bannister, learning the trade of engraver under his tutelage. Later he went into business for himself, being located in the old Infantry building, corner of Dorrance and Weybosset Sts., at one time, and again on Dorrance St.. Of late he had been in the employ of R. W. Richardson.

The William C. F. Finck Co.'s factory, 924 Broadway, Elizabeth, N. J., which was destroyed by fire Sept. 26, will be rebuilt. The company has leased temporary quarters at E. Grand St., and will turn out here the orders for the holiday trade, having sufficient facilities to employ nearly as many men as before the fire. Mr. Finck has not completed his plans, but contemplates the construction of a one-story pressed brick factory.

PEARL COLLARS.

All widths from three to twelve strands, as carefully made and of same appearance as a collar of genuine pearls.

Novelty Jewelry in Sterling Silver, Brooches, Pendants, Rings, Bracelets, Jeweled Combs, Collar Supporters, Scarf Pins, etc., in Rose Gold, Roman, English, Oriental and other finishes. Our specialty is the manufacture of Ear Drops, Studs, Scarf Pins, etc., set with Oriental Pearls. **Send for a selection.**

9 Beverley St., PROVIDENCE, R. I. **Geo. H. Cahoone & Co.,** 9 Maiden Lane. NEW YORK.

## Connecticut.

P. T. Ives, Meriden, is redecorating and modeling his store at 6 Colony St.

Walter H. Young, with the International Silver Co., is back at his home at Wallingford.

The Foreman's club, of Landers, Frary & Clark, New Britain, held its third annual banquet last Saturday night at Hartford.

The publicity department of the New England Watch Co., Waterbury, is now in charge of E. F. Cobb as advertising manager.

Samuel P. Thrasher, New Haven, is at South Manchester, exhibiting the Thrasher Time System in the building of the Manchester Trust & Safe Deposit Co.

Erick Herline, Meriden, an employe of the International Silver Co., jumped through a window the other day and was injured, his ring catching on a nail and almost severing the third finger of his left hand.

Another brick addition is to be made to factory "L," International Silver Co., Wallingford, and will be 40x120 feet in square dimensions, one story high. It will be so built that other stories may be added if desired.

W. F Winslow, superintendent of the Wm. L. Gilbert Clock Co., Winsted, was slightly injured a few days ago by his automobile falling over an embankment. The machine, which was valued at $1,200, was wrecked.

Eugene P. Golden, superintendent of the hollow-ware department of factory "E," International Silver Co., Meriden, has bought the property of the Jane L. Bowen estate, 956 Broad St., and after improvements are made, will occupy the house.

Samuel W. Tasch's jewelry store, 13 White St., Danbury, was opened recently with a concert and reception, which was attended by large throngs. Mr. Tasch has been in this location 16 years, occupying a store in the old building before the new structure was erected.

In the window of Davis & Hawley Co.'s store, Bridgeport, is on exhibition a straight wooden cane said to have been made from the wood of a tree which grew near the grave of George Washington, and to have been presented to Jefferson Davis when he was United States Senator from Mississippi.

Wm. A. Henderson, South African representative of the International Silver Co., after visiting the Meriden and Wallingford factories of the company, has gone to New York preparatory to sailing for Cape Town. It is his intention to introduce another man to the South African trade and to locate at Sydney and take charge of the Australian business of the company.

---

A report from Mt. Sterling, Ky., Oct. 3, states that a New York syndicate, headed by David Draper, the South African geologist, has just closed a deal for 22,000 acres of mineral lands in Elliott County at $32 per acre. On these lands are the supposed diamond fields of Kentucky, and the new company will at once begin their development. Mr. Draper is a diamond expert who recently visited the fields

The illustrated catalogue and descriptive price list of the Goodwin & Kintz Co., Winsted, Conn., shows their line of portable lamps, fitted for either gas or electricity. The catalogue contains 44 pages, is printed on coated paper, and is attractively and conveniently arranged.

## Boston.

George E. Knapp and Henry G. Morris, of George E. Knapp & Co., are enjoying an outing in Maine.

H. M. Rich, jewelry auctioneer, has opened an art and jewelry auction store for the holiday season on Bromfield St.

E. A. Cowan, of the Jewelers' building, arrived home Saturday from a trip through the south, which lasted about 10 weeks.

Samuel M. Shore, formerly with I. Alberts, has started in business on his own account, having headquarters in Room 94, Jewelers' building.

Charles S. Cook, of A. Stowell & Co., who is also interested in financial affairs in other enterprises, has been elected a director of the Washington Trust Co., whose banking office is on Milk St.

Frederick W. Stone, formerly with the C. E. Davis Optical Co., has been engaged by George E. Homer, 45 Winter St., to take charge of the new optical department which Mr. Homer has added to his establishment.

E. E. Hardy, who is a member of the Ancient and Honorable Artillery Co., of Boston, accompanied the command on its trip to Albany last week. George E. Homer was also one of the Boston jewelers in the ranks.

Frank W. Brown, druggist and jeweler, Cohasset, fell from a crowded electric car, while returning from the Brockton fair, Oct. 5, and his leg went under the wheel, receiving injuries which necessitated amputation of the injured member.

The beautiful North Shore residence at Pride's Crossing, in Beverly, Mass., formerly the home of the late Royal E. Robbins, of the American Waltham Watch Co., has been purchased by Frederic Ayer, the sale being made by the trustees of the Robbins estate, Royal Robbins and Reginald C. Robbins.

George J. Taylor, Somerville, who was charged with a fraudulent check transaction and arraigned in court last week, was acquitted on that proceeding, but was immediately rearrested to answer to his wife's charge of non-support, in pursuance of a default order issued when he failed to appear in the Chelsea Court Sept. 2 last.

Buyers in town during the past week included: Guy O. Vickery, Augusta, Me.; S. A. Watson, Chester, Vt.; M. P. Foss, Pittsfield, N. H.; Thomas Lemay, Manchester, N. H.; Mr. Moulton and Mr. Lunt, Moulton & Lunt, Newburyport; Joseph Martin, Bridgewater; F. B. Morgan, New Boston, N. H.; J. Stark, St. John, N. B.

The wedding of Harry A. Harwood, son of Willard Harwood, of Harwood Bros. and salesman for the concern, to Miss E. T. Sumner, sister of Charles Sumner, European representative of the Keystone Watch Case Co., will take place to-day at the home of the bride's parents in Newton. Mr. and Mrs. Harwood will reside in Newton on their return from a wedding trip South.

Charles W. Sweetland, of 373 Washington St., the New England agent for the Homan Mfg. Co., Cincinnati, O., has lately added to his salesroom two novel oak show cases of original design. The cases stand over seven feet in height, and are built to contain six upright revolving brass rods each supporting five glass stands, on which rest silver sets of varying designs. By simply turning one of the fixtures, five new patterns in silverware are shown vertically, each making its own individual impression. Both cases are adequately lighted with incandescent lamps, and are a departure in the construction of show room furniture of this nature.

It appears that the losses of Boston jewelers on account of the disappearance of Joseph Alperts, Jr., reported a short time ago in THE CIRCULAR-WEEKLY, will be much heavier in the aggregate than was at first given out. Alperts had for a number of

ears done a jobbing business in diamonds. irrying about with him a pocket wallet f gems, and was well known in the trade. le opened a store in Endicott St. last July, id secured considerable jewelry therefor. le disappeared Sept. 14, and since then a editors' petition in bankruptcy has been ed against him in the United States Court. lis debts may amount to $25,000 or more, id a number of prominent firms are among ie losers by his transactions.

## Optical Notes and Briefs.

C. C. Bailey, Cookshire, Que., has added a ombination retinoscope to his optical par-ors.

Mr. Kyte, of the Boston Optical Co., Los ngeles, Cal., was in San Francisco, Cal., ie past week.

C. W. Morris, Jr., Wallace, N. S., has st opened an up-to-date optical parlor at mherst, N. S.

Dr. S. S. Monheit, optician, El Paso, Tex., as in Douglas, Ariz., recently, combining isiness and pleasure.

J. C. Wahlen, Petaluma, Cal., accom-anied by his son, visited the San Fran-sco jobbing trade last week.

H. C. Warner, optician, Fresno, Cal., was San Francisco, Cal., recently, purchasing pplies from the wholesalers.

F. A. Landry, Bathhurst, N. S., is asking or a 15 months' extension of time. It is early sure to be granted, as the cause is erely overstocking.

A. L. Spence, optician, Santa Rosa, Cal., as perfected a new bridge spring for eye-asses, which he has patented but has not et placed on the market.

The Montreal Optical Co., Montreal, is out to make extensive alterations and ex-nsions to its factories and warehouses nd to remodel completely its prescription epartment.

M. T. Carney, until recently of Boston, Mass., has opened an optical department in the jewelry store of Geo. Andrus, 415 Main St., E., Rochester, N. Y. Mr. Carney was graduated from the optical course of the Waltham Horological School, Waltham, Mass., last Spring.

The Rochester Optical Society held its regular monthly meeting Oct. 7 at the offices of Clark & Bowen, Triangle building, Rochester, N. Y. Letters received from the various optical societies throughout the country with regard to the prevailing prices were read and discussed. Further action relative to obtaining a uniform price list in all cities having optical societies will be taken in the near future.

At Portland, Ore., H. W. Bahr, secretory of the Oregon State Board of Optometry, last week handed to District Attorney Manning a list of nine men accused of practicing optometry without a license at the Lewis and Clark Centennial Exposition. The names of the nine men accused of practicing without a license are Julius Kohn, Herman Lieber, Phillip Schaffer, Michael J. Manion, Abe Abeison, Joseph Featherman, Louis J. Skieble, Edward E. L. Walker and George W. Long. The District Attorney promises to institute proceedings in all cases in which proper evidences are presented to him.

There is still very bitter feeling existing in the trade throughout the State of California against the State Optometry law and the manner in which it is being executed. It is rumored that the fight which B. Lissner, Oakland, is making against the law is receiving not only the hearty endorsement of the trade in general, but substantial financial backing as well. Several remarks have been let drop by San Francisco opticians which would convey the idea that a fund has already been raised and will in the future be maintained for the purpose of defeating the ends of the State law, with the object of securing its ultimate repeal.

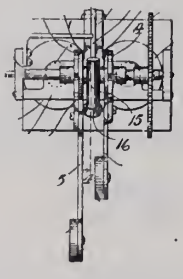
A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN AND UNITED STATES PATENTS THAT HAVE EXPIRED.

## UNITED STATES PATENTS.

ISSUE OF SEPT. 26, 1905.

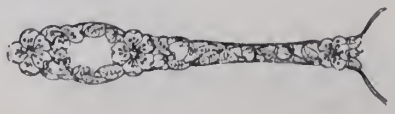
**800,286.** SECONDARY ELECTRIC CLOCK. ROBERT J. FLINT, Decatur, Ill., assignor to the Frank Curtis Co., Decatur, Ill. Filed March 11, 1905. Serial No. 249,653.



In a secondary clock, the combination of a ratchet-wheel having laterally-projecting pins, a

shuttle-frame having a path of motion crosswise of the path of motion of the pins, a cam-pawl on the shuttle presenting an inclined surface to the ratchet-pins, and a yielding finger on the shuttle beneath the pawl and presented in the opposite direction.

**800,607.** ELECTRIC WINDING DEVICE FOR CLOCKS. CHARLES S. BURTON, Oak Park, Ill., assignor, by mesne assignments, to the National Self-Winding Clock Co., Champaign, Ill. Filed Nov. 26, 1902. Serial No. 132,863.



In an electric clock, in combination with the prime shaft, a weighted lever pivoted thereon and

having pawl-and-ratchet connection therewith, adapted to rotate the shaft when the lever descends; an electromagnet and its armature and a connection from the latter terminating with a pin which engages a slot in the lever, whereby the lever and armature communicate movement to each other with play or range of movement independent of that which they respectively communicate and receive; a liquid-contact chamber and its carrier pivotally mounted on the shaft, the carrier having a slot engaged by the pin, whereby the chamber is tilted when the armature moves, and has a range of tilting movement in each direction in excess of that communicated through the pin.

### DESIGNS.

JR., Arlington, N. J. Filed March 11, 1904. Serial No. 197,717. Term of patent 14 years.

**37,564.** BACK FOR MIRRORS, BRUSHES, OR SIMILAR ARTICLES. GILBERT L.

CROWELL, JR., Arlington, N. J. Filed Marc 11, 1904. Serial No. 197,716. Term of pa ent 14 years.

## TRADE-MARKS.

PUBLISHED SEPT. 26, 1905.

[The following trade-marks have been adjudg entitled to registration under the act of Feb. 1905, and are published by the Patent Office compliance with Sec. 6, of said act, which provide "Any person who believes he would be damag by the registration of a mark may oppose the sa by filing notice of opposition, stating the groun therefor, in the Patent Office, within 30 days aft the publication of the mark sought to be reg tered, which said notice of opposition shall verified by the person filing the same before o of the officers mentioned in Sec. 2, of this a If no notice of opposition is filed within said ti the Commissioner shall issue a certificate of r istration therefor, as hereinafter provided for."

SER. No. **1,116.** WATCHES. ELGIN NATIO WATCH Co., Elgin and Chicago. Filed A 11, 1905.

The words and abbreviation "ELGIN NATIO WATCH Co."

SER. No. **1,321.** SLEEVE-BUTTONS, COLL BUTTONS, AND STUDS. KREMENTZ Co., Newark, N. J. Filed April 18, 1905

A figure having substantially the parts of anchor, a shank, a stock, and two arms cu oppositely to each other.

SER. No. **6,339.** EYE REMEDIES. THE MU

Eye Remedy Co., Chicago. Filed May 22, 1905.

MURINE

The word "Murine."

## BRITISH PATENTS.

ISSUE OF SEPT. 20, 1905.

(Abridgments of Specifications, 1904, from *The Illustrated Official Journal.*)

**12,213.** TIMING RACES, ETC. A. E. ICHOLS, Folkestone, and A. C. Brown, London. ay 30.

Races, fire-brigade and military competitions, etc., e timed by a stop-watch, which is started and opped by electric currents set up by signal ar- ngements indicating the starting and stopping the competition. The stop-watch is placed in

FIG.2.

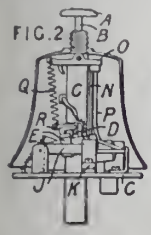

FIG.3.

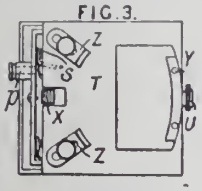

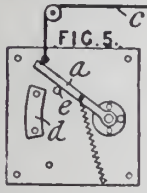

FIG.5.

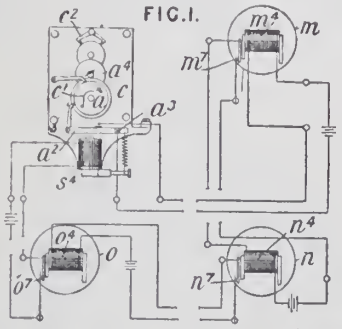
n adjustable holder consisting of an adjustable op Y, Fig. 3, and side clips Z arranged on a ate T, which slides in a frame and is moved latively to the frame by a screw U, around e thread of which is a spring to return the plate when the screw is slackened. The button of the op-watch is placed against a projection X of a voted armature of an electro-magnet, which is ergized when the starting signal is given. The gnal is given by pressing a plunger A, Fig. 2, n a rod B which works in a support C; in de- ending, a pin D on the rod B operates through vers, E, J, connected by toggle mechanism to revent the signal from being spoilt by trembling, close an electric circuit by the lever J coming nto contact with a platinized contact-block K. he completion of the electric circuit causes a sig- al to be given by a gun, detonator, or, as shown Fig. 2, a bell. Inside the bell is an electro- agnet, which, when energized by the completion f the circuit which actuates the stop-watch, at- acts an armature and releases a depending lever from a hook catch on the armature. The lever is attached to a lever O acted on by a spring , which is attached to a projection R on the rod and tends to move the lever so that a hammer n a lever P attached to the lever O will strike he bell, the striking being effected when the lever is released from its catch. At the end of the ace, a signal device, as in Fig. 2, may be struck, nd the current produced be caused to stop the atch, or the circuit to stop the watch may be osed by the breaking or pulling of a cord or read, produced by the falling of a target, or by ompetitors. As shown in Fig. 5, an arm *a* acted by a spring contacts temporarily with a block *d* hen a cord *c* is broken. Or the arm *a* may be ormally held by a pin *e* which is withdrawn when he cord *c* is pulled. The electric circuits are pre- erably connected to an external circuit by an sulated spring, such as *s*, Fig. 3, and an ordi- ary telephone plug which fits in a socket in a oss *p*. A switch may be included in the exter- al circuit, and other relay arrangements may be used to operate the stop-watch; for example, the Provisional Specification states that the timing-device may consist of a clock with an electro-movement, and that the timing device may carry movement, and that the timing-device may carry type-wheels to stamp the time on a sheet.

**12,375.** TIME AND OTHER INDICATORS. G. B. Bowell, Kensington, London. May 31.

The description presents the invention as applied to systems of electric clocks; but it is applicable to similar step-by-step devices such as gun-range indicators and engine-room order telegraphs.

FIG.1.



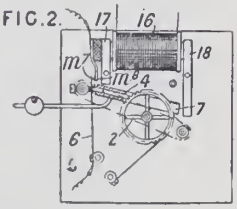


FIG.2.

In the master clock, Fig. 1, controlled by an escapement $c^2$, a ratchet-wheel *a*, connected to the first wheel *c* by a maintaining-spring $c^1$, is driven by a lever $a^2$ on a pivot $a^3$, which is pulled by a spring $a^4$ after being attracted by an electromagnet $s^4$. Such a master clock and a series of secondary clocks *m*, *n*, *o*, with separate circuits for their electromagnets $s^4$, $m^4$, $n^4$, $o^4$, are arranged as an endless chain of relays, the circuits of which are made and broken in succession by the armature lever $a^2$ and by flexible contacts $m^7$, $n^7$, $o^7$ attracted to fixed contacts $m^8$, etc., connected to the magnets $m^4$, etc. Alternatively, the master clock may be driven by a spring or weight wound by hand. Fig. 2 shows in detail one of the secondary clocks *m*, *n*, or *o*, Fig. 1. The electromagnet 16 corresponding to $m^4$, $n^4$, $o^4$, has unequal pole-pieces 17, 18, and the spur-wheel 2 is driven by a partly-counterbalanced armature lever 7 which contains a sliding click 4. When the lever is lifted by the attraction of the pole-pieces, the click is pushed over a tooth by the spring 6 which carries the contact $m^7$, Figs. 1 and 2, for the circuit of the next clock, and, when the lever drops on the cessation of current, the click pushes the tooth before it. When the installation may include one or more large dial movements, the arrangement may be such as to connect the winding-side of the master clock to the main wheel of such dial. Mechanism driven by a spring or weight may be employed.

# ONE MORE VICTORY

TO ADD to my long list of successful sales. I have just completed the most wonderful sale ever made in America, if not in the world. I sold the $15,000 stock of all Dresden China of Caldwell Johnston, Board Walk, Atlantic City, N. J. I sold it at a handsome profit over cost. This is the highest priced china made in the world, and for three years they tried to sell it, but all in vain. They tried it at auction, but the auctioneer did not understand it, and failed. The other auctioneers gave me two hours to stay, but I am a stayer. I have sold the finest stocks in America, including the six months' sale of diamond jewelry of the Oliver & Davis Estate at 3 Maiden Lane, New York, and sold all at a profit. My books are open to all. I can show a better record of high-class sales than any auctioneer, or pair of auctioneers in America. I am recognized as the leader by the trade and press, and shall continue to hold my honest name and treat the trade in the future as I have in the past 15 years. I personally conduct all large sales with H. T. Stapleford to assist me. I guarantee 100 cents on the dollar and over. I have sold over $100,000 worth in the last eight months, and my books show that I made 25 per cent. over costs on the average. I defy any man to show a better record. I refer you to a few of the best jobbing houses in America; such people as CHAS. S. CROSSMAN & Co., M. J. AVERBECK and others of New York; Jos. NOTERMAN & Co., or RICHTER & PHILLIPS, of Cincinnati; F. E. MORSE Co., Chicago; all will tell you of my past records. You can consult me personally for the next few weeks at my New York office from 9 to 11 A. M. I sell goods in the afternoon. If you want a sale conducted by me, get my terms, dates, etc., from either office: **3 Maiden Lane, New York; 151 Wabash Ave., Chicago; 512 Race St., Cincinnati, O.**

THE HOROLOGICAL REVIEW

## Balance With Electric Impulse.

(Translated for The Jewelers' Circular-Weekly from the *Deutsche Uhrmacher Zeitung.*)

THE efforts to use constant (remontoire) escapements for other than tower clocks, where the actions of the atmosphere render their employment almost imperative to neutralize, to a certain extent, the frequently occurring variations in the motive power, have for a long time been almost supplanted by those looking to an isochronism of the vibrations of the regulator system. But even the fact that the well-known properties of those escapements are without any influence upon a large number of

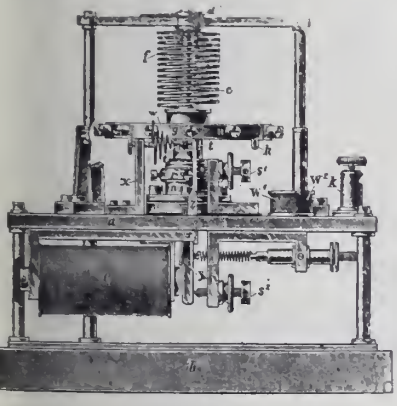

FIG. 1.

deterious actions, such as the variable density of the air, the changing condition of the oil; that the variations of the elasticity of the spring with the temperature make constant force (remontoire) in escapements with rebending rather dubious, and also that adhesion—even between dry surfaces, especially with such slight forces as enter here—will only contribute to render the mechanical work inconstant, all these circumstances have not had the effect of causing the effects mentioned above to be entirely suspended. The wish has remained, but the means and ways have been changed, at least, in the invention about to be described.

Karl Hoecken, of Bono, has applied for a patent on a balance system in which an electric current acts in such a manner upon a balance swinging in seconds that its rate is not affected by variations in the strength of the current. The apparatus in which the old theme to impel a balance (or any rate regulator, for that matter) by the greatest uniform force is treated in such a novel way is illustrated in Fig. 1, which shows

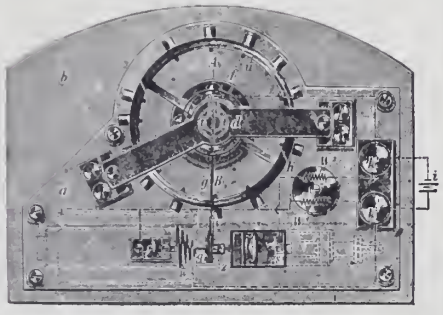

FIG. 2.

a side view; Fig. 2 shows a perspective view, while Fig. 3 depicts a section in the direction of line A B (see Fig. 2), and Figs. 4 and 5 show important parts of the mechanism, of which we shall speak at length later on.

The ground plate, 6 (Figs. 1 and 2), carries upon pillars a plate *a*, which for the

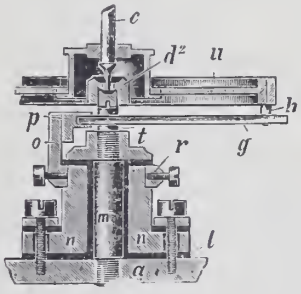

FIG. 3.

same reason that ships' chronometers were formerly placed in thick iron boxes (in order to render them inaccessible to magnetic influences), is made thick and of iron, so that the magnetic lines radiating from the electro-magnet, *e* (Fig. 1), are prevented from affecting the springs which act upon the balance, *u*. This balance is situated on the upper side of the iron plate and runs between the two cocks, $d^1$ (Figs. 1 and 2), carried by two pillars, and the pivot bushing, $d^2$ (Fig. 3), held by two supports, *t t* (Figs. 1 and 2), which are screwed fast to the pillar *m*, (Fig. 3), by means of a nut.

A part *n* solidly connected with this pillar *m*, and screwed on to the iron plate *a*, which, however, is insulated from the pillar as well as the plate by interlining of ebonite, carries at its upper end portion a revolvable ring, *r*, which can be tightened down by means of screws. This ring has in one place a perpendicular uprising arm,

FIG. 4.

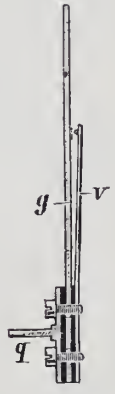

FIG. 5.

*o* (Fig. 3), to which the impulse spring, *g*, is attached by means of the angular piece, *p*. The spring, *g*, is so arranged as to project between the two supports, *t t* (Figs. 1 and 2), and the point where it is bent lies about in the prolongation of the axis of the balance oscillating above it, so that all friction is avoided when the spring is touched by the pin, *h*, fitted to the underside of the balance rim.

This pin, by the way, does not come in direct contact with the spring, *g*, the contact being effected by means of the auxiliary spring, *v*, (see Fig. 5, in which, however, only the relatively free-end piece of the spring, *g*, with appurtenances, is represented, but not its attachment in the angular piece, *p*, Fig. 3), which is insulated from *g* and connected by a screw to a part, *g*,

forming the final portion of the current conducting conical spiral spring, *w* (Figs. 1 and 2), that is attached to the plate, *a*, by means of the cock, *x*.

Outside of the range of the electro-magnet, *e*, fitted between the frame plates, *a* and *b*, runs the armature, *y*, with its lever arms, *z* (Figs. 1, 2 and 4). It projects through an opening in the plate, *a*, to the height of part *g*. These two parts move on one and the same axle, which is inserted in the plate. The pin inserted into the end of the lever, *z* (see Figs. 1 and 2), lies against the end of the spring, *g*, and in this normal position the lever is held by a small wire spring, which is either attached (Fig. 1) to a cock or else placed in sinks of the upper spur of the armature, *y*, and of the lever, *z*, itself. The armature, *y*, is also compelled by a screw-shaped spring to rest against the screw, $s^2$ (Fig. 1). The movement of the parts *y* and *z* is limited by the screws $s^1$ and $s^2$; the latter is arranged with its cock insulated from the plate and terminates in a contact point. On the plate, *a*, are two clamps, $k^1$ and $k^2$ (Fig. 2), which are connected with the resistances, $W^1$ and $W^2$, in such a manner that no self-induction (extra current) can occur. The first resistance, $W^1$, is in constant connection with the electro-magnet, while the resistance, $W^2$, as one will see, is only connected temporarily with the electro-magnet and the battery.

Let us now see how the apparatus works. The current of the battery, *i* (Fig. 2), passes through the clamp, $k^1$, into the insulated part, *n* (Figs. 1 and 3), and from there through the ring, *r*, and its arm, *o*, into the spring, *g*. When the balance is now set in motion to the right, the pin, *h*, will touch the contact spring, *v* (Figs. 2 and 5), and at the same time close the circuit with the spring, *g*, which, in consequence of the motion of the balance stretches until the force—the oscillating power of the balance and the elasticity of the spring, *g*—will counter balance. Meanwhile the current traverses the parts *g*, *v*, *g*, *w*, *x* (Fig. 2) to the electro-magnet, whose coil-winding is connected with the cock, *x*, and goes from there to the clamp, $k^2$. In this moment the armature, *y*, is tightened, and the lever, *z*, forced back by the short arm of the armature until it touches the contact point of the screw, $s^1$, allows the spring to regain its freedom and thus assists the balance in reversing the oscillation or swinging to the left, the amplitude of the same depending solely upon the strength of this spring. As soon as the spring, *g*, is arrested by the lever, *z*, the pin *h*, leaves the contact spring, *v*, and the current is interrupted. The induction current arising is used up for the most part by the resistance, $W^1$, but it may also take a different direction.

In consequence of the pushing back of the lever, *z*, at the moment of the tightening of the armature, it remains for a moment on the contact point of the screw, $s^1$, and the current will then flow from *x* through the plate *a* to *z* and from the screw $s^1$ (Figs. 1 and 2) to $W^2$ and $k^2$. The resistance, $W^2$, since it enters in this manner into the circuit after the closing of the current, must be large enough to prevent the current from

## Advertising of Watches—A Sign of the Times.

YOU MUST HAVE NOTICED the volume and quality of the Watch-advertising that is being done throughout the country at the present time. Where illustrations are used they are attractive, and the text is such as to carry conviction.

There is something back of this advertising—and there is something before it also. Back of it is the firm assurance of the prevailing excellence of Watch-wares; before it is the trade's certain recognition of merit.

tightening the armature, *y*, once more before the reversal of the balance oscillation. As soon as the circuit has opened after a correspondingly large return oscillation of the balance, the armature, *y*, under the action of the screw-shaped spring (Fig. 1) strikes against the stop screw, $s^2$; the lever, *z*, and the springs, *g* and *v*, return to their original positions, the functions described being repeated with every further oscillation of the balance.

The short, steady current furnished every second by this apparatus may also be charged into an alternating current, so that for the running of electro-magnetic dialworks all requisite factors are offered, but only experience can decide the question whether this very ingenious invention is able to live up to all it appears to promise and the inventor has endeavored to attain.

### A New Sun-Dial.

(By W. Banks, F.R.A.S., in the *Watchmaker, Jeweler, Silversmith and Optician.*)

THE art of dialing was one of the earliest applications of the knowledge of the apparent motions of the sun, and is of great antiquity. But, since the advent of the transit telescope and the invention of clocks and watches, it has fallen into disuse, owing

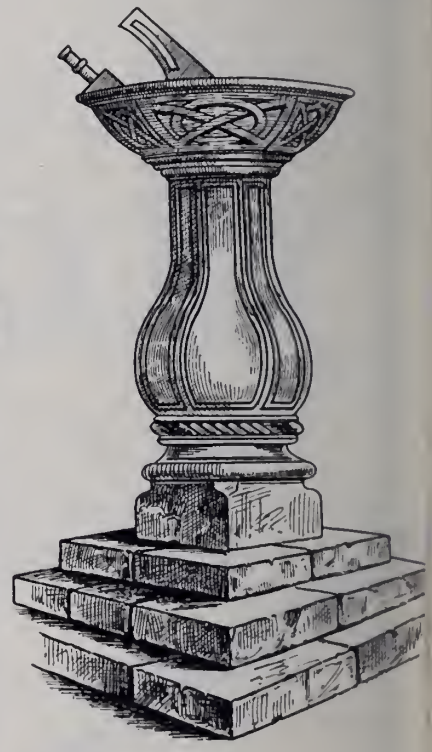

Fig. 1.

to the fact that it only gives very approximate time indications, and that the kind of time (solar) which it gives is unsuitable for ordinary commercial purposes.

The first defect is due to the very short length of the shadow cast by the gnomon; the second is the result of the varying speed of the earth in its orbit round the sun, and of the inclination of the ecliptic to the equator, causing the time intervals to vary.

In its primitive form, therefore, it is of small use for present-day requirements, and it only justifies its existence by its claim as a historical and an educational instrument, and, in a smaller degree, as an orn

mental garden accessory. Time is now obtained from the sun or stars by means of the transit instrument, consisting of a telescope attachment to a horizontal axis, and capable of movement in the plane of the meridian only, and furnished with means for accurate adjustment. An instrument of this kind must, however, always remain a high class scientific instrument, the care of which is beyond the ordinary amateur, requiring for its proper adjustment special experi knowledge.

The new transit dial here described while making no pretensions to the scientifi accuracy of the transit telescope, is far su perior to the old, primitive sun-dial, an will furnish time to within the limit of . second. It consists of the usual form o sun-dial on an ornamental stand with en graved dial and gnomon. This latter i composed of two metal plates separated b an interval. Between these plates is place

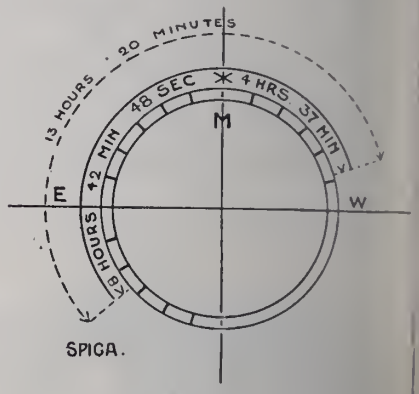

Fig. 2.

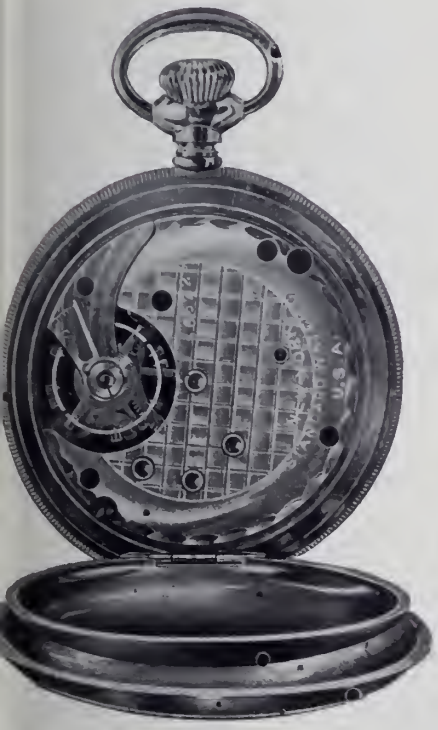
a special form of narrow cylindrical le covering an arc of 75 deg., so arranged th it gives an image of the sun or a star all ordinary altitudes without being mov

As is well known, a cylindrical lens h no effect on rays of light in one meridi —that parallel with its axis—and that t image of any source of illumination form at its focus is a line of light. This is ranged, in this case, to be in a vertical dir tion, and, whatever the altitude of the s or stars, a line image is always present the field of vision. This image is view in the ordinary way by a positive eyepi furnished with cross wires, the rays, convenience of observation, being turn at right angles by the intervention o totally reflecting prism.



The instrument is therefore a combi tion of the original sun-dial with a spe form of telescope, the object glass of wh is formed by the narrow segmental cy drical lens, which projects into the field vision an image at all altitudes of the s or a star, without any movement or adj ment. The metal work is permane fixed to the dial and not liable to derat ment or damage, the lens being perfe protected by the plates of the gnomon is easy to use, and tables are furnish rendering unnecessary the usual ca tions. The method of making the cor tions is here given, using two exampl the sun and a star.

If the sun is used the time must ne sarily be at or near noon, at the time the sun's southing or passing the meri Greenwich being taken as the stan

**"The Best Watch in the World for the Money"**

How can we make so good a watch for so little money? We have one of the largest American factories running full time on this *one thing*—producing nearly 2,000 movements a day—always making them thoroughly good, yet reducing the cost to the minimum. If we were working on twenty-five different models, the price of these new watches would be perhaps double. You get the benefit of our *specialization*. Your jobber has these new models *now*—order early, the demand is great and growing. Price-list on request.

## New York Standard Watch Co.

Jersey City, N. J.

meridian, all other places at other longitudes are referred to this, and allowance made for their distance east or west. We must also know the difference between mean and apparent time for the day; or, in other words, the "equation of time," which is given in the almanacs.

We will presume that our place of observation is, by the ordnance map, 2 deg. 15 min. west of Greenwich. As 360 deg. of arc are equal to 24 hrs. of time, the proportion is 360 to 24, or 15 to 1. If, therefore, we divide 2 deg. 15 min. by 15, we obtain 9 min. as the distance in time from the meridian of Greenwich, and, being west, the sun will transit this amount of time later than at Greenwich.

Taking the transit on July 30, 1905, we find that on this date the equation of time is 6 min. 14 sec. + ; or, in other words, the real sun does not arrive at the meridian until 6 min. 14 sec. past 12, and, as our station is 9 min. later also, the time shown by a mean time clock when the sun souths on this date must be 12 hrs. 15 min. 14 sec.

| | h. | m. | s. |
|---|---|---|---|
| Mean time at apparent noon..... | 1 | 6 | 14 |
| Correction for longitude..... | .. | 9 | .. |
| | 12 | 15 | 14 |

If the place of observation is east of Greenwich then the correction is minus and must be deducted also. If the time has been, say, February 12, 1905, 14 min. 26 sec. would have to be added for equation of time.

If time is taken by a star we must have a table of conversion from sidereal to mean time intervals, as the right ascension of stars is given in sidereal time. The position of a star is explained by the diagram, Fig. 2.

Sidereal time at noon is the distance from the first point of Aries, from which all distances of stars are measured in right ascension. This, on June 1, was 4 hrs. 37 min. 12 sec.

Taking the well-known star Spica, we find, from the almanac, that its right ascension is 13 hrs. 20 min., so that it will come to the meridian at this time minus 4 hrs. 37 min. 12 sec. = 8 hrs. 42 min. 48 sec., and this corrected into mean time intervals, given on page 574 of the "National Almanac," is found to be 8 hrs. 41 min. 23 sec., the time a mean time clock should show when Spica passes the center wire of transit dial. The same method is applicable to any other star, and the almanac gives particulars of some visible all the year round.

In the *English Mechanic*, for every month, a list of 24 stars is given, with t *mean* times of southing on the first da the month. The times for any other da obtained by multiplying 3 min. 56 sec the day of the month, minus one, and ing this to the time given for June 1. list of stars is fairly comprehensive and be found to answer for all ordinary poses.

### A Clock With Thirteen Dials.

A CLOCK with 13 dials has just made in England, for the palace eastern potentate. It shows the tim London, Paris, Rome, Berlin, Vienna Petersburg, Constantinople, Washin Yokohama, Peking, Bombay, Samar and Teheran. Thus the owner will be to see at a glance time in these citie compared with that of his own ca

The figures and also the names o various cities are in native character, each dial is mounted in an ormolu f richly engraved.

The tower clock in the Great C building, Cincinnati, O., which wa moved a short time ago for repairs, ha been installed in place again.

## A New Book on Horology.

A NEW contribution to the science o horology is "Illustrated Studies Horology," by George G. Koeberle. Th work contains 40 enlarged drawings o folios of 11 x 30 inches in size, illustratin the construction of depthings of whee and pinions and types of the lever, cyli der, duplex and chronometer escapemen The book is accompanied by an explanat key.

Horology not being an exact science, b rather the result of the application of oth sciences, of invention and of empirical rul a comprehensive criticism cannot be expe ed. The review must, therefore, be lim t and will be confined to plate 27 and plate Draft 27 shows a lever escapement of wh and pallets, the latter of which are rep sented by two small steel pins, enclos between their distance three teeth of escape wheel of 15 teeth, which are tended by their inclined angles to imp the entire impulse to the pin-pallets of escapement, the faces of which teeth of such proportions as to lock and dr the pin-pallets and to make the use of ba ing pins for the lever unnecessary.

As far as known an escapement m on these principles has never been a pra cal success, because the draw on the gaging pallet and the draw on the diseng ing pallet differ so greatly; for exam when we have a 15-tooth escape wheel, which three teeth are enclosed between pallets, an investigation would demonst that such an escapement could never be cessfully used for a portable timepi Some Swiss watch manufacturers, howe have used such an escapement in g timekeepers when they have used a c struction where four teeth were encl between the pin-pallets of an escape w having 20 teeth. An escapement of sort can also be made successful wl three teeth of an escape wheel of 14 t are enclosed between two pin-pallets. both these constructions the draw on l pins will be nearly equal.

The teeth of the motion wheels show plate 6 are evidently formed too much those of train wheels and have too n play for stability of the hour hand. stem winding and setting mechanism lowers are used as drivers in setting hands, and this may have suggested pointed teeth. When the teeth of the tion work wheels are made wide en and formed in continuous curves to roots they will act well either as fo ers or drivers and, with proper deg ating circles, may be made short strong.

These drawings, however, being of size, show the details of their sub plainly, and their value as studies can ly be excelled. Any zealous and intel watchmaker would do well to enlarg library by adding a copy of the book. l logical schools in particular could see points not noticed in smaller drawings a comparison with other works would scholar and teacher to appreciate the cl of the author.

# STORE KEEPING DEPARTMENT.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## One of New York's Attractive Retail Jewelry Establishments.

AMONG the ornaments to that newer, broader and more cosmopolitan New York which has been developing for the past decade or more, and which centres around Broadway and Fifth Ave., from, let us say, Union Sq. on the south to Central Park on the north, not a few are the impressive and stately edifices which serve as emporiums for the sale of jewelry and kindred lines.

Some of these have already been pictured and described in the columns of THE CIRCULAR-WEEKLY, and to-day we add another to the gallery—one, it is true, which was opened to the public late last Spring. But as it has only been thoroughly completed within five or six weeks, the following general description and the two photographs which accompany this sketch are not untimely.

The store referred to is that of A. Frankfield & Co., at 38 W. 34th St., located, as will be noted, between Fifth Ave. and Herald Sq. The entire building belongs to the firm, and was erected with regard to the business conducted by them. Thus, though they do not occupy it entirely, with an eye to the future, it has been so constructed that should they require the space which they as yet sub-let, they will have three floors admirably adapted to the needs of a progressive jewelry business. The architect of the edifice was Robert D. Kohn, and it was built under his direct supervision, being completed during the early part of this year.

In designing the building, the architect was instructed to secure the maximum of floor space in both upper stories as well as the ground floor, without sacrificing the light of the latter, which the firm naturally deemed an essential. As a result, the upper floors have a depth of about 65 feet, while the ground floor occupies the entire lot, the standard size of 100 feet in depth. Little sacrifice of the light in the front has been exacted, for this is provided with a screen of prism glass suspended from a lintel over the show windows. In order to make this screen thoroughly effective, it has been placed in front on a line with the front of the building. Furthermore, it has been kept quite free from the ventilating sash, the latter being three feet back of it. Added to this, the stone piers on either side of the front, have been made narrow. As a result, the store has proven satisfactorily light, the use of electric burners during the daytime being practically unnecessary, quite an exceptional advantage in a city like ours.

The entrance to the upper stories is on the westerly side of the building. This has been made unusually low, so that the mezzanine gallery was made possible. This gallery has added very materially to the floor area of the store, and by ingenious arrangement it has also gained additional light from the street thereby.

The building is lighted throughout by electricity, and is equipped with an Otis electric elevator. It is heated by a direct system of steam heating. The first loft has been so arranged that should A. Frankfield & Co. desire to use it for themselves, they will require no special entrances or corridors.

The exterior of the building displays front of limestone and light-face brick.

The interior fittings of the store are Cuban mahogany, with dark platinum fi ish hardware. In accordance with advanc taste, the effect is very chaste, giving sense of ample space.

The firm of A. Frankfield & Co. is c which has almost reached a half centu of honorable age. Its founder, after years of constant connection with the ness—to be exact, since 1856—still ren as its active head. He began it with hi individual name as the style, at the north corner of Eighth Ave. and 26th St. In a branch store was opened at the north corner of Sixth Ave. and 14th St.. In the entire concern was concentrated W. 14th St., where it remained unti cently, removing to the present loc

e center of the best retail section. The history of A. Frankfield & Co. has en one unbroken chapter of honorable hievement, and it looks forward to a fu-e as hopeful, based upon the rugged tues which gave it such steady impetus.

### Among the Shadows of the Past.

*(Continued from issue of Oct. 4, 1905.)*

UT now we have reached the neighbor-hood of Prince St., and at the south-st corner of the great jewelry show-place the New York of that day, the noble edi-

EXTERIOR OF THE FRANKFIELD STORE.

f occupied by Ball, Black & Co. That ncern has a history anterior, as it has e subsequent to the time. It had been nded as early as 1810, by Erastus Bar-t, with a store at 166 Broadway. He s succeeded by Frederick Marquand. ring 1833 the concern removed to 181 oadway. Then the firm became Mar-nd & Barton, then Marquand & Bro., n Marquand & Co., who were succeeded i 18 by Ball, Tompkins & Black. Dur-i the term of this copartnership, in 18, the firm's place of business became 247 Broadway, southwest corner of Murray St. Mr. Tompkins dying, the firm became as above, with the store we have just designated. In 1871 the style became as at present, Black, Starr & Frost, and two years afterwards headed the trend to Fifth Ave., removing to 251, northeast corner of 28th St. Thence, in 1898, it removed to its present abode, 438 Fifth Ave., southwest corner of 39th St.

Opposite Ball, Black & Co., on the southeast corner, is Cyrus A. Stevens & Co. The head of that concern becomes the forerunner of the movement to Union Sq., for long before he is followed by competitors he establishes himself in an old residence, transformed into a business place, on the south side of the Square, near University Pl.

Howard & Co. is the sign above 619 Broadway, near Houston St. This concern, too, becomes one of the early heralds of the coming glories of Fifth Ave., seeking first No. 253, and then its present home, 264, southwest corner of 29th St.

Then in due course comes Mrs. Theresa Lynch, with her store first at 729, near Waverly Pl., then above Union Sq., at 839 Broadway, southwest corner of 22d St., and finally backward again to 1 Union Sq., corner of 14th St., where she dies and the business is at last discontinued, or merged into that of Mrs. T. Lynch's Son.

At 777 Broadway are Culbert Bros. A few years later they had withdrawn from business.

A block before reaching Union Sq., under the then Wallack's Theatre, at No. 848, is the small store of Richard Keeping. Notwithstanding its smallness, it is the scene of the sale of some exceedingly valuable jewelry. Mr. Keeping soon after removes to 1257 Broadway, near 32d St., where unfortunately he does not remain so successful.

Our jaunt has taken us as far north as Union Sq. Above this, at this early date, there are few establishments for us to see, though in a few years, as our recital has demonstrated, there will be plenty enough. We have scarcely the strength to-day to take great flights in other directions, for instance, to the Bowery, where on one block alone there are six successful jewelry firms. But before we close we note two stores on Canal St., far west of Broadway. One is that of J. B. Ginnochio, at No. 118, already an old man, almost on the point of retiring. The other is that of F. W. Pachtmann, at No. 102. Later the style becomes Pachtmann & Moelich.

Then as we cross over to Fulton St., by way of Chatham St., now Park Row and Chatham Sq., we see the sign of J. L. Moore & Co., at No. 112, succeeded by Brown & Marsters, some time between the years 1850 and 1855. And having reached Fulton St., at No. 97 we see the sign of Squire & Lander. Further down, under the United States Hotel, there are Seymour, Hoyt & Co., later Hoyt, Badger & Dillon. Subsequently this becomes McMullen & Hamilton, the former a clerk of the old house, and Hamilton a connection of Dillon of the same. Hamilton soon withdraws, his former partner continuing. But not for long, for the fates are not benign.

THE HISTORIAN.

### Extra Holiday Help.

MR. BLANK is a retail jewelry dealer in one of the up-State cities, and when visited by THE ONLOOKER, although the latter found him loth to give his opinions and experience on matters of shopkeeping, he finally became engrossed in the subject, and permitted THE ONLOOKER to impersonally detail the views he expressed.

Asked incidentally whether, when the holiday season comes near, he did not, as most do, require extra clerks, he said that he did, and the further inquiry as to whence he got them, elicited the following reply. It is a pity that this cannot be given in Mr. Blank's own words, for that gentleman is very original, and his answer loses much in transmission. As nearly as his words can however be reported they were:

"Yes, I need extra help around Christmas time, and now after about 25 years, I've got good help that I can—barring death or unforeseen obstacles—confidently rely on. But for fully 15 years I had trouble in this matter, until finally I began to dread the coming of the holidays. The truth is that having learned by experience and having trained this extra help, which pay very liberally, I have now a rather superior force of this kind.

"First of my mistakes was in believing that one or two female clerks were essential. That may be the case elsewhere, even in New York, but it is not according to my experience in this community. You see, this town is not so large that most people don't know most others, and at first I thought that was an advantage. But it is not. My saleswomen would gad with every friend, and even acquaintance who would call, and permit these to "shop" to no result. They never seemed to imbibe a realizing sense of the fact that they were here to sell goods. Of course, I'm enough of a business man to know that one cannot expect to make a sale every time, but to have my store used as a 'feeder' for other stores was something I couldn't stand, and that seemed to be the result of my saleswomen's efforts. After two or three years of this I shut off on female assistance, and since then no more in mine. That was not the only fault I found with them, I assure you, for compared with male clerks I found them careless and trifling.

"And now, Mr. Blank, of whom does your extra holiday force consist?"

"Of four male clerks I have been able to secure the past three years. I am forced to pay a little high for their temporary services, but I do so cheerfully, and find the results more satisfactory every time the holiday season comes round. Two of these clerks are wholesale salesmen of whom I am a good customer, and who, in their turn, are pleased that they can serve me. The other two are local friends of mine, one of them a man who at some little sacrifice to himself, comes to serve me because the compensation is much more than he can secure in any other manner for the same length of time. The other, who is in a business which is always dull in cold weather, manages to get a substitute in his own regular work, paying him less than he gets at that himself, and as I pay him nearly double his regular wages, he makes a satisfactory deal with me.

## Old Silversmiths of America.

(In this series of articles, which began in the issue of July 6, 1904, an attempt has been made, from time to time, to give the history of the craft in the principal cities from colonial days to the middle of the last century. They should prove interesting, not only to collectors of silverware, but to the fortunate possessor of plate that has been handed down through generations. Additional information or corrections from our readers will be welcome.—Ed.)

XVI.—PORTLAND, ME.

SETTLED by an English colony in 1632, Portland did not become a city until 1832. In the first half of the last century J. & J. Appleton, Banks & Hatch, John Cook, William Cutter, Fellows & Green, and Abel Moulton, brother of William Moulton of Newburyport, were in business. Banks & Hatch advertise in 1847, "Silver Tea, Table, Dessert, Sugar, Mustard & Salt Spoons." M. & T. Pearson were here in 1850.

PORTSMOUTH, N. H.

First settled in 1623, this city has lately been known throughout the world in connection with the peace conference of the Russians and Japanese. Samuel Drowne was a noted silversmith, 1770-1815. In 1835, John W. Abbott, Joseph H. Clark and Robert Gray were in business.

ST. LOUIS, MO.

Transferred to the United States in 1804, St. Louis was chartered as a city in 1822. With the exception of spoon ware no silver was known to have been manufactured here until after the war. The jewelers who made or sold spoons with their names stamped on them were: The Jaccards, L. Bauman, F. A. Bauvais, J. T. Sullivan, L. Forbes, James J. Monroe, B. F. Crane, M. Friede; all prior to 1850.

WASHINGTON, D. C.

Founded in 1790, the Government was removed here in 1800. In 1834, John Adam (Alexandria), Greenbery Gaither, William Hubball, W. A. Williams and R. H. L. Villard (Georgetown), were in business. George Brower was here later in 1850.

THE END.

## Information Wanted as to Old Marks.

SINCE the publication in The Circular-Weekly July 7, 1905, of the list of Old Marks, unlocated, the following have been located and dated:

I. ADAM was a silversmith and jeweler of Alexandria (Washington Directory), 1834.

A. BILLINGS, Poughkeepsie, N. Y., was Major Andrew Billings of Revolutionary fame, a noted silversmith and jeweler, who made silver cups and other work for General Washington and others.

S. BOWNE was a goldsmith, whose name appears in the New York directory of 1805.

LS. BOUDO was a goldsmith of Charleston, S. C., in 1825. According to the directory his widow was carrying on the business in 1828.

JOHN CAMPBELL was of Campbell Church, jewelers, 28 Washington St., Boston, in 1833; John Campbell was at Washington St. in 1850.

DRYSDALE was probably William Drysdale, watchmaker and jeweler, Philadelphia, 1819-1850.

ENSIGN was probably Charles Ensig jeweler, of Troy, in 1844.

FELLOWS was probably A. Fellows, jeweler, of Troy, in 1844.

J. HOLDEN was a jeweler, at Quin Mass., in 1850.

T. KEELER was a silversmith, whc name is in the New York Directory 1805.

E. K. LAKEMAN was of Salem, Ma according to the Directory of 1850

LAMSON was probably of Lamson Farr, jewelers, of Lowell, Mass., in 185

JNO. B. McFADDEN & CO. were elers, of Pittsburg, in 1860.

F. MARQUAND was a jeweler, of N York, in 1824. The firm was later M quand & Bros., in 1832; Hy. J. Marqua in 1842; followed by Ball, Tompkins Black, successors to Marquand & Co; t Ball, Black & Co., and now Black, Star Frost.

RIGGS was probably W. H. C Rigg watchmaker and jeweler, of Philadelp 1819-1850.

W. M. ROOT & BROTHER, P. wer Pittsfield, Mass., and later became Roc Chaffee, in 1850.

H. SARGEANT was a silversmith Springfield, Mass., according to the Di tory of 1850.

VANCOTT was a jeweler, of New Y in 1845.

J. VALIANT was probably John Va a jeweler, Palmyra, Marion Co., Mo 1850.

WATSON: There was a James Wa clock and watchmaker, of Philade (1831-1850), whose mark later seem t have been JAMES WATSON, P LK STANDARD; there was also a John t son in Boston in 1850.

E. WHITNEY was in New Yor 1805.

A. WHITNEY (ASA) was a w maker, of New York, in 1805.

GEO. W. WEBB was a silversmit Baltimore, about 1835.

WOODS. Freeman Woods was a smith, of New York, in 1791.

As most of the above names are on spoon ware it would appear that w elers and watchmakers, as well as s smiths, made spoons or had them stamped with their names.

## thesis of Anisometropia and Antimetropia.

BY GUSTAVUS KAHN.

*(Continued from issue of Oct. 4.)*

; the other hand, where both eyes fix alternately, according to whether right or hand points to object, there is no fa-ed or dominant eye with the full correc-, and should binocular vision be better n single vision the glasses will be used n comfort from the beginning.

hould, however, binocular vision be se than single, while one eye is domi-t, a full correction may also be unsatis-ory, but in a lesser degree. Where vision nade worse binocularly with a full cor-ion of the anisometropia it is very btful whether the full correction will be useful or acceptable.

hen binocular vision cannot be made er than the vision of the dominant eye, igh both retinal impressions fall on cor-onding parts of the retinæ and are, efore, overlapped in the visual brain er, the vision of the dominant eye is ertheless recognized by the mind and natters little what lens is placed before other eye, as regards sight, while in-sed comfort may nevertheless accrue er from a full or a partial correction. s is because of the slightly increased l of vision, and not on account of the eased perceptive sight power in binoc-vision.

he object in training the young should therefore, to gradually restore the com-d visual perception in the mind of both nal images, which would tend to break the dominating habit of the better eye. best plan is to gradually increase the rection until a full correction may be ommodated, while the other eye, which is the strongest lens, should be exer-d by covering the better eye several rs each morning and afternoon during n distant and near visual exercise.

is not strange, after all, when many people who have gone through life with n refractive error uncorrected for dis-e, and even when both eyes have the e refractive error, it is often found that, le the glasses wonderfully improve vis-for each eye and proportionately for two eyes together, that the use of the correction will be rejected; this is ally the case in high myopia; the reason it is found more frequently in myopia n in hyperopia is because the myope's or for distance without lenses is so elessly impaired that he will find it diffi-to accustom himself in old age to see objects clearly, while hyperopic persons are always able to accommodate more or less, which helps to keep up in a measure the sight perception and sight tolerance of the brain; then we seldom find hyperopia exceeding seven or eight diopters, while it is not so very uncommon to meet much higher degrees of myopia.

Now, when both eyes have equally high myopia, there cannot be unequal retinal images produced, owing to equal strength of lenses, neither any prismatic power or decentration, provided the frame and lenses are properly centered; neither could there be unequal accommodation, because both may have much or very little, usually very little, accommodative power equally distributed between them.

The cause, therefore, must be in the difficulty of becoming accustomed to the change. Now, if this is the case when both eyes need equal power lenses and where, perhaps, no domineering influence of either eye exists, it follows that a rational explanation of the intolerance of full corrections in anisometropia offers itself voluntarily, which relieves us of the task of having to provide all sorts of questionable theories, when the solution of the problem is so near at hand.

The proof that both eyes participate in the act of vision to an equal extent and neither eye is favored by the mind partially or exclusively, is always a good sign that the acceptance of a full correction in anisometropia for constant use is possible to achieve; in that case vision should be even a trifle better with both eyes together, also without the fullest correction, while with the latter there should be a very pronounced improvement with both eyes over the best seeing eye. Should it, however, be found that vision with both eyes is better with the full correction than the vision of the best seeing eye, used singly, and that in applying the parallox test, one eye (usually the one having the least optical error and best vision) is favored as the dominant eye, we may assume that the trouble is caused by a muscular imbalance and prism exercise or prisms united with the lenses for constant use will be needed. Where neither eye is favored exclusively during the application of the parallox test the finger will point on the median line (that is, equally distant between a straight line from test object to each eye) and this shows that neither eye is especially favored, and that both eyes fix the test object equally, while the finger, not pointing directly at the test object, but between the two eyes, when either right or left eye is covered, proves a true parallox for the eyes, with perfect muscular balance, with the full stereoscopic effect in vision with both eyes.

Such testing of the parallox is not alone useful to discover if one eye is dominant, but we are also enabled to ascertain whether one eye has a muscular imbalance, and which one; this fact, although not having any bearing optometrically, might, however, be of the greatest use to the eye surgeon for operating purposes. For that reason great improvement of binocular vision over the best seeing eye used singly, always proves the absence of a dominating or a favored eye; a perfect parallox found with test already described in connection with the former confirms the fact of perfect stereoscopic binocular vision with balanced muscles.

On the other hand, an equal improvement in vision with both eyes together over single vision with the best eye alone, and where the parallox test is unfavorable, indicated a favored eye, and this always proves a muscular imbalance, which, when set aside properly, may be instrumental in enabling the anisometrope to accept a full lens correction with comfort.

If vision with both eyes is worse with full correction than best eye singly, such a case, if past adolescence, will never accept a full correction for each eye. Of course, for very young children something may be done by training the eyes.

When single vision with the best seeing eye is not better than with both eyes with a full correction, neither worse, it proves: (1) Either the total absence of recognition by the brain of the effect of the combined retinal image as a stereoscopic visual impression and the brain in reality recognizes the vision of the best seeing eye only. (2) Alternating vision, which may be present in certain cases of antimetropia, where the far-sighted eye is used for distance, with the mind ignoring the blurred myopic retinal image, and the myopic eye being used for reading purposes. It is very doubtful if glasses can be fitted in many such cases with any degree of benefit to the wearer. (3) With amblyopia alone or combined with strabismus, there never will be binocular vision and the dominant eye must receive all our care and attention, while most any lens (preferably one giving nearly a full correction) will do, because in case a true parallox should nevertheless exist a larger visual field will be obtained than if the eye not favored is entirely neglected; this has reference only in cases with or without amblyopia, with entire absence of strabismus in the least favored eye.

Dr. Levison, optician, San Francisco, Cal., recently visited Santa Paula, Cal.

# Optical Department.

## The Extrinsic Muscles and Their Development

(Résumé of address of JOHN C. EBERHARDT, Dayton, O., before the American Association of Opticians.

THE speaker desires to present for your consideration some of the principal factors that enter into the physiology of the ocular muscles, and suggest several methods for their investigation. We will consider—The philosophy of involuntary binocular macular fixation (Demonstration); why the deviating eye sees the false image displaced in the opposite direction, (Demonstration); maddox objective method of determining the character of muscular inbalance and locating definitely the deviating eye, (Demonstration); the deire for central macular vision the guiding sensation of binocular fixation, (Demonstration).

Where the motor muscles are normal the desire for causing retinal images to fall upon the macula lutea makes it impossible for the eyes to deviate from the visual line without causing diplopia, therefore, when the eyes are fixed upon a given point, and a prism is placed before one eye base out, it deflects rays of light, causing them to fall upon the outer retinal field producing diplopia, unless the rectus internus of this eye has the requisite power, when it will involuntarily rotate the eye inward until the macula is brought in line with these deflected rays.

Therefore in investigating the efficiency of the motor muscles it must be borne in mind that only the eye over which the prism is placed participates in the enforced excursion, the other eye continuing rigidly to fix the object.

This, therefore, is the basic principle which underlies all investigations of the motor muscles and should be carefully digested by exhaustive experiments, which are facilitated by fixing rigidly at a distance of about 30 inches, the retinoscope in such a manner that the reflex is formed upon the cornea, which will appear to the observer as a brilliant point of light in the pupillary area, and which, if parallelism exists will occupy relative positions within this area. Should, however, either eye turn in, out, up or down, a corresponding displacement will be noticeable in the deviating eye, whereas, it will occupy the proper position within this area in the fixing eye. If now a prism is placed before one eye, base out, this eye will be observed to turn inward, whereas, the other eye will retain its primary position, as evidenced by the position of this reflex.

Of the various extrinsic muscles the interni's are most susceptible to development and in this, nature again reveals her providence, for the function of convergence depending as it does upon those factors, is most in need of assistance, where either age or disease results in muscular deficiencies. Therefore, where asthenopic symptoms present themselves (regardless of the age of the patient), after refractive corrections have been supplied, the efficiency of the interni's should be individually investigated.

### MINIMUM CONVERGENCE.

In order to fix a given point at 14 inches, the eye must converge so that the visual axes will intersect at this point, the amount of such convergence depending purely upon the mathematical calculation of the triangle formed by the pupillary distance as the base line and the 14 inch point as the apex. For all practical purposes the following rule is sufficiently accurate—one degree of prism power will deflect a ray of light one-eighth of an inch in a distance of 14 inches.

Therefore if the pupillary distance be two and one-fourth inches, equaling eighteen-eighths inches, it would require 18 degrees of prism power or nine degrees for each eye to deflect parallel rays of light so that they will intersect at a point 14 inches distant; this, therefore, would be properly termed the minimum convergence.

### MAXIMUM CONVERGENCE.

If a patient supplied with proper reading lenses be caused to fix a row of No. 3 Snellen test letters, placed singly one under the other, thus—

M
I
N
I
M
U
M

C
O
N
V
E
R
G
E
N
C
E

he will be forced to exert his minimum convergence. If now prisms, base out, be placed equally before both eyes, diplopia will result, unless he can neutralize it by additional convergence, and the combined value of the strongest prism the eyes can thus fuse, added to the minimum convergence, will represent the *maximum convergence.*

This method is valuable for exercising deficient interni's and when coupled with the same procedure of each eye employed alternately while fixing a light at 20 feet will effectively augment subnormal convergence.

The externi, as well as the vertical muscles, can be stimulated along similar lines, although they as a rule respond very slowly, if at all, to exercise. Vertical inbalances if at all marked, are generally of a paralytic origin and call for systemic treatment, prisms properly supplied having value where diplopia is troublesome and where eyes can be taught to accept these.

### TEST FOR HYPERPHORIA.

If a patient supplied with reading lenses, be caused to fix a single row of No. 3 Snellen test letters, thus—

ARE THE LINES EQUIDISTANT AND PARALLEL.

with the double prism before right eye, he will see three lines of letters, which, if orthophoria exist, will be equidistant and parallel, any deviation from the parallel indicating an inbalance of the oblique muscles termed cyclophoria; if, however, central line is displaced either upward or downward it indicates an inbalance of the vertical muscles termed Hyperphoria.

### HYPERPHORIC CORRECTION.

Experiment seems to indicate that vertical muscles if found deficient to a great extent, are but indifferently susceptible to exercise and usually affected disturbances of a paralytic character. Exercise should be experimented with, but as a rule such cases require prismatic assistance, and where such is the case, much judgment must be exercised. It is here that the double prism and single row of letters referred to are valuable, for the question is—how much prism power is necessary to neutralize the vertical inbalance?

The test suggested demonstrates the fact that static conditions as revealed by the rod test at 20 feet differs from dynamic conditions obtained by observing the muscle poise at 14 inches, while accommodation is made active by the eyes resting the single line of No. 3 Snellen test, whereas fixation is suspended owing to the fact that the right eye through the double prism fixes the double artificial or deflected images, whereas, the left eye fixes the primary image absolutely independent of its mate, and that prism which will neutralize the vertical displacement and cause these images at 14 inches to appear equidistant is the one which should be supplied.

### CYCLOPHORIA.

Dr. Savage, in his "New Truths in Ophthalmology," published in 1895, and in more recent work on "Ophthalmic Myology," suggests the rythmic use of cylinders for exercising the oblique muscles.

The student will, however, find that the cylinders necessary to neutralize the cyclophoric tilting of images, so much disturb vision, that the efficiency of this method is largely defeated.

The following method, employed by a short time by the speaker, presents interesting material for investigation and will form the basis for an effective method. Take a single word like "July" in plain block letters one-quarter of an inch in height, placed upon a plain card, and a circular card disk one and one-half inches in diameter be fastened to this card with a pin through the center so that it can be rotated, the center of this disk being on a line one-quarter inches below the word "July," and an exact fac-simile of this word be placed upon the center of this rotary disk, and the observer place before the right eye a 10-degree prism base up, he will find the upper word July displaced downward and over the same word appearing on rotary disk.

If this disk be now slightly rotated the word on this disk will slant or tilt, producing a scissors-like doubled image, formed by the real tilted image on rotary disk and the upper image which has been displaced downward by the prism. If the eye be kept fixed on this crossed double image they will gradually fuse into one image, meaning that the oblique muscles have rotated the eye-balls as to compensate for the obliquity of the image.

As stated, this is as yet in an experimental stage, and is presented to study of these phenomena so that many may grapple with the problem presented in the hope that the results may contribute to the cause of optometry.

HONEST AND PROMPT RETURNS FOR YOUR OLD GOLD, SILVER, FILINGS, SWEEPINGS &c.,

*[Answers are also solicited from our readers to the questions published on this page.]*

QUESTION No. 1337.—**Furniture Varnish.**—*Would you please give us the recipe for a good furniture polish?* *L. E. & Bro.*

ANSWER:—Dissolve four ounces of the best shellac in two pints of 95 per cent. alcohol. Add to this two pints linseed oil and one pint of spirits of turpentine. When mixed add four ounces of sulphuric ether and four ounces of ammonia water; mix thoroughly. Shake when used and apply lightly with a sponge. This is an excellent article, especially when the varnish has become old and tarnished. Clean the surface well before applying the polish.

QUESTION No. 1338.—**Bronzing Copper.**—*Will you kindly tell me by what process copper may be bronzed or given a rich, bronzed color? What solution will make it?* *A. L.*

ANSWER:—If a solution is desired that will bronze copper by simple immersion the formulas of several are as follows: (1) Dissolve in one-half pint of boiling water 120 grs. of copper sulphate. Neutralize this solution with sodium hydrate and add to this 150 grs. of red iron oxide. Immerse the copper article, take out and heat over a hot plate or charcoal fire until the desired color appears. (2) A solution that gives to copper red and every shade to black is: Water, 1 pt.; sulphur, 1 dr.; pearl ash, 1 oz. The object is to be removed when the desired shade is obtained. A solution to be used with the electric current is: 50 parts cyanide of potassium; carbonate of potassium, 500 parts; chloride of tin, 12 parts; chloride of copper, 15 parts; water, 5,000 parts. Dissolve the cyanide in part of the water. Dissolve the other parts and add them all together. This solution works best when heated to about 100° F., with a copper anode and a mild current. The copper must invariably be chemically clean before any of above is applied and should be protected with a coat of lacquer.

QUESTION No. 1339.—**Oval Bracelets.**—*In making bracelets of 10-kt. gold I put a piece of copper in the bracelet in order to make it round. Kindly let me know how I can take the copper out of the bracelet when the latter is round.* *J. S.*

ANSWER:—When round tubes are employed in the manufacture of jewelry and a temporary lining of copper is used, such copper linings, if of moderate size, are generall removed by the use of acid. But in the making of bracelets, where round tubes or knife-shape tubes of larger size are needed, another method is sometimes used, which is described as follows: A piece of brass wire is drawn about eight inches long and a size smaller than the required size of the bracelet. A strip of flat gold about No. 2 size in the metal gauge and wide enough to fit the brass wire accurately is cut off, swaged into a semi-tubular form by means of the pane of the hammer, and then annealed. The gold, having been placed over the brass wire, is drawn tight by means of the drawing plate and draw bench, so as to bring the two edges of the gold quite close together, and strong binding wire is wound tightly upon the gold to keep the seams quite close during the subsequent turning-up process. The article is annealed and allowed to cool, then the gold on the brass is turned up into the shape of the bracelet, so as to leave the brass wire projecting about one inch. The article is then once more annealed, and before it is quite cold it is submerged in oil. The brass wire is drawn out by placing the unprotected end in the draw plate in the reverse side and in a hole smaller than the one the gold has passed through; a steady but gentle pull will extract the wire and leave the gold tube in perfect form; the binding wire is then taken off, the ends cut so as to fit properly and the joining of the tube is soldered up.

QUESTION No. 1340.—**Cleaning Frosted Silver.**—*I recently made a cyanide dip for cleaning silverware. It cleaned the plain or burnished parts very nicely, but the satin, or frosted portions, remain yellowish. I am not able to clean them good, although I dipped them several times. What is the cause of this?* *F. E. D.*

ANSWER:—The satin or frosted silver is sometimes difficult to clean, the satin finish allowing the dust to accumulate, which the cyanide cannot remove. The satin parts should be scratch-brushed with bran water, which can be easily chucked on a jeweler's or polishing lathe. Care must be taken that the brush does not touch any of the plain parts, unless they are to be reburnished or polished. This scratch-brushing will remove the fine accumulation and restore it to its original finish.

QUESTION No. 1341.—**The Production of Quicksilver.**—*Where is the most quicksilver produced, and how much is the annual production?* *H. S.*

ANSWER:—The United States produce the most quicksilver, and the amount is estimated at 1,480 tons; Spain produces 1,028 tons; Austria, 556 tons; Italy, 355 tons, and the balance comes from Russia and Mexico. The total output is estimated at 4,000 tons.

QUESTION No. 1342.—**Iridium.**—*For what is iridium principally used?* *A. B.*

ANSWER:—Iridium is mostly used for the points of gold pens. The iridomine, called by the manufacturers "diamond point," is simply a grain of iridium soldered on the point of the pen, which is afterward sawed in two to make the two nibs, and ground into proper shape.

QUESTION No. 1343.—**Reduction of Tin at the Mines.**—*How is the tin reduced at the mine, and how much is produced in Cornwall, Eng.?* *C. B. S.*

ANSWER:—The annual output of the world is estimated at about 75,000 tons, of which Cornwall produces one-fourth. More than five-sixths of the output of tin is derived from secondary alluvial deposits, but all from Cornwall comes from vein mining. The vein stuff is broken either by hand or in rock crushers, and stamped to fine powder in stamp mills. These mills are practically large, mechanically worked pestles and mortars, the stamp proper weighing from 500 to 1,000 lbs. After the mineral has been crushed small enough to pass through a sieve with perforations or twentieth of an inch in diameter, it is carried from the stamp in suspension in water by means of a series of troughs, in which the heavier mineral is collected. The mixture is then passed through a series of washes, which reduce its component parts to tinstone and arsenical pyrites. Refined thus far, it is submitted to a calcining process, and rewashed, until finally black tin containing from 60 to 65 per cent of metal is left. The dressed ore is then smelted.

QUESTION No. 1344.—**Metal Casting From a Berry.**—*I want to make a metal casting from a blackberry. How must I proceed and use the natural berry as a model?* *S. L. T.*

ANSWER:—To produce a plaster mold in which to cast the metal you must make use of the Japanese method. Mix dental plaster and water into a thin paste, then pour it into a small cardboard box, placing the berry in this so that the plaster will surround the berry an inch or more. When the plaster is set, remove the cardboard and place the mass in a hot place for several days. Drill a hole to the berry and bake the mold over a fire until the berry can be blown out in ashes. The molten metal can then be poured into the mold and a perfect model will be obtained.

QUESTION No. 1345.—**To Clean Nickel and Copper.**—*I would like a good composition suitable for cleaning copper, nickel and other metals.* *B. C.*

ANSWER:—The French are using a product which is claimed to be very effective. It is composed of wool grease, 46 parts; fire clay, 30 parts; paraffine, 5 parts; cocoa wax, 5 parts; cocoanut oil, 10 parts; oil of mirbane, 1 part. After mixing these different ingredients, which will form a paste, this latter is molded into a cylindrical form and introduced into a case, so that it may be used like a stick of cosmetic.

QUESTION No. 1346.—**To Clean Britannia Metal.**—*We are making some articles out of sheet britannia and the pieces are small and difficult to clean after they have been buffed. How could I best clean them?* *C.*

ANSWER:—Britannia is easily cleaned with gasoline. Wash the object in it and allow to dry by evaporation.

## and Ceramic Treasures of the Late Servian King, Sold at Auction.

EGINNING yesterday, and on the four following days, an interesting collection art objects, etc, formerly the property he ill-fated Kings of Servia, is to be sold auction in the famous Dorotheum at nna.

he tragic circumstances attending the nction of the Obrenovic dynasty will be h in the recollection of our readers. All property of the last two kings of Servia sed by Queen Natalie, who directed that rything which recalled the terrible fate ier son or which had been used by him sonally should be given to the monas- of Kruschedol, where he was buried. rything possessing historic interest, such family portraits, national presents, etc., ether with the celebrated collection of s of King Milan, was bequeathed to Servian National Museum, while the k of the property, comprising works of silver, porcelain, glass, furniture, de e articles, etc., was given to the Doro- um, to be sold by auction, the proceeds be devoted to founding charitable in- utions. Not a single article from the rooms in which the tragedy was enacted will be sold. A short description of the contents of the collection may be interesting:

ROYAL BERLIN VASES PRESENTED BY EMPEROR WILLIAM TO KING MILAN.

TETE-A-TETE TEA SERVICE OF OLD SÈVRES.

An antique bronze figure after Giovanni da Bologna, old Empire and rococo fittings, an armchair for the writing table, a marble group representing an eagle and chamois, two old clocks and a magnificent branched candlestick belonged formerly to Prince Michael, who was murdered in the park of Topschider in 1868.

Interesting mementos of King Alexander are: A silver cabinet with beautiful baroque table silver; cups and dishes; a large picture frame worked in filigree; a splendid large Meissen vase, and a magnificent silk carpet presented by the Sultan and made in his private factory. All the furniture and handsome fittings of the living and reception rooms; numerous Oriental carpets of rare beauty; costly porcelain; majolicas; old faience, and many presents from ruling sovereigns forming part of the property of King Milan.

Italy is represented by old pictures and an artistic, finely carved and splendidly furnished dining room; Vienna and Paris, where King Milan passed many years of his life by pictures by Blaas, Max, Stuck and Pausinger; by two Gobelins; faiences and old porcelain, together with all the remaining fittings and useful drawing room articles. Most of these were purchased by

them have been reserved for the royal collection in order to exhibit it in a really worthy manner. The handsome showrooms of the institution and the resources at the command of the management are probably not the least of the considerations which have determined the choice of the Dorotheum for this sale in spite of foreign

RICH SÈVRES VASE.

offers. By this choice the Dorotheum has at once been raised to the rank of the auction institutions which are consulted when it is desired to dispose successfully

COLLECTION OF RARE PLATES.

THE EXCLUSIVE ART GOODS HOUSE

# The Virtues Immortalized.

Human and celestial. The artist's happiest thoughts, his highest conceptions, his loftiest ideals are expressed and perpetuated in Marble. Volumes might be written about their charms, and epics could be founded, symphonies composed and melodies brought forth. To view them is an inspiration.

There are Classical Figures—"Venus de Milo," "Victory of Samothrace," "Psyche"—with a chaste beauty worthy of the old Grecian masters. Historical Pieces—"Dante," "Napoleon," "Henry IV"—with a dignified poise befitting the subjects. Fanciful Conceptions—"Italian Girl," "Music," "Bluff," "Childhood's Sweet Repose," "Flute Player"—children of admiration. A group of busts symbolical of the flowers—"Pansy," "Sun Flower," "Iris," etc.—most charming and beautiful.

Some in the pure white marble and others embellished with the admirable Patina Tints. All the finest product of the Carrara quarries. In color, texture, soundness, durability and finish unexcelled, and deftly carved by the world's greatest sculptors.

Our exhibition of Marble Statuary this year is on a higher plane and displays more marked artistic excellence than ever before. A wide range of selection, from small pieces to life size figures.

## A Family of New York Pewterers.

FRANCIS BASSETT was apprentic to William Horsewell, pewterer, 1706, for seven years, but as Horsew died in 1710 he must have finished his ti with some other craftsman. Bassett wa well known citizen of his time, living the south side of Queen (now Pearl) a little east of Maiden Lane. He took his freedom, 1718, and died 1758. His s John, free, 1732, lived at what is now Pearl St. He died in 1761, mentioning t sons in his will:

"If either of my two sons, Francis Fredrick, shall have a mind to have my casting moulds belonging to my tr he shall pay for the same £50. I leave my son Fredrick 'my vice turning hoo wheels, blocks, and all other tools."

"Fredrick" evidently bought the mou appearing in the list of freemen in 1 In 1765 he made an affidavit as a w ness to a will, in which he describes him as Frederick Bassett, pewterer, aged late of New York, School Master.

Francis Bassett, a son (?) of the ab appears in the first New York Direct as a pewterer, 218 Queen (Pearl) St., most opposite to John Burger, the sil smith. J. H. I.

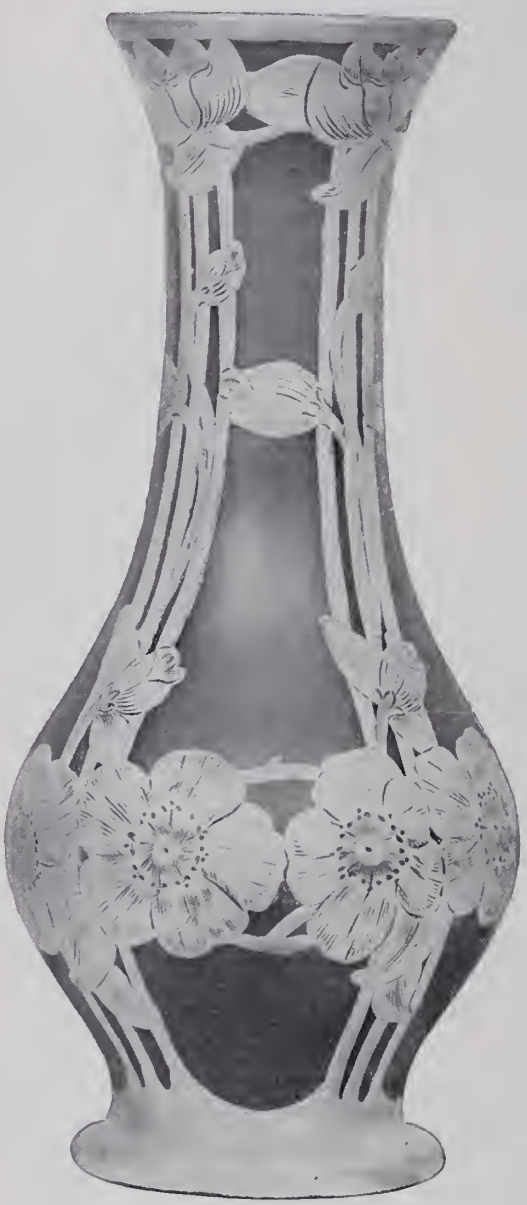
## ANDSOME SILVER SERVICE FOR THE BATTLESHIP NEW JERSEY.

IE silver service to be given by the State of New Jersey to the United es battleship named in honor of that mmonwealth will cost about $10,000, and mises to be one of the richest and most tained by American silversmiths of to-day.

The complete set comprises some 57 pieces and contains about 1,500 ounces of sterling silver 925/1,000 fine. The keynote of the design is colonial, symbolizing the

18½ inches and stands 14½ inches high, while the base upon which it rests is four inches high, 28½ inches long, with a width of 19 inches.

On either side of the bowl are eagles heads,



DESIGNS OF THE SALIENT PIECES OF THE SILVER SERVICE BEING MADE FOR THE BATTLESHIP "NEW JERSEY."

ostantial services ever furnished to a ves- of the navy. It is not only a fitting pression of the generosity and good will the people of the State, but also exem- fies the high degree of artistic merit at- early period of the history of this State.

A superb centerpiece, consisting of a large punch bowl and stand, forms the principal piece of the service. This bowl has a capacity of five and one-half gallons, a diameter with laurel wreaths suspended from their beaks. The wreaths also serve as handles. Festoons of flowers are gracefully draped from the neck of the eagles and at regular

# The Sternau Coffee Machine

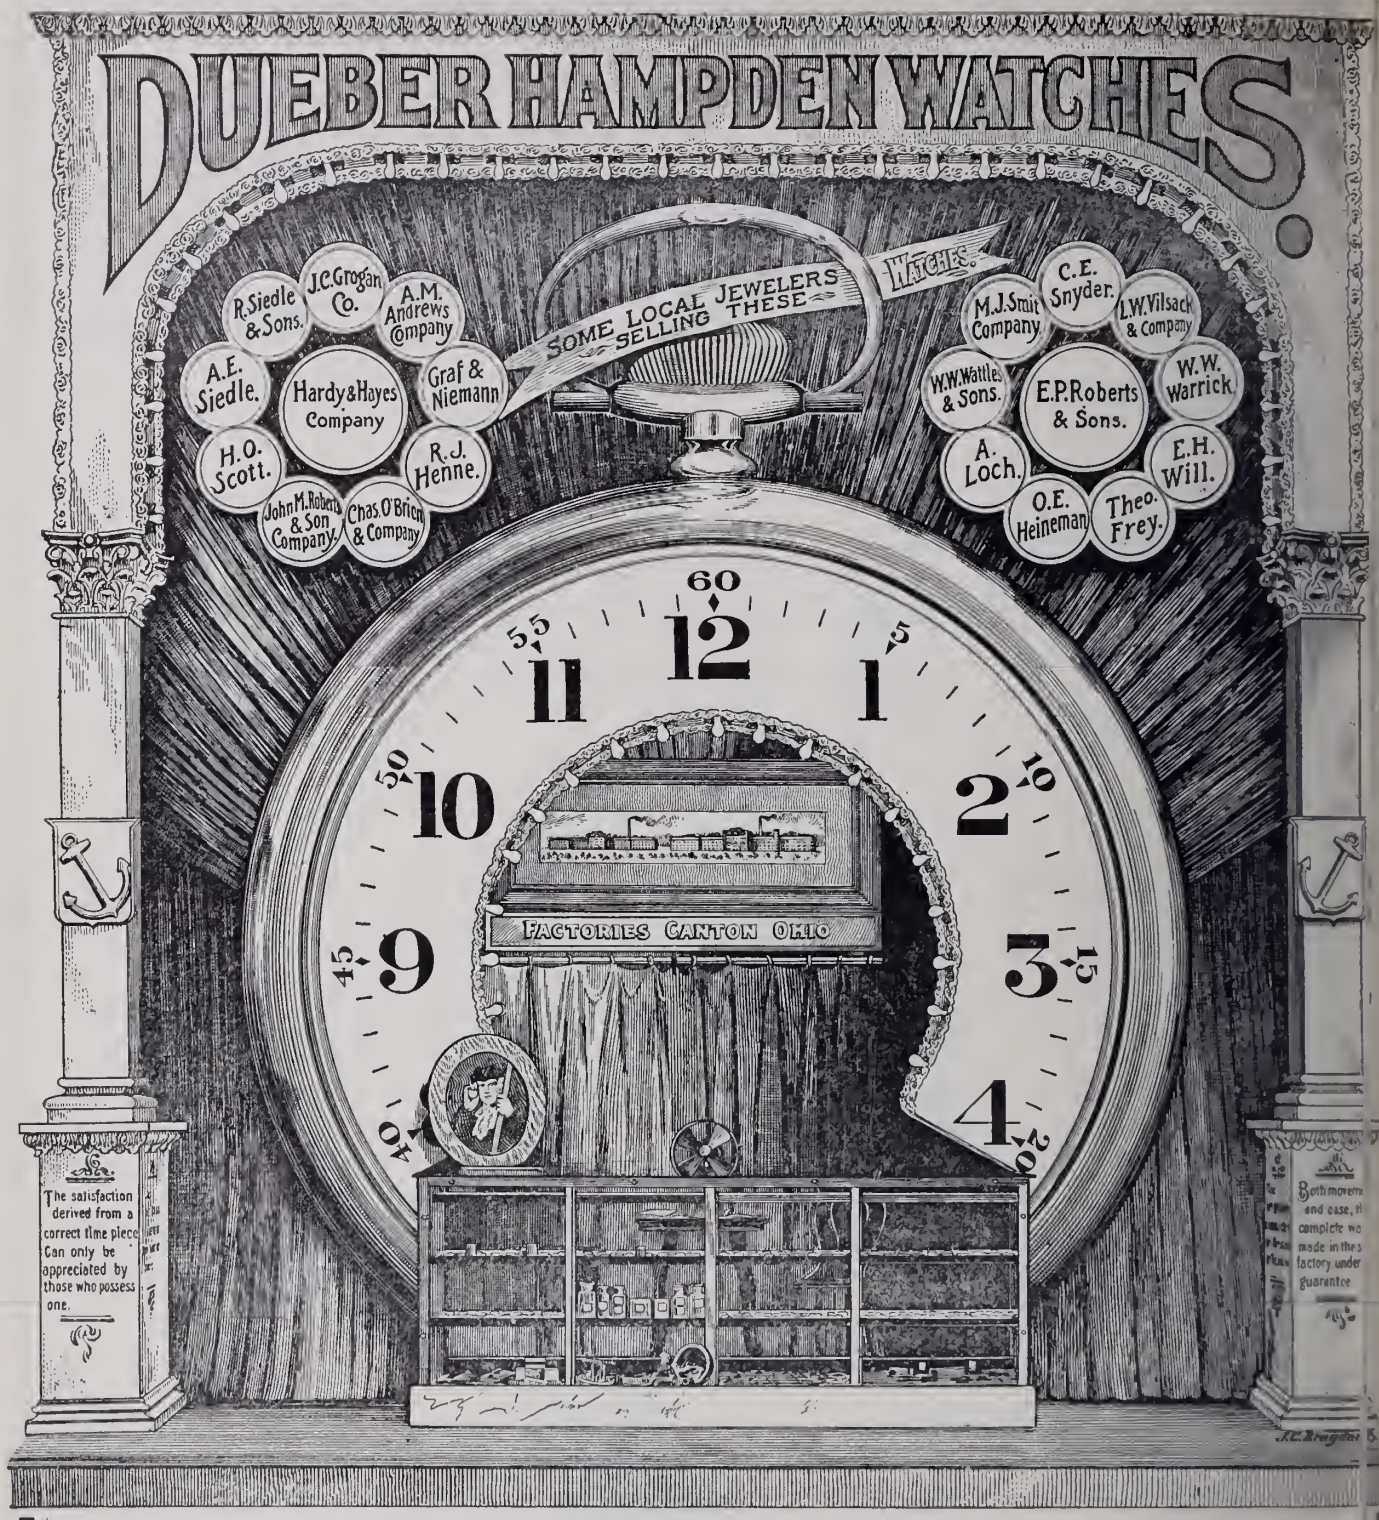
Jeweler Jones sat at his desk one Fall day,
Longing for something that he could make pay.
"I have it," said he, "to New York I will go
And purchase a stock of the well-known Sternau."

At home he tried one of them, so he would know
How to talk the advantages of the Sternau.
His wife was so pleased with the coffee it made,
That she said it put all the old pots in the shade.

*If It Burns Alcohol we Make It*

The next day Miss Smith came into the store
And spied The Sternau as she entered the door.
What's that? Did you say it's a Coffee Machine?
And Jones answered "Yes, it's the best I've yet seen"

The old coffee pot now stands on a shelf
And Miss Smith distils perfect coffee herself,
At the table each morning, which all goes to show
That pleased are all users of The Sternau.



Her friends now all use this Coffee Machine,
For a sale of The Sternau does many sales mean;
And you, Mr. Jeweler, now have the same chance
To brighten your stock, and your profits enhance.

Shall we mail you our Coffee Machine Booklet?

## ıdsome Silver Service for the Battleship "New Jersey."

(*Continued from page* 1.)

rvals are caught by bows, from which g anchors. In the semi-circles formed the festoons of flowers are the seals of State of New Jersey and the United tes. Other medallions contain reproduc-ıs of scenes and periods typical of the ly history of the State. Conventional sed leaves and flowers form the orna-ıtation of the base of the bowl.

'pon either side of the oval base are fe-e figures, seated, representing "Prosper-" and "Liberty," symbolizing the pros-ity of the State and the liberty-loving racteristics of its people. Surrounding figure are delicate shells and other sug-tions of the sea, while the culmination eached in the effect of the ocean waves h g, as it were, against the base of some regnable fortress, but in reality sup-ting the punch bowl. Along the front of base is an inscription reading, "Pre-ted to the Battleship New Jersey by the ızens of the State," with the seal of napolis inserted between the words "Bat-hip" and "New Jersey."

While the centerpiece with the large punch vl is designed for banquets and other cial occasions, there is another smaller vl for less formal use. This latter piece a capacity of two and one-half gallons, liameter of 12 inches and stands nine l one-quarter inches high.

Among the other notably rich pieces are 26-inch salver, picturing in a fine piece etched work, a battleship under full ım; a pair of candelabra, each with nine ıts; a tea service, consisting of teapot, ee pot, sugar bowl, cream and hot milk hers, hot water kettle and waste bowl; ıt vases; jardiniere; four compotiers; inch meat dish, four vegetable dishes; r *hors d'œuvre* dishes; asparagus dish, entree dishes; six salt cellars, with ons to match; six peppers, etc.

When completed the entire service will fitted in two handsome, large oak chests, ich, as well as the silver pieces, are being de at Tiffany & Co.'s Forest Hill works, wark, N. J.

## New Process for Inlaying Metals.

RECENT advices from England say that Sherard Cowper-Coles has invented a v process by which, it is claimed, met-can be burned into one another at a ıperature hundreds of degrees below the lting point of any one of the metals, s enabling new effects to be obtained l also the blending of various metals, ich hitherto has been impossible. Inlaid tal work can be produced similar in ct to the finest damascening, or, on the er hand, the process readily lends itself larger work requiring greater boldness, h as panels.

By a variation of temperature the depth the inlay can be regulated, and at the ne time one metal can be considerably sed above the other, at the will of the rator. Very pleasing effects can be ob-ned by the process.

Max L. Gibson, Linneus, Mo., has dis-ıtinued business.

# The Stamping

of a Trade-Mark in our Rings, Cuff Buttons and Shirt Studs is as important with us as the pattern or finish. We know there can be no question as to quality or workmanship, therefore we confidently stamp each article like above picture, thus guaranteeing them to the Retail Jeweler.

¶ If you want Rings, Cuff Buttons or Shirt Studs that you can honestly recommend, buy only those stamped with the above Registered Trade-Mark, for back of this Trade-Mark stands over forty years of honest manufacturing.

Edward Repath was arrested at Guel Ont., and brought to Toronto, Ont., rece ly, charged with a petty theft commit some months since. On searching his ro and clothing a number of small but valu articles of jewelry, two watches and unset diamonds were found. He is pected of being concerned in some of numerous jewelry robberies which have cently taken place.

The Canadian Minister of Justice hav reported that the statute recently passe British Columbia imposing a tax of upon commercial travelers from outside province was constitutional, the Canad Government has decided not to inter with it. The Dominion Government sesses the power to veto any provincial actment irrespective of its constitutiona but it is seldom exercised, and will not resorted to in the present case. This sion is regarded as foreshadowing their tion in the more important matter of Quebec provincial act imposing a tax $300 upon representatives of firms out of Canada doing business in that provi

## adge Presented to a New York Justice.

(GOLD) badge which distinctly reveals art in metal work and precious stone ting was recently manufactured by A. dwig & Son, 75 Nassau St., New York, the Harlem Independent Schuetzen rps. In the center of the badge is the l of the City of New York, from which nds out a four-carat diamond. The ornamentation, including scrolls, lau wreaths and other designs, are much ad- red by all who have seen this superb ecimen of workmanship. The scroll above seal is inscribed with the name Lorenz

DIAMOND BADGE FOR JUSTICE ZELLER.

ller, the Justice of the Court of Special ssions, to whom the badge was presented a banquet given recently. The cost of oducing this artistic jewel was $1,000.

## Family of Noted New York Silversmiths.

E ROUX, BARTHOLOMEW, silver- smith, who took out his freedom in e city of New York, 1687, lived at what is w 27 Broadway, the Stevens House oc- upying the site and that of adjoining lots. le was assistant Alderman for the West Vard, 1702-1712, and died in 1713, leaving ree sons, all silversmiths. Of John, who ok out his freedom in 1722, and Bartholmew, free in 1739, little is known; the tter died in 1763, making his brother, harles, residuary legatee.

Charles Le Roux, free, 1725, was executor of his father's will, and assistant lderman of the East Ward, 1735-1738. Ie made the following gold boxes for the orporation for enclosing the seals of complimentary freedoms: 1720, for Governor Villiam Burnett, at a cost of £19 3s.; 1723, or Capt. Peter Solgard, £23 19s.; 1728, for overnor John Montgomery, £20 6s. 6d.; 732, for Governor William Cosby, £20 11s. d.; 1733, for the Duke of Grafton, £14 8s.; 743, for Governor George Clinton, £20; ilver boxes—1728, for Capt. Covil Mayne, 1 2s. 9d. "For two silver, Guilt Boxes or the Freedoms of the Honble Major Alxander Cosby and Thomas Freeman, Esqr.," £7 1s. 11½d. He also probably made he box of gold for enclosing the seal of he Freedom presented to Andrew Hamton, of Philadelphia, 1735.

## Postal Clerk at New York Arrested on Charge of Stealing Jewelry from the Mails.

Charged with the theft of a decoy package containing a turquoise ring, Charles P. Tucker, a distributing clerk in the package department of the General Post-Office at New York, was arrested, Thursday, by Inspectors Jacobs and Mayer. The Post-Office authorities say that in the last six months they have received many complaints from Maiden Lane firms of the disappearance of minor articles of jewelry from the mails. Among the firms from whom complaints were received were: Aikin, Lambert & Co., Hugo Baer and others. When Tucker was arrested a number of articles of jewelry were found in his possession; also some pawn tickets. He was arraigned before Magistrate Shields, and held in $2,500 bail for the United States Grand Jury.

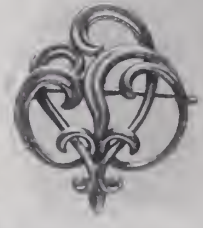
A representative of Aikin, Lambert & Co. told a CIRCULAR-WEEKLY reporter that their losses have been for the most part fountain pens, which disappear from time to time both in the incoming and outgoing mails. When these losses occur the company notifies the Post-Office Department. More valuable articles the company usually sends by express.

Secretary Ira Goddard of the Jewelers' Safety Fund Society said yesterday that thefts from registered mail have been infrequent. Manufacturers and merchants who ship by express or registered mail may obtain ample insurance protection. The Jewelers' Safety Fund Society insures up to one-fourth of the amount of the policy, and the policy may be as high as $1,000. The society makes no recommendation to the shippers as to whether the shipments be made by mail or by express. The more valuable merchandise is ordinarily sent by express. The society advises shippers, when the merchandise is of considerable value, to place upon it a valuation of not less than $50, because when this is done the express company keeps a record of the package as it passes from office to office, and the danger of losing is minimized

As is well known, express companies are liable only up to $50 if no valuation is made at the time of the shipment, but are liable for the full value of the merchandise if that is declared. Many jewelers find it advantageous not to do this because of the increased express charges, and to depend instead on the society's insurance.

An insurance company insures packages sent by mail up to the amount of $5 if not registered and up to $25 if registered. Shippers availing themselves of this insurance fill out numbered coupons, one of which is placed inside each package that is mailed.

---



A message was received recently, in San Diego, Cal., from Supervisor Jasper, who is now in Portland, to the effect that the jury on awards had given a gold medal to San Diego County for making the best gem display, and also a bronze medal for the best display of lepidolite in the mineral department. The gem display is acknowledged to be the best that has ever been made on the Pacific Coast and is valued at many thousands of dollars.

### Butler, Pa., Jeweler Arrested on Charge of Setting Fire to His Store.

PITTSBURG, Pa., Oct. 11.—S. Shamburger, proprietor of the Pittsburg Jewelry & Optical Credit Co., of Butler, Pa., who disappeared from the oil town, Saturday, before the discovery of the mysterious blaze which destroyed his store, was taken to a cell at the Butler jail. He is charged with burning the property to defraud the insurance companies.

Some time ago Shamburger opened a store in S. Main St. and placed $10,000 insurance on the stock. According to stories emanating from Butler, Shamburger shipped a big lot of goods away from there last Saturday, and on Sunday morning, it is stated, his place was discovered on fire. The building in which his store was situated is owned by the Daniel Wuller estate. A number of drawers in the show cases were examined after the fire and were found by insurance agents to be saturated with oil. The remains of a candle was also found, and this caused additional suspicion. Two pint milk bottles, two half-pint bottles and a tumbler all containing heavy oil and wads of tissue paper saturated with oil were also found in the drawers of the show cases.

Sunday Shamburger and his wife could not be found. He, however, returned to Butler about 11 o'clock in the night, and a short time afterwards County Detective Hoon found Shamburger and arrested him. He was taken to the office of Justice Keck, and in default of $5,000 bail was committed to jail for a hearing, charged with malicious burning of the property of another with intent to defraud insurance companies.

The jeweler denied positively that he had anything to do with the causing of the fire. He told the police that everything was in good shape when he left Butler on Sunday morning to go to Pittsburg. He said that he heard nothing of the fire or the destruction of his property until about 2 o'clock Sunday afternoon. He was in church when a member of the family came to the church, and calling him out, told him of the fire. He then declares that he came to Butler by the first train arriving there about 11 P. M. He said that he believed that he would have no trouble in proving himself innocent of the charge, when the case came up for a hearing. After being lodged in jail the accused sent for the district-attorney and had a conference with that official regarding the bail necessary to secure his release. But the conference was fruitless, and the district attorney could make no statement as to what was said during the interview.

Mr. Shamburger, up until last July, was a resident of Pittsburg. He lived in Crawford St. and is a property owner here. Prior to engaging in business at Butler he was a peddler, and bought much stock. It is reported that he bought considerable goods here to stock his store. It is stated that Shamburger has always borne a good reputation and paid his bills promptly.

---

PITTSBURG, Pa., Oct. 13.—S. Shamburger was arraigned for a hearing at Butler yesterday, on the charge of setting fire to his store, and was held for court. His bail was reduced from $5,000 to $3,000, and at last accounts he was hunting to find a bondsman.

### Death of August H. Stecher.

MILWAUKEE, Wis., Oct. 11.—August H. Stecher, a well-known jeweler and highly respected member of the business community here, passed away Saturday afternoon at his home, 534 5th St. Death came after a long illness, Mr. Stecher having suffered with cancer of the stomach for many months. He underwent an operation for his trouble in February at Chicago, and, in the hope of regaining his health, gave up his business and spent the Summer at Cedar Lake. This, however, did not benefit him and he returned to this city, where he grew worse until his death.

The deceased was born in Luebbecke, Westphalia, Germany, March 15, 1851, and came to this country when 15 years of age. When a young man he learned the watchmaker's trade in Sheboygan, and later went to Fond du Lac. Thirty-five years ago he came to Milwaukee, and as a youth started in the jewelry trade. He was for 10 years employed by Christian Preusser, and in 1881 started in business for himself on 3d St. with Wm. Berndt, under the style of Stecher & Berndt. This partnership, however, was dissolved in April, 1887, and from that time on he conducted business alone at the corner of State and 3d Sts.

Mr. Stecher was prominent in social life and had a large circle of friends. He was a member of the Milwaukee Turn-Verein since his youth, and had done much for that organization.

The business will be continued by Mr. Stecher's estate, the store remaining in charge of Henry F. Stecher as manager.

### Death of Frank E. Smurr.

MARTINSBURG, W. Va., Oct. 11.—Frank E. Smurr, who died last week at this place, was for a number of years proprietor of a jewelry establishment here, and was well known in this section. Death was due to dropsy and came after an illness of six months.

Deceased was a native of West Virginia, and was born in Shepherdstown about 37 years ago. As a child he came to Martinsburg, and had lived in this city continuously from that time. He started in the jewelry business in February, 1900, and, although at first had small capital, by his ability as a jeweler and his acumen as a business man, he succeeded in building up a good trade.

Mr. Smurr was married a short time ago and is survived by his widow and parents Mr. and Mrs. J. H. Smurr, and one sister Miss Bertha Smurr, of this city.

### Death of John H. Mabie.

John H. Mabie, junior member of the firm of Mabie, Todd & Bard, manufacturers of gold pens, pencils and fountain pens died suddenly Tuesday evening, Oct. 10. Mr. Mabie, who was 57 years of age, had been attending to business up to the day of his death. After he left his office that day he took a short ride in his automobile with members of his family. On his return to his home he told his sons that he was not feeling well, complaining first of a pain in one of his arms. His illness became so pronounced that he decided to lie down, and before his sons could summon a physician death had claimed their father.

John H. Mabie had been connected from early boyhood with the business of Mabie, Todd & Bard, having entered the factory as an apprentice in 1862. He thoroughly learned the practical part of the pencil and holder end of the business and gradually rose in his position until he became foreman of the factory in 1872. Feb. 1, 1873, John Mabie, his father, who was the senior member of the firm, retired, and John H. Mabie and his brother, George W. assumed the father's interest, formed a partnership with Henry H. Todd and Sprague Bard, to continue the business under the same name. The firm continued without change until 1900, when H. H. Todd and J. Sprague Bard retired. George W. and John H. Mabie have since composed the firm, the latter giving his personal attention to the factory.

The funeral took place last Saturday at the family residence in Hackensack, N. J.

No change will be made in the style of the business, which will be continued by George W. Mabie.

### Death of Solomon Bachrach.

Solomon Bachrach, formerly in the wholesale and retail jewelry business in New York, died Wednesday of last week at his home 19 E. 94th St., New York, in his 64th year.

Mr. Bachrach began business by selling jewelry in a small way, and after accumulating some means opened a store on Grand St. He formed a partnership with his sons Isaac and Abraham Bachrach, under the firm name of S. Bachrach & Sons, and the retail business was expanded to include a wholesale trade. Mr. Bachrach bought the building in which his store was located, and after a time paid considerable attention to real estate, investing in tenement property and relinquishing to his sons the care of the jewelry business. The firm went out of business several years ago.

Mr. Bachrach is survived by his widow, Mrs. Rachael Bachrach, and seven children, Abram, Irving, William, Julius, Philip, Harry Bachrach, and Fannie Cohen. The funeral took place Thursday afternoon from the house and was largely attended.

James Hawkins, who for a period of 4 years was employed as jeweler and engraver for H. Joseph, Mattoon, Ill., died about a week ago as a result of an epileptic stroke. The deceased was buried with the rites of the Masonic order, having been a member of Lodge No. 260, A. F. & A. M. Mr. Hawkins was 51 years of age.

## Recent Decisions by General Appraisers on Jewelry and Kindred Lines.

In cases involving duties on jewelry, precious stones and imitations, the following decisions of the Board of United States General Appraisers, New York, were last week published by the Treasury Department:

JEWELRY, METAL ORNAMENTS.—Protests of Gimbel Bros. against the assessment of duty by the Collector at Philadelphia. The merchandise was classified as jewelry under Par. 434, Tariff Act of 1897. It consisted of (1) boa buckles composed of gun metal, in the form of large hooks and eyes with link chains and balls attached, intended to be permanently attached to fur collars and to boas; (2) gun-metal muff and fan chains; (3) gun-metal card cases; (4) silver chatelaine bags; (5) mirrors in gun-metal cases, somewhat in the form of lockets, and (6) certain metal ornaments, cabochons and buckles. As claimed by the importers, the Board held all these articles to be dutiable as manufactures of metal under Par. 193, Tariff Act of 1897, except those comprised in the fifth class, which were held to be dutiable as mirrors under Par. 112.

BEAD NECKLACES.—Protest of Moses Norris against the assessment of duty by the Collector at Baltimore. Certain beaded necklaces were claimed to be dutiable as manufactures of the component material of chief value, rather than as jewelry under Par. 434, Tariff Act of 1897, or as beaded articles under Par. 408. Protest overruled.

BEAD NECKLACES.—Protest of John J. Robinson against the assessment of duty by the Collector at New York. Certain bead necklaces were held to be dutiable as articles composed of beads under Par. 408, Tariff Act of 1897, as assessed.

JEWELRY.—Protest of Veit, Son & Co. against the assessment of duty by the Collector at New York Certain buckles, brooches, necklaces, etc., were held to have been properly classified as jewelry under Par. 434, Tariff Act of 1897.

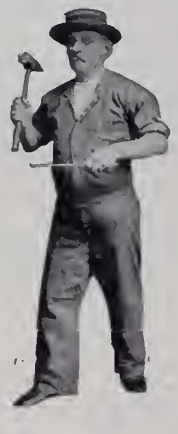
PIERCED AMETHYST BALLS.—Protest of Lebolt & Co. against the assessment of duty by the Collector at Chicago. Protest sustained on the authority of G. A. 6097 (T. D. 26586), relating to drilled opal balls.

IMITATION JET ARTICLES.—Protest of Adolph Strauss & Co. against the assessment of duty by the Collector at New York. The merchandise was claimed to be dutiable as manufactures of jet under Par. 115, Tariff Act of 1897. Protests overruled, it appearing that the component material of chief value was paste in imitation of jet.

IMITATION PEARLS, IMITATION PRECIOUS STONES.—Protests of Albert Lorsch & Co., *et al*, against the assessment of duty by the Collector at New York. G. A. 6086 (T. D. 26541) and G. A. 6088 (T. D. 26554) followed, relating to imitation precious stones and imitation pearls.

IMITATION PEARLS.—Protest of American Express Co. against the assessment of duty by the Collector at New York. G. A. 6088 (T. D. 26554) followed, relating to imitation pearls.

MILLINERY ORNAMENTS, JEWELRY.—Protest of Veit, Son & Co. against the assessment of duty by the Collector at New York. G. A. 6130 (T. D. 26653) followed, relating to millinery ornaments.



MILLINERY ORNAMENTS, JEWELRY.—Protests of A. Bader Co. Same as protests of Veit, Son & Co. above.

TOY WATCH CHAINS.—Protests of A. Strauss & Co. against assessment of duty by the Collector at New York. As to a portion of the goods, consisting of flimsily constructed gilt chains for toy watches, the Board sustained the importers' contention that they should be classified as toys under Par. 418, Tariff Act of 1897. G. A. 6027 (T. D. 26335) followed.

### Death of Alonzo F. Bennett.

NORTH ATTLEBORO, Oct. 12.—Alonzo F. Bennett, one of the most prominent residents of Wrentham and one of the pioneer jewelry manufacturers of North Attleboro, died at his late home in the former town Monday morning as the result of a paralytic shock, the third he had suffered in nine months.

Deceased was born in West Wrentham 67 years ago, his parents being Isaac and Lydia Hayden Bennett. When quite young he entered the employ of Sturdy & Sherhardson, jewelry manufacturers at Wrentham Center. After remaining with the firm about two years he accepted a position with the firm of E. Ira Richards & Co. of North Attleboro. In 1872, in company with Charles Young, of this town, he engaged in the manufacture of jewelry under the firm name of Young & Bennett. The firm dissolved in 1888 and since that time Mr. Bennett had engaged in no business enterprise except for the first five years of the existence of the firm of Riley, French & Heffron in which he was a silent partner. Mr. Bennett is survived by a widow and two daughters, a brother, Charles Bennett, of Springfield, Mass., and one sister, Dr. Alice Bennett, of Brooklyn, N. Y. The funeral was held this afternoon and the interment took place in the Wrentham Cemetery.

### War Department Solicits Bids to Furnish Field Glasses for Signal Corps.

WASHINGTON, D. C., Oct. 13.—The War Department, through the chief signal officer, is inviting sealed proposals until Nov. 11 for furnishing the Signal Corps with 250 field glasses, according to specifications. Bidders must forward a sample glass, properly tagged for identification, to the Chief Signal Officer, U. S. Army, Washington, D. C., by prepaid express before the date of opening bids. Bidders must also state at what price per pair glasses will be furnished singly when purchased individually by officers of the army. Bidders must also show in the body of their proposal the name and place of business of the manufacturer of each article upon which the bid is submitted.

Prospective bidders can obtain blank forms, specifications and detailed information by applying to Gen. A. W. Greely, Washington, D. C.

### Death of G. Offenhauser.

OMAHA, Nebr., Oct. 14.—News has just been received here of the death at Norfolk, Nebr., of G. Offenhauser, of G. Offenhauser & Co., retail jewelers, of the latter place. Death was caused by heart disease.

Mr. Offenhauser was a young man and had only been married about a year. Mr. Wolf, with the Shook Mfg. Co., of this city, went to Norfolk, and helped to take the body to Shenandoah, Ia., where the remains were interred. The jewelry business of the deceased will be sold.

W. B. Brewster, who recently created a scene in the store of Hope Bros., Knoxville, Tenn., by displaying a pistol, which he discharged, was arraigned in the local court on Monday of last week, on two charges. Brewster pleaded guilty and fines aggregating $75 were imposed upon him.

THE BEAUTY OF THIS NEW PATTERN DOES NOT NEED BE TOLD — IT SPEAKS FOR ITSELF

### Watch and Watch Case Companies File Answers to Suit Brought by William I. Rosenfeld.

The various watch and watch case companies named as defendants by William I. Rosenfeld, in the action which he commenced last June, in the New York Supreme Court, to recover $150,000 damages, served their answers to this suit on the plaintiff's attorneys last week. An abstract of the complaint was published in THE CIRCULAR-WEEKLY June 14, and as then told, the defendants are the Keystone Watch Case Co., the Crescent Watch Case Co., the Philadelphia Watch Case Co., the Elgin National Watch Co., and Robbins & Appleton, selling agents of the American Waltham Watch Co.

The answers to the suit by all the companies, which are of substantially uniform tenor, deny that the defendants made any agreement with each other to sell their goods only to certain jobbers or to publish lists of jobbers in common. They further deny that the defendants have ever confederated or conspired together to force plaintiff out of business, or that they ever agreed as between themselves that they would not sell to the plaintiff any of the goods made or manufactured by them. The answers also deny that other jobbers were instructed by the defendants not to sell to plaintiff.

The answers admit that the plaintiff is engaged in business in the Borough of Manhattan, as a dealer in American watches and American watch movements, and that the plaintiff has been using and dealing in the goods manufactured and dealt in by the defendants. The answers deny, however, that the plaintiff confined his business to the products of the defendants, and deny knowledge or information sufficient to form a belief as to most of the remaining allegations contained in the complaint. The answers are, therefore, in substance, a general denial.

### Death of Solomon Scherzinger.

PITTSBURG, Pa., Oct. 11.—Solomon Scherzinger, who died last week at his home at 518 E. Ohio St., Allegheny, was one of the oldest merchants in this section and had been in the jewelry trade for almost half a century.

Deceased was born in Baden, Germany, 75 years ago, and when a young man came to this country. He moved to Allegheny in 1863 and immediately went into the jewelry business, conducting a store in Ohio St. for 34 years. He was an expert repairer, and built up a good trade in this line as well as doing a moderate business in jewelry and silverware.

Mr. Scherzinger was a member of St. Mary's German Roman Catholic Church at which requiem high mass was celebrated Monday. The deceased is survived by a son, Chas. S. Scherzinger, and four daughters.

### Death of A. W. Titus.

WORCESTER, Mass., Oct. 11.—A. W. Titus, a real estate dealer and broker, of this city, who died Sunday last, was at one time a jeweler and for many years prominent in that trade. He formerly lived in Boston and after coming to this city became a member of the firm of Hastings & Titus, which went out of business many years ago. He then went into the real estate business, and had been successful as a broker in this line.

Just before his death Mr. Titus was married to Miss Margaret Tobin. His widow alone survives him.

The Menees & Patton Co., Springfield, Tenn., has sold its jewelry stock to Dunn & Glenn & Co. The latter firm has just completed a large building, which it has fitted up in modern style. R. A. Davis, proprietor of the Menees & Patton Co., has become associated with the purchasers, of whose jewelry department he will act as manager.

### Certain Heads for Hat Pins Held to be Dutiable as Imitation Precious Stones.

The Treasury Department last week published another of the imitation precious stone decisions recently rendered by the Board of United States General Appraisers, New York. In this case the protest of Loeb & Co. against an assessment by the collector at New York was sustained. In his opinion General Appraiser Sharretts said:

"The merchandise under protest consists of articles of paste simulating various precious stones in material, but fashioned into shapes and sizes unlike precious stones, and with a hole drilled partly through. They are to be used as heads for hat and bonnet pins. Return for duty was made as manufactures of paste at 45 per cent. ad valorem under Par. 112 of the present tariff act.

"The exhibits in the case show the articles in dispute to be imitations of topaz and amethyst oblong in form with faceted surfaces, not exceeding one inch in dimensions each, and intended as reported by the appraiser, for use as heads for hat pins. In G. A. 6139 (T. D. 26679) the Board held that hat, bonnet and shawl pins provided with heads identical with the imitation stones now before us were articles of personal adornment set with imitation precious stones, hence were jewelry. We still adhere to the correctness of that decision and find the goods in question, marked 'P1' on the invoices for purposes of identification, to be imitations of precious stones not exceeding one inch in dimensions. Tl protest, claiming 20 per cent. duty und Par. 435, is sustained and the collector decision reversed in each case.'

### Twenty-Four Karat Club Prepares f Fifth Annual Banquet.

A meeting of the 24-Karat Club to place last Friday afternoon in parlor "1 of the Astor House, New York. In t absence of President E. R. Crippen, Vic President Leo Wormser occupied t chair. The following committee was appoi ed to make arrangements for the fifth annu banquet, full power being given: Jam R. Gleason, John B. Wood, William Gough, David Kaiser and A. L. Brown. is likely that the date will be about the m dle of January and Delmonico's will pr ably be selected as the place.

The committee, of which Leo Worms is chairman, appointed to get the views the members in relation to a project for e larging the membership and obtaining qu ters for dining purposes, made an inforr report. As the committee has not as succeeded in getting definite expressio from the entire membership further ti was given. A circular letter has b drawn and will be sent to all members questing them to promptly send their vie on the subject.

On motion of C. F. Brinck an appropri record of the death of Moses Weiss v made on the minutes.

## Death of James I. Stevens.

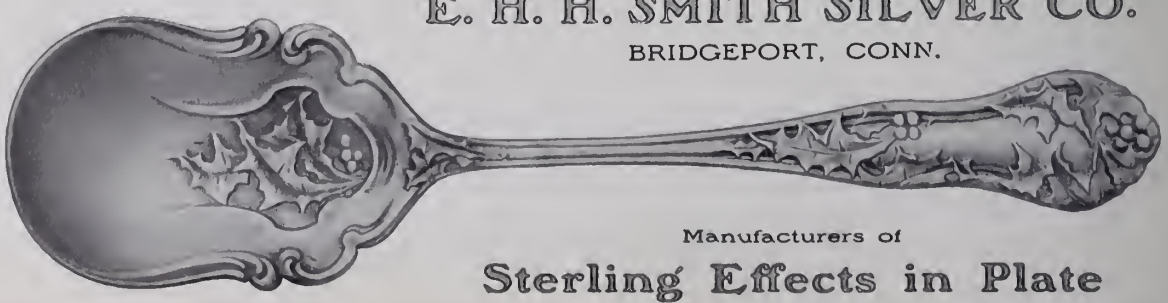
PENSACOLA, Fla., Oct. 13.—James I. Stevens, prominent jeweler of this city and one of the most popular members of the trade in the south, died to-night of yellow fever. Mr. Stevens was stricken Sunday, and in spite of the fact that he had the best medical attention, competent nursing, and every aid that could be given him, he was unable to withstand the attack and passed away at 8 P. M.

Deceased was a member of a prominent family of that name in the State of Georgia, but came to Pensacola about 35 years ago. His first venture in business was in the stationery line, but shortly after that he gave up this trade to go into the jewelry business, starting for himself in 1878. He continued alone until 1890, when reverses forced him to the wall, but he resumed business, first as an agent and later in his own name, and of recent years had built up a prosperous trade.

Just and honorable in his dealings, kindly in manner, and affable in disposition, Mr. Stevens made hosts of friends not only among his business associates, but among his customers, and in social life as well. His death is universally regretted.

## Suspect Arrested at St. Louis Identified as Walter H. Lydick, Wanted at Washington, D. C.

WASHINGTON, D. C., Oct. 16.—Late this afternoon a telegram was received at police headquarters from Detective Hartigan, at St. Louis, saying the man under arrest there (as told in another column), and supposed to be Walter H. Lydick, was really Lydick. Detective Hartigan knew Lydick well, and when the latter was placed under arrest by the St. Louis police he was sent there to identify the suspect.



Lydick has been wanted here for some time, the police having been searching for him for over a year. He is charged with having disposed of about $4,000 worth of jewelry belonging to R. Harris & Co., and a pair of diamond earrings owned by Warren F. Johnson, a pawnbroker.

Lydick was employed by R. Harris & Co. as an outside salesman. His plan was to take a quantity of goods from the store, pawn them for what he could get and turn in part of the proceeds to the firm as a first payment on the goods, which he claimed to have sold on instalments.

Thousands of circulars describing Lydick were sent out by the police department, and his capture is very pleasing to Captain Boardman, chief of detectives.

### Two Mexicans Arrested in Texas on Charge of Smuggling Opals.

AUSTIN, Tex., Oct. 12.—The Federal authorities of this district received notice some time ago that a flood of opals was pouring into this country from Mexico. It was believed that the stones were smuggled across the border and plans were arranged to capture the persons employed in the smuggling operations. Two Mexicans, Felipe Ricco and Renito Mirando, who are alleged to belong to a gang of opal smugglers, have been arrested by United States officers at San Antonio. Other important arrests are expected to follow soon. At the time of the arrest the men were going from store to store, exhibiting a few of the stones.

After the prisoners were searched it was discovered that the opals they were exhibiting were only a few of those in their possession. A large cigar box on being opened revealed more than a $1,000 worth of stones. Customs Collector C. M. Ferguson was at once notified and one of the deputies took the men in charge and had them locked up in the county jail.

Ricco is evidently the leader, for he did most of the talking, while Mirando assumed the part of a servant. The men were in the habit of traveling separately, or at least they never walked side by side, Mirando always bringing up the rear. It was Mirando who kept the cigar box, while Ricco would enter the jewelry stores, engage the proprietors in conversation and endeavor to do business with them. One or two of the merchants asked if the opals had paid duty, at which Ricco would extract from his pocketbook customs receipts to show that he had passed through the customs house and had paid duty for so many opals. The receipts, however, two in number, amounted to only $7.50, covering about $75 worth of stones, while some of the opals singly were worth at least $100. In one package he had some of the finest specimens of the gems ever seen in Texas, the authorities say. Other packages contained stones of less value.

Ricco showed he had passed through the customs house at Brownsville, Sept. 30 and paid $6 on opals in his possession. Oct. 2 he passed through the same port of entry and paid duty to the amount of $1.50 on the same variety of stones.

There is another man at present in Austin who is said to have a box of opals in his possession, and has been endeavoring to get rid of them here in such a manner as to excite suspicion.

### Jewelers Gold Bars Withdrawn and Exchanged at New York.

*Week Ended Oct. 14, 1905.*

Stearns, San Jose, Cal.; F. E. Vanssiere & Co., Rome, Ga.; E. M. Wittigschlager, Niagara Falls, N. Y.; Younglove & Singer, Peoria, Ill.

## Alleged Actor Works "Next Room" Swindle on Hoboken Jewelers.

Police in Hoboken, N. J., are looking for a man who gave the name of Max Hiller and who is accused of stealing a diamond ring, valued at $400, from B. Braunstein 121 Washington St., in that city. According to the story told to the police, Hiller arrived in Hoboken, one day last week, and registered at the Continental Hotel, saying that he was an actor. Then he went to three jewelry stores, starting at Mr. Braunstein's then calling on Jacob Ritter and Gustave Meiners & Son. He picked out a ring at each place and ordered that they be delivered at his room in the hotel the next day at three different hours.

Mr. Braunstein's clerk, according to appointment, called at 10.30 A. M. and handed the ring to Mr. Hiller, who, after admiring it, excused himself from the room while he gave a letter which he had been writing to the porter to be mailed. Although the supposed actor was in his shirt sleeves he did not return.

At 11.30 o'clock, a clerk from Gustave Meiners & Son's store arrived with a $450 ring and after he compared notes with Mr. Braunstein's clerk they concluded that the man was a thief.

# Simmons Watch Chains

¶ A great majority of the trade—four-fifths of all the jewelers in the country—carry Simmons Chains.

¶ Surely, four dealers out of every five wouldn't handle them if they weren't a paying proposition.

¶ Food for thought for the fifth man!

¶ If you are of the minority who are not selling Simmons Chains this fall, think it over—then see the line at your jobbers'.

**R. F. SIMMONS COMPANY**

**Main Office and Works, Attleboro, Mass.**

Salesrooms, 9-13 Maiden Lane, New York, and 103 State Street, Chicago.

# Dubois Watch Case Co.

We produce the most symmetrical and elegantly modeled Watch Cases in the World, a symphony of artistic proportions, and have

special department and facilities for casing the most complicated movements manufactured.

**DUBOIS WATCH CASE CO.**

FACTORY, 316 HERKIMER ST., BROOKLYN, N. Y.

THE MANIPULATION OF STEEL IN WATCHWORK.

Price, 60c. **The Jewelers' Circular Pub. Co.**

## Providence.

After a brief trip to Europe, William A. Copeland is once more to be found at the office of Martin, Copeland & Co.

George Kelley, a well-known traveling salesman, has decided to go into the jobbing jewelry business and will have quarters in the Cæsar Misch building on Westminster St.

Among the imports at the Port of Providence last week were four packages of imitation precious stones from Bremen, one from Havre and one package of jewelry from Southampton.

Charles F. Irons, of this city, and A. C. Messler, Pawtucket, were among the delegates to the Democratic State Convention which nominated ex-Gov. Garvin as candidate for Governor.

Alexander Machon, a cabinet maker, who for the past 25 years has been in the employ of the Gorham Mfg. Co., committed suicide last week at his home, 452 Broad St. Machon cut his throat with a razor and died before medical attendance reached him. He was 47 years old and leaves a widow, two daughters and a brother.

Charles J. Rumenapp, a Prussian and a Civil War veteran, who for some time was in the employ of Brown & Sharpe, although an optician by profession, was asphyxiated by illuminating gas at his boarding place, 117 Sabin St., last Friday night. Death was no doubt due to an accident. Rumenapp, who was 76 years old, was highly educated and spoke six languages.

A touring car owned by Theodore W. Foster and driven by his son, William C. Foster, figured in an accident last week in which the younger Mr. Foster, who was accompanied by a chauffeur, had a narrow escape from serious injury. Mr. Foster was bound for Attleboro and in turning out to avoid a car ran into a telegraph pole. The machine was damaged somewhat, but the occupants escaped unhurt.

Jewelers were, as usual, prominent in the Republican caucuses last week. In the Second Ward, where William A. Schofield was elected a delegate to the city convention; in the Fifth, Roswell C. Smith was chosen to represent the ward in the State convention, and Pembroke S. Eddy will go to the Assembly convention. Ernest Rueckert will go to the city convention from the Sixth Ward, and Walter H. Durfee will represent the Sixth Ward in the State convention.

A fire, for which three alarms were sounded, broke out in the Altair Hall Block the early part of last week, starting on the ground floor and working up through the roof. The Elmwood Paper Box Co. is one of the largest concerns located in the structure and was one of the heaviest losers. The stock and equipment of the company were badly damaged by fire and water, the manager, George H. Lincoln, estimating the loss at between $1,500 and $2,000. It was well covered by insurance.

## North Attleboro

Artemus Chase, western salesman for J. S. Gilbert, is home from an extended trip.

Harold H. Totten, of F. M. Whiting & Co., is home from a trip through the west.

Alpin Chisholm left, Monday, on a short trip in the interests of the Bugbee & Niles Co.

Fred. B. Brigham, western representative of Cheever, Tweedy & Co., arrived in town Wednesday.

The following was the result of the games played last week in the Jewelers' Shop Bowling League:

| | | | |
|---|---|---|---|
| Oct. 9, T. I. Smith Co. | 418 | 405 | 42 |
| *vs.* Riley, French & Heffron | 344 | 422 | 38 |
| Oct. 10, G. L. Paine Co. | 442 | 438 | 41 |

For Sale Through the Jobbing Trade.

# To the Retail Trade.

While we have greatly enlarged our capacity during the past year, there will, nevertheless, be a greater scarcity of Illinois movements during the next two months than ever before in the history of our company. Therefore we advise dealers to anticipate their wants as early as possible, as we will not sacrifice quality to secure an increased output.

Our product is distributed by twenty special selling agents—twenty of the best wholesale watch houses in the country. If none of these solicits your business, we will be glad to supply your wants direct from the factory.

There is no surplus of Illinois movements, consequently we are not continually reducing prices or discontinuing undesirable grades, the inevitable effect of which is to depreciate the value of your stock.

ILLINOIS WATCH COMPANY,
SPRINGFIELD.

# Mr. Retailer:

A very prominent Watch Jobber paid us the following compliment :

"One thing about Solidarity Gold Watch Cases is we never have to look at the tag nor the stamp inside to know whether it is a solid gold or a gold filled case."

Gentlemen :

That means a whole lot. That is the secret of Artistic Watch Case making—

Our cases do have that

RICH, ELEGANT APPEARANCE

that is so satisfying to people who want "the best."

Order through your Jobber only.

GENERAL SELLING AGENTS

JOHN W. SHERWOOD

FRANK E. HARMER

## Attleboro.

TRADE CONDITIONS.

"We could find employment in this town for 500 more," said a manufacturing jeweler, the past week, commenting on the fact that a boom of uncommon proportions is in progress in the Attleboro shops. The returns from the traveling salesmen are pouring in in a volume that fills the mails. The local post office extended its closing time, first to 9 P. M., some time ago, and the past week to 9:20 P. M. This allows so much more time for late shipment of small jewelry packages and letters, and anything accepted up to that time goes out the same night. Packing and shipping rooms in all the shops work until late at night, and, contrary to custom, many of the shops are obliged to use men who work at the bench all day to help the overworked shippers at night. To increase the force of workers not only have advertisements been freely inserted in the local papers, but also in Rhode Island papers. The result has been an influx of unskilled but welcome help from the nearby towns, and a number have deserted jobs in Rhode Island cotton mills to come here for the higher pay offered. Many so secured have proven valuable, being used to hard work and having dexterous fingers. The effect of the jewelry rush has served to postpone many lodge, church and social events of prominence.

Samuel Cohen, of New York, was one of the prominent visiting buyers here last week.

Fontneau & Cook are making extensive alterations to allow more room for the polishing department.

Harold E. Sweet, of the R. F. Simmons Co., was last week elected to office in the local Universalist Men's Club.

Miles L. Carter, of Carter Qvarnstrom & Remington, with his wife, departed last week for an auto trip up into Maine.

J. Harry Mansfield, who mysteriously disappeared from New York some months ago, leaving many large bills unpaid among the retail jewelers, has been located at Quebec.

The physical impossibility of local manufacturers to fill orders as fast as they come in has led, the past week, to personal calls at the local office by over a dozen New York jobbers, eager to get their goods ahead o their turn.

Joseph G. Hutchinson, traveling salesma for Smith & Crosby, has given up his pos as manager of the Bates Opera House which he has held for many years, to devot all his time to his business.

Ralph H. Cole, for the past 10 years successful jobber, head of the Bismid Jew elry Co., left last week for Chicago. H left his local enterprises in the hands of competent manager, and will start afres in the western city.

The Masonic Royal and Select Mast elected to office last week: J. Thomas In man, of J. T. Inman & Co.; Everett Horton, of the Horton, Angell Co.; Cla ence M. Dunbar, of the Dunbar, Leac Garner Co., and William A. Spier, of W Spier & Co.

William Nerney & Co. move this wee from the rear of the R. F. Simmons C building, 191 N. Main St., to the Robins building, 136 Railroad St., formerly occ pied by E. A. Fargo & Co. The move precipitated by the desire of the Sim on concern to expand its plant.

A laugh lightened the rush at a oc shop last week. A sign hung out "S dcrers Wanted." A man applied, was l to a bench and given the outfit and so parts of jewelry to work on. "What k of a game is this, anyway? I know how solder, but I'm a plumber. No dinky s dering for me." And he left.

Thus far no clue has been obtained the whereabouts of Alfred N. Von Sede holm, a jeweler and watchmaker of S Rafael, Cal., who mysteriously disappear about two weeks ago, leaving behind h a bride of a few months. Von Sederho had in his possession several articles wh had been left by customers to be repair A writ of attachment for $4,500 was issu on the establishment about a week ago.

## Boston.

O. E. Scott, of Waterbury, Vt., has been ssing the week in Boston and vicinity.

C. M. Ward & Co., 410 Washington St., ve incorporated their office under the yle of the C. M. Ward Co., with a capi- l of $15,000, all paid in.

T. J. Renwick, well known in the Boston ade as a watchmaker and jeweler, whose ace of business was at Cambridge, died t Saturday night, after a brief illness. He as nearly 50 years of age.

There was a rumor here last week to e effect that Mr. Maynard, of A. Stowell Co., is about to retire from the business. hen asked about this Mr. Maynard said would neither affirm nor deny the re- rt.

E. A. Bigelow, treasurer of the E. How- d Clock Co., has gone to San Francisco a trip which will combine pleasure and siness, with stops at several of the more portant cities en route, and expects to be ay about two months.

About 85 employes of the finishing de- rtment of the American Waltham Watch 's factory in Waltham enjoyed an outing t Saturday. They were accompanied by band, and spent the afternoon on a farm ter an enjoyable trolley ride to the place.

Frederick B. Chase, of the Washington ilding, who has been on a trip through stern New England, reports the condi- ons this Fall excellent in all the principal ies of that section, with special prepara- ons in progress for a larger holiday trade an usual.

Reginald W. P. Brown, of the concern of elson H. Brown, a former Harvard foot- ll team member, is devoting considerable ne again this year to coaching the second leven," having charge of that part of e process of getting promising material to shape for the games.

The store of Wetherbee Bros., Arling- n, who carry on an automobile and bicy- business, as well as a jewelry store, was tered Thursday night by burglars, who cured a number of gold and silver watch ses, filled goods, chains and lockets, and ticles of lesser value, but did not attempt, parently, to force the safe.

Buyers in Boston during the past week cluded: C. E. Mudgett, Fairfax, Vt.; ank T. Preston, Danielson, Conn.; George Tilton, Rochester, N. H.; J. H. Otis, ennebunk, Me.; M. P. Foss, Pittsfield, H.; C. S. Bennett, Guilford, Me.; harles Sinclair, for N. C. Nelson, Con- rd, N. H.; R. C. Eldridge, Milford; J. E. hiting, Andover; E. F. Welch, Westboro.

Mrs. Esther Ann Stowell, widow of ancis Stowell, a former jeweler, whose ath was announced a few weeks ago, died the family home, corner of High and dar Sts., recently. Mrs. Stowell was the ughter of Capt. Charles Flanders, of ewburyport. Mrs. Stowell was married Somerville, but had made her home in harlestown for many years. For 15 years e had been an invalid.

---

Andrew W. Rogers, formerly of Fort yers, Fla., is now located in new ter- o y in Punta Gorda, in the same State.

S. C. Wells & Co., Plant City, Fla., have ld out to the Central Pharmacy.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

**WHY?** *Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had **FREE** for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

**Extract from "Printers' Ink," Nov. 23, 1898.**

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

## Connecticut.

Extensive improvements are being made in the interior of the store of Aaron Rabinowitz, Atlantic Sq., Stamford.

A recent dispatch from Middletown reported the finding on Main St., at that place, of two large pieces of coral.

J. R. Sloane, with the Chas. Parker Co., Meriden, and Mrs. Mary E. Rodman, were united in marriage on Friday, of last week, at Lynn, Mass.

A runaway horse, on Oct. 13, crashed through a door and window in the establishment of the S. L. & G. H. Rogers Co., Hartford. The horse was severely injured.

The National Self-Winding Clock Co., owing to its removal from Bristol to the west, sold at auction, on Saturday, all its real estate and water rights on W. Washington St.

Shortly before midnight on Monday of last week thieves broke a large plate glass window in the store of Wm. L. Smith, Seymour, and stole all the stock which was on display.

Joseph Grella, employed at the Wilcox City Plate Co.'s factory, Meriden, was severely injured one day last week by falling against a glass cutting wheel. Several deep gashes were cut in his right arm.

A recent dispatch from South Manchester announces that the Thrasher Time Co., of that place, will soon locate in Manchester, where it will occupy part of the old Mather factory.

James F. Conway, formerly employed by the American Silver Co., Bristol, was committed to the Connecticut Hospital for the Insane at Middletown, on Tuesday of last week, by Judge Newell.

Charles B. Parrett, employed at Manning, Bowman & Co.'s factory Meriden, was painfully injured about a week ago. His right hand was caught in a press and three of his fingers were amputated.

Thos. O. Bergen, foreman of the factory of the J. D. Bergen Co., Meriden, who suffered a slight paralytic stroke on Tuesday of last week, is gradually improving. Mr. Bergen has been in ill health for several weeks past.

Morton Ingraham, of the E. Ingraham Co., Bristol, who is a member of the Kenilworth Club, New Britain, gave an interesting talk on his travels in Europe at a smoker, held Saturday evening at the club's headquarters.

James G. Conehoven, for many years with the Meriden Britannia Co., Meriden, died at his home in Wethersfield, Sunday evening, of last week. The deceased, who was 83 years old, was a veteran of the Mexican War.

David Cramond, who for about four years held a responsible position with the National Self-Winding Clock Co., while the latter concern was engaged in business at Bristol, was married last week to Miss Ella May Lalley, of Bristol.

Summerfield S. Stocking, for several years head of the case shop of the Ansonia Clock Co., Ansonia, and later with the E. Ingraham Co., Bristol, and the E. N. Welch Mfg. Co., Forestville, died, Tuesday morning of last week, at his home in Bristol, aged 79 years.

Walter Camp, president of the New Haven Clock Co., and athletic adviser of Yale College, was among those who were entertained at luncheon by President Roosevelt, Oct. 9, when the question of amending the present football rules, in order to eliminate brutality, was discussed.

R. N. Johnquest, Ansonia, has retired. The business will be continued by George A. Comstock, who had been employed by Mr. Johnquest for over two years. Mr. Johnquest had been engaged in business in Ansonia for nearly a quarter of a century. His retirement is due to ill health.

As Oliver G. Richman, a retail jeweler of Rockville, was lighting the gas in one of his show windows one evening last week the drapery at the back of the window caught fire and in a moment was in a blaze. The walls were slightly scorched, but the stock which was on display was not damaged.

At the annual meeting of the Meriden Hospital Corporation, held at the hospital on Monday afternoon of last week, the following well-known members of the jewelry trade were elected officers: President, N. L. Bradley; vice-president, Walter Hubbard. Among the original incorporators of the hospital now living are N. L. Bradley, Walter Hubbard, Robert H. Curtis and

eorge H. Wilcox. Among the new in-rporators are: E. B. Manning, Edward iller, C. L. Rockwell, C. F. Linsley, E. B. ogers and W. F. Parker.

Gen. Wm. T. Clark, son of Levi Clark, at ne time a well-known jeweler of Norwalk, id the only surviving adjutant and chief staff of Gen. Grant's army of Tennessee, ed Saturday in St. Luke's Hospital, New ork, of cancer of the throat. The deceased as 74 years of age.

The thief who recently stole a diamond ng valued at $100 from Coleburn & auder, S. Norwalk, where he had regis-red at the Mahackemo Hotel as "Charles vrne," has been arrested in Jersey City, . J. He is Frank P. Cheney, of 1 Logan t., Lawrence, Mass. He admitted his ilt.

## Rochester.

Judgments were taken by default, last eek, in Municipal Court by Marvin J. ndsay *vs.* Milton E. Darling, $3.70; Mal-lm I. Danks *vs.* Samuel Wood, $21.15.

The handsome sterling silver trophy pre-nted to Past Grand Chancellor Max L. oltz by the Knights of Pythias of the omain of New York at the 37th annual nvention, held at Ogdensburg, recently, as designed by A. L. Langenbaln and was ade by E. J. Scheer & Co., of this city.

Peter Rauber, diamond merchant and eculator, is in jail on complaint of H. A. radley, of this city, who accuses him of indling by means of a bogus diamond. st week. Rauber arrived a few days ago om Syracuse, where he was in diffi-ilty. He tried to pass off several itation stones at Syracuse, was detected id locked up, but came to Rochester again. he police believe they have a sure case gainst him this time and that "Pete" will put some place where he cannot victim-e the public with his "bottle glass" stones. radley gave Rauber $11 in cash and a ileage book for a stone which a jeweler alued at about 75 cents.

## Syracuse.

M. L. Mantell, 124 S. Salina St., who ad been confined to his bed for two onths, has left for Norwood, where he ill spend a few weeks.

W. P. Hitchcock, a wholesale jeweler, id others, recently purchased the stock of e Ideal Cut Glass Co., of Canastota, and e organizing the corporation.

Edgar Alexander Pritchard, formerly of irmingham, Eng., was locked up at Po-ce Headquarters, last week, charged with aving stolen jewelry from the store of ey Bros. & Co., where he had been em-oyed at the jewelry counter for the last onth. He declares that he stole in order make presents to a young woman.

The attorneys for the bankrupt M. S. enedict Mfg. Co. and Harry L. Benedict, ie principal stockholder and partner in the Benedict & MacFarlane Trading Stamp Co., made a vigorous protest over an adjournment of the proceedings before Referee Stone last week. The trustee for the company asked for another week's delay before action was taken on the shutting down of the big factory at East Syracuse. The bankrupt's attorney claimed that the proceedings had dragged along for over two months and he thought it was time some definite action was taken. The referee allowed a week's adjournment. Two new claims were filed, that of the National Bank of the Republic of Chaumont for $17,978.32, and the First National Bank of Ottawa, for $6,000. Both claims were received, as well as a number of other smaller claims.

## New Orleans, La.

TRADE CONDITIONS.

Cold weather is beginning to show in this city, and with its advent yellow fever hies back to the tropics where it belongs and business takes a big jump up. Among the leading jewelers many bright faces are to be seen, and the increasing throngs of customers in their stores justify the pleased expressions. Late Autumn and Winter orders are being sent out daily by mail, but still is the murmur heard over the fact that the traveling men with their sample cases haven't begun to appear.

William Schlack, who died recently at his home, after a short illness, was in early life a watchmaker, and later entered the business of a jeweler. He was connected with the firm of M. Scooler for more than 16 years, and was one of the charter members of the Jewelers' Fraternity.

The trophy for the winners of the Clothing Store Baseball League, a handsome silver cup, was made by T. Hausmann & Sons. The bowl, which is goblet shaped, with the exterior neatly scrolled, and decorated, and gold lined, rests on several small horns, which are attached to an ebony base.

The house of Henry Thomas, a jewelry peddler living in Hagan Ave., was entered by thieves one night late in September, and $400 worth of watches, charms and rings stolen, besides a large, unset diamond, which Mr. Thomas valued at $900. Thomas sells most of his stock in the small towns adjacent to New Orleans, but because of the quarantine he was unable to leave the city, and had his goods locked up in a small iron safe in his bedroom. The thieves chloroformed Thomas and his wife, drilled open the safe, secured their booty and left. The police were notified and worked on the case without results, but last week Mr. Thomas heard a knock on his front door, answered it, and found a small negro boy standing on the sidewalk before his house. Without a word, the boy handed him a package and ran away. When Mr. Thomas removed the wrappings, he found a pasteboard box, and, opening the box, nearly dropped with surprise, when he saw all of his jewelry with the exception of two silver watches. The mystery is still unsolved. Mr. Thomas is willing to lose the silver watches, his valuable possessions having come back to him.

## Lancaster, Pa.

TRADE CONDITIONS.

The movement for a celebration here of Old Home Week, is taking shape, and the Lancaster jewelers favor it. It means an influx of visitors who will spend money here. Local jewelers say the outlook is bright for an unusually heavy holiday trade. Not for a dozen years have the farmers received such big prices for tobacco, which will put about $2,500,000 into their pockets.

Two more dealers in bogus jewelry were driven out of the city last week by the police.

Harry R. Yergey, Columbia, was attacked on the strect last week by a large dog and badly bitten on the leg.

J. D. Fox, North Adams, Mass., has entered the Ezra F. Bowman Technical School as a student.

Jared Kemper, Pittsburg, who has been visiting Columbia, with a view to locating there, was called home Thursday by the serious illness of his wife.

There is a general scarcity of good watchmakers in this territory, and the local trade has been solicited from different points to furnish competent workmen.

William F. Holland, a watchmaker for Ezra F. Bowman's Sons, was married Thursday to Miss E. A. Walter, of Ephrata. They will spend their honeymoon in the south.

A big blaze occurred Friday night in the block of buildings in which are located the establishments of the H. S. Meiskey Co. and G. William Reisner, but the stocks of both escaped unharmed.

Maxwell Benson, watchmaker, left for London, Eng., Wednesday, where he will spend a couple of months with his parents. Upon his return to America he will settle in Buffalo, N. Y.

Among the jewelers visiting here last week were: Albert Heberling, Parkesburg; George L. Hepp, Lititz; C. Aug. Carmany, Coatesville; C. E. Hinkle, Ephrata; H. F. Andrews, Strasburg, Pa.; Francis B. Wallen, Camden, N. J.; W. H. H. Needy, Hagerstown, Md.

A Syrian boy, about 13 years of age, who gave his name as Roger Chalyie, was arrested Thursday morning in Scranton, Pa., on a charge of larceny preferred against him by S. Trucker, a retail jeweler at 1 Penn Ave., that place. The boy entered the establishment with another youth who tendered a watch to be repaired. Mr. Trucker, at the time, was engaged in dressing his show window, and six diamond rings, which were to be placed on display had been left on the show case. The boy took one ring, valued at $50, which, however, was recovered. A knife measuring four inches in length and sharpened on both edges, was found in the boy's pocket when searched at the police station.

## News Gleanings

Meyer Cohen, Nashville, Tenn., has discontinued business.

The death is reported of Robert London, Mountain Home, Ark.

L. R. M. Hill, Fort Morgan, Colo., has given a bill of sale for $1,600.

W. J. Withers, formerly of Jackson, Minn., has moved to Dixon, Ill.

Herbert P. Lewis, Gravett, Ark., has sold his business to L. M. Bond.

J. N. Rovang, Dalton, Minn., has disposed of his business interests at that place.

W. J. Iliffe has moved his stock from Forsythe, Mont., to Dickinson, N. Dak.

T. Kampstead, Sauk Rapids, Minn., is now located in new quarters at that place.

Henry H. Wray, Daytona, Fla., moved recently to New Smyrna, in the same State.

Dr. I. M. Schwab, Savannah, Ga., has just returned from a trip to Saratoga, N. Y.

C. E. Benway has been placed in charge of Hayter & Stetzel's jewelry department, Colman, S. Dak.

H. Testroet is about to erect a new building in Persia, Ia., which he will use as a jewelry store.

J. F. Post is now in charge of the jewelry repairing department of Carl Hansen & Co., Tyler, Minn.

O. P. Noisom, South Bend, Ind., is a candidate from the First Ward for Councilman of that place.

M. H. Miller, Pembina, N. Dak., has moved into his new store building, which has just been completed.

E. W. Beyer, with Miss E. Harrington, Amsterdam, N.Y., was married last week to Miss Katherine M. Mullins.

Stock valued at $200 was recently stolen from the store of Ben. Raue, Harvard, Ill. There is no clue to the thieves.

James E. Harper, Delhi, N. Y., is at present enjoying a short vacation, the first which he has taken in 10 years.

F. W. Zimmerman, Staples, Minn., has just moved into new premises, which have been fitted up with new fixtures, etc.

Wm. Putnam, of Luverne, Minn., has gone to Yankton, S. Dak., where he has taken a position with Livingston Bros.

W. N. Boynton, Manchester, Ia., has added machinery to the rear of his jewelry store for the manufacture of jewelers' tools.

Neal, Adean & Co. is the new firm name of the business which was formerly conducted by Warren, Adean & Neal, Paris, Tenn.

Halder Anderson, Fessenden, N. Dak., has moved into a handsome new building which he has just completed at a cost of $10,000.

Brice & Demgen, Green Bay, Wis., have dissolved partnership. The business will be conducted in the future by Wm. J. Brice alone.

W. E. Stofflet, Shamokin, Pa., recently returned from a purchasing trip to New York. Mr. Stofflet's store has just been entirely renovated.

N. C. Pabst, Fargo, N. Dak., is gradually recovering from the effects of an electric shock sustained a short time ago, while turning on a light.

H. E. Fox, Albuquerque, N. Mex., has sold out to C. H. Hickox, formerly of Santa Fe. Mr. Fox will move to Spokane, Wash., about April, 1906.

Otto Klueber recently purchased an interest in the business of Dr. Ormond, Sedalia, Mo., and hereafter the firm will be known as Ormond & Klueber.

The building occupied by Jacob Lesser, Portland, Ore., will shortly be replaced by a large office building. The old structure will either be razed or moved to another location.

Harry D. Beresford, with A. W. Miller, Ft. Dodge, Ia., and Miss S. A. Orvis, of Dubuque, were united in marriage on Tuesday of last week, at the home of the bride's parents.

Roy S. Hunt, Medford, Mass., is about to occupy the store formerly conducted by J. A. Payson, Jr., Foxboro, who has opened up in Laconia, N. H., having bought the business of C. E. Bruce.

A thief, one day last week, bored two small holes in the lower corners of the plate glass window in the store of R. H. Morehouse, 510 E. 4th St., Topeka, Kans., and stole about $50 worth of jewelry.

Otto Wennerlund, Willmar, Minn., has bought the jewelry and optical business of O. G. Hulberg, Duluth, Minn., on behalf of his firm in Willmar. Both stores will be continued by Wennerlund & Nelson.

J. E. Reger, Mount Ayr, Ia., has added a stock of jewelry and in future will conduct a retail jewelry business in conjunction with his music business. The jewelry department will be in charge of G. E. Manners.

Ed. Hulstad has moved from Glenburn, N. Dak., to the new town of Adams, N. Dak., which is but six weeks old and yet has four hardware stores, three banks, two drug stores and a number of general stores.

Simon Stacey, until recently in charge of the repairing department for Crane Bros., Lake City, Minn., has removed to Brandon, Man., where he has taken a similar position. L. E. Speltz, Winona, Minn., has succeeded him.

Miss Theresa Allen Renkl and Andre Desbouillons, Savannah, Ga., were married Wednesday last, after which they went to New York. Mr. Desbouillons is a son of A. L. Desbouillons, Savannah, with whom he is associated in business. A. J. Renkl, Augusta, Ga., was a guest at the wedding.

Arthur J. Dougles, Watertown, N. Y., is seeking the whereabouts of J. Ferguson, who posed as an evangelist, and recently secured from the jeweler three watches, on which he agreed to pay $1 a week. Immediately after securing the timepieces "Ferguson" left town and thus far no trace of him has been found.

The S. Conradi Co. has completed improvements in its establishment at 205 S. Spring St., Los Angeles, Cal., which make it one of the most attractive in that territory. The interior has been refinished in mahogany, new show cases have been installed and large French plate glass mirrors adorn the walls on all sides. The electric light fixtures are of antique brass.

Bert Riggins, the alleged diamond thief who was arrested in Indianapolis, Ind., a short time ago, on a charge of being implicated in the theft of a $60 diamond ring from the store of Frank Schario, Danville, Ill., and who was brought back to the latter city recently, has been held to await the action of the Grand Jury. In default of bonds amounting to $300, Riggins was sent to jail.

The Ontario Silver Co. and the Charles Boldt Cut Glass Co., Muncie, Ind., have been made the defendants in two suits which were filed last week in the Circuit Court, at that place, by the French manufacturing concern known as the Compagnie Generale des Produits Metallurgiques de France. The latter concern seeks to recover $82 from the silver company for steel dies and $200 from the cut glass company for steel bars, which it claims to have delivered in Muncie on the order of the two local firms.

In the case of the Merchants' National Bank *vs.* L. Lechenger, Houston, Tex., a suit to recover the possession of the building now occupied by the defendant in the conduct of a jewelry business on Main St., the jury was recently instructed by Judge Kittrell to return a verdict in favor of the plaintiff for possession of the building. The defendant in this case sought to recover damages by way of a cross action, but the court some time ago, on a demurrer urged by the plaintiff, dismissed the cross bill.

Because of a growth of fine hair on the end of his tongue, Will E. Cleaves, a jeweler of Biddeford, Me., is losing his sense of taste and also his power of speech. The strange case has thus far baffled the local physicians, who say they have never known of a similar case, and do not know how to treat it. Some time ago Mr. Cleaves discovered a few fine hairs on the end of his tongue, but thought little of it at that time. They continued to grow and increase in number. He soon found that his sense of taste was becoming very deficient, and that all his food tasted alike. He consulted local physicians, who are now making every effort to kill the hair. The hair has reached such a length that Mr. Cleaves is losing his power of speech, not being able to articulate plainly.

### Death of Henry Yoste.

VICKSBURG, Miss., Oct. 13.—Henry Yoste, one of Vicksburg's oldest and most prominent citizens and a well-known jeweler, after an illness of some weeks, died at his residence to-day.

Mr. Yoste, who was 66 years old, was a native of this city. He leaves a widow, one daughter, Miss Delia, and two sons, Edward and Harry. The deceased was a Confederate veteran, serving with the Southerns through the war in Gen. Lee's army. Ever since the war he has been engaged in the jewelry business in this city, and his store of late years was at 306 Washington St. The funeral will take place at 4 o'clock to-morrow afternoon, Rev. Father Mullen officiating, and the services will be under the auspices of Camp No. 32 of Confederate Veterans.

Lapp & Flershem, Chicago, have issued their 30th annual illustrated catalogue, a handsome publication of 584 pages, giving complete details and illustrations of all articles sold by this concern.

## OUR TRAVELING REPRESENTATIVES.

**Travelers may consider these columns open for the publication of any items of interest regarding themselves or their confreres.**

Charles Goldsmith, of Lindenberg & Fox, Cincinnati, O., is making an extended trip through the west.

The Kansas City, Mo., traveling men, who were nearly all called in by their respective firms to help entertain the visitors during carnival week, are all on the road again now.

Among the traveling representatives who visited San Francisco, Cal., recently, were: W. S. Sparrow, Stern Bros. & Co.; Mr. Mitchell, Mitchell Bros.; Nat Shiman, Shiman Bros.; J. S. Jepson, Riker Bros.

E. W. Carlton, traveler for Joseph Cowan, of Boston, Mass., is traveling with excellent success, this Fall, in the eastern New England territory, and calling also on the trade in Vermont and New York State.

Among the traveling representatives who called on the trade in Kansas City, Mo., during the past week, were: P. W. Serwich, Wm. A. Rogers, Ltd., Fred Sheridan, Arnold & Steere; R. L. Clarke, Towle Mfg. Co.; Mr. Johnston, Johnston & Son.

The following traveling representatives were in Savannah, Ga., recently: J. Bernheim, L. D. Block & Co.; A. B. Cary, Link & Angell; Chas. E. Bride, Bride & Tinckler; A. N. Tichenor, C. F. Rumpp & Sons; Louis H. Cohn, Adolph Goldsmith & Sons.

Among the travelers who, recently, visited Louisville, Ky., were: Fred H. Felger, F. & F. Felger, E. M. Sachs and Stephen Howard, Wilcox & Wagoner Co.; Mr. Murray, Higbie, Barbour Mfg. Co.; Henry Cowan and Percy Lucas, Frank W. Smith; Mr. Macpherson, C. Ray Randall & Co.; Thos. E. Rogers, Riker Bros.; Helmer Thompson, F. H. Noble & Co.; C. B. Bartlett, Whitney Mfg. Co., A. J. Augustin, Dennison Mfg. Co.

Not as many traveling men were in Columbus, O., last week, as usual, owing to the fact that all hotels had been reserved for three days by Ohio Knights Templars, during their annual conclave. Among those here were: Walter S. Strauss, Jacob Strauss & Sons; M. E. Van Bergh, Van Bergh Silver Plate Co.; H. Grabowski, Dattelbaum & Friedman; L. Strauss, H. H. Curtis Co.; E. P. Ledos, Ledos Mfg. Co.; F. C. Allen, Sansbury & Nellis; J. C. Miller, Miller Jewelry Co.

Traveling salesmen visiting Boston, Mass., during the past week, included: Harold Sweet, R. F. Simmons Co.; Irving Russell, L. Tannenbaum & Co.; Mr. Dalzell, John A. Dalzell & Co.; R. W. Simpson, Jr., Riker Bros.; J. R. Scofield, Thomas W. Adams & Co.; D. D. Brokaw; Mr. Bishop, Bergfels Co.; Mr. Henckel, G. A. Henckel & Co., Wallace Campbell, Day, Clark & Co.; J. M. Morrow, American Watch Case Co.; Mr. Theurer, Crane & Theurer; William Huger, William Huger & Co.; William H. Jones, Jones & Woodland, accompanied by E. Cooper Stone; Fred Sturdy, J. F. Sturdy's Sons; Edward A. Sweet, Sussfeld, Lorsch & Co.; Jack Luden, L. H. Keller & Co., Gus Strandberg, Sykes & Strandberg.

Last week the following traveling representatives visited the trade in Lancaster, Pa.: George L. Shepardson, C. A. Marsh & Co.; Charles Conrey, Riley, French & Heffron; C. R. Cobb, W. R. Cobb & Co.; E. P. Ledos, Ledos Mfg. Co.; Mr. Johnson, E. A. Potter & Co.; H. C. Kionka, H. C. Kionka & Bro.; E. C. Marvin, Meek Co.; Alex. Patterson, Hayden W. Wheeler & Co.; F. C. Shinn, Levy, Christie & Co.; R. A. Hunken, J. B. Bowden & Co.; W. F. Parker, W. T. Thompson; Mr. Cornell, J. A. & S. W. Granbery; John L. Wasman, T. J. O'Connor; H. C. Woods, Dominick & Haff, J. W. Mackey, Parker Clock Co.; J. F. Townsley, Cross & Beguelin; Walter J. Mays, McIntyre Magee & Brown; Lewis C. Hast, Charles M. Robbins Co.; George B. Potter, E. J. Wilkins Co.

Among the traveling representatives who visited Indianapolis, Ind., last week, were: Mr. Townsend, Kreis & Hubbard; G. W. Payson, Seth Thomas Clock Co.; H. E. Vincent, Simpson, Hall, Miller & Co.; R. E. Williams, St. Louis Silver Co.,

Heller, L. Heller & Son; Charles Boss, Amer-
n Cuckoo Clock Co.; William S. Manheimer,
uis Manheimer & Bros.; J. W. Friedman; A. S.
ormwood, Illinois Watch Co.; L. Frances, H. H.
rtis Co.; Walter S. Strauss, Jacob Strauss &
ns; Walter J. Triner, Chas. Armsheimer & Son.

The following traveling representatives visited
Louis, Mo., last week: H. N. Van Bergen, Snow
Westcott; Wallace E. Welch, Hoyt, Obrig &
iger Co.; E. A. Dorrance, Traub Jewelry Mfg.
.; Stephen C. Howard, Wilcox & Wagoner Co.;

### Albany.

The suit of the Anchor Silver Plate C against John Krank, Schenectady, was up i the City Court, at that place, recently, b was adjourned until Nov. 2.

Jeff Moore, who is wanted in this cit to answer to a diamond robbery, was r cently taken to Meadville, Pa., from Ea St. Louis, to serve out the term in the ja at Meadville, from which he escaped son months ago. It is believed that an attem will be made to get him to this city soon as his term has expired.

An investigation is being made of t record of Wm. Goodman, who, with a co federate, was sentenced last June on t charge of breaking open the safe in Me del Levitz's jewelry store in the Drisla building, this city. The investigation to prove that Goodman is the man w twice jumped his bail in New York pr to coming here to rob Levitz.

### Buffalo, N. Y.

Ulysses J. Rogers, who is wanted in A bama, for failing to pay a license to deal diamonds, may not be returned to that c He was recently released in $500 bail Justice White of the Supreme Court, this city, on a writ of habeas corpus. It contended that the crime for which he wanted in Alabama is not extraditable.

At the last meeting of the local bran of the International Jewelry Worke Union, in this city, the following offic were elected: President, Albert Weis berger; vice-president, Morris Lindebu recording secretary, Daniel J. Moser; fin cial secretary, George Peterson; treasur Oscar Schmitt; guide, Leo Fritsche; gua W. Wagner; trustees, Jacob Straub, Jo Diebold, R. Peterson; delegates to Uni Trades and Labor Council, D. J. Moser, Peterson, G. Straub.

The Colorado Loan Co., Pueblo, Co last week, turned over to the local po department a box of jewelry, valued about $300, which had been pawned b man named Edward. Lewis, who is r under arrest in Kansas City, Mo. A pa ticket for the jewelry was found in possession of Lewis when he was ta into custody. The police believe that jewelry was stolen from some dealer Kansas City.

Optical machinery from lens drills and grinders down to the improved Standard Orisoptometers and other appliances used for the fitting and adjusting of lenses, fitted with the latest improvements, are handsomely illustrated by means of half tone cuts in a new optical machinery catalogue now being distributed by the Standard Optical Co., Geneva, N. Y. This catalogue is a valuable "guide for buying" to the manufacturer of optical goods as well as to the retail optician and jeweler. Description and prices are printed on the page opposite each cut, and from these illustrations it will be seen that many improvements have been made in this line of goods. The catalogue is handsomely bound with a gray linen cover, and the text is printed on high grade glazed paper, making the catalogue serviceable for frequent reference.

If You need one or more Diamonds, loose or mounted, write us for a Selection Package.

We have received large shipments of Diamonds from Amsterdam, which we had cut there from "Rough," bought by us previous to the late advance in prices. We offer these goods at prices which must prove attractive to Jewelers, and we invite examination of our stock.

## Canada Notes.

George Miller, Gretna, Man., is about to sell out.

W. J. Kines, Melfort, Sask., has gone out of business.

Robert Hicks, Exeter, Ont., has decided to sell out.

W. C. Hickok & Co., Montreal, have discontinued business.

W. H. Crawford has bought the jewelry business of A. C. Tobey, Picton, Ont.

M. Cochenthaler, Montreal, has issued execution against A. Bergevin for $60.

John H. Walker, Aylmer, Ont., has given a bill of sale for $5 to Minnie H. Walker.

G. R. Murtrie, Grand Valley, Ont., has given a bill of sale to G. Murtrie for $2,247.

Willie Hayes, of Alfred Eaves, Montreal, is at present traveling in the province of Quebec.

G. B. Richardson, Humbolt, Man., has given a chattel mortgage to J. H. Lyons for $286.

J. K. Vick, Owen Sound, Ont., has given a renewal chattel mortgage to H. T. Clegg for $570.

W. J. Barr, of the Goldsmith's Stock Co., Toronto, Ont., left last week for New York on a buying trip.

A. G. Carter, jeweler, Winnipeg, Man., has removed from the Clarendon Hotel block to the Commonwealth block, Main St.

P. W. Ellis & Co., Toronto, Ont., have issued a writ for $75 against W. H. Bloomfield & Co., Fort William. The latter concern has assigned.

Edmund Scheuer, Toronto, Ont., accompanied by his nephew, Edmund Scheuer, Jr., has gone to New York on a purchasing trip.

L. Herbert Luke, of Ambrose Kent & Sons, Ltd., Toronto, Ont., has gone to New York, accompanied by Mrs. Luke, on a vacation trip.

The Canadian Jewelry & Importing Co., Montreal, has issued a writ for $203 against E. & A. Svaiger, Balgonie and Regina, Saskatchewan.

Alfred Lemieux has been appointed curator of the insolvent estate of A. Lechasseur, Levis, Que., the assets of which will be sold to-day.

The Keystone Watch Case Co. has announced in Canada that it wishes all cases for exchange and repairs to be sent direct to the factory.

R. J. Abbs, eastern representative of the Goldsmiths' Stock Co., Toronto, Ont., was married a few days ago and has taken a house at Westmount, a suburb of Montreal.

Out-of-town jewelers who visited Toronto last week included: C. Hollingshead, Woodbridge, Ont.; C. E. Frost, Peterboro, Ont., and W. H. Kearney, Renfrew, Ont.

J. A. McEwen, of the silverware department, and Cecil Maynard, of the diamond department of Ryrie Bros., Ltd., Toronto, Ont., have gone to New York and eastern jewelry centers on a purchasing trip.

Owing to the strong opposition raised by merchants, travelers and others to the $300 tax levied on outside commercial travelers by Quebec Province, the provincial government has promised to reduce the tax to $100.

Martin Rosenthal, of A. Rosenthal & Sons, Ltd., Ottawa, Ont., was married in Toronto, Oct. 10, to Miss May Adams, of Windsor, Ont. On Saturday the employes of the firm to the number of 25 presented Mr. Rosenthal with a Morris chair and a congratulatory address.

Ryrie Bros. Ltd., Toronto, Ont., have obtained permission from the city authorities to erect an ornamental canopy in front of their new store on Yonge St., to cost $2,800. The by-laws forbid the putting up of awnings in front of business places, but an exception was made in this case on account of the decorative character of the work.

Ryrie Bros., Ltd., Toronto, Ont., have made a handsome silver cabinet of quartered oak with silver trimmings with two drawers and a deck, and lined with light blue satin, which, with its contents of massive sterling silver flat ware, will be presented by the High Court of the Canadian Order of Foresters to their High Treasurer as a mark of appreciation of 22 years' service.

Edwin Murphy was tried at Brandon, Man., on the charge of stealing diamonds from the store of Mallett & Matthews in that city last August, and, being found guilty, was sentenced to 14 years' imprisonment with hard labor. He had previously served terms of seven years and six months and was only liberated in the Spring. The diamonds, valued at $5,000, have not been recovered, and it is believed that Murphy alone knows where they are concealed.

A crowd of several hundred persons collected outside the store of Henry Birks & Sons, Montreal, Friday night, attracted by the ringing of the burglar alarm. The bell rang without intermission for half an hour and the passersby imagined that the largest Montreal jewelry store was being robbed. The trouble signal at the office of the Dominion Guarantee Co. brought four men to the scene, when it was discovered that the continuous ringing of the gong was due to a derangement in the mechanism of the system of protection which is instituted in the building.

The story of the discovery of diamonds in New Ontario is again being circulated and has resulted in numerous inquiries from capitalists, prospectors and others as to the reality of these alleged finds. The Canadian Geological Survey at Ottawa recently received several pieces of mineral ore, supposed by the senders to contain diamonds. Upon examination, however, it was found that they were crystals of other minerals, garnet being one of the varieties. The widely entertained belief that New Ontario must contain diamond deposits is due to the fact that some genuine diamonds have been found in the glacial drift of some of the Northwestern States, from which it is argued that they must be in place in large quantities somewhere north of the line. The great discoveries of silver and other mineral wealth in the Temiskaming region have naturally directed attention to that quarter and a number of prospectors for diamonds are now pursuing searches in that vicinity. Director Thomas W. Gibson of the Ontario Bureau of Mines, Toronto, when asked concerning the occurrence of diamonds in the Province, stated that so far as he knew no diamonds of gem value had yet been found.

## Philadelphia.

H. M. Nesbitt, a New York manufacturer, was a visitor to this city last week.

Thomas J. Campbell, of M. Sickles & Sons, returned last week from a successful western trip.

Neil Markley, watchmaker, has left Harry Cain, 2924 Ridge Ave., to go with Clark Bros., 8th St., below Race.

Frank Kind, of S. Kind & Sons, has been appointed a member of the reform campaign committee of the 20th Ward.

Gus Frech, with H. O. Hurlburt & Sons, is receiving the felicitations of the trade upon the recent presentation to him of a bouncing baby girl.

The first meeting of the creditors of Morris Kutcher, dealer in general novelties, is to be held next Monday before the referee, Mr. Amram, in the Penn Sq. building.

George C. Child, 27 S. 9th St., expects to remove this week to another store nearby, being forced to vacate his present building, which is to be torn down and rebuilt by its owners.

The magnificent $25,000 silver service which was made by J. E. Caldwell & Co. for the battleship *Pennsylvania*, is to be presented to the warship upon its arrival at the Navy Yard here, within a few days.

Out-of-town retailers buying here last week included: J. W. Parrish, Newark, Del.; G. William Reisner, Lancaster, Pa.; George Bowen, Bridgeton, N. J.; C. F. Rudolph, Wilmington, Del.; J. Harry Holt, Mt. Holly, N. J.

James L. Pequignot, in business with his father, Z. J. Pequignot, 1322 Chestnut St., returned last week from a moose hunting trip in the Canadian woods. Mr. Pequignot captured one of the largest moose in those regions, and as a 20th century nimrod is receiving the congratulations of his friends.

The death, Saturday, of Thomas W. Sweeney, a jeweler and engraver of Reading, Pa., for a half century, is generally regretted in this city, where Mr. Sweeney often visited. He was conspicuous as a stalwart Republican, having been one of the founders of the party in this section of the State. Mr. Sweeney was 71 years old.

It is reported that gold bullion shipments to the mint here so far this year aggregate $30,000,000, several million dollars' worth greater than was received during the corresponding period of last year. From the Klondike alone $14,000,000 worth of gold has been imported from the assay office at Seattle. Notwithstanding reports to the contrary, the largest part of the gold sent to the mint is sold to private concerns and jewelry houses. The S. S. White Dental Mfg. Co. annually buys more than $5,000,000 worth of gold. The mint makes no profit, but charges $2 for refining every $5,000 worth.

The sudden death, Thursday, of Mrs. Sallie Gropengeiser, who since the death of her husband, Louis C. Gropengeiser, formerly a widely known expert watch and clock maker, had conducted the business for herself in Sansom St., near 13th St., was a shock to a host of her friends in the trade. Mrs. Gropengeiser was universally liked in the trade and respected for her cheerfulness, refinement and charitableness. Since her husband's death she has been given every assistance possible by the trade, and, by reason of the charm of her personality, was enabled to build up a profitable business. Mrs. Gropengeiser became familiar with the business during the period of her husband's protracted illness and was able to continue it since his death. The Gropengeisers had an exclusive trade, especially in old-fashioned clocks, among a wealthy class of people. The funeral was held Monday afternoon at her late residence, 824 Windsor Sq.

## Newark.

Herman Deutsch, who was engaged in the manufacture of jewelry in a small way in this city, has gone out of business.

Gerson Gootenberg, Paterson, N. J., bought for $22,000 one day last week, the property at 270 Main St., in that city, from the estate of Henry Gerstly.

In the case of D. Luther Briggs and others against the Annual Wind Clock Co., an order was entered, recently, in the Middlesex County Superior Court, for a hearing on the final account of the receiver of the defendant corporation, to take place last Friday at 10 A. M. in the Superior Court-room at Middletown.

Flames caused about $500 damages some time ago in the factory of Charles Schuetz & Sons, 713 Mulberry St. Two workmen were engaged in the basement lining a tank with asphaltum. They used candles to illuminate the cellar, and the gases generated from the material they were using caught fire.

Arguments were heard last week before Edwin G. Adams, Referee in Bankruptcy, Newark, N. J., in relation to claims against the Spencer Optical Mfg. Co. The question was in relation to the validity of the claims made by Mrs. Angeline Spencer and Mrs. Anna M. Spencer for $15,900 and $20,493, respectively, which amounts, they say, they loaned to the firm through their husbands, James and John Spencer. In opposition to the claims, Edward D. Duffield, counsel for the trustee in bankruptcy, argued that no consideration for the notes had been proved. After hearing the arguments, the referee reserved decision. There has been much litigation over the affairs of the company both in New Jersey and New York since it was adjudicated a bankrupt, two years ago.

# BIRTHDAY SPOONS

*in* STERLING SILVER

·R·WALLACE·&·SONS·MFG·CO·

·WALLINGFORD · CONN·

Branches:

NEW YORK
CHICAGO
SAN FRANCISCO
LONDON

THE PROVERBIAL STORK brings 6,000 babies into the United States every day in the year. At least 15% of these children are born, metaphorically speaking, with silver spoons in their mouths. It's up to you to supply the spoons for those born in your town.

There are no end of birthday spoons put out each year by various silversmiths, but the percentage of meritorious ones is wretchedly small. The spoons we show here are infinitely superior to any we have seen, for they are built by "Wallace" craftsmanship, and have all the weight and beauty peculiar to the "Wallace" products.

The spoon on this page is full size, those opposite being shown on a reduced scale. The price is $10.50 a dozen, net. $1.00 a dozen extra for gilt bowls.

### Jewelry Failures During the Past Three Months.

THE general prosperous condition of all lines of business is indicated almost as well in the figures showing the failures in September and the third quarter of the year as in the general reports of the actual buying and selling. A comparison of even the first nine months of this year with those of former years shows a most satisfactory condition on the average. Commercial failures for the nine months of 1905 amounted to 8,806 in number, with liabilities of $76,234,000, as against 9,183 failures in the same months of 1904, when a defaulted indebtedness aggregated $111,659,000. Among manufacturers there were about 2,040 failures in the first nine months of this year, as compared with 2,099 in the same time last year, and the liabilities amounted to $32,783,000, as against $38,769,000 in 1904. Among the merchants in trading lines the defaults were about 6,531, as against 6,728, and the liabilities about $38,614,000, as against $49,128,000 in the previous year. The figures for the third quarter (July, August and September) make even a better showing in all lines.

Statistics of commercial failures in the jewelry trade during the third quarter of the year will be found distinctly gratifying inasmuch as they show that the insolvencies, both in number and amount, were below the normal. According to a table prepared for *Dun's Review*, showing failures by branches of business, there were 24 insolvencies among dealers in jewelry and clocks during the third quarter of the year, and the total liabilities were but $143,288, or an average of $5,970. The figures for the previous four years show 39 failures in 1904, with liabilities of $256,156; 27 failures in 1903, with liabilities of $170,904; 25 failures in 1902, with liabilities of $276,173, and 26 failures in 1901, with liabilities of $145,664. The jewelry failures during September were also below the normal in number and amount, though not below the figures of September, 1904, in total liabilities. Last month there were nine failures, with liabilities of $80,407, or an average of $8,934. In September, 1904, there were 10 failures, with liabilities of $48,181; in the same month of 1903 there were but eight failures, with liabilities of $81,655; in 1902, 12 failures, with liabilities of $152,492; and in 1901, nine failures, with liabilities of $61,075.

### As to the Production of Diamonds.

IN another column of this issue we publish an article which appeared in the *Engineering and Mining Journal* on the subject of the price of diamonds, and, while as a rule we are always willing to acquiesce in the statements of so noted an authority on mining subjects, we, however, must take issue with this journal in the general conclusion of the article, although much of the information contained therein will prove interesting reading to the trade.

It seems to us that it would have been better had the author of the article produced in support of his denial of the decrease in the output of the diamond mines some statistics showing the yield in gem stones by the mines of the De Beers company, which supplies the great bulk of all the gems used. It appears as if the author did not take into consideration the increase in the amount of bort produced by the mines of the De Beers company in drawing his conclusions as to the product, nor did he take into consideration the fact that the Premier mine in the Transvaal, whose production he cites, cannot for some time be a factor in the question of price, even if the directors of that company should start to compete with the De Beers mines and the selling syndicate in London, because under the mining laws practically two-thirds of the value of the full product belongs to the Government, and but one-third to the company. This, if considered as a part of the cost of production, places a handicap on the Transvaal mine, as against the absolute ownership of the stones mined by the De Beers company, that will be hard to overcome, even with the largest production and the smallest cost of mining.

How effective this Government share in the production is, in relation to its final disposition, was commented upon by David Draper, the South African geologist who discovered the Transvaal mines, on his visit to this country, when he called attention to the fact that, should the great Cullinan diamond not soon be disposed of at a proper price by the directors of the new Premier mine, the pressure brought to bear by the citizens of the Transvaal would soon be great enough to cause the Government to step in and exercise its right, under its two-thirds ownership of the stone, to force a sale at anything like a reasonable price.

### Death of Henry H. Sheldon.

PROVIDENCE, R. I., Oct. 15.—Henry H. Sheldon, one of Pawtucket's best-known citizens, died at his home in that city last week after a long illness. He was 71 years of age and was the son of Pardon and Harriet (Collins) Sheldon, being born in Providence.

Deceased entered the jewelry business after receiving a common school education, and after working at it three years formed a partnership with George G. Greene, under the firm name of Sheldon & Greene. In 1863 he was appointed to a position in the United States Treasury Department, a place which he held until 1865. Later he was connected with a large cutlery house in Boston and still later with a similar enterprise in New York. In 1874 he came to Providence, where he became connected with the Retort Gas Stove Co., and in 1882 invented the Sheldon gas stove and established branch offices in Boston and New York. Of late years he had been largely interested in real estate and in street railway ventures in Pawtucket. He had twice been candidate for Mayor in that city, once as a Republican and again on an independent ticket.

Mr. Sheldon was not connected with any secret organizations, but was a member of the First Light Infantry Veteran Association and of the First Baptist Church of Pawtucket. The funeral, which was largely attended, was conducted by Rev. Frank Rector, D.D., and Rev. George Bullen, D.D.

Joseph Kopcsay, formerly in the precious stone business, is now manufacturing lawn and tree sprinklers at South Bend, Ind.

## New York Notes.

P. Mackey, pearl merchant of Muscatine, Ia., has been in the city for several days.

F. B. Ross, who is to open a new store in Columbus, O., was in this city last week.

The George T. McEneany Co., has succeeded S. E. Clairmont, optician, 129 E. 23d St.

Arthur Reichman, 65 Nassau St., has returned from a trip to the western pearl fisheries.

Maurice Brower will sail to-morrow on the *Deutschland* to pass a month in the pearl markets of Europe.

Mrs. Edward D. Bird, whose husband is with Tiffany & Co., died, last Saturday, at her home in Hempstead, L. I.

Jacob Jaffe, who was in business at 205 Amsterdam Ave., recently moved his home to 10 W. 18th St., and closed his store.

In the new store opened at Broadway and Rockaway Ave., Brooklyn, by H. A. Baker & Co., a clock department has been established.

Jacob G. Schnaper, 320 Bleecker St., recently sold the safe and fixtures of his jewelry store to Alexander Kipnis, who is conducting the business.

Wilson Bryant, formerly with the Camerden & Forster Co., last week entered upon his duties as salesman with the Mermod,, Jaccard & King Jewelry Co.

Jewelry store booths are to be a feature of a bazaar which will be conducted Nov. 27 to Dec. 2 by the Women's Auxiliary of the Jewish Hospital in Brooklyn.

Judgment for $53 was entered recently in favor of the Seth Thomas Clock Co., and against the Ocean View Cemetery, the amount representing the costs in a suit.

Kleinberg & Probstein, New York, were admitted to membership in the Jewelers Association and Board of Trade at a meeting held last Thursday by the Board of Directors.

A man giving the name of Thomas H. Boerum, and his address as 935 Pacific St., Brooklyn, was arrested recently on the charge of stealing a pearl necklace from a Fulton St. store.

Abraham I. Cohen, a real estate operator at Los Angeles, Cal., and who was formerly in the diamond business in New York, died, recently, at his home in the former city.

F. Kroeber, formerly of the F. Kroeber Clock Co., is now with Sussfeld, Lorsch & Co., importers, 37 Maiden Lane, and will devote his energies to the clock department of his house.

Ernest F. Konzelmann, who is associated in business with his father as a watchmaker and optician at 1348 Myrtle Ave., Brooklyn, was last week named on the Democratic ticket for Alderman of the 65th District.

A silver punch bowl, to cost $5,000, it is announced, will be given by the German Warrior and Veteran Societies of North America to the German Emperor on the occasion of his silver wedding, Feb. 27, of next year.

Benjamin Berkman and S. D. Levy, the jewelers accused of receiving stolen property from the Hall-Hazen-Martin gang of Harlem flat burglars, were each held, last week, by Magistrate Crane in $3,000 bail for examination.

A photograph and complimentary sketch of Wm. J. Carey, 198 B'way, was published, recently, in the New York *News*, which placed with him a contract for supplying Waltham watches and other prizes awarded in a recent voting contest.

Bertram Bernhard, who has been assistant manager of the claim and collection department of the Jewelers Association and Board of Trade, has accepted a position as manager of the law and collection branch of Adolph Schwarz, 229 Broadway.

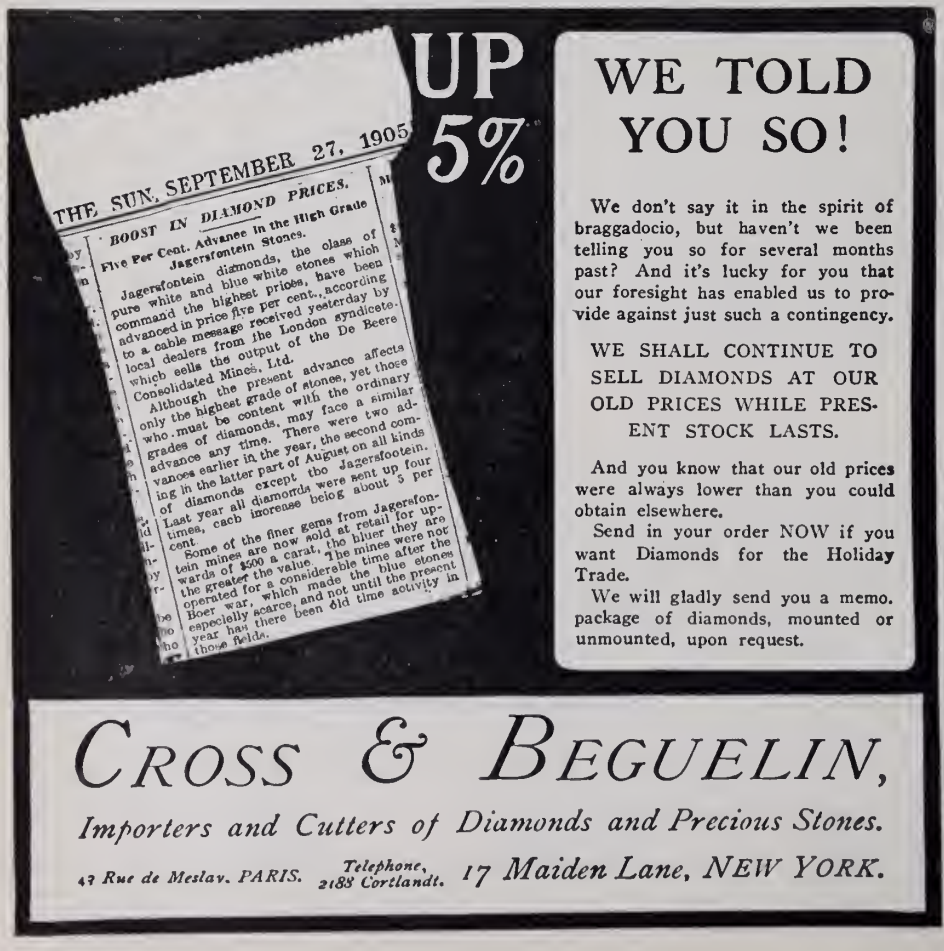
B. J. Van Gelder, of Antwerp, Belgium, a member of the firm of Van Gelder, Kahn & Co., 170 Broadway, New York, left for home, last Saturday, on the *Kroonland*, after passing two weeks in New York. This was his first visit to the United States.

Catherine Duerr, the 18-year-old girl bride who was found drowned in the Harlem river, last week, was the wife of Otto Duerr, a jewelry workman. Charles Hahn, another jewelry workman, was in the boat with Mrs. Duerr on the day that she met her death.

Diamond bracelets, rings and some other jewelry, valued altogether at $1,200, were seized by customs officers from Miss Ada Fireman, a seeond cabin passenger on the steamship *Philadelphia*, which arrived last Saturday, the jewelry being concealed in her stocking.

Marx & Miller, attorneys for Harry Levinson, the wholesale jeweler, 30 Maiden Lane, against whom involuntary bankruptcy proceedings were begun Aug. 15, said yesterday that all of the creditors have accepted the compromise offer of 20 per cent.

From Red Oak, Ia., comes the information that the indictment charging Thomas Dennison with complicity in the Pollack diamond robbery of many years ago, has been dismissed on the motion of the county attorney. Dennison was tried several months ago and the jury disagreed.



Wm. J. Goggins, 438 Pacific St., Brooklyn, was fined $25 in the United States District Court, last Wednesday, for using the mails to defraud. He obtained money by advertising under the name of W. E. Snell Co. the sale of "wonder packages," containing so-called jewelry.

Among the articles sold last week at the Fifth Ave. Art Galleries, 366 Fifth Ave., were several antique clocks belonging to the estate of William Mortimer Green. A bronze Marie Antoinette clock brought $36, and a Sèvres bronze Louis XVI. clock by Raingo Freres, Paris, was sold for $192.

Several boys in Brooklyn have complained to the police that they were swindled of small amounts of money, $1 and up, by a man who claimed that he was a foreman of a jewelry factory on Fulton St., and who, after promising employment, required them to pay a deposit which, he said, was according to the rules of the house.

Mrs. Josephine Healy, wife of Henry Healy, jeweler at 435 Fulton St., Brooklyn, died Sunday at her home, 96 Decatur St., in that borough. Mrs. Healy was born in Brooklyn in 1871, and was married in 1893. For a number of years she was prominent in the regious work of the Tompkins Ave. Congregational Church. The funeral took place yesterday.

C. F. Brinck, with the Crescent Watch Case Co., who recently returned after a

short vacation and business trip to the west, says that conditions in the territory he visited have been prosperous and the outlook is altogether promising. He said that the jobbers whom he met were unanimous in saying that the trade in the last three months was larger in value than in any corresponding period for several years.

Nathan Anusewitz, 37 Clinton St., is offering his creditors 50 cents on the dollar. A burglary occurred in his factory, as related in the last issue of THE CIRCULAR-WEEKLY, and according to his inventory he sustained a loss of $4,000. He says that the thieves took the more valuable portion of the stock, and, therefore, he is unable to meet his obligations. He expects to issue notes in settlement of the claims against him.

Benjamin Feingold, 528 Sixth Ave., was arrested, last week, on the charge of receiving stolen property. Jewelry to the value of $500, it is said, was recently stolen from Daniel Dougherty, a prize fighter, by a friend, Edward Farley. The latter was arrested, and made a confession, saying that he had pawned the booty with Feingold. According to the pawnbroker's statement, he did not know when he bought the articles that they had been stolen.

The Kennedy-Carey Co. is the name of a new corporation engaging in the jewelry and watch business at 198 Broadway, with an authorized capital stock of $5,000. The incorporators are Eugene A. Kennedy, who was for nine years with the Robert Simpson Co., at 143 W. 42d St., and Wm. J. Carey, who has been in the business since 1867, for a number of years with the old firm of Wheeler, Parsons & Hayes, and more recently in business for himself at 3 Maiden Lane. John M. McGee, the third incorporator, has been in the printing trade.

Patrolmen McHenry, of the Adams St. station, and Smith, of the Classon Ave. station, in Brooklyn, were summoned before Deputy Commissioner Farrell, one day last week to explain why they had bought diamond rings from instalment jewelers and had failed to pay for them. The patrolmen claimed that their other expenses had been so heavy of late that they had been unable to keep up their payments on the jewelry debts, but that they intended to pay in full. The Deputy Commissioner said that in future officers who fail to meet similar debts will be fined, and he gave the two officers before him additional time to settle.

In the window of Black, Starr & Frost, 436 Fifth Ave., are on exhibition the Kaiser's cups won by Wilson Marshall's schooner *Atlantic* in the race between New York and The Lizard and between Dover and Heligoland. A cut and description of the gold cup awarded in the race across the Atlantic was published Aug. 23 in THE CIRCULAR-WEEKLY. The auxiliary cup is from the royal potteries, and was sent from Berlin to St. Louis for exhibition last year. Mr. Marshall, the owner of the successful schooner, has presented a solid silver salver, beautifully chased and engraved with a picture of the boat, to Capt. Charles Barr, who commanded her in the transatlantic contest.

Joseph, Morris and Samuel Klein, who composed the corporation of Klein Bros.' Co., jewelry manufacturers at 51 Maiden Lane, are to be examined to-day in the Jefferson Market Police Court on the charge of grand larceny, preferred by Eduard Van Dam. The complainant says that he entrusted to the corporation merchandise which the brothers were to sell and turn over the proceeds to him, after deducting their profits, and that when the petition in bankruptcy was filed, Sept. 19, against the Kleins this stock had disappeared. A sale was recently conducted by the receiver at the corporation's factory and about $200 was obtained for the stock on hand and fixtures. The liabilities are estimated at $25,000.

Relatives of George C. Densmore are making inquiries to discover a watch which he left for repairs with a jeweler, whose identity is unknown to them, a short time ago before he received fatal injuries in an accident in the subway. Mr. Densmore lived at 89 Somers St., Brooklyn, and was employed at the 110th St. station of the Lenox Ave. subway. The timepiece, which is valued as a family heirloom, is an old-fashioned, English "Cosper," ladies' watch, a key-winder, the hunting case being of solid gold. It was bought many years ago at J. & W. Moir's store, 315 Hudson St. A nickel case watch was given by the jeweler to Mr. Densmore to carry until the repairs were made. Any information may be sent to Miss May T. Densmore, care of THE CIRCULAR-WEEKLY.

Window smashers broke the side plate glass window in the store of Louis Staudenbaur, 238 Grand St., Brooklyn, early one morning last week, and stole several $1 watches, which were hung on a crosspiece. Mr. Staudenbaur removes from his window each night all the jewelry except this line of watches. There is an electric light on the street near the store and he burns a 30-candlepower light in his window all night. The loss of the watches does not amount to as much as the expense of replacing the broken window and repairing and repaint-

OUR MOTTO is still—NOT HOW CHEAP, BUT HOW GOOD!

ing the woodwork, which was damaged. The thieves probably used a paving stone to break the glass. It is supposed that they are loafers who loiter about that part of the city. Since Mr. Staudenbaur has been in business in this store his windows have been smashed three times, the last occasion being about three years ago.

The bankruptcy case of Wm. W. Randall, formerly in business at 209 Greenwich St., Manhattan, which has been quiescent for some months, is to be reopened next Friday. The question of ordering Mr. Randall to turn over to the trustee in bankruptcy $5,000 in cash or the equivalent in merchandise, will be presented for the second time for adjudication before A. T. Stoutenburgh as Referee. The issue was originally referred to a referee, who took voluminous testimony, but died before reaching a decision. Mr. Stoutenburgh was then substituted by the District Court as Referee, and after reading the testimony taken by his predecessor, he handed down quite a lengthy opinion, which was presented to Judge Thomas in Brooklyn for confirmation. The lawyers for the creditors and for Randall differed in their interpretation of Mr. Stoutenburgh's decision, and the Judge finally concluded to send the case back to the Referee for further examination, in the expectation that conclusions will be reached so definite that the lawyers will agree as to their significance. It is probable, also, that further testimony will be taken. The Randall failure occurred Sept. 12 of last year, his petition estimating his assets at $10,985 and liabilities at $15,081. The schedules gave the values of the merchandise and fixtures at $7,000, and the amount actually realized was $3,100. Some of the creditors, through their counsel, charge Randall with failing to account for diamond jewelry and other stock to the value of $5,000.

A sale of diamond rings and other jewelry, seized from Aaron Rabinowitz, a passenger on the steamship *Zeeland,* is to take place Friday of this week, at 12 o'clock, in the office of Wm. Henkel, United States Marshal, Post-Office building. The jewelry was forfeited for violation of the Custom House laws. Mr. Rabinowitz carried the articles in his satchel, on his arrival from St. Petersburg, where he had been in the jewelry business. In explanation of his failure to declare the articles, he said that they were intended as presents for relatives in Philadelphia, and supposed that no duty was attached to the jewelry under such circumstances. The explanation did not save the merchandise from forfeiture. The sale will include one diamond and ruby brooch, one sapphire ring with diamonds, one solitaire diamond ring, one ruby with diamonds, one diamond cluster ring, one lady's gold watch, one gold chain, one lady's gold watch, one gold chain, one locket set with sapphires, rubies and diamonds, one pair gold bracelets, one gentleman's gold watch chain, one lady's gold snake bracelet and one silver cigarette case.

### Death of James H. Fleming.

NEWARK, N. J., Oct. 17.—James H. Fleming, formerly a watch case manufacturer, died last Saturday at his home, 49 S. 9th St., this city, of acute pneumonia. The funeral will be held this afternoon.

Mr. Fleming was a member of Field & Co., Newark, and afterwards was associated with a watch case company in Philadelphia. Then he engaged in the manufacture of watch case springs, and after a time sold out this business. He was president of the National Dairy Machine Co., to which concern he had given his attention in recent years.

Deceased was 66 years old, and is survived by a widow and a step-son.

## Trans-Atlantic Voyagers.

## Chicago Notes.

Daniel S. Jones, Independence, Ia., was a visitor here last week.

Edward H. Clopper, Polo, Ill., was here last week on a purchasing trip.

C. W. Crosby, Kansas City, Mo., is here taking a post-graduate course in optics.

August Wetterroth, retail jeweler, St. Joseph, Mo., is remodeling and refitting his store.

Frank H. Challen, representing the Ohio Cut Glass Co., is on a trip through Indiana, Illinois and Michigan.

Theodore L. Rogg, Des Moines, Ia., has notified his friends here that he will soon move into his new store.

Briggs & Dodd, the jewelry auctioneers, are conducting a successful sale for W. A. Kirkham, Leavenworth, Kans.

The Chicago Jewelers' Club held a smoker at the clubrooms Saturday night. It was a stag affair and was well attended.

Charles E. Graves & Co. have on exhibition in their show window a number of prizes which will be awarded by the *Evening Post*.

William L. Ely, who recently robbed A. W. Johanson's jewelry store, has been indicted by the Grand Jury and is held under bonds of $10,000.

One of the attractions at the advertising show held at the Coliseum last week was the display of F. H. Noble & Co., who exhibited a large line of novelties and operated machinery for making chains and pointing pins.

An exhibition of books on ceramics and pottery decorations will be held in the art rooms of the Chicago Public Library from Oct. 16 to 28. The display will be a fine one. The rooms will be open daily, except Sunday, from 9 A. M. till 5.30 P. M.

D. L. Davies, of Knapp & Davies, Nelson, Nebr., who was a visitor here last week, reports a good business in Nelson. His partner, Al W. Knapp, was married recently. Mr. Davies informed a Circular-Weekly reporter that A. D. Ackerman, of Fairbury, Nebr., has opened a branch at Nelson, with Mr. Durr in charge.

An adjustment bureau for the co-operative handling of insolvent debtors is being considered by the Chicago Credit Men's Association. The plan contemplates giving control of the bureau to an attorney, who will have the power to institute bankruptcy proceedings against any debtor of a member of the association whom he may find to be insolvent.

Col. T. P. Moody has returned from Green Bay, Wis., and has gone to Knoxville, Tenn., where he will start an auction sale for G. Kern, a retail jeweler of that place. Col. Moody is particularly fond of a song entitled, "Everybody Works but Father," and created a stampede as he sang it on State St. one day last week. His friends say he has a fine "subcellar" bass voice.

C. H. Seaman, diamond dealer in the Champlain building, had Mr. and Mrs. Louis H. Berg arrested last week, charging them with embezzlement. Both are out on bonds of $1,000 each. The case comes up Oct. 20. Seaman claims that Mr. and Mrs. Berg got from him $1,150 worth of diamonds on memorandum, and instead of returning either the goods or the money they pawned them. The proceedings against Mr. and Mrs. Berg were reported in The Circular-Weekly several weeks ago.

E. Bauman, of the Bauman Loan Co. and the Bauman Jewelry Co., whom Elmer A. Rich had arrested on a charge of knowingly concealing stolen property and who was subsequently discharged when the case came to trial, is suing the Elmer A. Rich Co. for false arrest, defamation of character, etc. His attorneys have brought two suits for damages for $50,000 each—one for damages for E. Bauman individually and one for damages to the Bauman Jewelry Co.

James T. Brady, attorney for Mrs. Berg, is trying to recover the money which Berg claimed to have lost at stud poker. Mr. Brady says the men who got Berg's money are well known socially and can be made to disgorge the money they won from Berg, who, it is claimed, bid as high as $400 on a card. As yet no part of the money Berg lost has been recovered for the trusting creditors.

A number of changes have taken place in the Columbus Memorial building. R. W. Dorg, optician, has removed from Room 704 to Room 703. A. C. Bard & Co. have removed from Room 704 to 703. The western office of Joseph Fahys & Co. has been removed from Room 501 to Room 704. The George H. Fuller & Son Co. has removed to the Heyworth building. The western office of Simons, Bro. & Co. has removed from Room 703 to Room 601. The western office of the Ostby & Barton Co. has removed from Room 607 to Room 706. L. G. Cobb & Co. have removed from Room 802 to Room 707. J. A. Schoenthaler has taken Room 607, in addition to his present quarters, and the Schrader-Wittstein Co. has added Room 501 to its premises.

The offer of Clapp & Cowl to compromise at 25 cents on the dollar has been accepted by all the creditors. All the expense of administration was borne by the estate, the creditors paying their attorneys' fees only. Lyndon Y. Cowl will continue in business at the old store, 68 Washington St., under the name of the Clapp & Cowl Co., a corporation. The only objector to the settlement on a 25 per cent. basis was Max L. Silverberg, a diamond dealer in the Champlain building, who was a creditor for about $1,000 and who only recently returned from Europe. Mr Silverberg, however, withdrew his objection and his withdrawal gave rise to a rumor that he had received a better settlement than the rest of the creditors. On oath Mr Silverberg denied this and to a Circular-Weekly representative said that, while he at first intended to fight the settlement, he concluded not to go to the expense without aid from the rest of the creditors.

### Retail Jewelers' Protective Association Decides on By-Laws.

Chicago, Oct. 15.—The members of the Retail Jewelers' Protective Association held their regular semi-monthly meeting yesterday and by-laws for the association were read, which will be adopted at the next meeting. The meeting was well attended and all the members present were enthusiastic over the possibilities of the new organization, whose aim is to prosecute all window smashers, burglars and hold up men who make jewelers their special prey.

The next meeting of this association takes place on Friday, Oct. 27, at 10 A. M. in room 912, Masonic Temple.

The advantages of belonging to this organization are many. The dues are small and within the means of every jeweler. Applications for membership should be addressed to William Lambucht, president, 1576 Milwaukee Ave., A. W. Johanson, treasurer, 270 Wells St., or B. T. Hoffman, secretary, 121 E. Fullerton Ave., Chicago.

## Pacific Coast Notes.

Harry Jacoby, Oroville, Cal., is enlarging is store and putting in new fixtures of a ate pattern.

G. A. Davis is preparing to open a store n the Merchants' Exchange building, at Villits, Cal.

A. E. Springborg, Redlands, Cal., was in San Francisco, last week, buying stock for is holiday trade.

O. H. Carns, formerly of Trinidad, N. Mex., has taken a position in H. Yanow's tore, Albuquerque, N. Mex.

J. I. Cohn, proprietor of the Cohn Jewry Co., Berkeley, Cal., has greatly imroved the interior and exterior of his store.

A. E. Case has moved his stock into new quarters in the Daneti building, Halfmoon Bay, Cal., where he has a much larger store.

L. C. Koberg, Healdsburg, Cal., is making extensive changes in his place of business. He is remodeling the entire building and putting in new fixtures.

Sol. F. Purdy, a pioneer jeweler of Downieville, Cal., well known to the early settlers of Sierra and Plumas counties, died suddenly, a short time ago, at the St. Charles Hotel, in Downieville, while at dinner with his friend, Frank Mora.

A. F. Dobrowsky, Redding, Cal., accompanied by his wife and son, is en route home from an extended pleasure trip. They visited the Lewis and Clark Exposition, Portland, Ore., just before it closed, saw Seattle and other cities and are now proceeding to San Francisco, where Mr. Dobrowsky will purchase stock for the holiday season.

C. O. McCarroll, field manager of the Mesa Grande Tourmaline Co., was in Los Angeles, Cal., last week, and says many gems are being taken from the mines. He also states that he firmly believes that San Diego County may yet become famous for its diamond mines.

A new wholesale house was opened in Los Angeles, Cal., Monday, Oct. 16, by Walsh & Hanbright. Mr. Walsh formerly represented the Dueber Watch Case Mfg. Co., and had headquarters in the Call building, San Francisco. Mr. Hanbright is also familiar with the jewelry business, having been identified for some time with E. W. Reynolds, of Los Angeles.

# To the Jobbing Trade.

before you go to the trouble of buying loose diamonds and precious stones and mounting them yourself.

We will save you all of the labor and some of the price by selling them to you already set.

Of course, if you have your loose stones bought, we can supply you with mountings of every description. In such a case, it is an advantage to be able to look over a mounted line such as we have, and set your stones accordingly.

## St. Louis.

E. Nickl has purchased the store of J. F. Schmitt, 2237 S. Grand Ave.

W. K. Bergfeld, of the H. G. Bergfeld Jewelry Co., is on a trip through Missouri.

E. S. Weidlich, of William Weidlich & Bro., has just returned from a visit to Kansas City.

James J. Burke, president of the Brooks Optical Co., has returned from a business trip to Chicago.

The Frederick W. Drosten Jewelry Co. donated a silver cup that was offered as a prize at the horse show, which closed here last week.

L. Blumenkranz has moved his stock of jewelry formerly at 513 Franklin Ave. to 508 Olive St. Mr. Blumenkranz also has a store at 1602 Market St.

John Bolland, of the John Bolland Jewelry Co., will shortly move his residence from the Southern Hotel to a new apartment house at Kingshighway and McPherson Ave.

Harvey M. Hubbard, who represents the L. Bauman Jewelry Co. in Texas, with headquarters in Fort Worth, spent several days in this city last week. He will stop off several days in Hot Springs, Ark., on his return trip.

Among the visiting jewelers here last week were: George F. Longnecker, Winchester, Ill.; Emil Bichsel, Sedalia, Mo.; L. S. Smith, Kosciusko, Miss.; A. Hollister, Monett, Mo.; Jacob Garrtner, Thomas, Okla.; J. R. Spradling, Flatriver, Mo.; F. D. Hoff, Dyersburg, Tenn.

Harry Lucas, one of the best-dressed men ever confined in the Alton (Ill.) jail, last week was bound over to the Grand Jury on charges of burglary, larceny and highway robbery for stealing two watches. Pawn tickets for the watches were found on his person and he was identified as the man who pawned them.

Fred Wandstrat, 10 years old, a runaway from Cincinnati, O., was arrested at Union Station last week, while wandering around at 11 o'clock in the evening. He had in his possession about $200 worth of jewelry and diamonds, three new grips and 45 cents in money. He would tell the police nothing as to where he secured the jewelry.

Mark Eiseman spent several days here last week, having come from his headquarters at Birmingham, where he represents the L. Bauman Jewelry Co. He states that the prospects for a good business in that section of the south, despite the yellow fever epidemic, are favorable.

A man whom the police say is Walter H. Lydick, of Washington, D. C., has been arrested here. Lydick is wanted in Washington on an embezzlement charge and the police have been looking for him for the past three years. He disappeared from the National Capital several years ago with valuable diamonds and other jewelry, the property of various jewelry houses for which he was acting as agent. The detective who arrested him saw the accused coming from a theater and called "Lydick," and the man turned around instantly. When the officer questioned him, however, he said his name was Harry Wilson. A picture of Lydick, sent abroad at the time he disappeared from Washington, was found t closely resemble Wilson.

Goodman King, president of the Mermod Jaccard & King Jewelry Co., recently celebrated the 40th anniversary of his connection with that firm. Mr. King entered the employ of the firm in 1865 as a bookkeeper and collector. He was pleasantly reminded of the event when he found a cluster o 40 American Beauty roses on his desk, with a card from the 300 employes of the firm "1865-1905. To our President: May the future years to come be as prosperous a the past, with many returns." Mr. King replied in a terse and fitting speech. The firm was established by Louis Jaccard in 182 He was joined in 1837 by Eugene Jaccar and in 1845 by A. S. Mermod, who die two years ago at the age of 78. In 184 D. C. Jaccard entered the firm, dying si years ago, and C. F. Mathey, whose so is now vice-president, secured an interes in 1860. Mr. King was admitted into the co partnership in 1871. In 1883 the co-partner ship was converted into a corporation, wit A. S. Mermod, president; D. C. Jaccard vice-president; Goodman King, secretar and C. F. Mathey, treasurer. The nex change was made two years ago, when M King was advanced to the presidency, an the style of the firm became the Mermo Jaccard & King Jewelry Co.

## Kansas City.

TRADE CONDITIONS.

Jobbers state that there has been very heavy buy-g during the past week. Traveling men, too, re-rt a big business. Besides there is a great deal business being done through the mails. From esent indications, they say, there will be about the orders on file by November that can be ed. It seems the retailers of the country have en allowing their stocks to run rather low, and w that there is such a propitious business pros-ct they are stocking up heavily. The factories re entirely unprepared for such a rush of busi-ss. Retail jewelers who do not place their orders rly will have to be satisfied with what they can t, instead of being able to pick and choose.

C. B. Kionka, of Kionka & Stuhl, started it last week on a trip through Iowa and Illinois.

Harry Carswell has resumed his business ities after a severe illness of several eeks' duration.

Mr. Lenneman, formerly with H. E. nerth, has resigned and taken a position ith the Hassig & Krieke Jewelry Co.

Charles Moll has sold out his business in ardiner, Kans., and has taken a position ith Frank Winkler, Kansas City, Kans.

John Galladini, of the force of jewelers nployed by the Meyer Jewelry Co., has st returned from a three months' visit to s old home in Italy.

C. W. Bowman, a jewelry auctioneer, of is city, has left for Syracuse, Nebr., here he will conduct an auction sale for . A. Cross, who is closing out his business.

John Betcher and Jeff. Creviston, for-erly with the Dorst Co., have engaged in siness for themselves in the Missouri ilding, where they will manufacture jew-ry and devote particular attention to case pairing.

The Jaccard Jewelry Corporation has just rnished to the Kansas City *Journal*, on ecial order, a handsome cup, which the *urnal* is offering as a prize for the golf urnament, which begins this week on the lm Ridge Club links.

Mr. Underwood, formerly a retail jew-er on 11th St., is the author of a new ook, entitled "Travelers' Stories," which receiving the favor of the reading public. Ir. Underwood was a traveler himself at ie time, and his acquaintance among trav-ers is very large.

The following students have just been en-lled on the books of the Kansas City Poly-chnic Institute: D. W. Huff, Garnett, ans.; Miss Lena Whiteside, Liberty, Mo.; . W. Struby, Green City, Mo.; Luther raver, Kansas City, Mo.; H. T. Corson, ansas City, Mo., and Katherine Slusher, ndependence, Mo.

On Oct. 9 a thief cut a hole in the show indow in the store of R. H. Morehouse, opeka, Kans., and carried away about $600 orth of jewelry. The day before Mr. Morehouse had three big diamonds in the window, and it was evident they had attracted the thief. They had been removed before night, however.

J. R. Mercer has on display in his show windows two handsome vases, which he is furnishing for the American Royal Live Stock Show, one being for the National Bank of Commerce, to be presented to the champion percheron stallion of the show, and the other for the firm of Woolf Bros., to go to the champion French coach stallion of the show. Both vases are elegant specimens of the silversmith's art.

The following out-of-town jewelers were in this city during the past week: Geo. W. Lewis, Herington, Kans.; Geo. Porth, Jefferson City, Mo.; G. N. Hartwell, Jamestown, Kans.; Ross C. Libby, Weir, Kans.; P. J. Thomas, Fredonia, Kans.; J. K. Riffe, Craig, Mo.; Mr. Davis, of Davis & Owens, Falls City, Nebr.; J. C. Dewey, Breckenridge, Mo.; J. B. Vannoy, Hereford, Tex.; J. B. Williams, Higbee, Mo.; J. H. Leonard, Kinsley, Kans.; J. W. Schmandt, Holden, Mo.; Fred. Krueger, Shelbyville, Mo.; H. A. Tibbals, Emporia, Kans.; Frank Wuerth, of I. H. Wuerth & Son, Leavenworth, Kans.; G. H. Methe, Council Grove, Kans.; Orville and Sam Shrack, of W. H. Shrack & Sons, Pratt, Kans.; Otto Burkland, Osawatomie, Kans.; F. W. Taylor, Trinidad, Colo.; Mr. Crew, of Crew Bros., Tahlequah, Ind. T.; I. Boger, Ardmore, Ind. T., and Harvey Lewis, Woodbine, Kans.

## Omaha.

Sol. Bergman will leave soon for a short business trip in the west.

T. L. Combs, of T. L. Combs & Co., has gone east on a short business and pleasure trip.

Mrs. G. W. Goldberry, Craig, Nebr., spent a few days visiting in this city last week.

Morris Berg, of Hyman, Berg & Co., Chicago, was the guest of S. W. Lindsay, for a few hours Thursday, on his way to Chicago.

The case against Tom Dennison, connected with the Pollock diamond robbery, has been dismissed. Discrediting of Shercliffe and failure to secure promised cash is said to be the reason for the action.

Out-of-town buyers in this city last week were: C. Thelen, Shelby, Nebr.; C. A. Nordhause, Wall Lake, Ia.; G. W. Butterfield, of H. G. Butterfield & Co., Hamburg, Ia.; F. A. Barnard, Stromsberg, Nebr.; Mr. Samson, Blair, Nebr.; Hilmar Anderson, Fremont, Nebr.; C. F. Collins, Dunbar, Nebr.; Banks Lerew, Ashland, Nebr.; W. A. Myers, York, Nebr.; S. S. All, Clarks, Nebr.

## Indianapolis.

TRADE CONDITIONS.

Out-of-town jewelers here, last week, to stock up for the Christmas trade, reported that business throughout the State is better than for a long time. Good crops have put money in the pockets of the farmers. Local merchants are elated over the prospects for an unprecedented holiday rush. Collections are said to be satisfactory. Manufacturers are working overtime in an effort to keep up with orders.

Mr. and Mrs. Carl L. Rost last week entertained relatives from Columbus, Ind.

Charles Haseltine, of Haseltine Bros., Kokomo, Ind., was greeting friends in this city, last week.

Frank D. Bowers, Lancaster, Pa., was in this city last week, looking for a location for a retail store.

Horace A. Comstock has just purchased an 18-foot gasoline launch to add to his camping equipment at Broad Ripple.

H. Smith, Logansport, Ind., was in this city last week, on his way home from Kansas City. He said that the jewelry business in the west is booming.

Elmer Stokes, watchmaker for Horace A. Comstock, was married in September to Miss Anna Martin, of this city. The wedding was kept secret for a month.

The firm name of Conway, Stanley & Lanham has been changed to Stanley & Lanham, J. M. Conway having retired. The firm has moved from the Lemcke building to Virginia Ave.

No clue to the identity of the cracksmen who blew open the safe in the store of John J. Harrison, at Clayton, Ind., has been obtained by the local police. Various persons arrested on suspicion have been released from custody.

Out-of-town jewelers who visited the local jobbers and manufacturers last week, included: J. Hummel, Jr., Muncie; C. W. Neal, Franklin; H. F. Bennett, Lapel; E. O. Collins, Franklin; F. C. Sheldon, Shelbyville; P. C. Seaton, Clayton; A. W. Owens, Greenwood; D. S. Whittaker, Lebanon; J. M. Washburn, Anderson; A. Pursee, Noblesville; J. A. Miessen, Cicero; Geo. L. Spahr, Lebanon, and Leslie E. Heaps, Spencer.

## Minneapolis and St. Paul.

Fred Betlach, formerly of Duluth, is a new jeweler and diamond setter for Johantgen & Kohl, Minneapolis.

Axel Madsen, Minneapolis, has just returned from a six weeks' trip through the northwest, on behalf of his firm, Rettig, Hess & Madsen, Chicago.

A. Jay Gould, Minneapolis, is credited with having found pearls valued at $2,000 in orders for oysters at a local cafe. One of the largest was sold in that city for $800.

Philip M. Kohl and Miss Rose Mueller will be married to-day at the Church of St. Boniface, in Minneapolis. Mr. and Mrs. Kohl will take a wedding trip to the east. Mr. Kohl is the junior member of the manufacturing jewelry firm of Johantgen & Kohl, Minneapolis.

One of the most fashionable weddings in Minneapolis, recently, was that of Walter Gibbs Hudson and Laura Belle Harrington, both of Minneapolis. The ceremony was performed at St. Mark's Episcopal Church, Wednesday evening, Oct. 11. The groom is the junior member of J. B. Hudson & Son.

A new swindle has been tried on jewelers in the Twin Cities. A well-known make of watch is left to have a hand replaced or some other small repair made, with the promise that it will be called for a few minutes later. Because of the brief time no claim check is accepted. The man fails to call on time, but after a few hours another man who looks like the original calls, pays for the repairs and takes the watch. Soon after the original comes in for his watch and then sets up a demand for a settlement.

## Cincinnati.

TRADE CONDITIONS.

During the past few weeks the improvement in business conditions here, especially among the jobbers, is remarkable. The general complaint now seems to be that dealers can't get stock in fast enough to fill their orders. For some weeks work has kept up day and night in almost all offices. Manufacturers are in want of help and report business to be the best experienced in many years. Retail business is also picking up a little earlier than usual, and in fact has kept up pretty well all Summer. In all lines sales this Fall so far have exceeded the records of past years.

Edgar Fox, of Lindenberg & Fox has returned from a trip to Chicago.

Joseph E. Smith, Lockland, O., held his opening sale, Oct. 12. It was well attended.

Arno Dorst, of the Dorst Co., Lion building, is in Kansas City looking after interests of the company.

Adolph Smith, with H. A. Dodt, 30 Emery Arcade, is ill with fever and unable to attend to business.

Loring Andrews, of the Loring Andrews Co., has returned from Europe, where he had been purchasing holiday stock.

B. F. Roark, Rome, Ga., was here last week purchasing stock for his new store, which is one of the finest in the south.

Edward Croninger, Glen building, with his wife, spent the past week in Louisville, Ky., where he attended a lodge meeting.

E. P. Roysdale, Franklin, Tenn., has been in this city making purchases for the handsome new store which he has just opened.

The MacDonald Jewelry Co., of Lima, O., recently purchased stock here for its store, which has again been opened after being completely remodeled.

F. W. W. Trewin, with the Keystone Watch Case Co., at New York, and F. B. Falkner, with this company at Philadelphia, were visitors here during the past week.

The Greutz Plating Co., Lion building, will soon occupy the entire floor on which its quarters are now situated. An addition will be made to the factory and the office will remain as it is.

The John Holland Gold Pen Co. has about completed the repairs made necessary by the recent fire, and is now negotiating for more factory room on account of rapidly increasing business.

Charles W. Hicock, of the Gorham Mfg. Co., who for several weeks has been laid up with typhoid fever, is now seen on the streets again, and is receiving the congratulations of his friends on his recovery.

An uncontrolled auto carrying five passengers ran into the Oskamp Jewelry Co.'s show window, 5th and Vine Sts., one morning, recently, shattering the glass. The chauffeur regained control and the party disappeared before officers arrived. The damage to the window and contents was considerable.

Charles Meyers, who recently left the Dorst Co., Lion building, without explanation and for whom a warrant of arrest was issued, to explain why a small diamond

**Odd Pieces,**

**Charles T. Spence & Co.,** 103 State Street, CHICAGO, ILL.

as missing, was acquitted of the charge in he police court, last week, as there was no vidence against him. Myers claimed he as away at the time the diamond was tolen. Upon hearing that he was wanted n charge of grand larceny he gave himself p to the police.

Between 2 and 3 o'clock A. M., Oct. 8, a atrolman saw two colored men working at door in the rear of Henry Korf's store, 25 Main St. The men saw they were be- ng watched and ran away, but the officer ave chase and fired two shots at them. )ne of the shots hit one of the fugitives, ut he kept on running. The other man id behind a brick pile and was caught. He ave his name as Joe Brannan, and when ried in the police court was sentenced to erve a term in the workhouse. The man ho got away is known as "Philadelphia Vill" Jones, and is still at large.

John Sternberger, jewelry salesman at 'hiladelphia, Pa., has filed a suit against )etective Cal. Crim and B. Greenwald, at ace and Longworth Sts., in the United tates Court, for $50,000 damages for false rrest. He alleges that Mr. Greenwald, at lr. Crim's instigation, charged him before magistrate with having embezzled a $375 amond stud and a cluster ring at $96, and used his arrest in Philadelphia. He also ates that the Grand Jury refused to return n indictment. It is claimed by Mr. reenwald that relatives settled for the mount due him on goods which Stern- erger had gotten and sold, but hadn't paid im for.

Among the out-of-town jewelers buying here during the past week were: J. T. Anderson, Dayton, O.; H. Mehmert, Olney, Ill.; O. L. Anderson, Columbus, O.; Joseph C. Meyer, Harrison, O.; T. P. Fry, Lewisburg, W. Va.; August Vial, Horse Cave, Ky.; J. H. Boiarsky, Huntington, W. Va.; H. A. Rohs, Cynthiana, Ky.; E. F. Starks, Newpoint, Ind.; N. Sanning, Crittendon, Ky.; A. B. Wilson, Greenfield, O.; W. R. Jackson, Franklin, Ky.; Charles E. Seng, Louisville, Ky.; O. Sherwood, Falmouth, Ky.; J. H. Bovard, New Castle, Ky; A. B. Wilson, with F. Midelburg, Charleston, W. Va.; F. A. Schweeting, Oxford, O.; E. H. Didot, Versailles, O.

The diamond, valued at $500, which was lost by Mr. Bingaman, of Bingaman & Co., some weeks ago, is located in Hamilton, O., a Cincinnati, O., detective believes. A reward of $100, which was later increased to $150, was offered for the return of the stone. During the past week Frank Clements, a clerk of the Mayor of Hamilton, notified a detective here that he thought he knew where the stone was hidden. The detective went to Hamilton, and a young man named Will Whitney was questioned as to the stone. The detective says Whitney told him he had the stone in a trunk at his home, but though a search was made no diamond could be found, much to the surprise of Whitney, who now says the stone has been stolen from him.

A. J. Green, Mound City, Mo., has discontinued business and moved to Twin Falls, Idaho, where he will engage in farming.

## Toledo, O.

TRADE CONDITIONS.

Toledo jewelers are enjoying the best ante-holiday trade in their history. This business is not limited to the wealthier customers, but includes all patrons, who are buying liberally. Sales for the Fall are way ahead of those a year ago. Those jewelers who do a large business in diamonds state that they are selling more than they have sold for years, despite the present high prices. The reason for this condition lies in the general prosperity of the people. There is not a contractor in Toledo but who is trying to get more men; in fact the general cry is "More employes." The result is that everyone is working and everybody has money to spend. The coming holiday season will likely establish a new high water mark so far as the volume of business is concerned.

Mrs. W. H. Broer is entertaining a number of out-of-town friends.

Milner & Co. are greatly increasing the capacity of their jewelry department.

The wife of John Prochaska, 109 Summit St., is recovering from severe illness dating back over a year and a half. She is not yet able to leave the house, although she will likely do so shortly.

The appearance of the new Toledo terminal passenger station has been enhanced by a large circular clock, which comes from the Summit St. store of William Walcott. It is the largest station clock erected in Toledo.

J. G. Kapp has just installed a handsome glass case for his solid silverware. It stands on a marble base and is made of plate glass, the joints being made by a patent clasp and without the need of any holes in the glass.

***Publishers,***
**11 John St., cor. Broadway, New York.**

## If You Know the Marks

you are not confined to the limitations of your stock, but will be able to supply any goods desired. Frequently a resident of a town or city will return from a visit to a larger city, bringing back an attractive novelty or piece of jewelry that is greatly admired by her friends, who will probably want to obtain others like it. They will first call on the local jeweler and if he is not an up-to-date jeweler he will turn them away disappointed because he has not the articles in stock. If, however, he is a progressive dealer, he will examine the trade-mark on the article, identify the maker and send for a line on memorandum. He will tell his prospective customers that he has not the goods in stock just at present, but will have them in a few days. He will make a sale, and every sale counts. But more than this, he will agreeably surprise and please his patrons and will convince them that it is not necessary to go out-of-town to obtain the latest and best productions of the jeweler and silversmith.

## "TRADE-MARKS OF THE JEWELRY AND KINDRED TRADES"

(Second Edition)

will enable the jeweler to identify the maker of any article embraced in the jewelry and kindred trades. It illustrates 4,000 marks and covers every branch of the trade. It also contains much interesting and valuable reading matter on the subject of trade-marks in general.

One jeweler, after having the book for a while, wrote: "This book has been invaluable to us upon many occasions. Like the cowhoy's pistol, 'tis not required every day, but when needed it is wanted quite bad."

PRICE $3.00,

Express Prepaid.

PUBLISHED BY

The Jewelers' Circular Publishing Co.,

11 John Street, New York.

## News from the Optical Trade.

H. E. Lough, Tampa, Fla., has added to his optical parlors on Cass St. machinery for the manufacture of lenses.

Otto Bachmann was recently elected secretary and treasurer of the Western Optical Mfg. Co., 714 Pine St., St. Louis, Mo.

James Sullivan, who has been with F. W. Estabrooks & Co., Blackduck, Minn., has gone to Minneapolis to take a three months' course in optics.

A few days ago the Oregon State Board of Optometry held an examination for applicants who desired to practice optometry, and out of 30 who took the examinations eight failed to pass.

T. F. Butler and T. Coffin, of the Montreal Optical Co., Montreal, Can., attended the funeral of Joseph Charles Roberts last week. Mr. Roberts was Mr. Butler's brother-in-law. The funeral was largely attended.

Members of the faculty of the Rochester School of Optometry and several students spent one day last week at Geneva, upon the invitation of the Geneva Optical Co. After dinner the party was conveyed to various points of interest about the city including the Standard Optical Co.'s plant.

The following letter, which was recently sent out by the Johnston Optical Co., Detroit, Mich., to its salesmen, heads of departments and other employes who have been with the concern for a certain length of time, is self-explantory:

I have thought for years that some time I would give some of the employes of the Johnston Optical Co. a share in the profits of the business. I am pleased to inform you that such time has arrived and that the plan of division for 1905, in which you will participate, will be as follows:

*First.* The capital actually invested as shown by the inventory at the close of 1904 shall first draw seven per cent. interest, the balance then remaining to be divided in such proportion as the capital invested in the business bears to the salaries and wages of those participating.

*Second.* Should you wish to leave any profits or funds with the Johnston Optical Co., not exceeding $1,000, we will pay you seven per cent interest per annum when left one year or longer.

*Third.* Other employes of the Johnston Optical Co. may participate in the profits upon invitation but the computation of their share shall be figured only on wages earned after date of notification.

*Fourth.* Any employe not under contract can withdraw from the company's employ at any time by giving three months' notice and still participate in the profits while employed.

*Fifth.* If any employe under contract leaves without the company's consent, he shall not be entitled to any share of profits for that year.

*Sixth.* We reserve the right to discharge any employe at any time, and in such case his share shall be based on the salary earned while in our employ.

*Seventh.* The division of profits will be figured as soon as our books are closed for the current year, but we hold the right to retain the reserve until three months after that date without interest.

I intend to make this division for the year 1905 only, as experience may show that some changes are needed.

In formulating this letter I have tried to view it impartially from your standpoint as well as my own, as our interests are mutual. We also must not forget that our customers' interests are also mutual with our own; for this reason we must aim to protect them in every way possible.

As you know, my policy has always been to supply legitimate dealers only with our goods, and I have offended many friends by refusing to sell them at retail. Therefore, we must ask you to protect the retail trade by refusing to supply our goods to consumers.

Believing you will see the importance of this and wishing our mutual prosperity, I am,

Fraternally yours,

(Signed) GEO. JOHNSTON, President.

### Wearers of Strange Jewelry.

SIR THOMAS LIPTON is said to be the possessor of a breastpin which is a perfect model of the yacht *Shamrock III.* The yacht floats on a sea of emerald, and by twirling the pin can be made to move forward and pitch and toss as if actually in the sea.

A lawsuit lately reported from Dresden shows that Sir Thomas Lipton's breastpin is by no means unique in freakishness. The subject of the suit was a lady's bracelet, composed of a chain made up entirely of tiny gold and jeweled motor cars. The lamps were represented by diamonds, behind which shone tiny electric lights.

More democratic is the taste of a Mrs. Veigein. All this lady's jewels in some way refer to her husband's business, that of railway contractor. A necklace is made like a section of rails, the metals being gold and the sleepers coral. A brooch is shaped like a turntable, while the signal lamps and flags for which her husband contracts, are inlaid in emerald on a gold bracelet.

The German Chancellor, Count von Buelow, wears a life buoy breastpin. While staying at Heligoland many years ago he rescued a Hamburg gentleman who had fallen off a tugboat by throwing him a life buoy. As a token of gratitude the rescued man presented his savior with the pin.

A marvelous watch has been made for a Nancy gentleman named Ducrot. The double case, which is about as broad as a sixpence, is made of two large emeralds hollowed out. Inside are a dial and chronometer works, a compass and a guide to the movements of the moon and planets. The watch, including the two emeralds, cost over £8,000.

Musical jewelry is not unknown. A Milanese named Fassicomo is said to have given his wife a bracelet which tinkled forth three different tunes.

An artificer in Odessa lives wholly by inventing jeweled freaks. Among his productions are gravestone breastpins, bracelet puzzles, which can be unclasped only by turning the inset gems in a particular way, and talking brooches. Talking brooches can be made to flash forth such simple words as "yes" or "no," and are in great demand among young ladies who expect offers of marriage.

A San Francisco gentleman has a jeweled pipe. The pipe is made of meerschaum, covered with a thin sheet of gold, in which are set pearls, sapphires and diamonds.

The tiara of a lady of the same city represents the inmates of a Noah's ark. Round the edges are set jeweled horses, cows, lions, bears, serpents and birds. At the back is an artificial oyster, carved out of mother-of-pearl, representing, according to the owner's opinion, the crown of the animal creation.

In Leipsic is a lady who possesses a peacock brooch, the tail of which is set with stones colored in exact imitation of that of a real peacock. The tail distends or closes at the owner's will.

When the Kaiser painted his famous picture of "The Yellow Peril" a Berlin jeweler put it on the market in the form of a brooch, the figures being depicted in enamel.

Another piece of "topical" jewelry was issued in St. Petersburg shortly after the investment of Port Arthur. It was a gold brooch on which, set in colored gems, appeared a big Russian wresting a Jap flag from one of his diminutive enemies.

The King of Italy inherited from his ancestors a set of shirt studs, each of which is set with a big diamond containing a sapphire. The diamond completely surrounds the sapphire, and where the joining is no jeweler has ever been able to discover.

Among other articles of freak jewelry owned by the same gentlemen is a scarf pin shaped like a lighthouse, the jeweled top of which revolves, and a pair of sleeve links containing watch, compass and a snuff box.

Among the treasures of the Gaekwar of Baroda is a pair of earrings, each made of a single ruby hollowed out and containing a few drops of a precious perfume. Another Indian potentate glories in a jeweled breastplate showing the possessions in precious stones. Three years ago the Czar Nicholas sent as a gift to Paris a map of France, with all the departments shown in gems obtained in the Ural mines.—*Pearson's Weekly.*

---

J. H. Fling, Old Town, Me., has discontinued business.

A watch once owned by Marquis de Lafayette recently came into the possession of S. S. Wert, Altoona, Pa. The watch was made by Gregson, Paris, France. It is made of gold and is studded with about 480 pearls. Instead of a mainspring a small chain encircles the drum and keeps the watch in motion. Lafayette at the close of the Revolutionary War gave the watch to Col. Smith, his chief of staff, as a keepsake and memento of their struggles and hardships, as well as companionship, during the war. Col. Smith was the great-grandfather of Mr. Wert and the timepiece descended to Mr. Van Pelt and by him was bequeathed to Mr. Wert.

# The Bachelor's Alarm.

## A Most Novel Alarm Clock.

The figures on the dial are represented by groups of tiny men in dress suits, each group a separate picture, forming by their varying attitudes the numerals one to twelve.

**In Place of Hands on the Clock's Face**

there is a dainty, beautifully colored ballet girl, whose pointed toes in her journey about the dial designate the time of day—*can you imagine her position at a quarter of three?*

**The Bachelor's Alarm**

has been universally pronounced the cleverest novelty produced in years. In the bedroom, the cozy corner—the den—it's wonderfully attractive.

## San Francisco.

C. Gilbert, Eureka, Cal., is now in this ty, buying goods.

E. W. Clemo, Nevada City, Cal., last cek replenished stock in this city.

C. Haas, Stockton, Cal., made selections or his Christmas stock here last week.

Alex. Feldenheimer, with the California welry Co., visited Los Angeles last week.

M. Markheim, Stockton, Cal., was in San rancisco last week, combining business nd pleasure.

H. S. Field, of Hammersmith & Field, as just returned from a vacation much nproved in health.

Louis M. Cahn, formerly with Wolf ros., has taken a position with the Alhonse Judis Co.

Neil O'Neill has fitted up a store in the ew Terminus Hotel, a few doors from is former location, at 20 Market St.

O. M. Howard, formerly with the San rancisco Jewelry Co., is now connected ith A. Schohay & Son, 308 Hayes St.

C. W. Friend, Carson City, Nev., called n the San Francisco jobbers last week and ade large purchases of holiday goods.

Mr. Lord, a member of the firm of lakslee & Lord, Goldfield, Nev., was here st week on a buying trip for his house.

W. J. Brown, J. B. Whitney's well-known aveling representative, has just returned om a successful trip through the north.

J. P. Alverson, Tulare, Cal., made a brief sit to San Francisco last week, spending ost of his time in the Sutter St. jobbing istrict.

E. H. Gotlschalk, formerly with Albert ansen, Seattle, Wash., has taken a position s watchmaker with Brittain & Co., 120 eary St.

J. Auerbach, with M. Adelsdorfer, westrn agent for the William E. Gilbert Clock o., will take a trip through the San Joauin Valley this week.

A. Garcia, formerly with the Portland ewelry Co., has taken a similar position ith the Alexander Jewelry Co. Mr. Ries, watchmaker, has also been added to the orces of the latter concern.

H. F. Barbier, a member of the W. K. anderslice Co., who has been stopping at ne Astor House in New York for the past few days, buying goods for his house, is expected to return shortly to San Francisco.

The W. K. Vanderslice Co. has increased its force by the addition of two new salesmen in the persons of D. K. Rauch, who takes a position in the gold department, and Charles Parmenter, who has been added to the silver department.

Rothschild & Hadenfeldt now have the largest force in their factory at 134 Sutter St. that they have employed during the past 15 years. They have just secured the services of George R. Clarke, Providence, R. I., who will in the future act as manager of the factory.

J. Lewis, familiarly known to the trade as "Jack" Lewis, traveling salesman for M. Levy & Co., has resigned his position with that company and will in a short time open a wholesale store in San Francisco. Mr. Lewis has been identified with the jewelry business for the past 35 years and during that time has made many friends.

The men employed in the manufacturing jewelry houses of San Francisco met Oct. 5 and organized a branch of the Gold and Silversmiths' Allied Trades Union. The roll was signed by 173 persons. Application has been made to the International Jewelry Workers' Union for a charter. The new organization will meet again Oct. 19 for the purpose of electing officers.

Jacob Olcovich, who is associated with his father in the retail jewelry business at 226 Ellis St., went violently insane a few days ago, and is at present confined in the insane ward of the San Francisco prison, prior to being committed to an insane asylum. While at work with his father Mr. Olcovich suffered an epileptic fit, which was followed by a lapse into violent insanity. Mr. Olcovich, Sr., escaped from the store, locking the insane man within. The latter threw himself through the plate glass window and after making his escape attacked a tailor and his wife, who had an establishment next door. The tailor and his wife escaped and the police were called. After a struggle of several minutes, during which the tailor shop was badly wrecked, the crazy man was overpowered. On the way to the jail Mr. Olcovich became more violent, smashing a lamp and other frail parts of the patrol wagon.

## Cleveland.

TRADE CONDITIONS.

Traveling men of the local jobbing and manufacturing houses, returning from their first trips, report an excellent business for the Fall and holiday trade. They say that retailers over the central States are buying more liberally than they have for some years. In addition, all the manufacturing concerns are running full time and people seem to be exceptionally prosperous. They look for the best business they have enjoyed for several years, although they do not expect retail merchants to overstep themselves, as they did two years ago. The local retail dealers are having a fair trade for the Fall months, but say that indications for a good holiday business are very good.

The Harburger Jewelry Co. has changed its corporate name to the Harburger Bros. Co.

Webb C. Ball has been appointed general time inspector of the New York & Ottawa Railroad Co.

The traveling men for the Sigler Bros. Co. are preparing for their second or regular holiday trips and will be out in a few days.

J. W. Dunlap, Greenville, Pa., spent two or three days among the wholesale houses here last week, making up his holiday stock.

A. E. Knight, Michigan representative of the Scribner & Loehr Co., returned to the house Friday and will start out again within a few days. H. S. Hurlbut, representing the house in southern Ohio and West Virginia, was also at headquarters last week.

Among the visiting jewelers noted in the city within the last week were the following: H. H. Brainard, Medina; A. P. Humphreys, Bellefontaine; Stephen Emery, of Birrell & Fobes, Kinsman; Mr. Judkins, of Judkins & Co., Flushing; W. W. Wells, Lodi; D. Leonheiser, Huron; J. G. Davis, Bellefontaine; L. J. Goddard, Ravenna; John Austin, Geneva; H. S. Sumner, Akron; W. H. Packard, Uhrichsville; E. N. Davis, Kent.

Contrary to a previously published report, Mrs. Josephine B. Ways, Connellsville, Pa., has not opened a new store in Dallas, Tex., but will remain in Connellsville until she disposes of her establishment at that place. Mrs. Ways moved, with her family, to Dallas, Tex., a short time ago owing to ill health, but will return to Connellsville, Oct. 23.

## Columbus, O.

F. B. Ross paid a visit to New York last week.

E. J. Goodman, of Goodman Bros., will visit New York this week.

Mrs. C. M. Haynes, wife of C. M. Haynes of Henn & Haynes, Chillicothe, has been engaged to sing each Sunday at the fashionable Broad St. Methodist Church in Columbus.

The White-Haines Optical Co. has remodeled a room in the rear of its store and will remove its workroom there, giving it more display room. A gas engine, now running the machinery, will be replaced with individual electric motors.

The optical business of Crawford & Sniff will be taken over by a company, organized Friday, with a capital stock of $10,000, to be known as the Crawford & Sniff Co. The incorporators are John R. Crawford, John E. Sniff, William E. Munsey, B. M. Crawford and G. M. Munsey.

The Knights Templars conclave here last week brought many visiting jewelers to the city, and several of them called on the wholesalers during their stay. Among them were: Ace Hart, Tiffin; T. K. Brumbe, Circleville; John A. Worrell, Washington Court House; J. C. Eberhardt, Dayton; W. M. Young, Mt. Vernon; C. A. Miller, Bellefontaine; E. G. Scott, Plain City; M. V. King, Granville; H. P. Lorbach, Circleville; F. A. Stengel, Marion; Charles M. Haynes of Henn & Haynes, Chillicothe.

Investigation by the receiver and examination of witnesses by the referee in the involuntary bankruptcy case of the Merchants' Supply Co. has thus far failed to bring out any considerable amount of information which would assist materially in straightening out the company's affairs satisfactorily to creditors. Philip Wolman and Louis Rapenport, Columbus merchants, examined by the referee at the request of the receiver, testified that they had bought goods from the company at figures below the market price. The first meeting of creditors has been called for Oct. 20.

F. L. Eisfelder, Postville, Ia., died recently at a hospital in Dubuque, of lung trouble.

**DIAMOND KNIFE EDGE PENDANTS.**

## Beautiful Trophy Cups for the Louisville, Ky., Horse Show.

A GROUP that was believed to contain the most beautiful and generally artistic trophy cups that have been exhibited Louisville, Ky., for many years was recently put on exhibition by George Wolf Co., at their store in that city. The ps, which were furnished by this concern, re prizes for the sixth annual horse show. and are known as follows: The Grosvner cup, donated by Mrs. J. B. M Grosvner, New York; the Seelbach Hotel cup, donated by the Seelbach Hotel Co.; the Stewart cup, presented by the Stewart Dry Goods Co., and the Hogan cup, a gift of Col. W. J. Hogan. All have the trade-mark of the horse show engraved on them, and where the bowls of the cups join the stems are beautifully modeled horses' heads, surrounded by Autumn leaves. It is needless to say

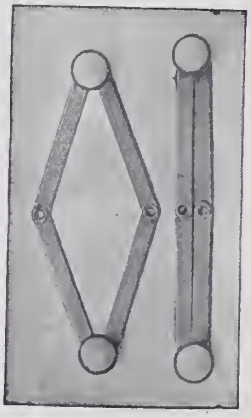
TROPHIES OF THE LOUISVILLE (KY.) HORSE SHOW.

hey were made to special order by Kerr Thiery, silversmiths, of New York.

In the group, which is illustrated herewith, the central piece, the Burger-Henry cup, is a trophy 16¾ inches high, weighing 7 ounces, which has on one side a fine etching of the trade-mark or insignia of the Horse Show Association, etched in the metal. This design shows a horse in action under a horseshoe. Above this appears the name "Burger-Henry," also etched. The handles of the cup are formed by two beautifully modeled horses' heads.

The other four cups are alike in style, having handles of more conventional shape, that the cups attracted considerable attention to the window in which they were displayed.

Herbert S. Harris, Bath, Me., supplied the loving cup which was presented a short time ago to Emma Eames Storey by the Mendelssohn Club, of Bath. The cup is of silver and measures 10 inches in height.



Guy E. Wolf, until recently in the employ of the San Luis Jewelry Co., San Luis Obispo, Cal., accompanied by his wife, mysteriously disappeared about a week ago. Wolf's whereabouts is being anxiously sought by several creditors.

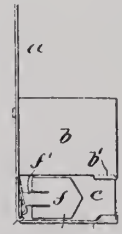
## UNITED STATES PATENTS.

ISSUE OF OCT. 3, 1905.

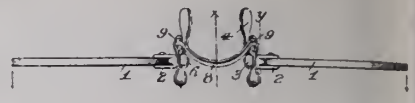
**800,772.** HAT-PIN. Robert Thorner, New Dorchester, Mass. Filed Jan. 23, 1905. Serial No. 242,232.



A hollow socket-piece adapted to be secured to a hat, combined with a hat-pin having a pointed inner end, a headed outer end outside of the hat, and

freely movable the greater portion of its length through said socket-piece, the latter being partially closed and laterally slotted at its outer end next to the head of the pin, a spring in said socket-piece, and a block between said spring and said partially-closed end, said hat-pin being freely rotatable in said block and socket, and having a lug next to said head for entering between said block and partially-closed end, pressing said block against the spring and being frictionally clamped between said end and block.

**800,870.** MATCH-SAFE. Jacob E. Neahr, Boston, Mass. Filed April 7, 1903. Serial No. 151,517.



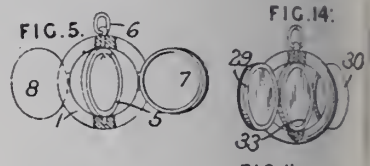
A device, embracing in its construction a re-

ceptacle for matches, a spirally-coiled strip coated with material for igniting matches, and a spring arranged to partly surround and to press inwardly toward the center of the strip to clamp and hold the strip from slipping when struck by a match.

**800,893.** EYEGLASSES. Gustav A. Bader, Rochester, N. Y., assignor to E. Kirstein Sons Co., Rochester, N. Y. Filed Jan. 3, 1905. Serial No. 239,341.

In eyeglasses, the combination with the lenses and the guards in rear thereof, of the spring connected to the lenses embodying the central portion and attaching ends, and two looped portions between each end and the central portion, said loop

opening toward the front and rear respectively and so arranged relatively to the guards that the separation of the guards will cause a movement of the sides of both loops toward each other.



## BRITISH PATENTS.

ISSUE OF SEPT. 27, 1905.

(Abridgments of Specifications, 1904, from *The Illustroted Official Journal.*)

**12,682.** LOCKETS, PENDANTS, ETC. T. Wilcox (trading as M. Wilcox & Son), Birmingham. June 4.

Relates to lockets, photograph pendants, charms, chatelaines, and the like. In the form shown

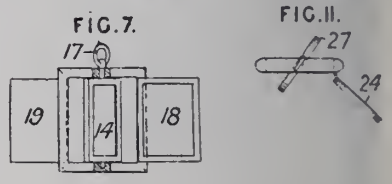


Fig. 5, a bezel or holder 5 pivoted in the fra 1, and is rotated by means of a ring, knob, or b ton 6 to open the two sides 7, 8 of the locket. The holder and both doors may contain pho graphs, hair, mirrors, compasses, or the like, plain glass may be fitted to the doors to show photographs, etc., from the outside. The same rangement may be used with square or ot shaped lockets, etc., or it may be used on a lar scale for chatelaines, as shown in Fig. 7. I modified form, shown in Fig. 11, the holder may form one side of the locket, and a door the other side. In another form, the doors 29, Fig. 14, are pivoted to the bezel 33 instead of the frame. In the case of chatelaines, a base support, or feet may be provided so that article may be used as a photograph stand frame.

## The Price of Diamonds.

(From the *Engineering and Mining Journal.*)

THE retail prices of the higher grades of pure white and blue diamonds from the South African mines were again advanced 5 per cent. in London on Sept. 26. There is a good demand for choice blue stones, and some of the best white and blue stones are selling at $500 per carat. Prices were advanced 5 per cent. on four occasions last year, and two similar advances have been made this year.

Altogether there have been advances in the rough goods aggregating about 55 per cent. in four years, but some grades of stones have been put up even higher. In addition the cost of stones to the cutter has been increased by requiring him to accept in each shipment certain amounts of inferior or yellow stones and large stones which do not cut to advantage.

The average value of the rough diamonds imported at New York last year was $37.50 a carat. The price to the public is much higher because the cost of labor in cleaving, cutting and polishing must be added. The explanation of the advance given by the London diamond merchants is that there is a scarcity of the qualities of stones that are most in demand and mining expenses are greater than formerly.

This is not a fact, however. For several years there has been a steady fall in the cost of production, and the last report of the Premier (Transvaal) Diamond Mining Co., Ltd., stated that "the most promising feature in the outlook is the large size and fine quality of the stones now obtained. Last year a certain parcel weighing 385 carats when cut yielded brilliants weighing 191 carats, and three other stones, weighing 689 carats, were valued at £14,066, or over £20 per carat." The actual cost of production in the Premier (Transvaal) mine in 1904 was 62 cents per load of 16 cubic feet.

A better explanation of the continual advances in prices appears to be that the De Beers and Premier companies are working in harmony. Neither can afford to war against the other; and there is every likelihood of them continuing to work together in controlling the market and advancing prices on every favorable opportunity. Each company has enormous diamond reserves. The "pipe" in the Premier mine, in the Transvaal, has been proved by drilling to continue to a depth of 1,000 feet. Between the present working level and a depth of 400 feet it is estimated there are fully 105,000,000 loads of diamondiferous earth, worth at least one carat per load, which can be mined at about 75 cents per load. The present annual diamond yield is between 400,000 and 600,000 carats, valued at about $3,000,000 to $5,000,000. The returns from the four De Beers mines are valued at about $25,000,000 yearly. The combined output of the diamond fields of Australia, Brazil and British Guiana are insignificant in comparison with the South African yield.

## Scarcity of Skilled Labor in Jewelry and Allied Trades.

IN a three-column article the New York *Sun* recently reviewed conditions in various industries employing skilled labor and declared that there is a great scarcity of such labor. "About the hardest thing to buy in New York," said the writer, "is immediate service from artisans."

As to the jewelry trade these comments are made:

"If you wish to have a Christmas gift of jewelry made according to your own design, even if it is nothing more than a pair of enameled sleeve buttons, you had better be quick about giving the order, for the chances are that you won't get it in time.

"What would you think if you were told that there is a jewelry house in this city that has been working four years on a set of silver and hasn't got the job done yet? Well, there is such a house, and one reason why the work isn't done is that the especially skilled artisans on that job have had to be taken away from it from time to time as to attend to the usual orders that are constantly being taken by the firm.

"When it comes to the jewelry trades a peculiar condition is beginning to exist in this country. Certain trades are being passed down from father to son, and in more than one establishment in the city three generations of one family are at work side by side in the same trade.

"This is true of silversmiths and goldsmiths. In India and in the Orient and, indeed, in many parts of Europe, this has been the rule, rather than the exception, but it has not been so in America.

"Here a man may have been a blacksmith. His son was likely to be a jeweler, and that man's son a lawyer. Or a man might have been a laborer. His son might have been an architect and that man's son a contractor, or, if he was studious, a college professor. The American rule has been not to do what your father did, but to be higher, as it is called.

"There is a change, however, going on in many of the trades relating to the fine arts. This is delicate work, as a rule, and it is indoors. The artisan can dress well, and his pride in his appearance is not hurt as it would be if he followed some of the rougher trades. Consequently, father and son are working side by side and occasionally the grandfather is seen with them.

"Just now there is so much prosperity in the land that no clever artisan in this line is out of work. People can afford jewelry at this time better than ever before in the country's history. There is a great demand for all kinds of precious stones. More and more silver plate is being used in houses, more and more silver is going out in businesses, and the demand for copper and bronze for the luxuries of life is constantly increasing. All this creates an unusual demand for skilled labor."

The plate glass in the large window of R. H. Dilley's jewelry store in the Harley block, W. Wheeling Ave., Cambridge, O., was broken recently, and a number of articles, including a gentleman's valuable gold watch, a lady's gold watch and a number of watch charms are reported stolen by Mr. Dilley. The police are inclined to think that the glass was broken by a blow from a heavy hammer in the hands of some one unknown, out of pure maliciousness, and that if anything is missing it was taken by passers by, who observed the hole in the glass.

## AMERICAN WALTHAM WATCH CO.

### WALTHAM, MASS.

## Printing Chronograph at the Paris Observatory.

*(Continued from issue of Sept. 13.)*

ET us now examine more minutely the
◄ wheels situated without the plates of
e movement. First, we have the wheel
*D*, giving the tenths of a second. A
yway *E*, together with a key, are pro-
ded to fix it solidly upon the axis *H H*.
makes its revolution in one second, and

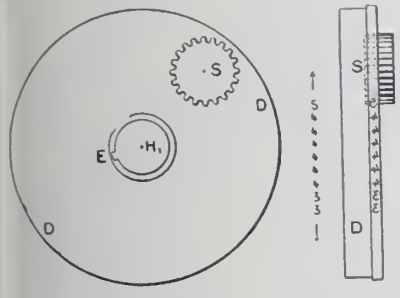

FIG. 4.

e smooth face or edge of this wheel is
vided into 10 equal parts, upon each of
hich parts one of the numerals is re-
ated six times (see Fig. 4). It carries
oreover a double satellite *S* with 20
eth; its rear member engages with a
heel *T T*, having 61 teeth, this latter be-
g fixed upon the plate of the movement,
hile the forward member engages an-
her wheel *t t* with 60 teeth (see Fig. 5)
at forms a part of the seconds wheel
rning loosely upon the axis *H H*.
The rim of this seconds wheel is di-
ded into 60 equal parts, each of which is
mbered from 00 to 59, which numbers
e cut into the wheel. Upon its forward
ce this seconds wheel bears a pinion
*U*, having 32 leaves. This pinion en-
ges with one of the wheels of the in-
rmediate piece (see Fig. 6). This inter-
ediate piece is made rigid or immovable
the lock *A*. Its wheel $R_1$, with 20 teeth,
gages the pinion *U U*, having 32 leaves,
hich makes one turn a second. At the
me time the wheel $R_1$ meshes into a
heel $R_2$, which also has 32 teeth, and this
rries a pinion $P_2$ with 18 leaves; this in
rn communicates its motion to the inter-
ediate wheel $R_3$ supported by an arm
fixed to the cylinder that encloses the printing wheels. (See Figs. 6 and 7.) The wheel $R_3$ has 108 teeth and carries upon itself a pinion $P_3$ with 21 leaves, engaging with the minute wheel, which has 210 teeth, fixed solidly to a drum, upon

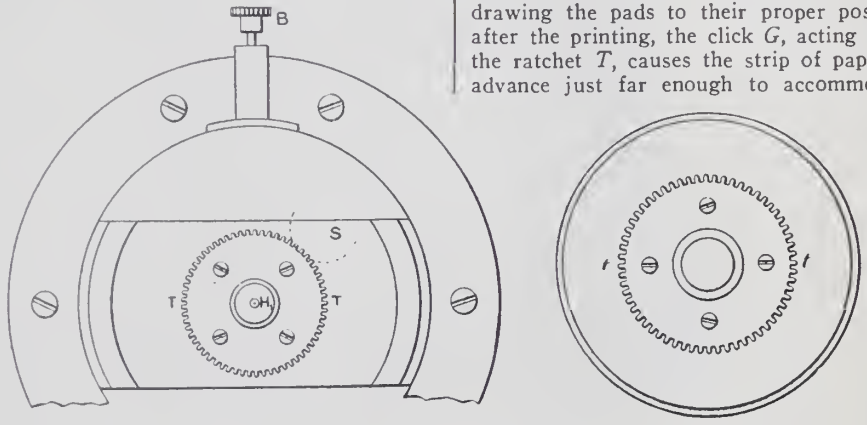

FIG. 5.

the rim of which are carved the figures representing the 60 minutes. From this we see that the minute wheel *M M* moves 60 times less rapidly than the seconds wheel

FIG. 6.

*D D*, the ratio of the product of the pinions $P_2$ and $P_3$ to the product of the wheels $R_3$ and *M M* being just equal to 1/60, and the wheel $R_2$ being driven along with the same speed as that of the seconds wheel.

The printing mechanism is illustrated in Fig. 8. At each contact made by the observer the electro-magnet *E* is excited and attracts its armature *A*, and this causes the three pads *P* to impinge against the printing wheels, which effect an impression upon the running strip of white paper *B* by means of an inked ribbon placed between it and the letter. Subsequently, that is while the coil spring *R* $R^1$ is withdrawing the pads to their proper position after the printing, the click *G*, acting upon the ratchet *T*, causes the strip of paper to advance just far enough to accommodate the next printing in a word about nine millimeters.

We give below an abstract of several observations recently taken at the Paris

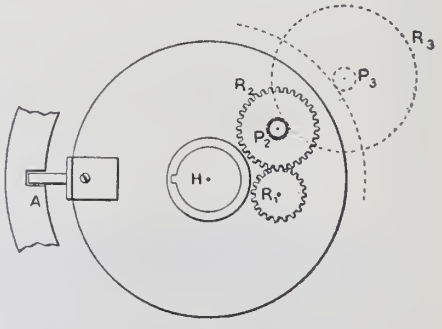

**FIG. 7.**

Observatory with the large meridian instrument upon the passage of a star across eight threads. The figures to be read in Fig. 9 are those which issued from beneath the index on the right. We see that the readings are perfectly plain and the impressions neatly made.

Finally, we must add that the mechanism of the chronograph is constructed in

such a manner that the contact, even though it be prolonged through several seconds, will never cause other than an instantaneous stroke of the pads upon the

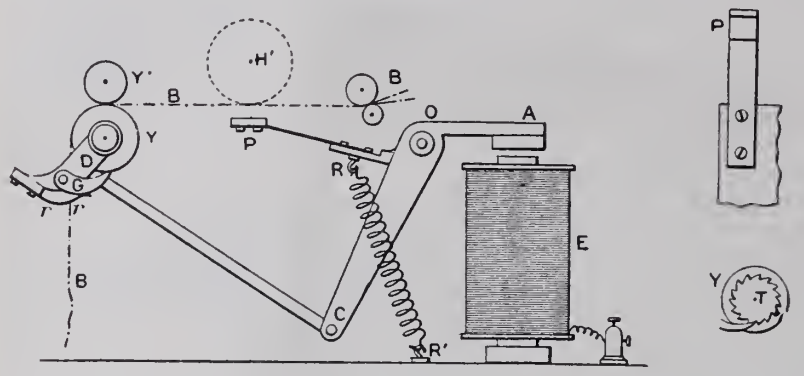

Fig. 8.

printing wheels, thus never taking any risk of friction upon the wheels, which continue

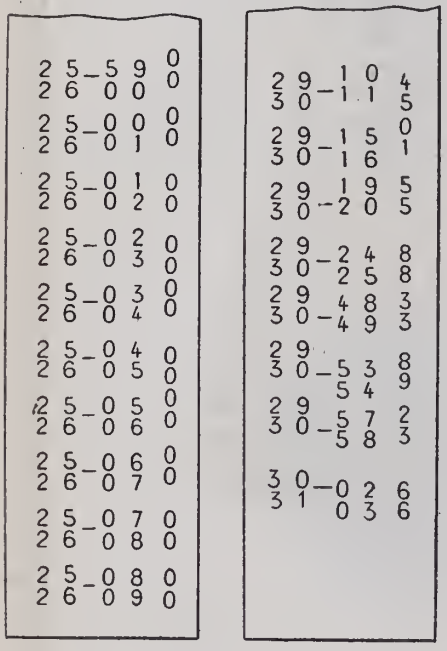

Fig. 9.

to turn normally while the strip of paper remains inactive. The contact between the paper and the wheels only takes place at the instant the circuit is closed. As for the recovery of the coil spring $R\,R^1$, it produces, as we see, the forward movement of the paper at the instant the electric flow ceases. The apparatus is installed upon a cast iron base of about 0.44 of a meter by 0.30. It runs about seven hours at one winding upon a fall of three meters and a weight of 146 kilogrammes, or about 300 pounds.

(THE END.)

## More About Escapements of Clocks and Watches.

(Translated for THE JEWELERS' CIRCULAR-WEEKLY from the *Almanach de l'Horlogerie.*)

PART II.

(*Continued from issue of Sept. 27.*)

THE Brocot escapement, although deviating a little from the true theoretical principles, has given quite good results. It would evidently have no success in a clock of precision, but the facility of its construction, the stability of the rate which can be obtained by making the rollers of jewels and the preservation of the oil, permit it to respond to all the exigencies of ordinary horology. The extensive use which has been made, and which is still made, of this escapement, proves that its results are satisfactory.

Fault has been found with it on account of the slight recoil which the lever causes the wheel to take at the moment when the tooth falls on the roller. It will be easy, by giving to the rounded part an appropriate form, to annul this defect, but, as we have had occasion to remark several times, a light recoil is at times favorable for adjustment. Besides, the lockings in this escapement are not tangential, but this is a defect of slight importance in an ordinary clock.

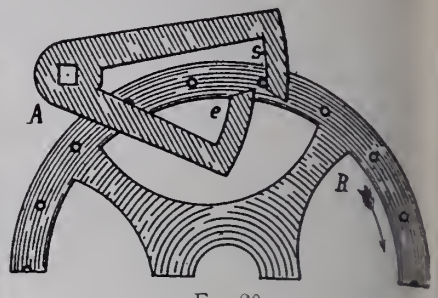

Fig. 20.

The action of the wheel on the pallets is also irregular, since the influence of the inclined plane is much greater at the end than at the commencement. Nothing would be easier than to correct this fault; but the Brocot es-

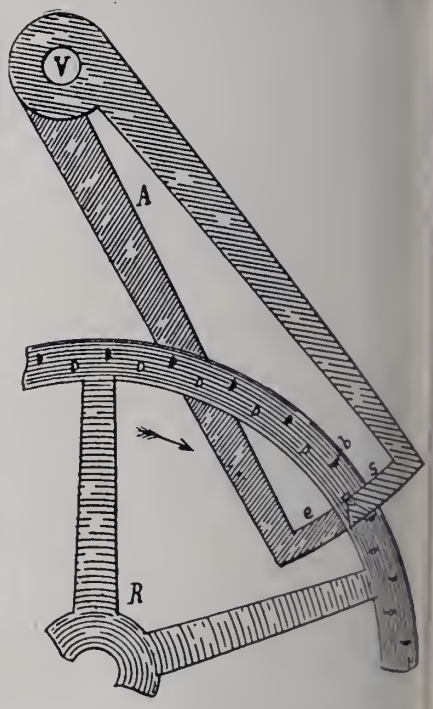

Fig. 21.

capement would not then be in existence and we would have a Graham anchor.

In 1741 a French clockmaker, name Amant, modified the Graham escapemen

# An ELGIN
# Art Treasure for You

This large "Father Time and Lady Elgin" calendar, because of its matchless beauty and superiority of execution, compels the admiration of the most discriminating lovers of art. Hanging on the walls of any home, it will share attention with the most highly prized masterpiece of painting. It is entirely free from all advertising matter. Size 8x15 inches.

The calendar is the work of Maud Humphrey, the well-known artist. It illustrates in four beautiful pictures the popular periods of English fashion—the fifteenth, seventeenth, nineteenth and twentieth centuries. Its strikingly delicate color effects, combined with remarkable originality of conception, places it among the treasures of art. It is instructive and valuable from a historical point of view as well. Send for sample calendar.

**ELGIN NATIONAL WATCH CO., General Offices, 131 Wabash Ave., CHICAGO.**

bringing the two pallets nearer together and causing both to work on the same side of the arbor of the wheel, with pins inserted in the periphery of the wheel. Fig. 20 shows the first form of the pin escapement. The

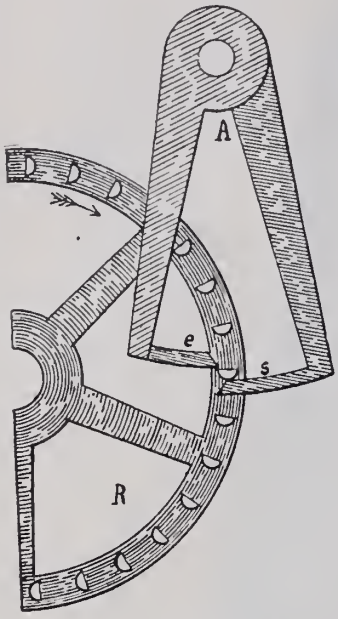

Fig. 22.

two levers appear with their locking faces, *e, s,* drawn as usual from the center of the lever. One of the pins of the wheel is locked on *s;* it will silde over the inclined plane to produce the impulse, and the following pin will work in the same manner at *e*. The pin escapement has certain advantages over the Graham anchor escapement, and it was immediately adopted for regulators and tower clocks. It does not require so great precision as Graham's, and the enlargement of the pivots of the es-

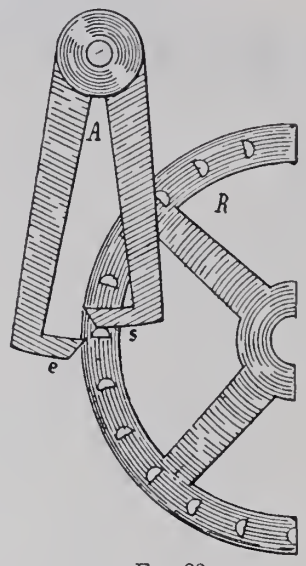

Fig. 23.

capement piece has less influence than in the latter.

In 1753 Lepaute, one of the most celebrated French horologists, presented the pin escapement, as modified in Fig. 21. The two arms of the lever A, friction tight on the same arbor V, may be brought close together or removed apart. They are termi-

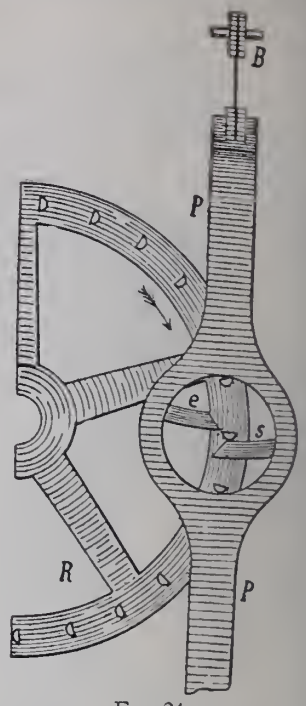

Fig. 24.

nated by the pallets *e* and *s,* having locking planes formed as usual, but working each on one side of the wheel. The wheel carries two rows of semi-cylindrical pins; those

represented in white are arranged on the anterior face; these work with the pallet *s*, which passes before the wheel. The pallet *e*, on the contrary, passes behind the wheel, and there meets the pins represented in

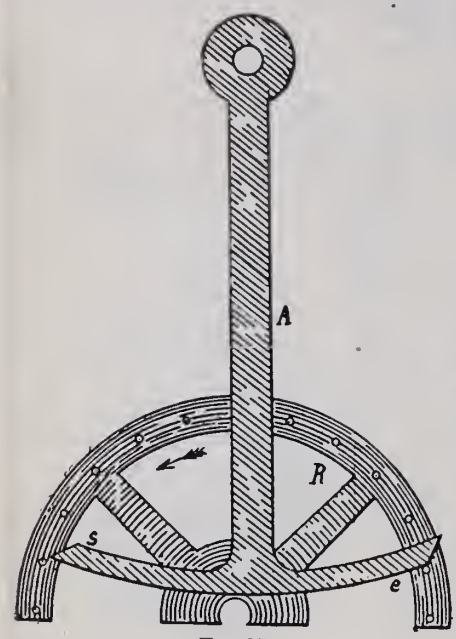

Fig. 25.

black, which are on the posterior face. The functions are still accomplished in the same manner.

Thus constructed, the Lepaute pin escapement presented new advantages. The locks and impulsions were effected at equal distances from the center of the lever, contrary to what had been produced in the mechanism of Amant. This advantage, it is true, was regarded illusory afterward, but that which resulted from the substitution of semi-cylindrical pins for pins which were round was recognized as of great

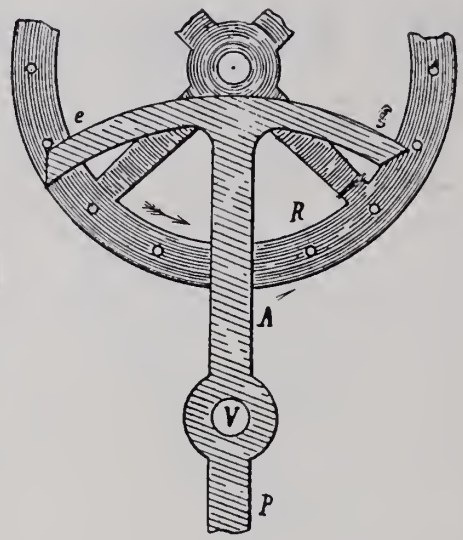

Fig. 26.

value, for it allowed of diminishing the extent of the drop.

The modern pin escapement is indicated in Fig. 22. The illustration gives a better idea than the preceding why the half-round pins diminished the drop. It appears useless to dwell on this subject. The springs recall the rollers of the Brocot escapement. They carry also a part of the inclined planes, and it would be sufficient to increase their

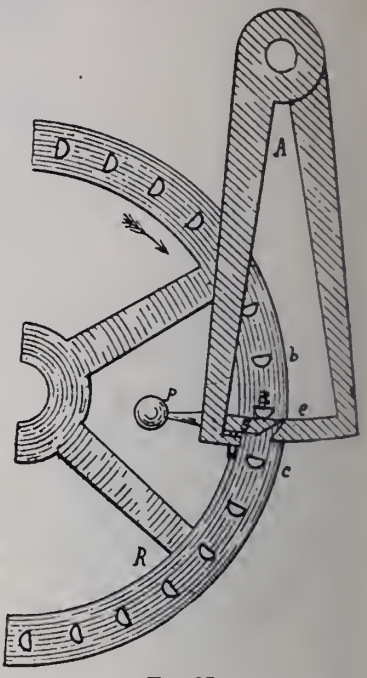

Fig. 27.

diameter, and to make the pallets pointed, to obtain the transformation of the Brocot escapement, corresponding to that of the Graham anchor in the pin escapement.

The pin escapement is especially suitable for large clocks. The arrangement of the

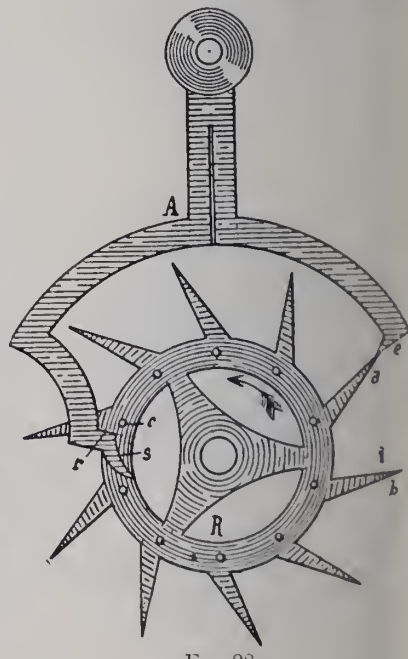

Fig. 28.

two pallets on the same side of the arbor of the wheel presents the advantage of not shaking the pivots of the lever in their holes. In the Graham anchor the wear of the holes readily caused entanglement, which is not the case in the pin escapement, which can work even when the effects of the wear are quite marked.

The length of the arms of the lever ha

**Quality.** Every sale you make should be the preparatory move for another sale; every transaction of any kind an invitation to your customer to come back—an inducement to buy from *you* only. There is but one way to do this—*build on quality.* The Howard Complete Watches give you the key to the watch situation. No other watch is its superior in construction—whatever the price; no other watch is more carefully adjusted; no other watch is re-adjusted after casing *at the factory;* no other American watch has a rating card; no other watch is so elegantly packed for show or selling—individual polished mahogany, silk-lined boxes; no other watch is priced from the factory—absolute fairness to seller and buyer—certainty of good profit to the dealer—cutting penalized—trade prices never published.

Write to us for booklet giving full description and prices at which Howard Complete Watches are sold to the public; also list of jobbers from whom they can be obtained.

in the timing contest of the Astronomical Observatory in Geneva, for the year 1904, comprising the only Series Prize; all the First Prizes (2), half of the Second Prizes (1), 8 of the Third Prizes out of 11, 5 of the Fourth Prizes out of 6, 12 Honorable Mentions out of 14, 8 Single Mentions out of 11.

68 NASSAU ST., NEW YORK. GENEVA, SWITZERLAND.

been the object of discussion and experiment, with the result that this length is a matter of indifference with relation to the impulse, but with reference to the friction it must be reduced as much as possible. The shortening is, however, limited by certain practical considerations. It is also recognized that the vertical position of the lever is the best, the oil maintaining itself better on the pallets.

The mechanism represented in Fig. 23 appears, at first sight, not to differ from that of the preceding figure, but on examining it closely it is seen that the inclined planes are established in opposite directions. The action of the wheel has the tendency of raising the lever, instead of exercising on it a pressure added to its weight. A certain advantage is also obtained with reference to the wear of the holes of the pivot, but practice has demonstrated that this advantage is offset if the holes are not of absolute precision, for then the pivots easily shake when the lever is raised.

As in the Graham escapement, the attempt has been made to construct the pin escapement by attaching the pallets of the lever directly to the pendulum. This ingenious arrangement, represented in Fig. 24 was contrived by Vérité in 1832. The horologist constructed several pieces, with the escapement thus disposed. It is useless to dwell on the working of the mechanism which is still effected in the same manner. We will say merely, that for planting the escapement, the piece B, to which is fixed the suspension spring of the pendulum P, moved on one side or the other.

A skilful horologist, Robert of Sancerre exhibited at the Universal Exposition of 1856 an escapement resembling, in the form of the lever, that which we have given in Fig. 14. It is a combination of the Graham escapement and the pin escapement. The mechanism is quite simple; and if it possessed the qualities of those from which it is derived, it would be perfect. Unfortunately, experience has proved that it has neither the one nor the other (see Fig 25). It can be readily understood that when the pins are locked on the pallet *e* they have the tendency to raise the escapement piece, while an the other side they cause a pressure in the opposite direction. In the following escapement (Fig. 26) a lever of the same form and similar functions is observed. All the mechanism is reversed. The fork is omitted, and the lever A forms a single piece, pivoting at V, with the pendulum P, as in the escapement represented in Fig. 12. This arrangement is due to Vérité, who adapted it only to certain clocks *de luxe*, having found that it required very great precision.

With a Graham or a pin escapement, having a wheel of 30 feet or 30 pins, and working a pendulum 984 millimeters in length leaps of a second are obtained from the hand adjusted on the arbor of the wheel. The pendulum of 248 millimeters beats the

half-second, and to obtain a turn of th hand in one minute, it would be necessar to employ a wheel of 60 pins. The near ness of the pins to each other would then b excessive, for the enlargement of the whee can be secured only within certain limits.

To obtain a hand marking seconds with pendulum of 248 millimeters, recourse wa had to the system of the single-beat escape ment, which, on rendering mute one vibra tion in two, gave the indication of th seconds with a wheel of 30 teeth

We see in Fig. 27 one of these single-be escapements, in which one of the pallets c the lever is so constructed as to obtain mute vibration. The pallet *e* is formed usual, whilst the other, *s*, has a movab beak, which tends constantly to rise und the action of the weight *p*.

The working of this mechanism is pr duced in the following manner: The pin becomes locked on the movable beak which it lowers in the position shown the illustration, and the vibration from le to right is accomplished. The lever, retur ing in the opposite direction, the pin pass on the locking *e*, and at this moment t movable beak rises. On the following c cillation the pin *a* passes under the moval beak and slips against the inclined plane the pallet *e*. Then the tooth *b* takes place, acting on the beak *s*.

This system, of which the movable be ought always to work with the aid of weight or a spring has given but mediocr results. The thickening of the oil inte feres with the liberty of the beak.

Fig. 28 exhibits another system of t single-beat escapement. The wheel h teeth and pins; the first only for a mi locking, while the latter furnish a seco locking, followed by the impulse In t illustration a tooth *a* is seen locked agai the arm *b* of the lever. When this too escapes another impulsion occurs, and t wheel turns only to a slight extent, the p *e* meeting the locking *r* of the other arm the lever. The impulse is then commu cated on the return of the oscillation by pin *e*, sliding against the concave incline and this impulsion terminates on the arri at the locking of the tooth *b* against the a *c* of the lever.

This escapement gives good results, the regularity of the Graham escapement of the pin escapement must not be expect

**PHILADELPHIA WATCH CASE CO., - - RIVERSIDE, N. J.**

# THE WATCH A TEST OF CIVILIZATION.

EXPLORERS in untraveled lands have sometimes given watches to the aboriginees. Such gifts were entirely unappreciated; time was of no consequence. The natives preferred beads or a taste of salt.

The higher the development of civilization, and the more complex its nature, the greater is the emphasis placed upon the importance of time. The perfection of the modern watch is due to this impulse. Watches handled by this office satisfy the most cultivated and exacting communities.

### Comments on the Man who is Fitted for His Work.

THE old jeweler, after his Summer silence, was visited by a CIRCULAR-WEEKLY reporter. After cheerful greetings and promptings by the reporter, he started with: "I once heard one of our great-New York divines declare that his ideal 'rest' was the smoothness of motion by great engine's fly-wheel when in action; ing the past Summer I have witnessed several mercantile fly-wheels in action; they gested many thoughts.

"A business man, to be competent, should fitted and trained to a position superior his work. He should be its master, not servant. The man who is beneath or better than his appointed duties is incompent unless he study and strive to rise the superior position relatively to his es.

"There is no economy in a 40-horse-wer engine to do 40-horse-power work. 60-horse-power engine will do the better more persistent work with less 'wear tear.'

"Many years ago in the old house of llows & Co., then on Maiden Lane, was ployed a clerk who when chided by a low-clerk for laxness in the performance some duty, responded: 'I *do* as well as *paid*.' The fellow-clerk, who afterward ame a partner in a large manufacturing use, to which he was called by reason of intelligent activity, replied: 'Fellows & invest money in your work, just as they in their merchandise; they must have a ofit on the money invested in your work, st as they do on their merchandise, else u are the equivalent of a bit of unsalable ods, the price of which must be reduced induce its sale.' Thereafter the youth ased his furtive glances toward his employers, apprehensive lest he be detected in indolence and unprofitable talkativeness his fellow-clerks and to visiting salesen; likewise, under his improved methods lacked time to traduce his fellow-clerks r their activities.

"As the Washington *Star* puts into the outh of Uncle Eben, 'Many a man wastes me in dis life tryin' to push somebody to rear when he ought to be tryin' to git ead on his own account.'

"The salesman or clerk is the nozzle rough which passes all the art, all the echanical processes, for getting the proactions of the importer, manufacturer and e dealer, to the consumer. He, whether anufacturer's or dealer's clerk, says the farewell, he pronounces the benediction to ard upon the final disposition of the product; he is the capstone, the finality, leading up to which every preceding part of the structure is but its support and help.

"Of course, we cut out the collection of accounts as no part of the salesman's duties.

"There is, I have been told, too little assistance, too much resistance, in the system of some employers of large numbers of employes, requiring intermediaries. Some of the latter, 'vested with a little brief authority,' become so puffed up thereby as to become tyrants, in the secondary significance of that word. Scant respect is due to him who would use the advantage of an official position to humiliate a subordinate, or one seeking legitimate business intercourse.

"I well remember the disgust expressed by a now deceased, well-known and popular traveler in our trade, who, after contact with one of the sort, exclaimed: 'The Almighty's great coat wouldn't make him a round jacket.' We've all met such in our travels, and when they depart hence there will be many a dry eye.

"Now, Mr. Reporter, you may pencil a picture of another sort—I wouldn't say the greatest, but undoubtedly one of the greatest jewelry and gem houses in the world, has for its present head a man who has conquered all the vicissitudes from boyhood up; and he is justifiably proud of it, filling ably the exalted position up to which he has grown. Notwithstanding, he may be seen about the great emporium daily, coming in contact with those whose duties he has performed in times past; with a few well-chosen words here and there to the present incumbents of positions he has himself been graduated from; he seems as if he was just one of them, and one with them.

"It was not many months ago, in a group of the elder employes with whom he had 'grown up,' that the experiences of one and another were being expatiated upon; the head of the house, among other reminiscences, had casually stated the fact that he started with the house as a boy, at a certain age, with the munificent salary of three dollars per week. An old employe in the group met the announcement by going 'one better.' Said he, 'I came some years later and beat your record; I started when a year younger than you, but with *four* dollars per week'; and the laugh was on the head of the house, in which, with all his responsibilities, he joined as heartily as any other of those 'boys.'

"He is a living evidence of the aphorism that 'there is always room at the top,' but not for the rolling stones."

---

Three youthful negroes were recently taken into custody in Madisonville, Tex., on a charge of stealing three gold watches valued at $60 from the jewelry and drug store of Burtis Bros., of that place.

**PRIZE ESSAY COMPETITION, No. 16.**

**SUBJECT:**

## How and Under What Conditions Should Auction Sales be Conducted?

I WILL acknowledge that the auction sale of jewelry is an excellent thing under the right conditions. If you must have a certain sum of money on short notice, and cannot raise it in any other way, the auction sale is convenient. You can depend upon deriving a very good sized pile of ready cash in a day, or at least two days, if you have an enterprising auctioneer. Yes, there are several good reasons why we should not entirely ignore the auction sale.

Notwithstanding these favorable reasons, there lingers in my memory recollections of my last experience with an auction sale; and I do not care to have any one talk auction to me again for quite a little time. It happened like this: I needed ready cash, and quite a considerable sum. I was behind in my bank account. The bank generously cashed several checks for me after my account was depleted. I had some thousands of dollars tied up that I could not collect for 30, 60 and in some cases 90 days. The cash sales of the store barely cared for the daily expenses. Some heavy bills were crushing me. I had to have money, and a great deal of it, in short order.

Therefore, I thought of the auction sale. I would dispose of just enough of my stock at auction to enable me to obtain the necessary money for the emergency. I sought out reputable auctioneers.

Carefully I looked into all the details of the auctioneering of jewelry. One auctioneer told me of glowing accounts of how his patrons derived exceedingly rich returns by "running in" outside goods. This made me angry. I could not deceive my customers by pawning off auction goods, claiming the same to be of my own stock.

The auctioneer showed me a lot of watches of the most inferior manufacture, but well put up to deceive. He would ring in a few bushels of these watches, and sell them to the highest bidders on the basis of my reputation and we would divide the profit. I refused and I proudly walked out of this man's office.

Then I tried another. He seemed to be different.

This is an honest man, I thought. At least he did not ask me to permit him to use the reputation of my store to boost his auction-made goods, calculated for auctioneering purposes only. He never referred to the matter. I engaged him and told him to hurry. "Would I object to a little advertising?" Of course, I consented. I supposed that he meant that he would run a short notice in the papers and perhaps put a card or two in my show window announcing the auction sale. The day was set. Some of my acquaintances who dropped into the store asked me, "What are you doing?"

Several guyed me and I could not understand what they were driving at until in going home to dinner I met a tramp-like individual gallantly patrolling the streets bedecked in the good, old sandwich style as an advertising medium to my disgrace. That is, I nicknamed the auction sale my "disgrace" from the moment I saw the sandwich man. My name stood out in full, boldface black letters. The line "auction sale" could be read at an eighth of a mile. I found out later that there were three of these men parading the principal thoroughfares of the city, freely advertising my downfall. Just why I considered the event a downfall, I do not know. But it appeared thus to me as soon as I realized that everybody else was aware of the fact that I had been driven to the wall and had to resort to auctioneering to get money. So long as I supposed I would have a nice, private little auction sale, in which friends would come to my rescue, and the coin would pile up fast before me, I saw no disgrace.

All that night I very foolishly remained half awake, dreaming of and seeing the walking signs proclaiming what I was about to do. A dozen times I made up my mind to call the whole thing off. Then I thought of the money needed in haste to meet certain pressing obligations. The auction sale began. People crowded into the store. I forgot to remove the rugs I had on the floor and the muddy-footed mob ruined them. The rowdies spat upon the floor. There was a crash, and every one laughed and had lots of fun because a seedy looking fellow had pressed his elbow through a plate glass valued at $12. I demanded pay for the glass. And the fellow said, "You can search me," as he turned his ragged pockets inside out. What fun it was for the people!

The sale progressed. The auctioneer seemed to be a good talker, but prices were very low indeed; in fact, ridiculously so. I saw some of my best pieces of jewelry go at much less than half cost price. The fools in the motley mob pronounced my best ware as plated. They used the term "brass" repeatedly. Everything was fraudulent and manufactured to sell at auction. They ridiculed my best goods.

I began to hate the crowd. There were no friendly faces there. I had made up my mind to be honest with them, but they were fast changing me. Then I saw the auctioneer open a strange box. It contained jewels that did not belong to me. The articles were rich in finish. They glistened. The crowd said, "Oh!" They became interested. I reached forth to check the auctioneer. I wanted to say, "Stop the sale; these are not my goods!" But I did not. "Ha!" I said to myself, "this is my revenge on the mob." Heavens! how the collection of inferior plated goods sold! Articles not worth a dollar each went at $5. Then I laughed. For the first time since the sale I felt cheery. I saw men and women go away in happiness because they had purchased a glistening piece of jewelry at auction rates. Some of the stuff was the worst I had ever seen.

For weeks and weeks after these people came to my store to accuse me of selling them plated goods. The plating had worn off and the brass showed. Rather than have trouble with prospective customers and to protect my name, I exchanged many of these inferior auction goods for my genuine goods from stock. I had worked ready cash. The auctioneer piled up the money for me and I paid my bills. He offered to divide the rich profits on his auction goods, but I refused. For the next month I was busy ripping down posters advertising my auction. I found them all over the country roads and everywhere.

My name had been posted in large letters throughout the locality. Everybody knew I had had an auction. But I had the money with which to pay debts, and was on a good footing once more.

"SILVE

## A Novel Business Card.

A SHORT time ago, G. Scherzinger, 16 S. Main St., Fond du Lac, Wis., celebrated the 50th anniversary of his business career and at the same time secured con-

UNIQUE BUSINESS CARD OF G. SCHERZINGER, FOND DU LAC, WIS.

erable newspaper advertising. This lat- was followed up by the distribution of original business card reproduced ove in its actual size.

The back of the card contains simply rses of poetry, giving the names of the cious stones associated with the different nths and also the significance and symism of the gems.

Mr. Scherzinger, although well adnced in years, is to-day as enterprising d vigorous in mind as when he resembled raw-looking youth portrayed on the left his card.

## ct of a New York Silversmith's Advertisement of the 18th Century.

THE following is the text of a New York silversmith's advertisement as it is published in the *New York Mercury*, pril 20, 1767:

*Charles Oliver Bruff, Gold-Smith and Jeweler, the sign of the Tea-pot, Tankard and Ear-ring, corner of King Street, near the Fly-Market ter an annauncement as to jewelry).*

*Whereas, the said Bruff has had his work undertued by three different silver-smiths of this city; one I lost three paunds by workmanship, out of ven pounds five shillings; and by another I lost shillings, on making a set of table-spoons; and third tried to undervalue a piece of wark of paunds eight shillings, to one pound sixteen llings, whereby I have hurted myself by keepup the prices, which I know no reason I uld hurt myself for others. He hopes far the ouragement of the Gentlemen and Ladies of this y and Country, as he will study to use them li.*

*Since those Gentlemen of the trade have brought prices so low, I therefore give notice, that I l work for the follawing prices, viz.: For making silver tankard, 3s. per ounce. For making a ver tea-pot, L4. Far making a silver sugar-pot, s. For making a milk-pot, 24s. For making a p-spoon, 10s. For making tea-tongs, bows, or ters 10s. For making a pair of carved silver ckles, 8s. I design to put the stamp of my name, full, on all my work; and will work as cheap any in the city.*

## Ideas and Schemes.

IN the show window of J. & C. N. Thomas, Savannah, Ga., there is on display a table covered with white damask, on which has been arranged an attractive display of cut glass, silverware, a clock and other goods suitable for wedding gifts. Just in front of the table is placed a card bearing the following inscription, "Suggestions for Coming Nuptials." The display has done much to increase the sale of wedding gifts.

Wm. L. Smith, Seymour, Conn., has four greenhouses at that place, which he opened Sept. 10. The jeweler now supplies cut flowers to his customers, and finds the scheme operates to enliven his jewelry business.

## An Up-to-Date Retail Jewelry Establishment of South McAlester, Ind. T.

ALTHOUGH South McAlester, Ind. T., has a population of only 3,479 inhabitants, it is by no means behind the times in its jewelry establishments. An example of one of its up-to-date stores, owned by Joseph Mazer, is shown below.

On the left of the picture, where the railing is shown, is a little office, where work is taken in and given out. Immediately opposite, on the right, but not visible in the illustration, is a comfortable settee, six feet long, for the accommodation and convenience of customers. This settee is surmounted by a beveled French plate mirror, equal in height to the wall cases, and finished in the same style. Close by the settee is a desk 'phone for the exclusive use of customers.

In the rear, on the left of the illustration, can be seen the private office. On the right is a doorway leading into the workshop, which is equipped with electric motor, rolls, presses, etc. At the back of the workshop is a vault, measuring 16 x 10 feet.

In the ceiling are four arcs, each containing 12 electric lights. Suspended from the ceiling are three large arc lights. Each of the seven wall cases is lighted by seven invisible incandescent lights.

The show windows have no woodwork at the corners, the glass being lapped over and joined by clamps; the transom is fitted with artistically set prism lights. The whole front of the store is designed after the Grecian style of architecture. It is but one story in height, and was built especially for the jeweler. The floor is of mosaic tiling.

The store is particularly attractive at night, when it is illuminated by the three arc lamps and nearly 150 incandescent lights.

INTERIOR VIEW OF THE STORE OF JOSEPH MAZER, SOUTH MCALESTER, IND. T.

# RETAIL JEWELERS ADVERTISING

*The use of this department is open to every retail jeweler and optician. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters as full and particular as you desire. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed several weeks.*

## Holiday Advertising by Retail Jewelers.

JEWELERS are now preparing to take care of the usual rush of Christmas business, and it will soon be time to make holiday announcements in their local papers. To assist readers along this line, we reproduce eight advertisements used by jewelers during last Fall and the early Winter. The illustrations are reduced one-half.

The ad. of E. J. Dister, Cleveland, O., occupied four inches, double column. His illustration which could hardly miss the attention of readers. The space occupied was eight inches, double column.

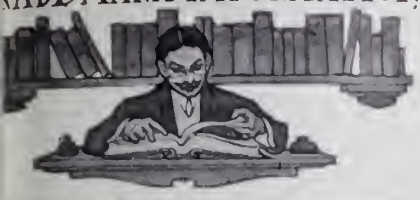
The oval frame illustration of the Harvey & Seymour Co., Grand Rapids, Mich., is very appropriate for the class of goods advertised. Space, four inches, double column.

Victor E. Zoeller & Co., Wilmington, N. C., attract attention by using an illustration of Cupid and the word "Diamonds" in large type. This advertisement occupied four and a half inches, double column.

The annuoncement of the Hess & Culbertson Jewelry Co., St. Louis, Mo., appeals to persons who desire to make selections while the stock is complete. Their design is an "eye-catcher," and occupied six inches.

In four and a half inches, double column Robert C. Glover, Dallas, Tex., asks "Why not select a diamond for your best girl now for Christmas?"

The black background plate of T. Hausmann & Sons, New Orleans, La., is a price list of various styles of suspender buckles and dragon fobs. Space, four inches, double column.



Anderton & Son, Dayton, O., received

HOW SEVERAL JEWELERS ADVERTISED DURING LAST YEAR'S HOLIDAY SEASON.

readers that Christmas was at that time nine days away, and recommended that they make purchases while the stock was still large and before the grand rush of last two or three days before Christmas commenced. Space, seven inches, double column.

# RADE MARK INFORMATION

lote.—The publication of our work, "Trade-rks of the Jewelry and Kindred Trades," Sec-l Edition, containing 4,000 marks, the accumu-on of various works of reference, and the nifications of our business enable us to trace their origin nearly all marks that may be found jewelry, silverware, art pottery and kindred s, of both American and foreign make. All stions in regard to trade-marks will be cheer-ly answered. We would be pleased to have the de seek the benefit of our facilities regarding identity of any marks they cannot trace. We uld prefer to receive the article for examina-a; for, if the mark is of foreign origin, the htest difference between a drawing and the ginal is of great importance.

*ll queries received are also answered promptly mail.*

PORTLAND, Ore., Sept. 20, 1905.

itor of THE JEWELERS' CIRCULAR-WEEKLY:

Kindly tell us who uses a trade-mark like the lowing:

14K

t is used on 14-karat brooches. G. H. Co.

ANSWER:—Bippart, Griscom & Osborn, Marshall St., Newark, N. J. See page , second edition of "Trade Marks of the welry and Kindred Trades."

NORWICH, Conn., Sept. 8, 1905.

itor of THE JEWELERS' CIRCULAR-WEEKLY:

## Dynamics of the Ocular Muscles.

By JOHN C. EBERHARDT, Dayton, O.

(Continued from issue of Sept. 20.)

MAXIMUM AND MINIMUM CONVERGENCE.

It will be desirable to have a unit upon which the optometrist can base his calculations in considering the function of convergence.

For all practical purposes it will be sufficiently accurate to adopt the following: A prism will deflect light ⅛ inch in a distance of 14 inches, a patient having a pupillary distance of 2½ inches will require one-half this amount of convergence for each eye, being 1⅛ inches, or 9/8 inches, which, allowing 1° for each ⅛, would mean that each eye would require 9° convergence, or a total of 18° for both eyes. If, therefore, the duction test should develop barely 18° of adduction, it would at once be evident that vision at the near point can only be accomplished by forming [illegible] interni to maintain their maximum contraction, which must of necessity lead to speedy exhaustion. It would, therefore, in this case be imperative to pursue means which would enhance the efficiency of these muscles until at least 15° each or a total convergence of 30° was obtained. If other muscles be investigated in those cases where insufficient convergence is encountered, they very likely will all be found abnormal, whereas if these be again tested after the interni have been brought up to a normal condition of activity, all will be found to have profited, as evidenced by their increased duction power, thus demonstrating that through the effect of intelligently directed exercise of the ocular muscles all collateral centers, and through these undoubtedly the entire nervous system, are stimulated, and physical conditions thereby improved.

While these exercises are being carried on, all the various muscles should be alternately brought into activity, care being taken not to carry them to a point of exhaustion.

METHOD OF EXAMINATION.

Have examination book, or where cards are used, the back of these ruled so that at each sitting notations of date and duction of the various muscles can be made.

Although muscular imbalances in most instances have little diagnostic value, for the reason that an esophoric condition indicating an excessive convergence while eyes are fixed at light 20 feet away is frequently found to be an insufficiency when action of interni is taken, yet the alignment should always be taken with Maddox rod and notations thereof made as a matter of record.

Now make test for cyclophoria, first by means of a chart having on it a single horizontal black line ¼ inch wide and 12 inches long placed on the wall at the height of the patient's eyes and about eight feet distant. A double prism is placed horizontally before the right eye in trial frame and opaque disk before left. Right eye will see a double line, these being the artificial lines deflected upward and downward by double prism. When opaque disk is removed, left eye will see the real image between these two, which if muscles are in a condition of equipoise, will be equidistant, vertical and parallel. If these, however, have a tendency to tilt, an imbalance of the oblique muscles termed "cyclophoria" is indicated. These tests are all made while the eyes are relaxed and are termed "static" and have value as matters of record.

We now proceed to measure the efficiency of the various muscles, making careful record of their maximum efficiency, and noting whether their proportionate duction is normal or whether a marked excess or deficiency of some particular muscle or muscles exists, thus indicating the course to be pursued, whereas as progress is made these records will clearly demonstrate it, and enable the operator to direct his efforts in the necessary channels, persevering until as nearly as possible a condition of balance between the various motor muscles has been obtained, and convergence brought to that point where near vision through the requisite refractive correction can be accomplished with comfort.

As pointed out in a previous chapter, it is easy to calculate how much convergence must be enforced in accomplishing vision binocularly at 14 inches, it being essential accurately to determine the pupillary distance and to calculate the amount of prism power necessary to deflect rays of light from the parallel so as to cause them to intersect at a point 14 inches from the eye. For all practical purposes it will be sufficiently accurate to adopt the following as a unit: *One per cent. of prism power will deflect a ray of light one-eighth of an inch in a distance of* 14 *inches.* Therefore, if the pupillary distance be two and one-fourth inches—equal to $\frac{18}{8}$ inches, applying this rule, it would require 18° of convergence to cause the visual axes to intersect at 14 inches, which would therefore represent the minimum amount of convergence.

If, therefore, the subject provided with proper reading correction be caused to fix a single row of No. 3 Snellen Test letters, placed vertically, one under the other, as here shown:

A
B
C
D
E
F
G
H
I
J
K

and held at a distance of 14 inches, he will enforce the requisite convergence, which we will assume to be 18°; if now prisms are placed before the eyes, bases out, double vision of the test line will ensue unless the eyes can overcome it by additional convergence, and the total amount of prism power which the eyes can thus fuse, added to the minimum convergence of 18°, will represent the maximum convergence. It will be found that frequently this maximum convergence is largely in excess of the adduction obtainable when the interni are individually tested at 20 feet, thus demonstrating that the ciliary innervation accompanying the accommodative effort enhances the efficiency of the converging muscles. This same procedure has been found invaluable in stimulating the nerve centers where convergence is subnormal.

The following will be found a frequently recurring case: Miss B, a seamstress, aged 39 years, had been forced to discontinue near work; was wearing glasses which careful refraction proved to be adequate. Adduction at 20 feet O.D. 7°, O.S. 9°; at 14 inches this was brought up to 20°, amplitude of accommodation being barely 3½ D.S. In one month, during which she presented herself eight times for exercise, adduction at 20 feet was brought from a total of 16° to 28°, and at 14 inches to 35°. The following week she resumed her sewing, and reported for exercise at intervals thereafter. Eight months have passed and vision has remained satisfactory, her endurance for near work having been much enhanced, whereas a decided improvement in health conditions is noticeable.

Reading lenses of 1½ D. in excess of refractive correction, which had been worn for several years, have been decreased ½ D. in order to give comfortable working distance. This also indicates improved physical conditions.

This emphasizes the value of investigating the motor muscles, particularly when health is unsatisfactory, or in advanced presbyopia, especially the recti interni, which should always be adequate to de-

## Optical Department.

velop not only the minimum convergence, but should have a generous amount of reserve efficiency, for a machine which is run at its maximum capacity continuously must of necessity be short lived. This philosophy applies to the various ocular functions.

The possibility of augmenting muscular efficiency has, of course, its limitations, one of which is age, and, generally speaking, subnormal convergence in persons over 50 years of age can rarely be dealt with along lines here suggested. They must, therefore, be treated mechanically by means of artificial convergence, meaning prisms. The vertical muscles also yield, but reluctantly, to exercise, as deficiencies in these generally indicate some nerve disease resulting in the troublesome condition of ptosis.

EQUIPMENT AND TECHNIQUE.

The writer has found that for some reason the rotary principle, as involved in the "Risley Rotary Prism," fails in coercing dormant centers as effective as does the principle of placing before the eyes batteries of prisms which admit of an increase of power by well-defined intervals, each of which calls for a renewed and additional effort on the part of the muscles, and thereby presents an effective and logical system of calisthenics. The trial frame made by the American Optical Co., arranged to hold square prisms, which has been provided with a simple spring attachment admitting of the introduction of the "Geneva" prism bars heretofore described, has been found satisfactory for making the various duction tests, as well as conducting the exercises outlined for developing subnormal duction.

The value of this branch of optometry is rapidly being recognized, as evidenced by the various appliances for conducting muscle investigations and exercises for their development, which, when perfected, will add another valuable factor to the armamentarium of the optometrist's adjuncts of precision.

In closing, the author craves the indulgence of the reader for the many shortcomings of this modest contribution, and sincerely hopes that it may prove to be the incentive for more analytical research on the part of the many earnest students of ocular phenomena, thereby evolving new trusts and enhancing the possibilities for good of the profession of optometry.

(THE END.)

## Optical Notes and Briefs.

W. C. Leon, optician, San Jose, Cal., was in San Francisco, Cal., recently, selecting stock.

J. A. Walman, of Minneapolis, Minn., recently started in the optical business in Little Falls, Minn.

Arthur Frese, son of Adolph Frese, one of the leading opticians of Los Angeles, Cal., was in San Francisco, Cal., recently.

Dr. Frank E. Morrison, eye specialist, Indianapolis, Ind., has announced that he is a candidate for school commissioner at the November election.

### California Optometrists and the California State Optometry Law.

SAN FRANCISCO, Cal., Oct. 11.—By order of the board of directors the secretary of the California State Association of Optometrists has been sending out notices to all registered optometrists to get an expression of opinion from the trade at large regarding the present California Optometry law. The notice, which is sent in the form of a return postal card, reads as follows:

IMPORTANT NOTICE.

The California State Association of Optometrists wishing to get an expression of opinion from all registered optometrists, would like you to kindly answer the following questions on the attached postal. Detach same and mail to the secretary. We desire all reputable optometrists to join our society, therefore if you are not a member, send to the secretary for an application blank.

Are you in favor of the optometry law as it now stands?

Are you in favor of an amendment to the present law that will be of benefit to the optometrists?

Are you willing to give your moral support to the California State Association of Optometrists in upholding the law?

As the State association has been the chief advocate of the present law and as it has naturally come in for a large share of the censure which that law has recently been receiving, this move to get an expression of opinion is very interesting, as those opposed to the law assert that the State association will never be able to get an indorsement of either the law or the association from any considerable number of optometrists.

L. M. Bond has sold his store in Jonesonia, Kans.

# HAVE You Signed the EYE-FIX Contract?

WE have adopted the Serial Number Price Restriction Plan, and are now sending contracts to all opticians and druggists in the United States. This contract stipulates that EYE-FIX shall not be retailed for less than 50 cents. As the cost to dealers is $3.60 per dozen, you can readily see that the

## Retail Profit is 66⅔ per cent.

The demand for EYE-FIX is steadily increasing, and there is no proprietary article in the market that can be handled with more confidence and satisfaction.

Opticians will find EYE-FIX a valuable aid in preparing the eyes for a proper measurement for glasses. It is an effective tonic and antiseptic—absolutely harmless and non-irritant—and does not dilate the pupil. As a safe and sure cure for eye trouble of every nature, EYE-FIX has no equal. Dealers can recommend it to do all that is claimed for it. **Every package contains a tube of EYE-FIX SALVE, as well as a bottle of liquid.**

*Samples and further particulars will be furnished the trade upon request.*

### Difficulties in Prescribing Eye Glasses.

Resumé of a paper read by T. M. Spaulding, M.D., before the recent meeting of British Society for Medical Improvement, and published in *The Dioptric Review.*)

THE object of his paper is to give some reasons why a fairly large percentage f cases should not experience this immedi- te relief and why such patients should re- erve their criticisms until they have given heir glasses a fair and proper trial. He xplains that the visual act is concerned ith a rather delicate co-ordination of vari- us nervous and muscular factors. In a erson with an error of refraction this co- rdination tends in an abnormal manner to vercome the error involuntarily so far as it an.

He remarks that the older a person grows who is an uncorrected ametrope, the nore habitual this abnormal co-ordination ecomes, that children accept corrective lasses, but that in the case of adults they re not accepted so readily. He then gives ome hints how to treat such cases, advising hat in prescribing glasses it is always wise s a matter of routine to inform patients hat in all probability their glasses will not eel particularly comfortable at first; other- vise subsequent explanations might be re- eived with some incredulity.

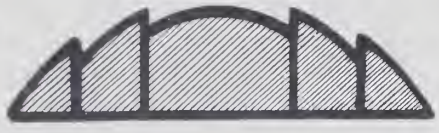
The most common cause that tends to prolong the period of adaptation is a faulty balance of the external ocular muscles. He explains that when a person has a refrac- tive error the relation between the accom- modation and convergence is disturbed, that he hypermetrope uses his accommodation n excess of his convergence, and myopes, on the contrary, use little or no accommo- lation, that hypermetropia is therefore a rule associated with esophoria and myopia with exophoria; so that it will be apparent hat correcting the ametropia would tend to restore the normal relationship between accommodation and convergence.

Another case which tends to prolong the period of adaption is anisometropia or dif- ference in the refractive error of the two eyes. He observes that if the deviation is very marked, correcting the error in the two eyes may give rise to a troublesome diplopia. When the error in the two eyes is corrected and visual acuity is as nearly as possible equalized the condition of true binocular vision is restored, though it may take place after a time.

In spasm of accommodation he advises the use of a mydriatic, but admits that it will often take some time for the spasm to re- lax, and until relaxation is complete the glasses will cause a blurring of distant ob- jects. Of course, an optologist will have to resort to fogging in place of a mydriatic.

Glasses may change a person's idea of distance and again glasses may change the apparent size of objects. Myopes as a rule complain of the reduced size of objects. In either case we should conclude from ex- perience that the patient is over-fitted, and he admits as much when he says not unfre- quently one is obliged to reduce the strength of reading glasses.

Glasses may cause trouble by altering the apparent shape of objects. This is particu- larly true of cylindrical glasses in astigma- tism, especially if the axes are oblique. The effect is to make square objects oblong or more frequently narrower at the top than the bottom. They also frequently make horizontal surface appear sloping.



His remedy is that all these changes are not noticed after the glasses have been worn for a short time, and for these reasons it is seldom one is obliged to modify his pre- scription. "Is obliged" is very naively put, but our experience would have warned us in the first instance that the patient's astig- matism was over-corrected.

His remedy for the prismatic effect caused by looking obliquely through glasses is to look directly at an object. Toric lenses being a great comfort to a person who has to wear a strong glass, we have not put them to this use, but it is worth a trial. On the whole, it is a very able practical paper, and though some points may come under the heading of *"non causa pro causa,"* the essayist may be congratulated upon treat- ments of difficulties that are usually evaded by writers in general.

### The Echelon Lens.

By E. Le Roy Ryer.

LENSES of large dimensions are con- structed only with difficulty. Such lenses further produce considerable spheri- cal aberration, and their thickness necessi- tates a great loss of light during its trans- mission through them. To counteract these disagreeable features Echelon lenses have been constructed. They consist of a plain convex lens, seen in the accompanying illustration, surrounded by a series of an- nular and concentric segments, each of which has a plane face with same side as the plane face of the central lens, while the

LENS CONSTRUCTED TO COUNTERACT SPHERICAL ABERRATION.

faces on the other side have such a curva- ture that the foci of the different segments coincide in the same point.

These rings, together with the central lens, form a single lens, a section view of which is represented in the figure, which was made from a lens about two feet in diameter, the segments of which are formed of a single piece of glass; but, with larger lenses, each segment is likewise formed of several pieces.

The lens is used chiefly for lighthouse purposes. The same form is copied in sig- nal lanterns on railroads, although these are small. The lenses take the place of parabolic mirrors, which were formerly used to send the light of beacons and light- houses to great distances.

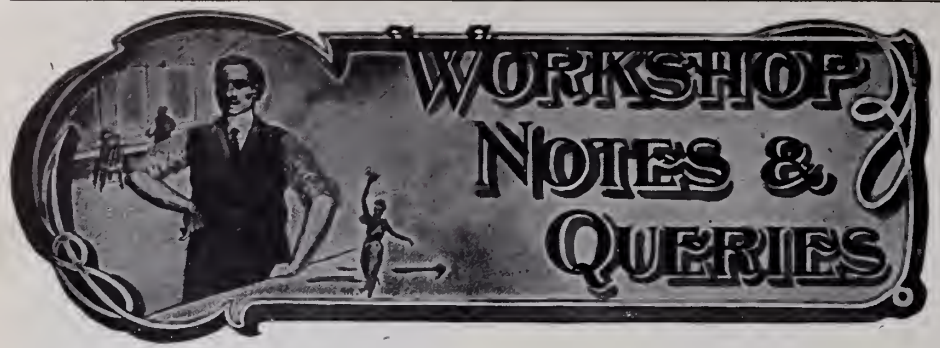
F. W. Alley has been succeeded in busi- ness in New Madrid, Mo., by F. W. Alley & Co.

The Jaffe Jewelry & Loan Co., Birming- ham, Ala., has moved to 2009 Second Ave., where it has larger quarters for its increas- ing business.

## The NEW Standard Prisoptometer.

The above illustration shows the Improved Standard Prisoptometer, an invaluable instrument for diagnosing errors of refraction, without which the equipment of any refractionist's office is not complete. The instrument is handsomely finished and can be attached to any table or stand. Illus- trated circulars and directions mailed to any one upon application. The instrument can be obtained of any jobber.

## ANNOUNCEMENT.



A handsomely illustrated 32-page *Cata- logue of Machinery* is now ready for dis- tribution.

## QUALITY "STANDARD" QUALITY.

It has been in the past, and is now, our aim to increase the quality and style of our goods whenever circumstances warrant rather than to decrease the price, as is com- monly the practice. We make special styles and quality for those of our customers who require something other than the regular styles. Our regular goods are the very best in quality and workmanship that can be turned out by skilled workmen and up-to- date machinery.

If you would be convinced, give us a trial order. The quality of our goods is our best advertisement.

**The Standard Opt. Co.,**
Geneva, N. Y., U. S. A.

*[Answers are also solicited from our readers to the questions published on this page.]*

QUESTION No. 1347.—**Hard and Soft Deposit of Metals.**—*Will a soft metal deposited on other metal be softer or harder after depositing?* *A. E. D.*

ANSWER:—Soft metal will deposit in a loose crystal-like form, while hard metal will separate in solid compact form. If a metal is not hard of itself it will help the solidity, if by some means we can deposit it in hard form. Silver deposit from a cyanide solution with the adoption of carbon bisulphide is harder than ordinary silver, and is bright.

QUESTION No. 1348.—**Japanese Gold Size.**—*Please give me a good formula for a Japanese gold size.* *S. J.*

ANSWER:—A good formula is as follows: Gum animi and asphaltum each one ounce; red lead, yellow litharge and umber, each one and a half ounces. Reduce to a fine powder, mix and put them with a pound of linseed oil into a pipkin, and boil gently, constantly stirring until thoroughly incorporated. Continue the boiling until it becomes as thick as tar. As it cools strain through flannel and keep for use, carefully stopped up. When wanted, grind with as much vermillion as will give it opaqueness, and dilute sufficiently with oil of turpentine to work freely with a pencil. This size may be used on almost any substance, and no preparation of the work is necessary beyond having an even and perfectly clean surface. To use the size, put a proper quantity, prepared as above, into a saucer and spread with a brush over the surface to be gilded, or draw by means of a pencil the design intended, carefully avoiding any other part. Let it remain until fit to receive the gold, which is to be determined in the same manner as in oil gilding by the finger. Then go over the work with a soft camel's hair pencil. When gold leaf is used the method of sizing is the same.

QUESTION No. 1349.—**To Clean Black Jet Articles.**—*I have some fragile carved jet articles that I want to clean, and I ask you to give me a recipe for cleaning them.* *B. A.*

ANSWER:—Carved jet articles are usually fragile and require careful treatment in the cleaning and repolishing. Remove the dust with a soft brush in a light manner, and with a piece of cotton flannel rub on a little sweet oil. Rub up with a piece of chamois.

QUESTION No. 1350.—**To Remove Stains From Tiles.**—*How can I remove spots from floor tiles?* *T. B.*

ANSWER:—Muriatic acid used on the spots will remove stains from tiles. Care should be used to keep the acid away from the cement, as this has a tendency to loosen them. The acid should be applied to the spots with a swab and then washed up with cold water.

QUESTION No. 1351.—**To Remove the Black From Etched Spoons.**—*Please tell me how I can remove the black filling on etched and engraved spoons.* *S. T.*

ANSWER:—The black can be removed by immersing in alcohol, or in a cyanide potassium dip.

QUESTION No. 1352. — **Silver Plated Casket Trimming.**—*Would thank you for information as to how the silver plated casket trimmings are made.* *S. I. B.*

ANSWER:—Some of the easket hardware is made out of sheet Britannia metal and is stamped. This is the case with name plates, shield and other flat objects. Many of the trimmings are cast out of a composition metal that is supposed to be principally lead, with just enough tin and antimony to harden somewhat. In the handles and parts that require some strength there is usually a wood or iron rod filling. Many of the knobs and end pieces are turned on the forming lathe. All the parts are sand-buffed and colored up to a high finish. The next operation is the nickel plating, which must be done so that a clear deposit is obtained, and upon this a light deposit of silver is applied. The articles are then ready for the rouge buff room, where the goods are buffed to a high finish. Some of the cast trimmings are not buffed, but are left in a white silver, frosted-looking finish. This is espeeially the ease with the cheaper grades.

QUESTION No. 1353.—**To Oxidize Silver Umbrella Handles.**—*I want to oxidize a lot of silver and silver plated umbrella handles, and want the oxidizing to be only in the deep recesses, leaving the prominent parts silver?* *F. H.*

ANSWER:—The dark color may be produced in several ways. One way is to dip the entire piece in the oxidizing solution and then relieve the prominent portions with pumice and water. The other way is to brush the deeper parts over with the solution. The usual chemieal used for oxidizing is ammonium sulphite, dissolved in warm water and used while hot. Another oxidizer, which is claimed by some to be superior to the above, is salammoniac two parts; sulphite of copper, two parts; saltpeter, one part. Mix the ingredients and pound up into a fine powder, and then dissolve in a little aeetie acid. Warm the articles and have the solution boiling while using. For oxidizing, the artieles must be perfectly clean and free from oxidization, otherwise the oxidizing will not adhere. All oxidized articles should be well lacquered and baked in an oven to secure a well-hardened eovering.

QUESTION No. 1354.—**To Lacquer Brass Plated Steel.**—*In lacquering some brass plated parts of lamps we often have pieces to which the lacquer will not adhere, especially the smooth-finished parts. Can you explain to me the reason of this?* *B. & H. Co.*

ANSWER:—Brass plated articles should be handled with more care than if they were of solid brass, and, therefore, the pieces should be lacquered as soon as ready for the lacquerer. Should the brass pieces remain standing around for several days the brass will tarnish or oxidize enough to prevent the lacquer from adhering firmly. Your lacquer is, no doubt, too thin, and has not enough body to it to prevent it from running off before drying. The irregular and frosted or ornamented parts will hold the laequer better than the smooth finish portions. The lacquer should be thick enough so when brushed on the article it will not run off, and if dried in a lacquer oven it will not show the thin places complained of.

QUESTION No. 1355.—**To Demagnetize a Watch.**—*Will you give me some method of demagnetizing a watch?* *D. E. & Co.*

ANSWER: — The *American Electrician* gives the following way of demagnetizing a watch: Mount the watch in a revolving frame in front of one pole of a powerful electro-magnet arranged so as to be excited with a direct current. Revolve the watch at a high speed and then turn on the current gradually. After 10 or 15 seconds turn the eurrent off gradually and take the wateh out of the frame. If alternating current is available the watch need not be revolved, but may be held stationary in front of the magnet pole. In this case the magnet must have either a laminated core or none at all.

QUESTION No. 1356.—**Depilatory Powder.**—*Kindly give me a formula for making a depilatory powder.* *A. C. A.*

ANSWER:—Triturate thoroughly until a fine powder is produced, 10 parts of barium sulphite, 5 parts of zinc oxide and 3 parts of wheat starch. When the powder is to be used make a thick magma and spread where wanted for 10 minutes.

QUESTION No. 1357.—**Soft and Hard Rouge.**—*I would like to know the difference between soft and hard rouge. Are they used for the same purposes?* *A. C. B.*

ANSWER:—Soft rouge is in a powdered form and must be moistened with alcohol or oil. Hard rouge is in the form of cake and is rubbed on while the buff is in motion. The hard rouge is used for cutting down or for work that can stand hard buffing, while the soft rouge is for producing a fine finish on silver and gold articles.

QUESTION No. 1358.—**Satin Finish on Aluminum.**—*How can I put a satin finish on aluminum cards and print my name on same?* *K. Z.*

ANSWER:—A very attractive satin finish can be put on aluminum by means of a circular brass wire scratch brush, revolving on the lathe. One must bear on hard enough so that the brush will cut through the outer coating when a beautiful white finish will appear. To print names on the satin finish cards it is best to use a rubber stamp. With a good pad and ink fine printing may be done on aluminum.

## Lac, Its Preparation and Use.

By George Cecil.

GENERALLY speaking, lac may be said to consist of several applications of colored varnish, with which wooden, brass and tin surfaces are coated. The process is a long and elaborate one—even for unornamented lac—while the decorative Japanese and Chinese lac, which is so prized by collectors all over the world, and nowhere more so than in Japan itself, entails an immense amount of time and labor, especially if it is the raised lac work, on which several years' toil may be expended before the example satisfies the conscientious craftsman, who gives of his best—or gives not at all!

FIG. 2.—CHINESE LAC ON PAPIER-MACHÉ.

Throughout the Far East it is customary to lacquer boxes—both large and small, trays, vases and screens. Beautiful, too, are some of the results, though the genuine Japanese lac is a very different thing to the praiseworthy attempts made by other eastern nations to reproduce it. According to a learned authority, a noted recipe for preparing one of the varnishes includes sandarach, turmeric, arnotto and "a quarter of an ounce of Dragon's blood," but the more usual method is to make—at fixed periods—incisions in the bark of a certain tree, from which a juice, which as it flows becomes darker, is obtained. This is kept in large vessels until it is possible to separate the top stratum from the sediment, each of which after straining constitutes a separate quality and is then ready for use. These varnishes are a very dark brown in color—nearly black—though when in thin layers they have a yellow appearance and

FIG. 1.—OLD JAPANESE VASE.

are almost transparent. Should a black lac be required, the crude varnish is stirred for a couple of days in the open air—a process which would be simplicity itself were nothing more necessary. But an infusion of gall

FIG. 3.—ENGLISH LAC TEA CADDY.

nuts, which is darkened with iron, has to be added, the stirring and exposure being continued till the water has evaporated, when the black varnish is of the required consistency. Red lac also is made both by the Japanese and the Chinese, but to the latter is due the red lac carved in relief which gives the impression of red sealing wax.

The object to be treated first receives several layers of raw lac, each of which is mixed with brick dust. As soon as the varnish has hardened, it is smoothed with a slightly roughened stone, after which more layers of common varnish are added, care being taken that they are of the color required in the finished piece. Next comes the drying and hardening process, which is a long and tedious undertaking, since the object must only be allowed to dry in a damp atmosphere; to insure these conditions, it is kept in a box, the sides of which are constantly sprinkled with water. Finally a coating of lac of the best quality is ap-

FIG. 4.—MODERN JAPANESE LAC.

plied, this being well rubbed with powdered deer horn, while the plain black lac is polished by means of many rubbings with uncolored lac in addition to the usual polishing process which the ordinary lac undergoes. The decoration of these prepared surfaces is either flat or raised; the former consists of parti-colored lac which is embellished with gilt patterns, and, like the lac which is ornamented in relief, may remain months in the hands of the artist (to whom the work is a labor of love) before he allows it to leave the studio. The raised surface is attained by building up with a mixture of lac and red oxide of iron, and the form is controlled by rubbing with charcoal powder. The beautiful me-

The subject illustrated is taken from our extensive line of

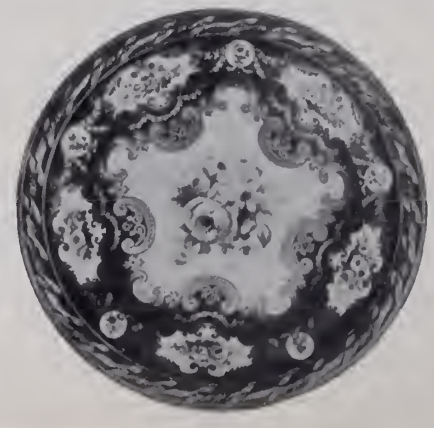
tallic luster—which is not the least of the charms of lac—is secured by allowing silver, gold or bronze powder to sink into the final coat of varnish before it has had time to harden. It also is customary to inlay lac with bronze, gold, mother-of-pearl and ivory, for the variety of effect thus obtained is greatly admired in some circles. This is done by placing the inlay on the freshly-coated object and rubbing the surface till the whole is smooth. Agates, corals and precious stones, too, are sometimes used in the Japanese scheme of decoration; examples, however, are rare.

Japanese lac was first brought to Europe in the 17th century, when it at once compelled general admiration. Since then continental craftsmen have unsuccessfully tried to reproduce it; but Japan remains the one country in which the finest specimens are to be found, though it must be admitted that some of the French lac work of the Louis XV. period is very fine. It also is noteworthy that beautiful as the present day Japanese lac is, it cannot compare with the old examples, which, as the well-known authority, Mr. Morris, of London, says, "are difficult now to get, for the Japanese and Chinese are quite aware of their value and consequently ask very high prices."

We are indebted to Mr. Morris for permission to reproduce our illustrations, the first of which represents one of a pair of old Japanese vases of unique form; the ground of black lac is decorated with a design in gold and with inlaid medallions of blue and white china and red lac alternating. Fig. 2 gives an old Chinese example, and furnishes an interesting specimen of black lac on *papier-maché;* both the figures and the flowers are brought out in wonderful relief by inlaid mother-of-pearl of the most beautiful iridescent colors, while all the decoration is in raised lac. Fig. 3 shows an English lac tea-caddy. Fig. 4 deals with a particularly fine example of modern Japanese lac, the design, workmanship and artistic feeling displayed in the raised work being of the highest order and an object lesson (as well as a reproof) to certain British philistines.

Mr. Morris throws an interesting light on the reason why western craftsmen have failed to imitate Japanese lac work. He points out that "the feeling in Japanese and Chinese painting is so distinct and so entirely different to any European art, that an artist must have the widest experience. . . . The effect is produced by so few touches of the brush. A Japanese or Chinese artist can with a few touches paint a picture that will give—in its peculiar style—all the conception of a landscape which would take a European endless time to accomplish."



In speaking of modern lac work, he says: "Some of it is very beautiful; take, for instance, the black lac screen, inlaid with ivory and mother-of-pearl. . . . But the fine old lac (which is so much sought after) is easily discernible and very difficult to imitate. . . . The raised decoration, which stands out—almost away—from the body of the object, give a perspectice effect rarely seen in any other style of decoration."

Pre-eminently artistic and original, the Japanese have not (to quote a contributor to a standard work of the past), 'as in Europe, grafted one style of are upon another." They do not strive to acquire a "knowledge of the various schools—from the remotest antiquity." Absolutely free of such influences, theirs is both a national and an exquisite form of art; it is a unique *genre,* while the workmanship is always excellent. As Mr. Cutler has observed: "The touch of ornament by a skilful hand . . creates (in the meanest object) a true work of art." Their decorative designs are, of course, treated in a somewhat conventional manner, but the conventionality of the Japanese artist, so far from resembling that of England's industrious domestic painters, who exhibit their efforts in the repellent windows of the picture shop, is, in its way, as attractive as the originality of a Corot or of a Constable.

It may interest the reader to learn that the Japanese lac owes its durable qualities entirely to the natural varnish employed in its formation. It is, in fact, so hard that it remains unaffected even when subjected to the greatest heat; boiling water does not harm it, and a needle would make little impression on some of the older examples which have hardened with age.

C. H. Wray has moved his stock into the Fiegenbaum Pharmacy, 13th and O Sts., Lincoln, Nebr.

Plans have been completed for the installation of a tower clock in the Court-House at Lake George, N. Y. The clock will be installed by L. P. Juvet, of Glens Falls, N. Y.

THE EXCLUSIVE ART GOODS HOUSE

# The Virtues Immortalized.

Human and celestial. The artist's happiest thoughts, his highest conceptions, his loftiest ideals are expressed and perpetuated in Marble. Volumes might be written about their charms, and epics could be founded, symphonies composed and melodies brought forth. To view them is an inspiration.

There are Glassical Figures—"Venus de Milo," "Victory of Samothrace," "Psyche"—with a chaste beauty worthy of the old Grecian masters. Historical Pieces—"Dante," "Napoleon," "Henry IV"—with a dignified poise befitting the subjects. Fanciful Conceptions—"Italian Girl," "Music," "Bluff," "Ghildhood's Sweet Repose," "Flute Player"—children of admiration. A group of busts symbolical of the flowers—"Pansy," "Sun Flower," "Iris," etc.—most charming and beautiful.

Some in the pure white marble and others embellished with the admirable Patina Tints. All the finest product of the Garrara quarries. In color, texture, soundness, durability and finish unexcelled, and deftly carved by the world's greatest sculptors.

Our exhibition of Marble Statuary this year is on a higher plane and displays more marked artistic excellence than ever before. A wide range of selection, from small pieces to life size figures.

## American Cut Glass and Pottery at the Lewis and Clark Exposition.

DOUBTLESS one of the prettiest displays of cut glass exhibited in recent years is that of the H. C. Fry Glass Co., Rochester, Pa., in the Manufactures Building at the Lewis and Clark Exposition. The glass is of the clearest kind and is made by a new formula, which gives a special brilliancy to the body. The cutting is from original designs, many of which are both unique and artistic. It is a wonderful display in new shapes, pretty designs, and clear, sparkling metal.

Occupying a place of prominence in the center of the exhibit stands a magnificent punch set, known as the "Lewis and Clark Masterpiece." It is considered the finest punch bowl ever cut. It is composed of six parts and stands five feet high. The base represents a large center vase, into which is fitted a large globe. Next comes a tall, graceful vase and on top of it rests a round table with a beautiful 20-inch punch bowl and 12 cups. These pieces can all be used separately if desired. The cutting is exquisitely done after the Kohinoor design. This punch set is valued at $5,000.

A large "Liberty bell" in cut glass, weighing 100 pounds, hangs over the center of the booth and on a center table are four large, dome-shaped electric lamps, made entirely of cut glass. Two handsome vases, 50 inches high, very artistically designed and cut, occupy places of prominence and are known as "Oregon, No. 1," and "Oregon, No. 2." They are valued at $1,000 each. A number of other magnificent punch bowls, vases and other articles in cut glass make up this attractive exhibit.

In the same booth are some novel plate clocks, ever-ready electric lights and other novelties.

Another exhibit of unusual merit and interest in the Manufactures Building is that of the S. A. Weller Pottery Co., Zanesville, O., whose exhibit at the exposition is valued at $10,000. The collection embraces only the finer lines of their production and includes hand-painted vases, jardinieres and umbrella stands in both light and dark effects. The concern also shows some choice specimens of their "Sicardo" ware, which is produced by the Weller factories, under the direction of J. Sicard, who for many years was associated with Clement Massier of Golfe Juan, France. The peculiarity and charm of this production is the marvelous metallic lustre which Mr. Sicard obtains combined with the most artistic floral and other effects executed in the same metallic coloring. The company has also a fine display of new matt ware in dull effects and Aurelian and Louwelsa hand painted vases, steins, etc., and a big assortment of Egyptian hand-painted pottery in exquisite shades and colors.

The Weller exhibit is the largest display of American pottery at the exposition and is in charge of C. W. Gibson, who, with three assistants, is exhibiting these pretty articles to exposition visitors.

# THE RAMBLER'S NOTES

**DOMESTIC ELECTROLIERS OF HAMMERED BRASS.**

ELECTROLIERS in hammered brass and with shades in leaded and bent glass now shown at the salesrooms of J. Morgan & Sons, 32 E. 19th St., New York, are greatly admired by Fall buyers. It is a subject for congratulation that this clever and artistic ware is a domestic product, turned out at the factory in Brooklyn, and the manufacturers do not hesitate to challenge comparison with the finest products from other lands. The hammered brass is made in all colors, representing bronzes and copper, as well as bright brass effects. The work on the glass is especially fine, the designs representing leaves, flowers, grapes and other similar effects, in producing which a wealth of color is used. Some of the patterns are further enriched with bead fringes in various hues.

*

**NOVELTIES IN LIMOGES CHINA.**

MANY select and beautiful articles, import samples of Avenir china, are offered for sale at the show-room of F. W. Jenkins, 25 West Broadway, New York. Vases of unique shapes and pretty, hand-painted plates in floral and fruit designs are included in this sale. Notable among these patterns is the Scotch thistle plate, which is a clever hand-painted reproduction of the beautiful blue, white and red plant. The longer the scrutiny the more realistic does the plant appear. The strawberry patterns and Japanese lilies are also hand-executed in fine style on plates and vases. A popular seller is the colonial china chocolate set, which embodies not only beauty of color, but also artistic simplicity of outline. This is made in a number of sizes. Avenir china comes from Limoges, and is manufactured in a broad range of prices.

*

**RUSSIAN CHINA IN MANY STYLES**

KORNILOW china from St. Petersburg is shown in rich variety at the salesrooms of J. H. Venon, 43 W. 4th St., New York, the new import lines for the Spring trade being now ready. Much of the decoration is representative of Russia's literature, customs and social life. Mr. Venon a number of years ago went to the White Czar's dominion and made arrangements for the manufacture of lines of china which, while retaining the national characteristics, would be especially adapted for the American market. The demand for the output on the part of a high-class trade has abundantly justified the wisdom of his idea and the judgment he showed in executing it. As an instance of the Russian spirit in the product may be mentioned a line of plates in gold and enameled colors. In the center of each plate on a gold background is the coat-of-arms, in colors, of Ivan the Terrible. The border is in a combination of encrusted and relief effects in gold. A dozen plates may be had, each bearing the coat-of-arms of a different city of Russia. On many pieces massive castles, fur-clad men and women, ice, snow and sleds are used profusely in producing ornamental designs which show a wealth of color and form. The artists have applied to china the same enamels and color effects previously used familiar to the admirers of Russian silver smithing.

THE RAMBLER.

## The Marble of Ancient Quarries.

THE report that a Swedish company has leased the old quarries in Iona Island, and that their famous white and serpentine marble will soon be placed on the market, calls to mind that the quarries were wrought ages ago. Their output, however, says the *Westminster Gazette*, has long been limited to a few occasional stones for the purposes of charm and local jewelry manufacture.

The altar in the old cathedral was made entirely of white marble, quarried and cut in the island, and, although there is no record of the material being exported, it is surmised that a similar use had been found for the stone in ecclesiastical building elsewhere, both in this country and on the continent.

The marble of which the Iona charms and jewelry are mostly manufactured is of a fine pale greenish hue.

## Recent Reappraisements of China and Glass

Cut glass ware from J. Seidl & Co., Gablonz, exported July 18, 1905, entered at New York (File No. 36622); findings of Sharretts, G. # THE JEWELERS' CIRCULAR

THE HOROLOGICAL REVIEW,

WITH WHICH ARE CONSOLIDATED THE JEWELERS' WEEKLY. THE JEWELERS REVIEW

Copyright 1905 by THE JEWELERS' CIRCULAR PUB. CO.

Corbin Building, 11 John St., Corner Broadway, New York.

Entered as second-class matter at the New York, N. Y., Post Office.

TH YEAR. NEW YORK AND CHICAGO, WEDNESDAY, OCTOBER 25, 1905. VOL. LI. No. 13.

## HANDSOME SILVER SERVICE FOR THE CRUISER MILWAUKEE.

design and workmanship, the 33 pieces of the silver service which is to be presented by the city of Milwaukee, Wis., to the cruiser *Milwaukee* of the United States navy, compare favorably with the best similar productions made in this country or in Europe.

The punch bowl will undeniably be one of the finest products of this kind to be seen in any of the ships. This bowl, which will have a capacity of more than nine gallons, is beautifully chased and engraved. On one side is a scene representing the cruiser *Milwaukee* under full steam, and on the opposite panel a representation of the new City Hall in Milwaukee. Dolphins form the handles of the cup and are gracefully extended along the rim, while floral figures are gracefully used in the scheme of decoration. The coat of arms of the city of Milwaukee is shown near the base. On the plateau which holds the bowl are 24 drinking cups. At the ends of the plateau are candle lights, which are equipped with electrical attachments.

Other pieces in the service include a handsome ladle and four fruit dishes to be used for dessert. On the water pitcher is an illustration of the Sailors and Soldiers' Monument at Milwaukee, while on the 14-inch round tray is the lifelike representation of an American eagle. On each piece of the service, in addition to an appropriate inscription are the seals of the United States Navy and of the city of Milwaukee.

The silver is all in French grey finish and each piece is gold lined.

The service will be supplied by Louis Esser & Co., 121 Wisconsin St., Milwaukee, Wis., who received the contract, and the makers are Dominick & Haff, New York.

The vessels whose services have been illustrated and described in THE CIRCULAR-WEEKLY, and the dates of the issues in which these illustrations and descriptions appeared from time to time are as follows:

| VESSELS. | ISSUE. |
|---|---|
| *Maine* | June 3, 1891 |

## DIAMOND-PLATINUM JEWELRY.

**Jewelry Fashions.** There is no doubt that Jewelry is affected by varying vogues and fashions, as are other popular trade products. It is a characteristic of SCHICKERLING creations that they are not only high class in themselves, but they are strictly in keeping with the demands of the best taste of the period.

**Collarettes.** At the present time the Collarette is especially prominent among the finer showings; and its nature permits of a variety of rich effects, to which gems and decorations both contribute. The finest pieces in this line range in price from $250 to $2,000.

**Bracelets.** Another product enjoying increased popularity this season is the Bracelet. This welcome revival affords opportunity for the daintiest and richest craftsmanship. The qualities of style which mark the general product of this house are present to a marked degree in the Bracelets shown. Superb examples ranging in price from $20 to $300.

**Exclusive Designs.** In the finer grades of Jewelry produced at these factories, only one piece of each kind is made, rendering the designs "exclusive" in the strictest sense. This policy is consistently carried out with regard to all the more expensive pieces.

## igh Prices Realized for American Fresh Water Pearls.

From the pearl fisheries on the western ivers come the usual reports this season f the finding of pearls of high value rang- ng from $1,000 up to $5,000. Several pearl nerchants in New York, who were asked bout these gems said that quite frequently here have been exaggerations in these re- orts. Because of the keen competition t the fisheries, it is said an inexperienced uyer has sometimes paid more for gems han he can afterward get when he tries to ell them in New York.

A pearl mentioned in a recent report was dentified by a New York buyer from the lescription as a gem which he had in his ossession a year ago. It is suspected that he pearl ultimately fell into the hands of dealer, who put it back into the river nd "found" it all over again, relying upon he buyers to offer a higher price in their agerness for newly discovered prizes.

Not all discoveries are of this character, owever, and it is said that some pearls ound this season are commanding pretty tiff prices in New York. One of the large lealers in pearls has a beautiful, round pin- vhite gem of 51 grains, on which he places price of $8,000.

The large buyers in New York seem to gree in the opinion that round American earls of desirable coloring and luster have een scarce all this season and that the rices have been maintained at a higher evel than a year ago.

# The Stamping

of a Trade-Mark in our Rings, Cuff Buttons and Shirt Studs is as important with us as the pattern or finish. We know there can be no question as to quality or workmanship, therefore we confidently stamp each article like above picture, thus guaranteeing them to the Retail Jeweler.

¶ If you want Rings, Cuff Buttons or Shirt Studs that you can honestly recommend, buy only those stamped with the above Registered Trade-Mark, for back of this Trade-Mark stands over forty years of honest manufacturing.

## National Law Popular.

### Jewelers in All Sections Favor Measure Against False Marking of Gold and Silver.

INDIANAPOLIS, Oct. 15.—The jewelers of this city are unanimous in declaring themselves in favor of national legislation forbidding interstate commerce in gold and silver improperly marked and in praising THE CIRCULAR-WEEKLY for the stand it has taken in fathering a bill to do away with the evils now in vogue.

J. H. Reed, of J. H. Reed & Co.: "I am heartily in favor of the law and I believe that every jeweler in Indianapolis will do all he can to aid in bringing about such legislation as THE CIRCULAR-WEEKLY proposes. There is such a law in other countries and there should be one here. Laws to prevent theft work hardships only upon thieves and robbers. This law would aid the legitimate jewelers and protect the public. None but the dishonest merchant would suffer from it."

Carl L. Rost: "You may quote me as strongly as you desire as favoring such a stamping act. I only regret that violation of the provisions of the act is not considered a more serious criminal offence. Some years ago an attempt was made to have such a bill passed by the Indiana Legislature, but this failed. Now that some of the States have stamping laws it is particularly desirable that national legislation on the subject be enacted so that the restriction may be uniform throughout the country. If the proposed law is adopted, the jewelry manufacturers of the entire country will be placed on an even basis and there will be no chance for any unscrupulous one to benefit by using dishonest or questionable marks or stamps."

Augustus P. Craft, of the A. P. Craft Co.: "I am heartily in favor of any law to prevent manufacturers from stamping gold and silver goods in any way to indicate another than their real quality. It would be a great protection to honest jewelers and the public as well. We have always upheld this idea with our work and have in the past refused to stamp goods other than quality even when ordered."

Michael F. Smith: "A law like the one proposed should have been passed by Congress years ago. I have always been cordially in favor of national regulation of the marking of gold and silver, as I am sure all legitimate jewelers have been. Now but the dishonest and the unscrupulous will suffer from such legislation, while the honest merchant and manufacturer, as well as the purchaser, will be benefited. Anything that will insure a standard is to be welcomed."

Frederick M. Herron: "Such a law should be practical and it is very necessary. A national law will reach the root of the evil, while State legislation might not. The trade demands the protection afforded by the bill. European countries have similar legislation. The law should be passed and rigorously enforced."

A. W. Gray, of Gray, Gribben & Gray: "We favor any act tending to defeat unlawful practices of unreliable members of the trade. Goods should be stamped in a way to leave no doubt as to the quality. THE CIRCULAR-WEEKLY deserves the thanks of the entire trade for its efforts looking to national regulation of the stamping of gold and silver."

Horace Comstock: "Such a law has long been needed. It would drive out the rascals in the trade. The stamp should tell the truth concerning the quality of the article it is on. Otherwise the retailer is at the mercy of the manufacturer and the customer at the mercy of the retailer. The law proposed would guarantee protection to all."

Ikko Matsumoto: "It is a good bill, deserving of support by all classes of the trade. The honest manufacturer has nothing to fear from it. I trust it will be passed and enforced. THE CIRCULAR-WEEKLY is doing a splendid service to the trade by advocating it."

J. C. Sipe: "The bill aims to correct an evil that has long been recognized by legitimate members of the trade, and I believe that it would be universally beneficial if enacted into national legislation. We are heartily in accord with the movement started by THE CIRCULAR-WEEKLY."

J. P. Mullally: "All good, honest jewelers are in favor of the proposed legislation. None would oppose it save the few dishonest dealers that have been profiting by misrepresentation."

The Fidelity Diamond and Jewelry Co.: "We a

sidedly in favor of legislation requiring that the imping of gold and silver represent the exact ality. National regulation will tend to elevate business and protect the public."

I. Cohen, of Cohen & Sons: "Certainly we are favor of the proposed law. It is a good bill and step in the right direction. It has our hearty pport."

The Hoosier Jewelry Co.: "We think that it is good measure and that it should be enacted im-diately into national legislation."

Taylor & Gray: "We heartily endorse the action THE CIRCULAR-WEEKLY in advocating the pass-e of the law, which would do the trade an in-timable amount of good."

Emma Eisele: "The bill covers all points and ould be enacted into legislation. I heartily en-rse it."

Frank L. Bryant: "Legitimate jewelers every-here welcome the action of THE CIRCULAR-EEKLY in attempting to secure national legislation such an important subject. I trust the bill will passed and the law enforced."

FURTHER COMMENTS BY ROCHESTER JEWELERS.

Geo. L. Andrus: "I am heartily in favor of such law, and I sincerely hope that THE CIRCULAR-EEKLY will be successful in getting it through ongress."

Carl Beyer, of Beyer & Lewis: "If the bill is ssed it would be a splendid thing for the honest, liable jeweler. The law proposed by THE CIR-LAR-WEEKLY would do away with the numerous kirs who now sell six-karat goods as 10 karat and ho cannot be held. I wish THE CIRCULAR-EEKLY success."

M. J. Lindsay: "I believe such a law would be g od thing. It would protect the jeweler and ake competition with department stores and mail rder houses more fair. Nowadays articles con-ining very little, if any gold, are called gold lled, others containing about half the quantity f gold claimed to be in them are palmed off on he public to the detriment of the retailer who ays his goods from a reliable house and who nows that his goods contain the quantity of gold laimed. Such reliable houses are ready to stamp heir goods properly, but while there is no law his does not protect them from having unscrupu-ous dealers stamp goods any karat they wish. I ope the bill will be passed."

E. J. Scheer, of E. J. Scheer & Co.: "All manu-acturers should be compelled to stamp their goods orrectly as to fineness. So many articles of in-erior quality are thrown on the market and passed ff on the unsuspecting public and also on some ewelers, that it would be a good thing to have a aw such as THE CIRCULAR-WEEKLY proposes to ave passed, to protect the public as well as the eweler from being the victims of unscrupulous anufacturers and dealers. I trust the bill will e passed and become a law."

ADDITIONAL ENDORSEMENTS FROM LANCASTER, PA.

F. A. Peters, of the H. S. Meriskey Co.: "It would be the best law the trade could have passed, and the local jobbers and retailers are anxious to have it, as it will put the jewelry business on a better basis. Of course, it would be a freeze-out for the dishonest manufacturer."

John H. Bowman, of Ezra F. Bowman's Sons: "Such a law would be a blessing, and could only work harm to trade crooks. Reliable, honest manufacturers should welcome such a law, and should exert themselves to have their representatives in Congress support it."

Philip M. Kohl, of Johantgen & Kohl, Minneapolis, Minn., accompanied by his bride, left Wednesday night on a wedding trip to the east.

The store of L. N. Austin, North Collins, N. Y., was broken into about a week ago by thieves, who secured about $40 worth of miscellaneous jewelry.

Two men who were recently taken into custody in Joplin, Mo., on a charge of disorderly conduct, have been held for an investigation owing to the fact that they had in their possession a large amount of jewelry, some of which is solid gold, and more of which is very cheap. They claimed that they were conducting a second hand business in Ramona and Tulsa, Ind. T.

### Japanese Pearl Culture Hurt by Invasion of the "Red Current."

According to letters recently received in New York, much damage has been caused to the Japanese pearl culture beds by the so-called "red current." K. Mikimoto, of Tokyo, who is said to control the business in Japan, has indicated in his correspondence, just before the appearance of the blight, that the prospects were hopeful for increased production of the pearls and for improvement in size, shape and quality; but the latest letter received from him expresscs grave apprehensions as to the size of the output in the next two or three years.

Maurice Brower, a New York pearl dealer, receivcd a letter in which Mr. Mikimoto writes:—"I am sorry to inform you that a great many pearl oysters in the culture ground have been destroyed by the invasion of the so-called 'red current.' It was the longest and severest attack which I ever witnessed, for four-fifths of the pearl-oysters have already been lost, including 700,000 pearl-bearing oysters which were treated by the patent method and all of the smaller oysters, numbering 1,000,000. Some of our scientists are studying about the red current and they are trying to know its cause and how to get rid of the disaster.

"As so many of the pearl-bearing oysters have been killed, I am afraid that I would not be able to send you enough pearls for about two or three years in the future."

The "red current," it is understood, is due to the presence in the bays, where the pearl oysters grow, of a seaweed which gives to the water its peculiar color, and is fatal to the molluscs.

### President Fessenden, of N. A. C. M., Speaks on the Bankruptcy Law.

O. G. Fessenden, of Hayden W. Wheeler & Co., who is president of the National Association of Credit Men, has been in Chicago for several days attending the annual meeting of the Board of Directors, and will return to New York about Nov. 1. Before coming back, he and other officers of the association will pay fraternal visits to branches at Pittsburg, Pa.; Wheeling, W. Va.; Youngstown, O.; Milwaukee, Wis.; Grand Rapids, Mich., and Buffalo, N. Y. At the annual meeting of the New York Credit Men's Association, last Wednesday evening, Mr. Fessenden spoke on proposed amendments to the bankruptcy law. In part he said:

That the present law is better than no bankruptcy law I am firmly convinced. It has its faults. What law has not? But these faults can be corrected by amendments. A determined effort will be made by certain interests to have the law repealed as soon as it can be brought about. Its repeal, in my opinion, would be a a calamity to the commercial world, and it behooves us all to be on our guard and by word and act do all we can to prevent its repeal.

Before the bankruptcy law was enacted it was a scramble, a constant fight to maintain one's rights, a fear in crediting, born of a want of knowledge of the true financial condition of one's customers, and, alas, of some secret indebtedness to friend, relative or bank, which could at any moment be brought forward and paid with money which should have gone to merchandise creditors.

Under the law of to-day every creditor and the honest but unfortunate debtor is more fairly treated than ever before. Certain amendments can and should be made which would make the law more effective in certain directions, and less expensive in its application, but taken as a whole we are much better off than with no bankruptcy law at all.

## Shipments of Clocks, Watches and Jewelry to Alaska, Hawaii, Porto Rico and the Philippines.

WASHINGTON, D. C., Oct. 20.—Figures have just been compiled showing the commerce of the United States with their noncontiguous territories in clocks, watches, jewelry, etc., during certain periods, as follows:

ALASKA.—Clocks to the value of $3,20 were shipped to Alaska during the eigh months ending August, this year, as com pared with a value of $3,275 for the same period of 1904. Watch shipments increase from $827 during the eight months of 190 to $956 during the same period of this yea During August last jewelry to the value o $6,442 was shipped to Alaska, which is considerable increase over the value for th same month a year ago, when the shipmen reached only $4,893. During the eigh months' period these shipments increase in value from $16,310 in 1904 to $31,765 th year. Plated ware shipments increased fro $25 in August, 1904, to $854 in August la and from $855 to $4,253 during the eig months' period. The Alaskan trade appea to be flourishing.

HAWAII.—While the shipments of cloc to Hawaii increased from $236 during A gust, 1904, to $1,537 during the same mon this year, the shipments during the eig months' period decreased from $7,538 $7,024. Watch shipments increased fro $384 to $432 for the month of August 1904 and 1905, respectively, but declin from $11,459 during the eight months 1904 to $2,376 during the same period this year. On the other hand, jewelry shi ments increased from $16,950 in Augu last year to $19,400 during the same mon this year, and from $110,465 to $144,325 d ing the eight months' period. Plated wa shipments show a big decline, the va for August, 1904, being $6,180, and $498 the same month this year, while for t eight months' period the decline was fr $50,333 last year to $25,922 this year.

PORTO RICO.—An increase is noted in t value of the clock shipments to Porto R during the eight months' period, that last year being $1,303, increasing to $2, this year. Watch shipments likewise creased in value from $945 to $1,192 dur these same periods, while jewelry shipme increased from $4,995 to $7,479, and pla ware from $1,546 to $5,396.

PHILIPPINE ISLANDS.—While clock sh ments to the Philippines show an incre from $2,197 in 1904 to $4,278 this ye watch shipments declined from $8,152 year to $669 this year. Jewelry shipme increased from $579 to $1,584 and pla ware from $368 to $3,081.

### New Test Cases to Settle the Duty on Reconstructed and Scientific Rubies.

New cases involving the duty on reconstructed and scientific rubies imported from Paris are to be brought before the Board of United States General Appraisers, New York, with the intention of presenting the issues to the courts for final adjudication at an early period.

The subject has been attracting some attention in the trade for several years. The Board of United States General Appraisers at New York in August, 1903, decided that these rubies are dutiable by similitude at 10 per cent. under Par. 435 of the Tariff Act of 1897, relating to precious stones advanced in condition of cleaning, splitting, cutting or other process. This conclusion is reported in the General Appraiser's Decision 5394 and the Treasurer's Decision 24601.

When this decision was made known a number of prominent jewelers in New York and elsewhere brought pressure to bear on the Treasury Department to appeal the action. These jewelers felt that if reconstructed and artificial rubies were imported on payment of as low a duty as 10 per cent., too much of an advantage was gained by the manufacturers in competing with real precious stones. It was also feared that the action of the Government in classifying the reconstructed and the scientific stones with the natural precious stones might give an opportunity to irresponsible dealers to mislead the public. Such dealers, it was suggested, might offer the reconstructed and scientific rubies as natural stones and claim that the Government itself had declared them genuine quality by its customs classification.

The Treasury Department appealed the case, which then went before the United States Circuit Court in St. Louis. At this stage of the proceedings the St. Louis importer, apparently not wishing to stand the expenses of legal proceedings, as the duty involved was only a few dollars, did not defend the case, and the decision was taken against him by default, the Board being reversed. Since that time the duty on reconstructed and scientific rubies has been assessed by the customs authorities at 20 per cent. under Sec. 6 of the Tariff Law, relating to articles not enumerated and manufactured in whole and in part.

The new cases will be brought by New York importers, whose interests are said to be sufficiently large to insure the case being fought through the courts.

A new pocket catalogue constituting the third edition and illustrating Princess rings and society emblems is being distributed by Sinnock & Sherrill, New York. The catalogue contains wood cut impressions of the complete line of emblems manufactured by them, with the lot number and prices to correspond. An elaborate index covers the three last pages of the booklet and from this as well as from the cuts reproduced will be gained an idea of the large assortment of emblem goods manufactured by the concern. The booklet also contains verbatim transcripts of testimonials of merit from many large jewelry concerns.

## Government Officials Conceal Name of Woman Who Smuggled Valuable Pearl Necklace.

Last week the daily papers published extended reports of the supposed smuggling of a pearl necklace valued at $22,000 by a young woman, who finally surrendered the property to Collector Stranahan, at the Custom House, New York. According to the papers, secret service agents followed the woman in a chase from one city to another until finally she was located in a hotel on Fifth Ave., New York. In one of the New York theaters, as the story goes, two officers threatened to arrest her unless she handed to them a necklace which she then wore. She convinced the officers that this necklace was only a paste imitation of the one of which they were really in search, and promised if they did not place her under arrest at the time she would surrender the necklace. On the following day her lawyer, it is said, called on the Collector and handed over the necklace, also proffering a check for $13,000 in settlement of the 60 per cent. duty. The woman's name was not revealed by the authorities.

After the stories were published, inquiries were heard in the jewelry trade as to why the Government has not proceeded in the usual way against this woman, and why her identity has been concealed. People in the trade said that they do not understand why the supposed wealth or influence of the woman should protect her from the usual proceedings and publicity. The point is made that if a smuggler can bring in valuable merchandise without any greater risk than that he or she will be compelled to pay duty, on detection, or possibly forfeit the merchandise to the Government, then there will be quite an incentive for some people to take chances.

An explanation was sought at the office of Collector Stranahan by a reporter of THE CIRCULAR-WEEKLY. In response to questions it was said that further action in the case of the smuggled necklace will not be taken until directions are received from Washington. It is understood that Secretary Shaw is considering the question of accepting a settlement or of directing the usual proceedings for the forfeiture of the pearls. In explanation of the fact that the woman's name had been concealed, a representative of the Collector said: "It has been our custom in these cases, when the merchandise is voluntarily surrendered, not to give out the names. We have found that this course often brings in considerable revenue which the Government would otherwise lose."

When asked if there was a voluntary surrender in view of the reports that Treasury agents had been following the woman for weeks, it was said that the Collector knew nothing of this chase when the necklace was handed to him. As far as his knowledge went at the time, the surrender was purely voluntary, and, this being the case, he has followed his usual course in withholding the name.

## Recent Customs Decisions on Millinery Ornaments, Jewelry, Precious Stones and Kindred Lines.

Numerous decisions were rendered in the last week by the Board of United States General Appraisers in cases involving duties on millinery ornaments, precious stones and imitations and jewelry, General Appraiser Sharretts writing the opinions.

The millinery protests were decided in accordance with the principle laid down in the Schiff and other cases, as recently published in THE CIRCULAR-WEEKLY. A. & H. Veith were sutainted in their protest against the appraisement of merchandise of this class by the collector at New York A. D. Matthews & Son were successful in a similar protest. Another protest was that of A. Bader & Co., whose importation comprised ornaments such as buckles and slides made of metal imitation jet and rhinestones; also pins used for the permanent trimming of hats and rhinestone ornaments with metal shanks. The latter were invoiced as pins, but the Board declared that they were really ornaments and not jewelry. All these articles were held to be dutiable at 45 per cent. ad valorem, under Par. 112 and Par. 193, thus reversing the collector, who classified them as jewelry at 60 per cent. ad valorem.

Charles H. Wyman & Co. appealed from the assessment by the surveyor at St. Louis on millinery ornaments, chatelaine bags, strung beads made of metal or glass and pins. Protests were sustained in relation to all these articles except the pins. The latter were held to be properly dutiable at 60 per cent. as jewelry, and the others at 45 per cent. under Par. 112 and Par. 193.

Mother-of-pearl, made into slabs by cutting or grinding for use in the manufacture of handles of knives, button-hooks and other articles, was assessed by the collector at New York at 35 per cent. ad valorem as manufactures of pearl, under Par. 450. The importers, the Morris European & American Express Co., Ltd., filed a protest, claiming that the slabs should come in free under Par. 635, or at the most at a 10 or 20 per cent. duty as unenumerated articles under Sec. 6. The action of the collector was affirmed.

Imitation pearls pierced through in the form of beads were held by the Board to be dutiable at 35 per cent. ad valorem, under Par. 408, sustaining the collector at Philadelphia and over-ruling the protest of Joseph G. Darlington & Co.

Geo. Borgfeldt & Co. imported a quantity of neck brooches composed of metal, plated or washed with gold, and set with imitation painted medallions, the latter being made of paste or glass. The collector of New York held that these articles are commonly known as jewelry, and therefore liable to a duty of 60 per cent. The importing company filed a protest, which the Board now overrules.

Another protest by Geo. Borgfeldt & Co. was in relation to bead necklaces with metal clamps. The collector was again affirmed in assessing duty on these articles at 60 per cent. under Par. 434 or Par. 408.

Unstrung pierced pearls in the form of beads made of jade were imported by O. C. Hempstead & Son, Philadelphia, Pa. The collector at Philadelphia classified these articles as beads dutiable at 35 per cent. under

THE PLAIN, GRACEFUL LINES OF THIS PATTERN APPEAL PARTICULARLY TO THE TASTE OF THOSE WHO ENJOY SIMPLE ELEGANCE.

# The Winthrop

THIS IS THE SECOND OF OUR THREE NEW PATTERNS. THE THIRD WILL BE ILLUSTRATED IN A SUBSEQUENT ISSUE.

The Woodside Sterling Co., 192 Broadway, New York.

Par. 408. The importers contended that the beads were really precious stones, cut but not set, and therefore dutiable at 10 per cent., and the Board agreed with this view.

A. Lorsch & Co. were sustained in a protest against the assessment by the collector at New York of duty on importations of imitation pearls on wires, goldstones, etc., in which paste is the chief value, and imitation pearls not pierced. All these lines were held by the Board to be dutiable at 20 per cent. ad valorem under Par. 435.

The H. B. Claflin Co. imported a quantity of gun-metal purses, which the collector classified as jewelry dutiable at 60 per cent., but the importers were sustained in their contention that Par. 193 covers this merchandise, the duty being 45 per cent.

A. Strauss & Co. appealed from the assessment of duty at 60 per cent. under the jewelry clause by the collector at New York on an importation of bracelets, brooches, necklaces, etc., also nickel plated watch chains. The importers contended that the duty should be 35 per cent. under Par. 435, with which opinion the Board agreed.

### Suit by Wightman & Hough Co. Against Louis L. Grey Discontinued.

By stipulation the suit brought by the Wightman & Hough Co., Providence, R. I., against Louis L. Grey, New York, in relation to alleged infringement of a trademark, has been discontinued, the necessary orders having been entered last week in the United States Circuit Court at New York.

The preliminary injunction asked for in this case was argued last Spring on affidavits, the attorney for the plaintiff being Champ S. Andrews, and the defendants being represented by Mr. Miller, of Marx & Miller. The plaintiff charged that the defendant had infringed a locket trademark, and the defence was that if any of the complainant's marks were placed on lockets made by other manufacturers, this was due to a mistake on the part of employes, and was not intentional.

In June Judge Lacombe handed down a decision permitting the plaintiff to take an interlocutory injunction with privilege to the defendant to move to vacate if the complainant should in any way advertise this preliminary decision. The final adjudication of the issues, involving questions as to accounting and damages, was not reached.

Correspondence recently passed between the attorneys. The complainant's attorneys offered to discontinue the suit at this stage without prejudice to either side and without costs to either side as against the other. This offer was acccepted by the defendant and the case was ended.

E. E. Wood, Colfax, Ill., is moving t Newkirk, Okla. T. He expects to beg business there about Nov. 1.

Henninger & Wheeler, Columbia, Mo have moved their stock into more spacio quarters at the corner of 9th St. and Br ad way. The concern was formerly located a 813 Broadway.

### Italians Accused of Robbing New York Jewelers to be Tried on a Different Charge.

Indictments have been found against Antonio De Sisto and his wife, Angelina De Sisto, who formerly gathered waste paper and rags at a number of Maiden Lane houses. The indictments charge the couple with stealing merchandise from the store of W. P. Andrews, a dealer in men's furnishing goods on Nassau St. Indictments were not found on any of the charges made by the Maiden Lane silverware and jewelry houses, because the latter were not positive that the property found in the rooms of the Italian couple had actually been stolen from their stores.

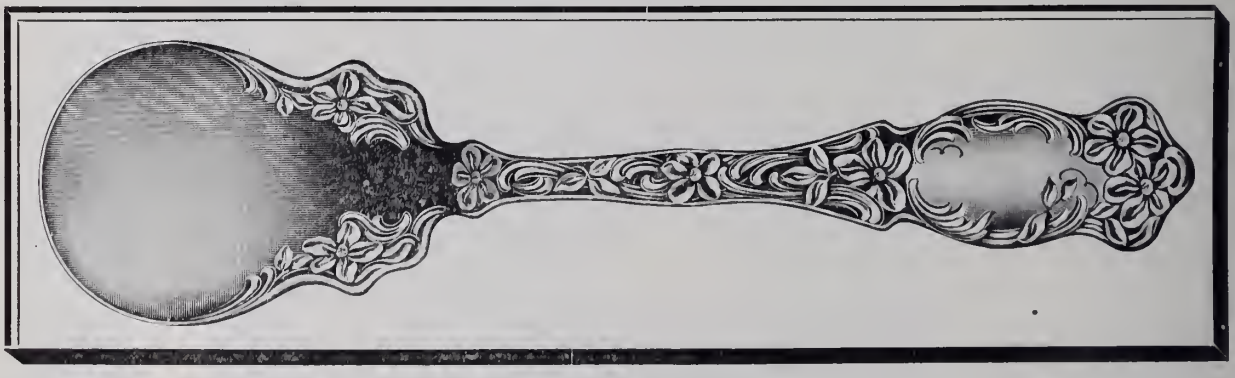
In the large quantity of silverware and other merchandise found by the police in these rooms there were articles bearing the stamps of the Derby Silver Co., Gorham Mfg. Co., the Reed & Barton Co., Rogers & Bro., Wilcox Silver Plate Co., Julius King Optical Co. and the Spencer Optical Co. None of the manufacturers could prove that any of the property was actually stolen from his store, because in all cases similar goods are sold in other stores, and positive identification was out of the question.

A few days before the arrest of the couple the store of I. W. Cokefair, at 25 Maiden Lane, was entered, and knives, forks, spoons and other articles valued at $300 were taken. As Mr. Cokefair makes a specialty of the Derby Silver Co.'s ware, and considerable Derby silver was found in the rooms of the Italians, it was at first supposed that a strong case was thus found against the couple, but Mr. Cokefair, like the other merchants, could not say positively that the articles were taken from his store.

In the Andrews case the testimony included stories by persons connected with the establishment, who had suspected the Italians for some time, and had watched them. The trial on the indictments will probably take place soon. The silverware men and jewelers will probably not be heard, as the court may decide that their evidence is not material.

The police say that there has always been special difficulty in fixing the responsibility for thefts of silverware, because the storekeeper cannot positively distinguish articles stolen from his store from those that are commonly in the market, and also because of the ease with which the silverware may be broken up or melted and then sold.

### Death of Julius F. Schmitt.



St. Louis, Mo., Oct. 20.—Julius F. Schmitt, a jeweler at 2237 S. Grand Ave., this city, died at his residence, yesterday. He had been in the jewelry business in St. Louis for a number of years, and was well known, having been the first secretary of the Retail Jewelers' Association. He resigned from the organization some time ago.

Mr. Schmitt is survived by a widow and three children. He will be buried to-morrow in Waterloo.

F. M. Allehurch has succeeded F. D. Clement, Barton Landing, Vt.

### Death of Arthur McKinstry.

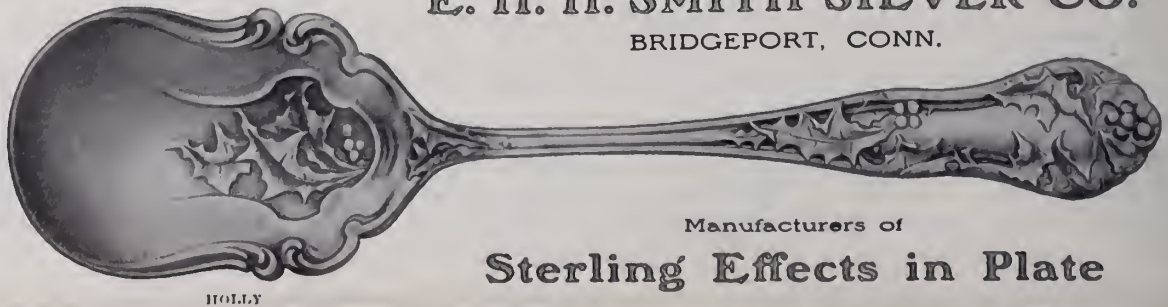
TOLEDO, O., Oct. 18.—Arthur McKinstry, one of the most popular of the younger jewelers of Toledo, was drowned in Lake Erie, Sunday, and his death has cast a gloom over his friends in this city. Mr. McKinstry had for some time past been employed at J. G. Kapp's store on Summit St., although prior to that he had a store of his own on Cherry St. He was recognized as one of the best watch repairers in the city, and, in addition, was an enthusiastic yachtsman, having at one time been commodore of the Maumee River Yacht Club and at the time of his death was financial secretary of the same organization. The sad feature of his death is that he leaves a young widow and a son, six months old.

On Sunday morning Mr. McKinstry took a number of friends for a fishing trip to the lake. The engine in his yacht did not work well and, after reaching the fishing grounds, he left in a rowboat to secure a new set of batteries. A young lad accompanied him and it is thought that the lad fell overboard and that in trying to rescue him Mr. McKinstry was drowned. The party, including his wife, did not know of his death until several hours later.

### Death of M. Zuckerberg.

CHICAGO, Oct. 27.—M. Zuckerberg, secretary of the L. Seligman Jewelry Co., Columbus Memorial building, died of cancer, Sunday, and his remains were cremated Wednesday last.

Mr. Zuckerberg was well known to the trade of Chicago and Illinois and had traveled in this State for many years. He was at one time a member of the firm of Rubens & Zuckerberg and later was a member of the firm of Felsenthal & Zuckerberg. He had also been a traveler for A. Hirsch & Co. and for the Stein & Ellbogen Co. For the last seven years he had been a partner of L. Seligman.



At the time of his death Mr. Zuckerberg was 59 years old. He had already undergone two operations and had suffered greatly. The extreme pain he bore did not interfere with his sunny disposition nor keep him from remaining kind and genial to the last. He was a man of high integrity and honor and will be greatly missed by his many friends in the trade. He is survived by a daughter.

W. E. Howard has succeeded to the business of George Rosenstock, Chatham, N. Y.

The firm style of the business of M. D. Fisher & Sons, Spencer, N. Y., will hereafter be known as Fisher & Doc.

### Heavy Liabilities and Small Assets of the Merchants' Supply Co., Columbus, O.

COLUMBUS, O., Oct. 21.—The first meeting of the creditors of the bankrupt Merchants' Supply Co., of this city, held yesterday, revealed the fact that the president of the company, A. C. Featherstone, has not been in Columbus, as far as the knowledge of the referee or receiver goes, since three days after the bankruptcy proceedings were filed against the company in the United States Court here. Mr. Featherstone was treasurer as well as president of the concern. Mrs. Norton, who was secretary, has not been in Columbus since the day of the filing of the suit, in so far as the receiver or referee know, and her present whereabouts are also unknown.

Both are wanted to give some explanations concerning the business. Goods which should be in stock, by the books which are at hand, cannot be located, and some accounts are also missing which might help considerably in straightening matters up. Former officers of the company, who preceded Mr. Featherstone, have been examined, but have been unable to give any information of value. The United States Government, it is said, will take a hand in the investigation, to ascertain whether there has been violation of any Federal laws. From the books at hand, compared with the inventory of assets just completed, unexplainable discrepancies appear which cause suspicion, to say the least, that the business has not been conducted as it should have been.

Sixty-five creditors were at the first meeting, and filed claims which aggregated $19,544.36. All the claims were proved and were allowed by the referee. How many other claims there are, is not known. To pay them there is only the stock of goods which was taken possession of by the receiver, which has just been appraised at $6,200. Whether there are any bills receivable is not known on account of the missing books. If any firms do owe the defunct concern it will not be known unless they come into court with the sums due and pay them, unless there are some further developments.

C. E. Ellis, who has been acting as receiver, was named trustee by the creditors and furnished bonds.

The list of claims filed thus far is as follows: Leon Hirsh, $357; Kaufman Bros & Bondy, $318; *Ohio State Journal*, $108; Daniel & Blumenthal, $57; E. Ingram & Co., $346; Allen-Lane Co., $122; I. Kommel $281; Bissell Carpet Sweeper Co., $383; E C. Steggall Art Co., $239; Max Klaas, $316 S. Franklin & Co., $479; American Electrical Novelty Mfg. Co., $54; Scharf Tag Label & Box Co., $23; Emden & Wormser $309; Watson, Porter, Giles & Co., $213 Gotham Garter & Novelty Co., $120; Fowler Bros., $67; Horton, Angell Co., $76 Chaflin & Co., $79; Union Braiding Co. $67; Union Fire Arms Co., $53; Putnam Hooker Co., $2,807; Critten-Clift Co. $1,030; W. Reichert Co., $112; Lancaste Silver Plate Co., $300; E. T. Hillyer, $292 Hopkins & Allen Arms Co., $312; Charle Emmerich & Co., $419; Jules Racine & Co.

### Career of Thomas W. Sweeney.

READING, Pa., Oct. 18.—Thomas W. Sweeney, of whose death brief mention was made in the last issue of THE CIRCULAR-WEEKLY, had been in business here for a number of years, and was well known both as a jeweler and engraver. He died Saturday of paralysis at his residence, 426 Penn St.

Mr. Sweeney was a native of Pennsylvania and was born in the town of Westchester 71 years ago. When about 21 years old he came to Reading and entered the employ of Solomon Weida, and began to learn the jewelry business at the latter's store, 426 Penn St. After mastering the details of the business Mr. Sweeney engaged in business for himself at the same address and continued in that line until his death. Notwithstanding his advanced age, he attended to business up until his recent illness, as he numbered among his patrons many who would have their engraving done by no one but himself. Deceased was prominent both in politics and in social life, having been one of the founders of the Republican party in Chester County. In his younger days he took an active interest in fraternal societies, especially in the Knights of the Mystic Chain, in which order he served as District Deputy for many years, and in addition filled other positions of honor in the society. He is survived by a widow and two children, William P. Sweeney and Mrs. Charles D. Tuke, of Rochester, N. Y.

Mrs. B. H. Fox, Memphis, Tenn., has disposed of her interests at that place to George T. Roy.

### N. Bernhardt, of the Potter Watch Co., Chicago, in Financial Difficulties.

CHICAGO, Oct. 21.—N. Bernhardt, doing business as the Potter Watch Co., 88 Madison St., is in financial difficulties. A meeting of his creditors was called yesterday and a committee, consisting of A. C. Bard, Maximilian Ellbogen and Mr. Bernhardt's attorney, was appointed to inventory the stock and determine the best method of procedure for conducting the business.

Mr. Bernhardt has been pressed for a settlement by some of his creditors recently and was able to settle some bills, but as he owes about $6,000 or $7,000 and depended mostly on a repair trade he found himself unable to meet his obligations as they fell due.

His stand at 88 Madison St. is regarded as one of the best of its kind in the city, and it is thought that, as the assets are very small and that the creditors will receive almost nothing if the estate is wound up, it would be profitable, in view of the coming holiday trade, to have the creditors stock up the place, place a man in charge and run the store until the profits will pay them a reasonable percentage of the indebtedness

### Death of Wm. M. Brazeale.

PACIFIC, Mo., Oct. 21.—William M. Brazeale, a well-known jeweler of this place died Thursday, after a brief illness. Mr. Brazeale had been engaged in business here since 1883. He was alert and enterprising and built up a prosperous business.

The deceased was a member of the Retail Jewelers' Association in St. Louis, where he had numerous friends and to which place he paid frequent visits. Mr. Brazeale was married and was about 45 years of age. He was buried yesterday.

Frederick Cox, a young Cherokee Indian, who a short time ago secured about $1,000 worth of diamonds from Michael Meisch, Muskogee, Ind. T., by means of a worthless check, was recently found guilty and sentenced to four years' imprisonment in the penitentiary.

COMFORT, COMELINESS AND SECURITY.

Simple in its parts and strong in construction, it is durable and not liable to get out of order.

## The Diamond Markets.

ANTWERP, Oct. 11.—Business here was excellent during September and the favorable news from the United States as to crop and other conditions tends to improve even the satisfactory state of affairs at present, as many more sales are expected to be made to American merchants. In addition a demand for cut stones comes from all sections of Europe without exception. During the past month Russia, for example bought more gems than during the entire period of the war.

The following were among the buyers in Antwerp during the last fortnight: Messrs. Conrad Levita, B. Rapoport, M. Slabotzky, Sigaar, De Haan, Sloag, Caragoenzian, Angeuli, Mund, Sommer, S. Van Moppes, all of Paris; Mr. Rees, New York; Mr. Fox, Cincinnati; Ad. Cohen, Birmingham; Messrs. Tufeld, Mendelsohn, Kauffmann, London; Mr. Weisager, Riga; Mr. Pines, Warsaw; Mr. Silberherr, Odessa; Messrs. Nacera and La Russo, Naples; Mr. Frankel, Frankfurt-on-Main; Messrs. Abend and Nix, Berlin; Messrs. Braun and Samek, Vienna; H. Strauss, Hanau; Mr. Fsitsopoulo, Constantinople; Mr. Roller, Bucarest; Mr. Chami, Alexandria; Mr. Muller, Nurnberg; Mr. Georgiades, Smyrna.

At a general meeting of the members of the Diamond Club, Oct. 2, the election for half of the Executive Committee resulted as follows: Y. Gauwels, C. Van Boxel, Ad. Adler, M. Finkelstein, H. Leclercq, and there is a new election between Messrs. H. Grienzweig and M. Caranca. Messrs. A. Neukorn and E. Buchenholz were not re-elected.

D. Brodsky, 62 years old, a diamond broker, died here suddenly last week.

A new firm in business is Herzl Freres, which consists of Arthur and Emil Hertzl, who have both been in the diamond trade. The duration of the partnership is for three years from Sept. 27.

The diamond merchants of this city who made such a fine exhibit at the World's Fair at Liege were awarded a grand prize by the Exhibition. The exhibitors included Messrs. Michaux, A. Adler, Coctermans Henrichs, A. Dreyfus, M. Feher, S. Himmelblau & Co., M. Polak, F. Ries & Co., Ryziger, and L. Folkowsky.

Good diamond polishers are in general demand to such an extent that an advance of 10 per cent. is offered over the regular salary for good men.

AMSTERDAM, Oct. 10.—Notwithstanding the holidays observed by many local merchants during the past fortnight, business has been surprisingly active, sales being unusual in amount and number, especially in small brilliants of 100 to 120 guilders per carat. The price of these stones was advanced about 10 per cent. during the month. Cut mêlée of 120 gilders per carat are also in demand.

Among the foreign buyers here recently were Messrs. Lambert and Himmelschein, Paris; S. Abrahams, Birmingham; H. Klein, Antwerp; Mr. Kaufmann, London; Messrs. Fox, Cincinnati; Messrs. Bruhl, Dreyfus & Mayer, Marchand Freres; J. H. Finck & Co., New York; Messrs. Kohn and Saül, Antwerp; Messrs.

Monossohn & Lagawir, St. Petersburg; Mr. Neresheimer, Munich; Albert Samson, Pforzheim; Mr. Green, San Francisco.

LONDON, Oct. 13.—The demand for rough has been larger than could be supplied by the "syndicate" in the sizes and kinds wanted. Small brilliants are now in particular demand. During the first part of the month business improved as a whole compared with the previous month, and while prices did not correspond to the general demand for rough, very small sized mêlée were sold to a greater extent than last season, and there is a better demand than usual for roses, provided they are of good color and not too large.

The employes of the factories are well employed and the prospects are very good.

The report is current in certain quarters that the "syndicate" will try to obtain a contract for the product of the Premier mines in the Transvall, but this cannot be verified.

The opinion is also expressed that the good condition of the trade will probably result in another increase in price for rough, as cutters to-day cannot obtain all that they desire. Diamond cutters expect that in future "sights" will be given by the "syndicate" only twice a month instead of every week, as formerly.

PARIS, Oct. 11.—The condition of trade here can be characterized only as extraordinary, and one would have to go back a long time to find a period of activity that could be properly compared with the present. Everyone has confidence in the future, no matter how high prices may go. Mêlée is very dear, and roses are sold as soon as finished by the cutters. Pearls and colored stones have been sold for some time past at very high figures. Roses at 50 francs per carat and "eight faces" are also in good demand again.

The office of Chas. Caeser, formerly at 48 Rue de Provence, is now at 53 Rue de Chateaudun.

The death is announced of Mr. De Vries, a local diamond broker, who passed away at his home, 17 Rue Rodier. The deceased was a brother of the well-known jeweler of that name. Another death last month was that of Mr. Goguely, of 9 Rue Cadet.

## Jewelers Gold Bars Withdrawn and Exchanged at New York.

*Week Ended Oct. 21, 1905.*

The U. S. Assay Office reports:

| | |

| Total ..... | $431,102.12 |

Jacob Stall, a negro, was arrested in Pulaski, Tenn., about a week ago, on a charge of larceny and burglary, preferred against him by J. K. Trigg, of Diana, Tenn. Stall implicated two others, who were arrested but released after an examination.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

# WHY?

*Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

**Extract from "Printers' Ink," Nov. 23, 1898.**

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

## Quality and Construction have made Its Reputation.

## Boston.

Reginald C. Robbins has purchased a farm at Hamilton for his country estate.

G. F. Farnham, formerly with H. P. Doe, Lawrence, has opened a new jewelry store in that city.

Philip W. Carter, clerk of the American Waltham Watch Co., will reside during the winter at Hemenway Chambers this city.

Charles A. Gaudette, the Fall River jeweler, who also has a store in Arctic, R. I., has established a new branch store in New Bedford.

George E. Stillings and Guy C. Stillings have pleaded *nolo contendere* to the 12 counts against them of using the United States mails to promote a lottery.

The Waltham Jewelry Co., Waltham, Mass., has been conducting a clearance sale, preparatory to removing to a new location. Max Posner is the auctioneer conducting the sale.

J. C. Donnell, of the Ripley-Howland Mfg. Co., who has been recuperating from a sickness that began last Spring, is once more on his travels in western Massachusetts and Connecticut, and has been warmly welcomed by his many friends in the trade.

An unknown man threw a brick at the window of Forest Whitridge's store, 1017 Washington St., Wednesday night, and, through the hole thus made, helped himself to the goods within reach. He secured about $50 worth of cheap watches, rings, etc.

John Caldwell Baird, of the firm of Redding, Baird & Co., stained glass manufacturers, died at his home, 245 Beacon St., last week, after a brief illness. He was born in Boston, Aug. 16, 1851, and as a young man entered the employ of C. M. Cook & Co., the first manufacturers of stained glass in this country. The firm was later succeeded by that of Redding, Baird & Co., of which the deceased was first a partner, and finally sole owner.

The Fall excursion arrangements on the railroads have brought an unusually large number of buyers to the city during the past week. Among them were: E. R Bumps, Thomaston, Me.; L. J. Sherwood Caribou, Me.; J. E. Stephens, Rumfor Falls, Me.; J. R. Philbrick, Skowhegan Me.; P. J. Dinan, Biddeford, Me.; Ralp Blethen, Dover, Me.; Hiram F. Burgess Fairfield, Me.; F. A. Harriman, Watervill Me.; F. F. Bartlett, Rumford Falls, Me.; F O. Cox, Concord, N. H.; Mr. Hendrik Nashua, N. H.; W. W. Brown, Littleto N. H.; Elmer O. Holmes, Barre, Vt.; C. F Mudgett, Fairfax, Vt.; H. L. Dole, Haver hill, Mass.; W. E. Hobbs, North Brookfiel Mass.; H. B. Howland, New Bedfor Mass.; W. W. Cook, Natick, Mass.; J. 1 McGovern, Haverhill, Mass.; U. C. Smit Brockton, Mass.; William L. Kelley, Ne Bedford, Mass.; B. D. Loring, Plymout Mass.; C. E. Powers, Webster, Mass.; A B. Smalley, St. John's, N. B.; Mr. Wellne son of W. W. Wellner, Charlottetown, P E. I.

## Albany.

John F. Kelley, Worcester, Mass., w sentenced to Dannemora prison from th city last week to serve a term of not mo than three nor less than two years, after conviction of grand larceny in the secon degree. He was charged with stealing $ worth of cheap jewelry from D. Harris Co., Aug. 13.

Among the indictments found by t Grand Jury in Troy last week was one against John H. Sloan and Esther Wrigl who were accused of attempting to defra W. F. Antemann & Son some time ag Sloan pleaded guilty and was sentenc to not more than five years nor less th three years and six months at Clint prison. An account of the attempted rob bery and the pictures of Sloan and M Wright appeared in THE CIRCULAR-WEE LY some time ago.

E. J. Leben, Americus, Ga., has pu chased the stock of Miss Bower, who co ducted a novelty store in the Hotel Win sor block, at that place.

3. Interchangeable material coming in finished form and ready to use.
4. A broad guarantee covering its time-keeping qualities under all conditions.

**TAVANNES WATCH CO.**

2 and 4 MAIDEN LANE, - - NEW YORK.

# To the Retail Trade.

While we have greatly enlarged our capacity during the past year, there will, nevertheless, be a greater scarcity of Illinois movements during the next two months than ever before in the history of our company. Therefore we advise dealers to anticipate their wants as early as possible, as we will not sacrifice quality to secure an increased output.

Our product is distributed by twenty special selling agents—twenty of the best wholesale watch houses in the country. If none of these solicits your business, we will be glad to supply your wants direct from the factory.

There is no surplus of Illinois movements, consequently we are not continually reducing prices or discontinuing undesirable grades, the inevitable effect of which is to depreciate the value of your stock.

ILLINOIS WATCH COMPANY,
SPRINGFIELD.

# Mr. Retailer:

A very prominent Watch Jobber paid us the following compliment :

"One thing about Solidarity Gold Watch Cases is we never have to look at the tag nor the stamp inside to know whether it is a solid gold or a gold filled case."

Gentlemen :

That means a whole lot. That is the secret of Artistic Watch Case making—

Our cases do have that

RICH, ELEGANT APPEARANCE

that is so satisfying to people who want "the best."

Order through your Jobber only.

GENERAL SELLING AGENTS

JOHN W. SHERWOOD

FRANK E. HARMER

## Connecticut.

The Gardner & Hall Co. filed articles of incorporation last week, to succeed R. S. Gardner, Derby.

John E. Parker, a representative of the International Silver Co., in Canada, and formerly a resident of Meriden, last week purchased a cottage at Cottage City.

S. P. Thrasher, New Haven, stated last week that the plans for the manufacture of his patent clock in Manchester were about completed, and that he would probably move to the latter city next Spring.

Landers, Frary & Clark, New Britain, last week purchased a parcel of real estate on Elm St., New Britain, known as the Wooster Estate. The new acquisition is a valuable addition to the already large tract acquired by the concern.

Harry Halpern, who, a short time ago, secured two valuable diamonds from Morris A. Green, a pawnbroker, of Waterbury, by means of worthless checks, was recently arrested in Providence, R. I., and sent to the Elmira Reformatory.

F. C. Chidsey, until recently engaged in business at 11 Main St., New London, has moved with his family to Hartford, where he will continue business in partnership with his uncle, F. N. Taylor. Mr. Chidsey has been succeeded in business in the former place by Charles H. Seyfried, formerly of New York.

Summerfield S. Stocking, who was at one time a contractor for the Ansonia Clock Co., Ansonia, and a resident of the latter place for about 20 years, died, early on Tuesday morning of last week, at the home of his daughter in Bristol. Mr.. Stocking recently suffered a shock of paralysis and this, together with other diseases incident to old age, caused his death. The deceased was born in Oswego, N. Y., on May 23, 1827.

According to a deed which was recorded last week at the Town Hall in Meriden, Walter Hubbard and N. E. Bradley, of the Bradley & Hubbard Mfg. Co., have transferred a one-half undivided interest in a parcel of real estate on Columbus Ave. to the city of Meriden. At present the land is laid out as a park, Mr. Hubbard having gone to much expense in putting it in good condition and in constructing a macadamized road through it.

## New Orleans, La.

TRADE CONDITIONS.

With only a few dozen cases of yellow fever still under treatment, with the general list being added to at the rate of only three or four a day, and with the chill in the air telling surely of Winter's approach, it's no wonder that the jewelers are feeling brighter and better than for some months past. People are looking at the articles displayed for sale, pricing them and buying to quite an extent. This augurs well for a season more prosperous than was anticipated. Drummers are still a missing quantity. The racing season opens early next month, and racing always means for the jewelers an increase in business.

Gabe Scooler, who has been spending a few weeks over the lake among the pine forests, is back in the city attending to business.

Although the baseball season is over and there will be no more diamond play until next Spring, a movement is on foot to launch a jewelers' baseball league and have everything in readiness for a fine start when the Winter's cold has passed and the balmy days reappear.

Two small negro boys showed up in a Rampart St. pawnshop a few days ago and tried to sell a solitaire diamond ring, valued at about $150. The pawnbroker became suspicious and called in the police, and when the lads were arrested it was discovered that the ring had been stolen some weeks before by their aunt, who was employed as a servant at the house of the manager of a Baton Rouge jewelry store.

William D. Goodman, a jeweler and watchmaker, well known in New Orleans and all along the Gulf coast, died at his home, in Mobile, Ala., a few days ago, after an illness of a week. Mr. Goodman frequently came to New Orleans, where he once lived, and had many friends here. He was recognized generally as an expert at his craft, and when he went into business for himself in Mobile he achieved some success. The deceased leaves a widow and eight children.

The Bass Jewelry Co., Huntsville, Mo., has sold out to P. Rafter and T. Biddow, and contemplates engaging in business in Louisiana, Mo.

## News Gleanings.

Tobey Bros., Olex., Ore., have sold out.

The death is reported of G. A. Cromer, Fort Worth, Tex.

Wurster Bros., Oklahoma, Okla. T., are selling out their stock at auction.

Geo. E. Bierlein, Bryant, S. Dak., has moved his stock into new quarters.

N. J. Smith, Bainsbridge, Ga., has moved his stock into more commodious quarters.

H. F. Wood, Foley, Minn., will move to the Starr building, Charles City, Ia., about Nov. 1.

William Lenhart, Bolivar, O., has disposed of his business interests to John W. Keel.

J. E. Cochrin, Clifton, Ga., has just moved to a newly furnished store in the Myers building.

W. J. Flack, Detroit City, Minn., is closing out his entire stock, prior to discontinuing business.

Leo Winterhalter, Butte, Mont., has returned from a trip to Germany, much improved in health.

A. J. Clark, Dayton, Tenn., recently moved from the Gardenheider block to the Gillespi block, on Market St.

S. E. Theus, of Theus & Co., Savannah, Ga., returned, recently, from a business and pleasure trip to New York and the east.

Max O. Doering, of Charles Ahrenfeldt & Son, 50 Murray St., returned from Europe last week on the first trip across the Atlantic of the giant Hamburg liner, the *Amerika*.

The windows in the store of Albert Tietz, Wausau, Wis., were again smashed by thieves about a week ago. Mr. Tietz recently received a number of letters containing strange and unintelligible marks. The police and postal authorities are investigating the case.

The Electric Gravity Clock Co. has filed a certificate of incorporation at Boston, Mass., with a capital stock of $40,000. The officers of the company are: President, Herbert C. Clifford, Somerville; treasurer, Lucie M. Fenne, Dorchester; clerk, S. M. Culver.

After a diligent search of 10 days, the police of Greenville, S. C., have succeeded in capturing George Hill, a negro who stole a large quantity of brooches and scarf pins from J. F. Bruns, of Greenville, by whom he was employed as a porter. Most of the plunder has been recovered.

Several new members were admitted to the National Cut Glass Association at a meeting held last Tuesday by its Executive Committee in the Hotel Astor, New York. One of the officers said that the organization now comprises practically all the prominent houses in the country, and many advantages are expected to accrue as the result of united action along specified lines.

The New Haven Silver Co., of New Haven, Conn., last week filed a certificate of incorporation with the State Secretary of Connecticut. The authorized capital stock is $200,000 of which $3,000 is paid in, The incorporators were L. M. Sagal, M. Strauss, C. H. Freedman, Samuel Goodman, F. L. Roesler and Ben. Slade. The trustees are N. J. Beck, H. C. Bratzfelder and George Jacob, all of New Haven. The officers of the concern are: President, Benj. Slade; vice-president, Samuel Goodman; treasurer, M. Strauss; secretary, C. H. Freedman.

### J. R. Thorn, Tarentum, Pa., Offers Settlement to Creditors.

PITTSBURG, Pa., Oct. 19.—It is reported here that J. R. Thorn, Tarentum, Pa., is financially embarrassed and he was in Pittsburg this week, endeavoring to settle with his creditors on a basis of 25 cents on the dollar. Mr. Thorn is proprietor of an exceedingly good store for a small town, having, so it is claimed, a stock of goods valued at $10,000. Some of his friends and creditors advised Thorn to make an assignment but it is stated that he desires to settle on the basis stated, if such an arrangement can be made. Failing in this it is believed that he will file a petition in bankruptcy. Just what his assets amount to is not known but his liabilities are said to be about $12,000.

Mr. Thorn has been in business in Tarentum for a number of years and is well and favorably known in the jewelry trade. After working in various stores he started in business here forming the firm of Thorn Bros. in 1903, which concern succeeded Rudert & Senn. In January of this year Mr. Thorn purchased his brother's interest in the business and since then has conducted it alone. He is considered to have about $2,000 invested in the business, but for some time past has been hard pressed for cash to meet bills as they come due.

Third Edition.

# WORKSHOP NOTES

For

JEWELERS and WATCHMAKERS.

Being a collection of the latest practical receipts on the manufacture and repairing of watches and clocks and on the various processes entering into the manufacture and repairing of jewelry, as coloring, polishing, enameling, annealing, oxidizing, etc.; in short, a thorough compendium of the numerous mechanical departments of the jewelers' and watchmakers' shop.

**Containing 300 pages. (Size, 7½ x 10½ inches.) Bound in Cloth, Stiff Covers.**

This book is the most useful, comprehensive and perfect publication of the kind and should be in the hands of every jeweler and watchmaker in the country.

**PRICE, = = = $2.50.**

PUBLISHED BY

THE JEWELERS' CIRCULAR PUBLISHING CO.,

11 John Street, cor. Broadway, New York.

## A Necklace of Japanese Culture Pearls.

A NECKLACE of round culture pearls, made by joining two Japanese pearls, is now being shown by an importer, who says that this is the first production of its kind to reach this country. Although the welding is clever, the point of contact is apparent, the Japanese making no effort to deceive anybody in relation to the character of the pearls.

As is well known, the culture pearls which the Japanese have been sending over here since the St. Louis exhibition have a base which is of mother-of-pearl. They have heretofore been coming usually in flat, button shaped and round backs.

The necklace is made of five strands, the pearls being of even size, with the seams at the sides, so that to the casual observer the joining of two half spheres in each pearl is not apparent.

An idea of the necklace may be had from the illustration.

DOG COLLAR NECKLACE OF JAPANESE CULTURE PEARLS.

## Recent Reappraisements.

Reappraisements of horn combs, coral beads and clocks were announced last week by the General Appraisers as follows:

Horn combs from the Aberdeen Comb Works, Ltd., Aberdeen, exported Sept. 8, 1905, entered at New York (File No. 36710); findings of McClelland, G. ## Newark.

Henry Richtmann, a former resident of Newark, who was for many years engaged with his brother, Carl Richtmann, in the manufacture of jewelers' scales, died recently in Germany.

Mrs. Martha Marcus, 695 Newark Ave., whose husband is in the jewelry business and who was recently held in $300 bonds to keep the peace, says that the complaint in the Police Court was made by spiteful persons who are trying to injure her, because she does not trade at stores in the vicinity.

The Bradley Jewelry Co., Newark, N. J., was incorporated last week to manufacture jewelry, with a capital of $10,000. The incorporators were: Thomas J. Bradley, 372 Broad St., Newark; Diedrick Tonjes, 139 West St., New York, and Helen McConville, Newark. The stock of Thomas J. Bradley, who was formerly in the retail jewelry business at 372 Broad St., Newark, was sold last week by the Trustee in Bankruptcy, about $2,500 being realized, and the largest purchaser being Mrs. McConville, who has a claim of $5,000 against Bradley. After the bankruptcy proceedings were begun against Bradley, and his wife obtained an order for his commitment, because of his failure to pay alimony, he left the city, and it was reported that he had gone to Canada. It is now said that there will be an adjustment of his affairs which will permit him to return to Newark. The new company, it is supposed, will take up the old business, adding to it the manufacturing plant.

W. W. Howe, Clearfield, Pa., was a recent visitor in New York, where he purchased holiday stock.

The Columbian Optical Co. has opened a branch store in Portland, Ore. The company has purchased the business formerly conducted by Walter Reed, the pioneer Portland optician, and installed a complete grinding and finishing plant at 133 6th St., Oregonian building. F. F. Brower will be in charge of the Portland house. The concern has stores in Denver, Colo.; Omaha, Nebr.; Kansas City, Mo.; Salt Lake City, Utah, and Dallas, Tex.

## Optical Notes and Briefs.

C. F. McKeeven has opened optical parlors in Minot, N. Dak.

H. J. Murphy, Courtenay, N. Dak., has added an optical department to his store.

F. W. Zimmerman, Staples, Minn., has engaged J. L. Cross, of Campbell, Minn., as optician.

D. Stephenson, Baker City, Ore., has been granted a license under the provisions of the newly enacted law of the State of Oregon to practice optometry in that State.

Charles A. Moore, Gridley, Cal., who lost his store, including his entire optical stock, in a fire which occurred at that place recently, has completed arrangements to resume business.

H. W. Freeze, Brownsville, Ore., has received his certificate of registration from the Oregon State Board of Examiners in Optometry and expects to commence the practice of optometry upon his return from a trip east, which he is now contemplating.

John Wimmer, Indianapolis, Ind., is now occupying his new optical parlors in N. Pennsylvania St., which are among the most handsome in the city. Mr. Wimmer expects to establish a well equipped workshop and supply house in the second story of his building.

The California Optical Co. contemplates devoting the entire second floor to its wholesale department. The first floor will be used exclusively for the firm's retail optical business. This departure has been needed for some time owing to the limited space which the lower floor affords for the handling of both departments and the accommodation of offices as well.

Dr. Frank Morrison, Indianapolis, Ind., who announced himself as a candidate for school commissioner in the coming municipal election, has had his name stricken from the ballot by Judge Carter, of the Superior court, because of irregularity in stating the term.

Dr. Lewis A. Hines, of the Hines Optical Co., Savannah, Ga., attended the meeting of the Georgia State Optical Association, held in Atlanta, Ga., Wednesday and Thursday. Dr. Hines was re-elected first vice-president of the association. He delivered an address on "Eyestrain and the Use of the Ophthalmoscope and Retinoscope."

A meeting of the Southern Tier Optical Society was held recently in offices of F. A. Jordan, 101 E. Water St., Elmira, N. Y. Among the speakers were F. A. Jordan, "Gold Frames"; C. H. Vernoy, Waverly, "The Retinoscope"; F. E. Robins, Elmira, "Transposing Lenses." Most of the members of the Society reside in southern New York and northern Pennsylvania. The society was organized about seven months ago. The officers are: President, F. E. Robbins, Elmira; vice-president, Edward H. Grant, Troy, Pa.; secretary, F. A. Jordan, Elmira, N. Y.; treasurer, Charles Vernoy, Watkins. The meetings of the society are held on the first Thursday of every month.

Since the passage of the new law regulating the practice of optometry in the State of Oregon, considerable light has been thrown upon the so-called opticians who have been practicing in that State. Under the new law every optician is required to go before the State Board of Examiners and pass an examination before being permitted to practice. Out of a list of 30 applicants examined in Portland during the recent examination held there, only two persons passed. The following opticians of Polk County, Ore., have been granted license to practice optometry: S. A. Bartlett, A. H. Harris and C. H. Morris, Dallas; O. A. Kramer, Independence; C. J. Pugh, Falls City, and Irving Mathews, Ballston.

The regular meeting of the Rochester Optical Society was held Oct. 10, in Rochester, N. Y. The minutes of the meeting held Sept. 12 were read and approved as read. A number of communications were received from different optical societies in answer to the society's letter of inquiry for a comparison of prices in the different sections of the country, and upon comparison the prices agreed with the list sent out by the society. A motion was made and carried that the Rochester society affiliate with the American Association of Opticians. The committee on the educational feature reported that they had secured Prof. Williams to give a series of lectures on anatomy and physiology. President Boston announced that he had a promise from a prominent eye specialist to give a talk on the eye at the November meeting. One application was received from M. T. Carney, which was referred to the Executive Committee.

The regular monthly meeting of the New England Association of Opticians was held at Young's Hotel, Boston, Mass., Tuesday evening, Oct. 17, at 7.30. The lecturer of the evening was F. P. Simmons, of the Davis Optical Co., whose subject was "Accommodation and Convergence." F. W. Putnam, Newport, R. I., and J. H. Newbegin, Hyde Park, were admitted as associate members.

# DIAMONDS

Some very attractive novelties are included among our Fall designs of DIAMOND

REGISTERED HW TRADE-MARK.

JEWELRY.

See these pieces in our travelers' stocks or send for a memorandum package when you need something out of the ordinary.

HAYDEN W. WHEELER & CO.,
IMPORTERS AND CUTTERS,
TWO MAIDEN LANE, NEW YORK.

## Trade Gossip.

The Gustave Fox Co., Cincinnati, O., is mailing its new catalogue to the trade.

The Diamond Cut Glass Works, 59 Nassau St., New York, will confine its energies in the future to the manufacture of specialties in cut glass.

The title of the new catalogue of Chas. L. Trout & Co., 15 Maiden Lane, New York, is "Uncommon Jewelry." It has 32 pages and cover, and illustrates their large line of jewelry, back combs, novelties, etc.

The illustrated catalogue of George T. Brodnax, Inc., Memphis, Tenn., is very comprehensive and exceptionally well arranged. It has 126 pages, blue embossed cover, is finely printed on coated paper, and will without doubt prove a "winner" for the Brodnax business. Mr. Brodnax is meeting the department store on its own grounds in a most effective way.

It was erroneously reported some time ago that J. A. Payson, Jr., Laconia, N. H., had purchased the business of C. E. Bruce the latter being still in business in Laconia. Mr. Payson has succeeded to the business of Osgood & Co., and has made extensive improvements in the establishment. A new plate glass front has been added, thus giving the jeweler a much larger show window.

## Philadelphia.

P. Carroll, 1513 Susquehanna Ave., has leased a portion of his store to a florist.

A. T. Heberling, Parkesburg, Pa., was in town last week laying in a stock for the Christmas trade.

Louis Sickles, of M. Sickles & Sons, was confined to his home several days last week with a heavy cold.

The Tiffany Studios instituted suit on a contract in the Common Pleas Court No. 1 last week against Wm. C. Allison.

The Commercial Jewelry Co. instituted suit in the local courts last week against Elmer L. D. Hershey on a contract.

Frank A. Braun, Jr., has formerly opened his new store at 1426 Susquehanna Ave. and annexed to it an optical department.

Fred Barry, with S. O. Bigney & Co., is in this city going over the trade, visiting his family and renewing old acquaintances.

John Stuertz, 323 Callowhill St., was the only jeweler empanelled for the trial of the former filtration bureau chief, John C. Hill.

Col. John L. Shepherd, of the New York office of the Keystone Watch Case Co., left this city last week for an extended western trip.

The United States Mint, last week, started to coin $1,000,000 in gold in half and quarter eagles, in compliance with orders from Washington.

Mrs. A. M. Kendall, wife of a prominent Milville (N. J.) retailer, and her daughter, Miss Bessie Kendall, spent a few days here last week with friends.

Fred. G. Sutor has removed from 1120 Chestnut St. to 106 S. 12th St., where he has a most attractive establishment, much better in every way than his former quarters.

A. J. Le Jambre, of Mann & Le Jambre, is organizing a fishing party to visit Ship John Light in the Delaware Bay. A number of prominent jobbers have agreed to join the party.

Among other out-of-town retailers visiting local jobbers were: Fred Bloomhall, Conshohocken, Pa.; Howard Fitzsimmons, West Chester, and J. Tyson Ogden, Woodstown, N. J.

L. C. Reisner, Lancaster, who conducted until about two weeks ago a branch material house in this city, was discharged as a voluntary bankrupt in the United States District Court here, last week.

The shuffleboard tournament at the Philadelphia Jewelers' Club attracted an exceptionally large number of spectators, last week. The tournament will be ended in a few days, when prizes will be awarded.

Wm. Fry has assumed the management of the business of his father, the late Frank H. Fry, in Burlington, N. J., but so far as is known only temporarily, since Mr. Fry is established in the wool business in this city.

In the suit of Jessie Froelich *vs* Isaac Garfinkel and Michael Moskovitz to re-

# MEYEROWITZ BROS.,

**A New and Complete Line of Reconstructed Rubies and Sapphires at Interesting Prices.**

over a commission, which was tried in the local courts last week, the jury returned a verdict for the plaintiff of $156.47. All are well known in the Sansom St. trade.

The Metal Mfrs'. Supply Co., 626 Cherry St., will be sold out at a bankrupt auction sale next Monday. The stock consists of polishers' and platers' supplies, boring and polishing lathes, buffing wheels, brushes, metal saws and files, grindstones, chemicals, bristles, scales, etc.

Isaac Herzberg, H. C. Rumpp and Wm. Rumpp are among those in the trade who have been appointed members of the German-American Reform Campaign Committee. Otto Eisenlohr, of the Jewelers' Club, has been appointed a member of the Finance Committee.

Robert Turner, watchmaker for the late Frank H. Fry, Burlington, N. J., opened, last week, an optical store on High St., in that village, which he conducts at such times when he is not required to be in attendance at the Medico Chirurgical College, where he is a student.

George C. Child will remove about Nov. 15 from 27 S. 9th St. to 105 S. 9th St., under the Continental Hotel. Mr. Child's new store will be handsomely refurnished. The vacation of the present store is required by the owners, who purpose to tear it and neighboring stores down and erect new ones.

The Board of Governors of the Jewelers' Club have arranged to have a special wire into the club-house election night to furnish the members with the returns of the bitterest political reform fight which this city has undergone since the early 80's. In addition to news of the election the members will have a collation served them.

---

The jewelry concern in Mexico City, Mex., known as La Esmeralda, supplied the gavel which the local passenger men recently presented to the retiring president of the American Association of General Passenger Agents. The gavel is made from the prehistoric war axe presented to the local passenger men by Leopoldo Batres, Government archæologist. To the axe the jewelers fastened a heavy gold handle inlaid with jade and obsidian ornaments which were dug from the ancient ruins in Mexico.

## Lancaster, Pa.

Jared P. Wilson, a watchmaker, died here last week of consumption.

T. Wilson Dubbs visited Fredericksburg and Hagerstown, Md., last week.

Frank Webster has gone to Atlanta, Ga., where he contemplates opening a jewelry store.

The death of James F. Yergey, formerly of Lancaster, is reported from Williamsport, his late home.

Henry J. Musser, formerly of Lancaster, now engaged in the jewelry business in the suburbs of Cincinnati, was here last week with his bride.

Charles E. Foose and Fred. A. Wheeler, of the Non-Retailing Co., who returned last week from an extended trip, are off again to cover other territory.

B. Lichtenstein has moved into his handsome new store in the Snyder building, No. 137 N. Queen St. The store is finished in oak and all the cases are of oak.

Walter Geist, foreman of one of the departments of the Lancaster Silver Plate Co.'s factory, with which he has been employed for 17 years, is ill, a victim of consumption.

Several employes of the Hamilton Watch Co.'s factory who left to work at other places during the shutdown of last Summer, have returned to Lancaster, and others are coming back in the near future.

Among jewelers who recently visited Lancaster were: E. F. Arndt, Florin; E. G. Hoover, Harrisburg; W. J. Frazer, Lincoln; J. A. Kirk, Quarryville; Mr. Brubaker, of Kaufhold & Brubaker, Columbia; J. S. Baker, Glen Rock.

In one of S. Kurtz Zook's handsomely decorated show windows was displayed, last week, a sword presented by King Edward of England to Edward Trevallian. Crowds stopped to see it and incidentally saw the fine display of jewelry made by Mr. Zook.

William Holland, with Ezra F. Bowman's Sons, and his bride are home from their wedding trip. Frederick Sheaffer, a jeweler for the same firm, who was on the sick list, is back at the bench again. John J. and Charles E. Bowman, of Ezra F. Bowman's Sons, spent last week hunting in the mountains of Elk County, Pa.

Walter Browlow, who is wanted for stealing jewelry from a Chicago store, several months ago, was in the custody of the police here last week under another name, having been arrested for disorderly conduct. He paid the costs and was discharged. It was only after he left Lancaster that his identity was discovered.

REAL CORALS

### Why Discriminate Between Smugglers?

ALTHOUGH smuggling of gems and jewelry by those who make a business of selling the articles illicitly brought into this country seems to have decreased to some extent, in recent years, there is no doubt that the smuggling of gems by private parties, who bring the jewels for their own use or for presents, continues on a very extensive scale. Only last week a wealthy lady was forced to surrender to the Customs Officer in New York a necklace said to be worth $22,000, after an investigation by the officers of the Treasury Department. This as well as similar cases where smaller amounts have been involved, that have been reported in the newspapers in the past two or three years, together with a number of seizures that are on record, but have not been reported in the daily press, prove clearly that, though headway may have been made in the fight against the professional smuggler, there is little diminution in the amount of gems and jewelry constantly being brought without payment of duty by apparently respectable members of the community.

For this condition the Government is itself in great part responsible inasmuch as its officers, both in the Treasury Department and Department of Justice, while using all the machinery of the law to prosecute, punish and forfeit the goods of professional smugglers, have shown a leniency to the private smuggler that is remarkable to say the least. Although the statutes provide three penalties for smuggling: (1) The forfeiture of the article smuggled in an action *in rem;* (2) the recovery of a penalty from the smuggler of three times the value of the article's value, and (3) a fine and imprisonment, as provided by the criminal statutes, there is not a case on record in recent years, where the smuggling by a private party has resulted in anything more than the forfeiture of the article clandestinely brought through the customs lines. Not only have there been no criminal prosecutions of smugglers of this character, and no suits to recover the penalty, but in several instances men and women who have been detected in smuggling have finally recovered the smuggled articles on simply paying the duty; and, what is stranger yet, time and again not only have some of these cases not been reported to the newspapers, but every effort has been made, as in the case mentioned in another column, to keep the name of the smuggler from being made public.

Is there any wonder then that men and women will continue to defy the customs laws with such precedents before them all the time? Clearly the customs officers have as much as said by their actions that there is no danger in smuggling, except the chance that the smuggled articles may be confiscated—that is, providing the smuggler is prominent and respectable and is smuggling for his own use. On the other hand, if he is a dealer, smuggling for a livelihood, he knows that all the laws in the statute books may be invoked, to fine and imprison him and to seize the smuggled articles. Is this discrimination right? Is it founded on a just or ethical basis, or is there any difference in the effect of the acts of the two classes of smugglers upon the public or business community? Is not a respectable smuggler as much an enemy to the laws of his or her country—as great a worker of injury to the business community, and as clear a defrauder of the revenues of the United States—as the dealer or messenger who brings in the same articles purely as a business proposition. If not, wherein lies the difference?

Truly it is time that the members of the jewelry and other lines whose business is materially interfered with every year by the smuggling of tourists, take concerted action and make an effort to have the officers of the Government enforce the revenue laws impartially, without fear or favor, and see to it that the respectable or prominent man or woman who transgresses these laws is dealt with as any other criminal would be. One conviction, with fine and imprisonment, of a respectable or wealthy smuggler will do more to stop this illicit practice than would the expenditure of half a million dollars in preventive measures by the work of Government agents.

## *LETTERS TO THE EDITOR.*

### A Correction from John E. Shepard.

*Editor* THE JEWELERS' CIRCULAR-WEEKLY:

In your issues of Oct. 4 and Oct. 11 is an article under the title of "The Shadows of the Past," and to the interesting information therein given I desire to add the names of several old and established houses that were overlooked by your historian, besides correcting one or two slight inaccuracies:

No one was better known in the retail business 80 years ago than was William I. Tenney, Cor. Broadway and Murray St. He had in his employ his brother, Dan I. Tenney, both unmarried. Some time in the 40's William made an assignment to his mother, Mrs. Ruth Tenney, and the business was conducted for several years under the name of R. Tenney. The late A. F. Cross, of Cross & Beguelin, commenced as a young man with Tenney.

Another well-known house was Gelston & Treadwell, under the Astor House, Cor. of Vesey St. and Broadway. After the dissolution, Mr. Gelston was engaged with Ball, Black & Co. until his death. Mr. Treadwell joined the firm of Tiffany & Co., then at 550 Broadway. After a few years he withdrew from that firm and entered the firm of Sypher & Co.

Another well-known house was Mott Bros., in Nassau St., near Wall St., who did quite a large business with bankers and brokers.

In relation to James H. Hart, I recall that he had a store in Greenwich St., and then was with Oscar Jennings in Fulton St. under the firm style of Jennings & Hart. Subsequently Mr. Hart moved to Fulton St., Brooklyn, near Sands St., and later to the Cor. of Fulton and Johnson Sts., where he was joined by his brother, the firm becoming J. H. Hart & Bro. The brothers finally moved out further on Fulton St.

Norman A. Freeman, afterward Freeman & Bennett, was in business at Broadway and Reade St.

In Broadway, just below Reade St., Bonfanti's was one of the oldest and most renowned stores in fancy goods, jewelry and

materials used by the theatrical profession.

Another of the old landmarks was the retail store of William Gemmell on the east side of Broadway, Cor. of Duane St. This was a long-established house.

I remember well going into the store of Benedict & Benedict in Wall St., on the north side, near William St., a door or two above the Bank of America. After the dissolution S. W. Benedict continued the business, as recorded by your historian.

The original Stebbins firm was E. Stebbins & Co., Alex. Rumrill being the Company. Mr. Stebbins retired and built a fine house in Springfield, Mass., not living long to enjoy it. A. Rumrill & Co. continued the business, as related in your article, George B. Jacques and George D. Stevens being the company. JOHN E. SHEPARD.

Walter H. Lydick, the jewelry salesman who has been missing from Washington, D. C., for some time, and who was recently arrested at St. Louis, Mo., was brought to Washington last week by local detectives and placed in jail. One of several charges against the prisoner is embezzlement of about $3,000 worth of jewelry from R. Harris & Co., 400 7th St., by whom he was employed to sell goods on commission. He disappeared Oct. 1, 1903, and a vigorous search was made for him all over the country. When arrested he was employed by an advertising concern at its branch office in St. Louis. After Lydick's arrival Wednesday he was photographed and measured at police headquarters and surrendered to the United States Marshal.

## New York Notes.

Joseph Zweigel, 375 Grand St., is selling out.

Hyman Brinker, last week, succeeded Brinker Bros., 36 John St.

Fire, last week, damaged the factory of the American Comb Co., 457 Broadway.

Louis Cohen, who had a small jewelry store at 85 Forsythe St., has been closed under execution.

Louis Kahn, of L. & M. Kahn & Co., and Mrs. Kahn, returned last week from Europe on the *Kronprinz Wilhelm*.

A. Trenkmann, tortoise shell manufacturer, has moved from 407 to 409 Broome St., where he has larger quarters and a more desirable corner location.

Visitors at the office of THE JEWELERS' CIRCULAR-WEEKLY during the past week included Charles E. Braun, of Charles E. Braun & Co., London, Eng.

Mary Fairbairn, the widow of Jesse Watson, formerly in the jewelry business, died last week at her home in the Vendome, Grand Ave., Brooklyn.

W. L. Van Moppes, of Van Moppes & Son, 87 Nassau St., returned last week from Europe, where he passed six months principally in visiting the diamond markets.

The jury composing Group 34 of the Lewis and Clark Centennial Exposition has awarded to P. W. Lambert & Co. a gold medal in recognition of its leather manufactures, consisting of ladies' hand bags, card cases and belts.

S. Solodar has opened a jewelry store with an optical department at 641 Sixth Ave., near 37th St. Mr. Solodar, who is a practical repairer and an optician, was for some time associated with another jewelry house on the same avenue.

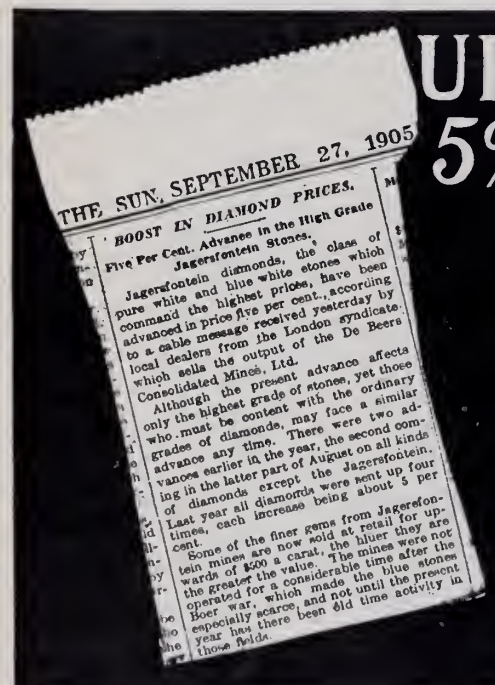
Eugene A. Kennedy, who was formerly with James Cassidy, a jeweler at 151 Bowery, and subsequently became manager of E. Simpson & Co.'s uptown pawnshop, 143 W. 42d St., recently accepted the position of manager of the New York *Daily News*.

The office of Philipp Zellenka & Son, 59 Maiden Lane, was closed three days last week, owing to the death of Mrs. Philipp Zellenka, the widow of the former senior member, who died in 1892. Edward Zellenka is the surviving member of the firm.

In the window of Oliver M. Farrand, 3 Maiden Lane, is shown a beautiful aurora, consisting of an opal, found by men in the employ of the Hamilton Co., New York, on lands in Australia. The opal, which has a beautiful green iridescence, has been set in a circle of diamonds.

Decorated glass ware imported by W. G. Horn, Bro. & Co. was last week held by the Board of General Appraisers, New York, to be dutiable at 60 per cent. under Par. 100 of the Tariff Law. This decision sustained the action previously taken by the Collector at New York.

Tiffany & Co. have designed a seal of the Canal Zone of the Isthmus of Panama. In the upper part of the design is the shield of the United States and below a Spanish galleon under full sail passing through the canal. On a ribbon is the inscription, "The Land Divided—The World United."



Thomas Jenks, an employe in the Ansonia Clock Co.'s factory, Brooklyn, was the defendant in a separation case, preliminary arguments of which were heard last week in the Supreme Court. His wife asks for $20 alimony and $500 counsel fees. He denies the charges of cruelty which she makes against him.

Imitation precious stones imported by Overton & Co. were held Monday by the Board of United States General Appraisers, New York, to be dutiable at 35 per cent. ad valorem, the rate assessed by Collector Stranahan. The protest of the importers who contended that the duty should be 20 per cent., was over-ruled.

Suit has been begun against V. Prague for $40, said to have been paid to him for a diamond ring by Wm. O'Rourke, of 61[illegible] Classon Ave., Brooklyn. It is charged that the defendant represented himself as a salesman for a Fulton St. jewelry house and after receiving the purchase price of the ring did not deliver it.

The Stern Bros. & Co. Mutual Benefit Association will Saturday evening next give an entertainment and ball at the Lexington Assembly rooms, 145 E. 58th St. Music will be furnished by Prof. L. Fischer, beginning at 8 o'clock. An excellent programme has been prepared for the amusement of all, and a large attendance is assured.

Five years in Sing Sing prison was the sentence pronounced last week by Judge Foster in the Court of General Sessions in the case of Louis Brown, a negro, who entered the store of Cross & Beguelin, 17 Maiden Lane, with the supposed intention of robbery, as related in THE CIRCULAR WEEKLY of Oct. 11. When Brown was seen in the diamond room he ran out from

THE SUN, SEPTEMBER 27, 1905.

BOOST IN DIAMOND PRICES.

Five Per Cent. Advance in the High Grade Jagersfontein Stones.

Jagersfontein diamonds, the class of pure white and blue white stones which command the highest prices, have been advanced in price five per cent., according to a cable message received yesterday by local dealers from the London syndicate which sells the output of the De Beers Consolidated Mines, Ltd.

Although the present advance affects only the highest grade of stones, yet those who must be content with the ordinary grades of diamonds, may face a similar advance any time. There were two advances earlier in the year, the second coming in the latter part of August on all kinds of diamonds except the Jagersfontein. Last year all diamonds were sent up four times, each increase being about 5 per cent.

Some of the finer gems from Jagersfontein mines are now sold at retail for upwards of $200 a carat, the bluer they are the greater the value. The mines were not operated for a considerable time after the Boer war, which made the blue stones especially scarce, and not until the present year has there been old time activity in those fields.

UP 5%

WE TOLD YOU SO!

We don't say it in the spirit of braggadocio, but haven't we been telling you so for several months past? And it's lucky for you that our foresight has enabled us to provide against just such a contingency.

WE SHALL CONTINUE TO SELL DIAMONDS AT OUR OLD PRICES WHILE PRESENT STOCK LASTS.

And you know that our old prices were always lower than you could obtain elsewhere.

Send in your order NOW if you want Diamonds for the Holiday Trade.

We will gladly send you a memo. package of diamonds, mounted or unmounted, upon request.

CROSS & BEGUELIN,

*Importers and Cutters of Diamonds and Precious Stones.*

47 Rue de Mesley. PARIS. Telephone, 2188 Cortlandt. 17 Maiden Lane, NEW YORK.

ie store and in the chase that followed ied to stab Oscar Windorf, one of the erks. The negro was indicted for felonius assault in the first degree, but the Disict Attorney's office accepted the plea of uilty of assault in the second degree. The harge of unlawful entry is pending in the 'ourt of Special Sessions, but will probably e dropped in view of the sentence imposed n the other court.

At the store of Higgins & Seiter, 50 W. 2d St., a man named John Reid, formerly butler in the employ of O. H. P. Belmont, was arrested on the charge of forging the names of Mr. Belmont and another an to a number of small checks. He was bout to pay for a quantity of cut glass ith one of these checks when he was arested.

According to a decision rendered by udge Lacombe, of the United States Ciruit Court last week the W. H. Bundy Time Recording Co. does not infringe in the manufacture of its card record on the atent of the International Time Recorder Co. The Judge refused to grant an injuncion, and said that the two machines are astly different.

Tiffany & Co. have received from the Lewis and Clark Exposition at Portland, Ore., two gold medals awarded for the exhibits of cut precious stones and semiprecious stones. Dr. George F. Kunz received a gold medal in recognition of his writings in relation to American precious stones, and also of his work as a collaborator in preparing his company's exhibit.

Arthur Seligman, formerly with A. C. Becken, of Chicago, who last December gave up his position to make a tour of France, England, Germany and South Africa, has finished his globe trotting and arrived in New York last Sunday on the *St. Paul*. After spending a few days in the metropolis Mr. Seligman will go to Chicago, where he will again go into the jewelry business.

Mrs. Caroline Dreher, widow of a clockmaker who for some years had a little repair shop on 66th St., near Third Ave., committed suicide last Saturday by filling her room in the apartment house at 1101 Third Ave. with illuminating gas. Her 13-year-old son was also killed by the gas, while two older children survived. The woman's mind has been unbalanced since her husband's death.

Henry Lucks, who said that he is a jewelry salesman, reported to the police about 3 o'clock one morning last week that two men tried to hold him up on Cherry St., while he was on his way home. It is supposed that they coveted his scarf pin and his watch. The police several hours afterwards arrested Thomas Costello and Samuel Greenberg who were held on this and another charge.

Nathan Greenbaum, with Rosenbaum & Adler, 65 Nassau St., recently found in the corridor of 16 Maiden Lane a package containing 18 pieces of diamond and gold jewelry. A day or two later he saw an advertisement in a newspaper describing the loss, and, in response, returned the jewelry to T. Murphy, a broker, who said that he had dropped the package while he was calling on the trade.

When a pedestrian passed L. M. Piccard's jewelry store at 705 Fulton St., Brooklyn, early one evening, last week, he saw a man going about the place, and supposing that a burglar was busy, he notified the police. A detail of detectives surrounded the store, and on opening the door were surprised to learn that the man inside was Mr. Piccard, who had remained at his place of business a little later than usual.

Wm. H. Fehlhabor, engraver with Dieges & Clust, 23 John St., and Miss A. Behling were married, last Wednesday, in the Trinity Evangelical Lutheran Church, Avenue B and 9th St. After the ceremony a reception took place at Arlington Hall, 21 St. Mark's Pl. The groom's employers and his fellow craftsmen showed the esteem in which they hold him by sending a case containing a full set of silver table ware.

In relation to western despatches announcing new pearl fisheries in the Kankakee River, Indiana, Dr. George F. Kunz, of Tiffany & Co., said yesterday that some of the pearls have already reached the market and compare favorably with those that have been coming from the Wabash and the Mississippi. There is the same trouble, he said, that has been noted this season in other fresh-water pearls when the mussels are placed in hot water for the purpose of opening them. This process discolors some of the gems and the pearl fishers who desire to obtain the more valuable gems do not resort to the hot water treatment, which is commonly used, however, by those who gather shells for the button manufacturers.

As a result of a trial in the Court of Special Sessions, one day last week, Wm. Riordan was found guilty of unlawful entry at the office of Max Bollotin, a jewelry manufacturer at 41 Maiden Lane. While the attendant was away from the outer office, as related in THE CIRCULAR-WEEKLY of Oct. 4, Riordan entered and stood inside the railing, near the safe. Here he was seen by Mr. Bollotin, who had been in the factory and heard a noise like the

click of the knob in the safe door. The man claimed that he was in search of work and had not intended to steal anything. The records showed that he was at liberty on a suspended sentence. The judges found him guilty and sent him to the penitentiary for a year.

A diamond ring valued at $500 was stolen last Thursday, from the store of L. W. Sweet & Co., 467 Fulton St., Brooklyn, by pennyweight thieves, who the police believe, are an English gang which has been driven from Europe. A middle aged man and woman of apparent respectability entered the store and asked to look at diamond rings. While they were examining an assortment presented on a tray, a dapper young man entered and asked the young woman clerk, who was alone in the store at the time, some questions about the location of a nearby firm. It is supposed that when the clerk's attention was distracted in answering the young man, one of the couple substituted a brass ring for a $500 article, and the trick was not discovered until later in the day.

Alexander G. Simmons, who was a salesman in the employ of the S. Cottle Co., 31 E. 17th St., received some of the money which Mary E. Golding, cashier at the New York branch of the Larkin Soap Co., stole from her employer, according to her confession. She said that for several years she had been giving him money from time to time, generally in amounts of $10 to $25. To a newspaper reporter Mr. Simmons is quoted as saying that he had no suspicion that the money was stolen, and as he could not afford to pay for the expensive entertainments which Miss Golding required when they went out together, he had, at her solicitation, accepted some money from her to defray their expenses. Since the publication of the facts, the jewelry company has given notice that Mr. Simmons is no longer in its employ.

At the jewelry factory of William Scheer, 544 Fifth Ave., New York, a diamond necklace, valued at $3,000, which was being made for Marcus & Co., of the same address, was missed from its proper place Thursday morning, and Mr. Scheer at once took energetic measures to recover the property. The police were notified, and the shop was temporarily closed while detectives went to work searching for the missing jewels. At noon the young woman employed as a polisher, who had reported the loss of the necklace, entered the office and handed it to Mr. Scheer, at the same time explaining its temporary disappearance. It appears that the day before she had taken several of her own rings to the shop for the purpose of cleaning and polishing them. She wrapped them in tissue paper and placed them in the same drawer in which she kept the necklace, on which she had been working. By mistake, on going home at night, she placed the necklace, which was also wrapped in tissue paper, in her pocketbook, instead of the rings, and did not notice the error until she paid for her lunch the next day, and then found in her pocketbook the diamond necklace, whose disappearance had alarmed her a few hours before. She had not worn her rings during that time, which accounted for the delay in learning of the mistake.

### Abraham Weinstein Appointed Receiver of His Firm in Action to Dissolve Partnership.

Abraham Weinstein was, Monday, appointed receiver of the jewelry manufacturing firm in which he was associated with Simon I. Loewenberg, under the style of A. Weinstein, 104 Fulton St., New York, in an action for the dissolution of the partnership, which was brought by him. Mr. Weinstein says that the firm was formed Aug. 12, and he put in $500 capital, subsequently advancing $350 more to meet expenses. Mr Loewenberg contributed his experience, and Mr. Weinstein is not satisfied with the developments in the business.

There are no liabilities, it is said, except what is due to Mr. Weinstein. He expects to conduct the business as receiver until he obtains control on the dissolution of the partnership. For a number of years, before engaging in business for himself, he was in the employ of Maiden Lane concerns

Vol. LI. CHICAGO, WEDNESDAY, OCTOBER 25, 1905. No. 13.

## Chicago Notes.

F. H. Noble & Co. are going to move into the Heyworth building.

Large finds of fresh water pearls are reported in the Kankakee River.

Charles E. Howes, representing E. L. Logee & Co. is on an eastern trip.

J. H. Kasbohm, 800 Milwaukee Ave., is making extensive alterations to his store front.

In one of C. D. Peacock's show windows is a display of 1,278 diamonds, ranging in price from $5 to $2,000 each.

George Gubbins, with the Illinois Watch Case Co. and the Rockford Watch Co., has returned from an eastern trip.

D. L. Safford, of the Jewelers Association and Board of Trade, visited the Chicago office of the association last week.

F. R. Sheridan, with Arnold & Steere, and W. A. Fay, with the John T. Mauran Mfg. Co., have returned from the Coast.

H. V. Holcomb, who manages the "Crown" jewelry store at 4251 Cottage Grove Ave., was united in marriage Oct. 17 to Miss Oma Bliss.

Mrs. Grove B. Sackett, wife of the former western manager of the William L. Gilbert Clock Co., was here last week, accompanied by her sister, Mrs. Allard.

F. E. Blackburn & Co. is the title of a new mail order jewelry firm in the Heyworth building. Mr. Blackburn was formerly manager for the Colonial Jewelry Co.

A recent edition of the New York *Daily Trade Record* contained an interesting interview with S. Swartchild, of this city, on the subject of business conditions abroad.

C. M. Robertson & Co., jewelry jobbers, now at 126 State St., are going to branch out on a large scale next January and will be located in the Chicago Savings Bank building.

C. W. Harmon, of Joseph Fahys & Co., New York, paid a two days' visit to the Chicago office of that firm last week. Geo. Weidig, manager of the Chicago office, is on a business trip.

N. A. Smith, 591 N. California Ave., is going to sell out his store and take up the profession of portrait and landscape painter. In the art Mr. Smith has already demonstrated his ability.

Henry Sears, formerly head of the cutlery firm of Henry Sears & Co., died in San José, Cal., last week, aged 90 years. Mr. Sears was well known in the jewelry trade, to which he had sold cutlery for many years.

Lydia M. James, formerly a saleswoman for the Barrios Diamond Co., has brought suit against the latter for $500. Miss James claims that it was part of her duty to wear a pair of plate glass diamond earrings, and while doing so contracted erysipelas from germs which nestled therein.

News was received here from Los Angeles, Cal., last week of the death in that city of John P. Wilcox, aged 55 years, who for 10 years was head watchmaker for Hyman, Berg & Co. Mr. Wilcox left that firm about a year ago to engage in the automobile business. In his line Mr. Wilcox was regarded as highly efficient and his death is generally regretted. A widow and two sons survive him.

Hyman Telles, 18 years old, and Fred Langwell, 25 years old, were arraigned in court last week, charged with conspiring to rob the jobbing jewelry house of Gordon & Morrison, 199 E. Madison St. Telles was employed by Gordon & Morrison, and it is alleged he stole several thousand dollars' worth of watches and sold them to Langwell. The latter claims he only bought $60 worth. Telles was held to the Juvenile Court and Langwell was held to answer to the Criminal Court in bonds of $3,000.

The case of C. H. Seaman, a diamond dealer, against Mr. and Mrs. Louis H. Berg, has been continued until Oct. 27. Seaman charges them with embezzlement by bailee. This case differs from the others in which Mr. and Mrs. Berg are interested in that the complainant alleges that the diamonds delivered to the defendants were not given on memorandum, but were given to be shown to other parties. The courts have always held that when goods are delivered to be shown to other parties the title remains with the owner and to dispose of them is a criminal offense.

Clarence A. Powers, 92 LaSalle St., was arrested here last week, accused of buying stamps stolen from Loftis Bros. & Co. The arrest of Powers followed that of Ralph M. Stowers, 17 years old, who, after a week's employment by Loftis Bros. & Co., stole a box containing $200 worth of postage stamps and after disposing of them at a discount went to Milwaukee, where he was arrested. S. T. A. Loftis says he is going to push the case against Powers to the limit and will do all he can to discourage stamp brokers, who make a practice of buying postage stamps from young people at a discount large enough to arouse suspicion as to the honesty of the seller.

Among the out of town retail jewelers in Chicago last week were: Claude E. Range Trenton, Mo.; W. J. Graff, Boscobel, Wis. E. A. Marsh, Grinnell, Ia.; Louis Ratzesberger, Milford, Ill.; S. B. Walton, Unionville, Mo.; Lucas Hermann, Calumet Mich.; Robert J. Litschert, Winchester Ind.; Elisha L. Thayer, Rockford. Ill.; J J. Vernier, Toledo, O.; George W. Flanders, Three Rivers, Mich.

Theodore H. Purple, who for 17 years was the western manager of the Holmes & Edwards Silver Co., and the Manhattan Silver Plate Co., is again back in the jewelry trade after an absence of some years Mr. Purple has an office in the Heyworth building and represents the Philadelphia cut glass factory of Taylor Bros. & Co. and the Middletown Silver Co., Middletown Conn., and will also cover part of the west for the S. L. & G. H. Rogers Co. Mr. Purple has a host of friends here and throughout the west and has received many testimonials of welcome from the trade, all of whom are glad that he has re-entered the jewelry field in which he has been so long and prominently identified.

C. Franz, a retail jeweler, 4626 Wentworth Ave., engaged a watchmaker last week who proved to be a thief. He gave his name as G. E. Miller, and after working for a few days stole a $25 watch and pawned it under the name of E. Miller. Mr. Franz found the pawn ticket and tried to redeem the watch, but the pawnbroker said that Miller had previously taken the watch out after making an affidavit that he had lost the ticket. Miller is described as a Hebrew 5 feet 8 inches high, with brown hair, brown eyes, smooth face and has two moles on the right cheekbone. He is of middle age and speaks with a Hebrew accent. He claims to have a brother in the butterine business in Milwaukee. Any information regarding this man will be appreciated by Mr. Franz.

---

Milavitz Bros., Virginia, Minn., have dissolved. Samuel Milavitz will continue the business on his own account.

## San Francisco.

TRADE CONDITIONS.

Jobbers are busier than at any time since the opening of the Fall season, and a greater number of out-of-town retailers were in the city, last week, than during any week for several months past. This would at least indicate that preparations are being made in the rural districts for a good trade during the holiday season. Local retailers are finding things a little quiet just for the moment, but they are kept busy preparing for the handling of the holiday trade which they believe will be unusually extensive this year.

J. P. Alverson, Tulare, Cal., made a brief buying trip to this city, last week.

E. W. Clemo, Nevada City, Cal., paid the wholesale trade a visit, last week.

E. Meybem, Chico, Cal., made purchases in this city last week.

Charles A. Daunt, Modesto, Cal., was here, last week, combining business and pleasure.

Harry Frutig, Gilroy, Cal., made the San Francisco wholesale trade a call during the past week.

R. Schwartzkoff, manufacturers' agent, is the proud parent of a little girl, born one day last week.

R. Kocher has left for San José, Cal., after having purchased liberally among the jobbers of this city.

F. J Stumm, Benicia, Cal., has just left San Francisco, after spending several days on a purchasing trip.

J. J. Wilson, Dunsmuir, Cal., attended the Grand Lodge meeting of the Masonic Order in this city, last week.

J. A. R. Viera, Honolulu, H. I., made numerous selections from the San Francisco jobbing houses, recently. He will leave shortly for the Islands.

Charles Niner, Pleasanton, Cal., was in town recently, making purchases for his new store in that city.

William Moore, Grindley, Cal., has just ended a trip on which he made many purchases for his holiday trade.

Fred Levy, president of M. Schussler & Co., is about to move into a handsome residence which he has just built.

C. J. Noack, Sacramento, Cal., was in town the first of the week making one of his periodical visits to the jobbing trade.

J. J. Fretwell, Los Gatos, Cal., was here last week, attending a session of the Masonic Grand Lodge. During his attendance he was initiated into the order of the Mystic Shriners.

On his return from his last road trip Al. Cantor, Nordman Bros.' traveling representative, was greeted by a new member in the family, a boy of standard requirements, born during his absence.

Shreve & Co. turned out a set of prizes which were competed for by the Polo and Pony Racing Association at a race meeting and polo tournament held at San Mateo, Cal., Oct. 14 to Oct. 21. The set consists of 21 pieces, largely cups wrought from gold, silver and bronze. The work was done in the factory of Shreve & Co.

Hammersmith & Field, in addition to having completely remodeled their store, have also enlarged their stock and their working force. Fred W. Lippman, a well-known retail jewelry salesman, who has been for many years with J. Lippman, is among those recently added to their force of salesmen.

F. F. Barss, Sr., Placerville, Cal., came down from the mountains to lay in his Winter supplies and incidentally to attend the meeting of the Masonic Grand Lodge, last week. He made several calls among the jobbing trade while here.

A. H. Cohen, formerly with Geo. Greenzweig & Co., has resigned his position with that company and will succeed J. Lewis as traveling representative of M. L. Levy & Co. Mr. Lewis will leave in a few days for the east, where he will make arrangements for the handling of manufacturers' jewelry lines on the Pacific Coast.

Charles H. Hinges, formerly in business at Salem, Ore., recently returned from a prolonged stay in the east, accompanied by his wife. He has just left San Francisco for the north, after spending some time among the wholesale jewelers and dealers in optical goods. It is reported that he intends going into business again either in Salem or Portland, Ore., in the near future.

Harold Forbes, the local representative of the Dueber Watch Case Mfg. Co., will continue to conduct the business formerly carried on by Walsh & Forbes, whose offices were located in the *Call* building. Mr. Walsh having disposed of his interest in the concern, it is the intention of Mr. Forbes to move into the new Camm building as soon as it is completed. This will add one more to the already large number of wholesalers in that building, making it the largest wholesale center in the city.

## Pacific Coast Notes.

M. Markheim has moved into his new store in the Wolf building, Stockton, Cal.

R. W. Cummings, Ventura, Cal., has made extensive improvements in his store for the holiday trade.

E. M. Clarke, formerly of Boston, Mass., has purchased the jewelry business of N. W. Frantz, Hemet, Cal.

A. E. Billen, Detroit, Mich., while en route to San Diego, Cal., recently stopped off in Santa Ana, Cal., to visit R. V. Corbett, of that place.

George W. Hickox who has purchased the business of H. E. Fox, Albuquerque, N. Mex., will not take possession until Jan. 1, 1906. Mr. Fox will engage in the lumber business in British Columbia.

Charles Roberts has opened a store in the Nottleman building, Chico, Cal. It is Mr. Roberts' intention to manufacture jewelry, and he has fitted up his establishment with the most modern machinery for that purpose.

The San Luis Jewelry Co., San Luis Obispo, Cal., has secured the services of Geo. A. Butt, Portland, Ore., to fill the vacancy caused by the sudden disappearance of Guy E. Wolf. Thus far no trace of Wolf has been found.

John O'Brien, who was recently arrested at Los Angeles, Cal., on the charge of stealing silverware and other merchandise from the store of H. Graff & Co., of Fresno, while being brought back to Fresno by detectives jumped from a northbound passenger train about five miles west of Mojave, and, although shackled, managed to escape. O'Brien is an American of Irish descent, about 24 years of age, five feet nine and one-eighth inches in height, and weighs about 136 pounds. He has chestnut brown hair, blue eyes, a large vaccine scar on the upper left arm, a scar and cavity between the base of the left thumb and the index finger, and also a large black scar on the upper part of the right groin.

Two men, supposed to be jewelry thieves, recently had an encounter with a police officer at Bakersfield, Cal. The officer was not in uniform at the time, but had observed one of the men attempting to sell jewelry on a street corner in the tenderloin district. He watched until thoroughly convinced that the jewelry, of which the man was trying to dispose, was a portion of the booty taken from a jewelry store at Fresno, Cal., in a robbery which occurred there a few weeks ago. He placed the man under arrest and started with him for the police station, when he was suddenly struck a violent blow on the head by his prisoner's confederate, who had stealthily approached from behind. The officer was felled to the ground and the two thieves made their escape. Despite the fact that immediate steps were taken for their apprehension and that vigilance has not been relaxed since the occurrence, the men are still at large.

## Indianapolis.

TRADE CONDITIONS.

The presence in this city of hundreds of visitors to attend the National Convention of the Woman's Home Missionary Society, of the Methodist Episcopal Church, last week, increased the sale of souvenirs and novelties. Local merchants are greatly pleased with the regular Fall business. Prospects are good for a splendid trade. Manufacturers are rushed with orders, and collections are reported to be satisfactory.

C. A. Slinger, foreman for Ikko Matsumoto, is about to move into a new home on Morris St.

Charles Mayer & Co. is running a new automobile delivery vehicle. It is one of the largest machines in the city.

E. M. Craft, of the A. P. Craft Co., spent last week on the road. He reports that business is good in most parts of the State.

Harry Cohen, of H. Cohen & Sons, is again manager of the Indianapolis polo team, holding a franchise in the Central League. The season opened on Monday, of last week.

Cracksmen last week dynamited the safe of R. M. Smith & Co., at Franklin, 20 miles south of this city. Six hundred dollars in cash and some jewelry were secured. The store carried general merchandise, with jewelry as a side line. It is thought that the burglars were the same ones who blew open the safe in the store of B. F. Harrison, Clayton, two weeks ago.

J. C. Sipe is in Colorado seeking big game with his shotgun. He left a week ago and will be gone three weeks longer. His object is to return in time for the holiday trade. That Mr. Sipe is a hunter of no mean ability is attested by the numerous skins with which his home and store are adorned. Forming a handsome corner in his store are 11 skins, which represent 17 days' hunting that Mr. and Mrs. Sipe en

We Have a Large Stock of Diamonds in all sizes, which we purchased prior to the recent advances, and on which we have not raised prices. Send for selection package.

Trade-Mark.

oyed in Colorado and New Mexico, last pring. On that trip they killed seven ears, a wild cat, a mountain lion, a timber olf and two badgers. Mr. Sipe went west naccompanied this time. His only com-anion on his hunting trip in the mountains vill be Steve Elkins, a trusted and well-nown guide.

The Fitzgerald building in which Ikko Matsumoto has his manufacturing establish-nent, has been sold, and various improve nents are contemplated. Many of the oc-upants have been notified that their leases vill not be renewed, as the purchasing com pany desires full use of the building, but Matsumoto will not have to make a change, as he only recently secured a five years' lease of his rooms.

Out-of-town jewelers who visited the lo-cal manufacturers, last week, included: J. Hummel, Jr., Muncie; C. W. Neal, Frank-in; H. F. Bennett, Lapel; E. O. Collins, Franklin; F. C. Sheldon, Shelbyville; P. C. Seaton, Clayton; A. W. Owens, Greenwood; D. S. Whittaker, Lebanon; J. M. Wash-burn, Anderson; A. Pursel, Noblesville; J. A. Meissen, Cicero; George L. Spahr, Leb-anon, and Leslie E. Heaps, Spencer.

J. H. Reed, last week, was visited by two women thieves, who afterwards robbed Rink's cloak-house of fur garments valued at $950, and another general store of furs and hats valued at $200. The women asked Mr. Reed to show them diamond brooches. Not being impressed with their sincerity to buy, Mr. Reed was cautious in displaying his stock. He did not put the trays out on the counter. After looking at one or two brooches, the elder of the women asked to see a $375 brooch, which was in the win-dow. Before moving away, Mr. Reed re-placed in the show case the articles he had been exhibiting. The women said they would return after consulting with their husbands. That was the last seen of them by Mr. Reed. The next morning he heard of the Rink robbery and recognized from the description given that the thieves were the women who had visited him. Much of the goods stolen from Rink's was recov-ered in Chicago. The women are portly and apparently about 45 years of age. They were dressed in black. At Rink's they were accompanied by a lame man.

## Cincinnati.

Louis J. Klotter is closing out his business at Brighton, O.

Joseph Hornback has left on a business trip through the south.

G. V. Dickinson, of the Elgin National Watch Co., visited this city, last week.

V. A. Gebhardt, of Gebhardt Bros., is visiting the trade in the northern sections.

R. A. McClelland, West Union, O., stopped here on his return from Chillicothe, O., last week.

Harry Power, formerly with A. H. Watts, Zanesville, O., is now employed as watchmaker for William Owens, 425 Elm St.

J. T. Anderson, Dayton, O., called here last week en route to Marion, Ind., where he is conducting an auction sale for J. H. Baber.

Raines Bros., Maryville, Mo., were here purchasing stock for their new store, which is reported to be among the finest in the southwest.

Garry Mohlman, Lafayette, Ind., formerly with L. N. Philbin, made purchases here, last week, for the new store which he has just opened.

Among his Cincinnati friends the news of the sudden death of M. S. Hawkins, formerly with H. Joseph, at Mattoon, Ill., was heard with deep regret.

Ritterman Bros., Evansville, Ind., have purchased in this city new fixtures and stock for the new store in their own building, one block east of their present location.

Charles J. Nurre, 1214 Main St., a few evenings ago, was tendered a reception by Cincinnati and Covington friends upon his return from a six weeks' trip in the east.

H. D. English, Hartford City, Ind., has announced to friends here that he is starting a new store at Dunkirk, Ind., and that M. Massie Johnson will hereafter conduct the business at Hartford City.

The Frank Herschede Co., 24 E. 4th St., furnished the handsome gold watch and fob recently presented to John Clifton Marquette, inspector of the B. & O. Railroad, by the freight traffic officers of the road.

W. Clemens Air, formerly of the Duhme Jewelry Co., is now manager of the retail department of S. & H. Gilsey, 409 Race St., having succeeded D. O. Shaw, who is now located in the store of George H. Newstedt.

The convention of the Grand Lodge, F. & A. M. of Ohio, held here the past week, brought a number of out-of-town jewelers, including: A. Wahlrab, of Dayton, O.; Elmer Fell, of Guyville, O., and Walton Parker, of Beverly, O., who received the distinction of being elected lecturer for the 17th district of the State.

Out-of-town jewelers who visited the Cincinnati trade during the past week, not elsewhere mentioned, included: S. S. Vanhoy, Jr., Campbellsville, Ky.; Mr. Oberhalz, of W. C. Fisher, Lorain, O.; Frank Fullilove, Owenton, Ky.; G. M. Wilkinson, Mansfield, O.; Rude Meyer, of F. G. Wittlinger, Middletown, O.; J. H. Kreker, Huntingburg, Ind.; J. W. Clark, Mt. Vernon, O.; A. Clooney, Maysville, Ky.; W. W. Roberts, Nicholasville, Ky.; Victor Bogaert, Lexington, Ky.; Henry Moser, Wapakoneta, O.; G. M. Wilkinson, Mansfield, O.; Will Schaible, Troy, O.; J. E. Holloday, Blanchester, O.; J. A. Simpson, New Richmond, O.; Ira B. Wylie, Springfield, O.; James Rollins, Loudonville, O.; Frank Mayer, Jr., Middletown, O.; T. P. Fry, Lewisburg, W. Va.; D. A. Sewall, Wilmington, O.; W. J. Ewing, Dillsboro, Ind.

Nathan Stainiger, Tipton, Ia., has been succeeded by R. H. McCormick & Co. Mr. Stainiger has moved to Vail, Ia.

## Cleveland.

Arthur Mills, who was formerly in the jewelry business in this city, has been discharged from his debts in bankruptcy.

William Willson, a colored preacher and watch repairer and jeweler, was in Police Court a few days ago on the charge of not supporting his family.

Among the visiting jewelers in the city the past week the following were noted: Mr. and Mrs. F. H. DeWitt, Port Clinton; Mr. and Mrs. J. O. McClintock, Chagrin Falls; Mr. and Mrs. C. J. Duncan, Massillon; F. R. Montgomery, Sandusky; H. D. Davis, Kent, and E. E. Critz, Elyria.

Capt. R. E. Burdick, of the Bowler & Burdick Co., took part at the smoker and reunion of the Veteran Association of Troop A, 1st O. V. C., at Troop A Armory, Saturday evening, commemorating the date of mustering into the Spanish War service. Capt. Burdick served through that war with the troop and later resigned. He is president of the association, which meets annually on this date.

The sale of the Chadwick jewels seized by the Government because the duty had not been paid, took place Thursday. The appraisement of the lot sold was $2,220 and just $3 less was realized through the sale. A number of dealers from different points attended, but only a few made purchases, the prices being too high. H. Schwartz, a Chicago jeweler, purchased an amethyst brooch for $65, which he said was worth at least $200, and a three and a half carat diamond ring for $245.

H. W. Burdick, of the Bowler & Burdick Co., and G. L. Sigler, of the Sigler Bros.' Co., represented the two houses on the 15th trade extension excursion, which took place last week. About 40 representatives of wholesale and manufacturing houses took a four days' trip over eastern Ohio, western Pennsylvania and western New York. Although the weather was stormy for a good portion of the time, the travelers enjoyed the trip and feel that they have been amply repaid for all the trouble and expense. They traveled in a special train furnished by the Erie Railroad Company. Mr. Burdick stopped off to visit relatives at points in New York.

## St. Louis.

J. A. Granbery, of J. A. & S. W. Granery, Newark, N. J., visited this city, last week.

W. K. Bergfeld, of the H. G. Bergfeld Jewelry Co., has returned from a trip to Missouri.

Harry E. Farquharson, a manufacturers' agent of Chicago, was in St. Louis several days last week.

F. Dienstbier, of F. Dienstbier & Co., 203 N. Broadway, has returned from a fishing trip in Arkansas.

John M. Cutter, secretary of the Trenton Watch Co., Trenton, N. J., spent several days in St. Louis last week.

The Mermod, Jaccard & King Jewelry Co. has presented a silver loving cup as a prize in a trapshooting contest on the East Side.

Herman Mauch, president of the Retail Jewelers' Association, accompanied by Mrs. Mauch, returned from a fishing trip, last week.

Jule J. Meyer was in St. Louis last week purchasing stock for his new store at Sullivan, Mo. Mr. Meyer was formerly with W. C. Rans, Berger, Mo.

H. Liberstein, East St. Louis, Ill., has moved to more commodious quarters at 11 Collinsville Ave. He now has one of the handsomest stores on the East Side.

James Campbell, John Scullin and B. F. Yoakum, three St. Louis capitalists, have an option on a gold mine in Central Mexico, agreeing to pay $1,400,000 therefor. It is reported that they have refused an offer of $2,000,000 for the property.

Jewelers in East St. Louis, Ill., who have been conducting watch clubs have been greatly exercised over rumors that indictments may be found against them by the St. Clair County Grand Jury. That body is reported to be after all merchants who, to stimulate the sale of their goods, organize clubs in which there are weekly drawings and in which the early numbers get "something for nothing."

Among the out of town jewelers in St. Louis last week were the following: Charles Mosby, Batesville, Ark.; Captain Klein, of Klein & Fink, Fort Smith, Ark.; T. P. Ross, Columbus, O.; M. J. Motsinger, Rector, Ark.; W. H. Jahn, St. Clair, Mo.; G. Brevelt, Aviston, Ill.; E. Zimmerman, Stonington, Ill.; A. E. Helbert, Bonne Terre, Mo.; R. A. Dunlap, Festus, Mo.; H. Foerste, Okawville, Ill.; Fred Simon, Colinsville, Ill.; W. F. Speck, Harrisburg, Ark.

Vincent J. Gorly, 1508 Cass Ave., recently lost a pair of diamond earrings in a peculiar manner, and recovered them in a manner no less strange. His wife gave an old coat to a negro, and in the pocket of the coat were a pair of diamond earrings which Mr. Gorly had left by mistake. He did not know of his loss until the articles were returned to him by a patrolman who had arrested the negro after another negro had told him of the finding of the stones.

## Detroit.

### TRADE CONDITIONS.

Detroit jobbers report more inquiries during October than in two years. Retailers are apparently anticipating an excellent holiday trade and are buying liberally. Detroit retailers are making elaborate preparations to handle the Christmas trade satisfactorily. Traveling men who pass through here report similar conditions existing in other western cities.

Fred E. Platte, formerly with John Hellerich, has started in business on Gratiot Ave., near Dequindre St.

Frank Mathauer, of Mathauer & Koester, will leave next Monday for a four weeks' trip to his Michigan trade.

Hugo S. Fecheimer, for many years with the Adolph Enggass Jewelry Co., will start a new store about Nov. 1 at 12 John R. St., this city.

Horace W. Steere, Providence, R. I., paid Detroit and his store at 68 Woodward Ave. a flying trip last week, but has returned, leaving the business in charge of Manager Lutz.

F. T. Zehner, 335 Michigan Ave., this city, was one of the several merchants who was visited last week by a man who passed worthless checks. Mr. Zehner was a loser to the extent of $7.50.

Among the out-of-town jewelers who visited the jobbers here, last week, were: E. J. Brown, Cassopolis; William La Clare, St. Ignace; Jas. P. Walton, Durand; D. A. Hodge, Auburn, Ind.; C. E. Montfort, Utica, and E. S. Barnes, Rochester.

J. Sillman, a clerk in the store of Joseph Moyer, who was murdered recently, last week, accidentally discharged a revolver, which had been brought in by a customer who wanted to exchange it. The bullet passed through Sillman's right hand, but the wound was not serious. The report of the pistol caused a large crowd to assemble, who were dispersed with great difficulty.

Wright, Kay & Co. are making some notable improvements in their big store. The offices, which have been scattered all over the building, are now located on the second floor, the fixtures being finished in mahogany. The various executive departments will be partitioned off, so that there may be more privacy. On the same floor will be the badge department, stock room, a room especially designed for traveling men where they may show their wares and a diamond room. This will leave more room downstairs, where the firm has felt the need of more space for several years.

James E. Hawkins, a watchmaker of Mattoon, Ill., dropped dead a short time ago while seated at his supper table. Death was caused by heart disease.

R. C. Christoferson, who recently opened a new store in Warsaw, Nebr., bought his opening stock in Omaha, last week.

Mr. Seal, formerly a silverware salesman, but at present selling surgical supplies, was in this city calling on a number of his old friends in the trade last week.

Two sneak thieves entered the store of Fred. Brodegaard & Co., last week, and while Mr. Brodegaard was busy waiting on several ladies helped themselves to about $50 worth of opera glasses and gold spectacles. The theft was not discovered until the men had gotten securely away.

The following out of town jewelers were in this city during the past week: E. L. Dunham, Farnam; Mr. Thomas, Trenton; Dr. C. B. Little, Bloomfield; H. G. Heald, Ponca; Hilmar G. Anderson, Fremont; A. H. Bothwell, Reynolds; Mr. Schacher, Petersburg; J. L. Moore and Mr. Norseen, Tekamah; Ora Capes, Araca; E. Freeman, Randolph, Ia.; Dr. I. C. Wood, Logan, Ia.

D. R. Wilson, who was formerly in the jewelry business in Shenandoah, Ia., has entered a plea of guilty to the crime of forgery and has been sentenced by Judge Wheeler in the Page County District Court to five years in the penitentiary at Fort Madison. Wilson was arrested a few weeks ago in Chicago and brought back to Page County for trial. His forgeries amounted to several thousand dollars. He would make and sell forged notes, and lived in an extravagant manner in Shenandoah until the crisis came.

## Pacific Northwest.

Lars Shaker, Aberdeen, Wash., has moved to a new location.

P. Gibson has sold his store in Grangeville, Idaho, to Wm. Allen.

J. H. Haas, Salem, Ore., accompanied by his wife, recently visited Portland, Ore.

L. Hoffman has purchased the stock of the estate of Louis Klodt, Seattle, Wash.

Geo. W. Hathaway has purchased the store of C. L. Crawford, Leavenworth, Wash.

D. Stephenson, Baker City, Ore., has moved his jewelry stock from the Williams piano house to the Wolf pharmacy store.

W. H. Turiek, formerly of Napa, Cal., has purchased a store in Hoquiam, Wash. He expects to be settled in that place Nov. 1.

Two men entered Albert Hansen's store at Seattle, Wash., a short time ago, and asked to see some jewelry. One of the clerks displayed several trays of jewelry for the benefit of the supposed customers, who after a short inspection, declined to buy. A few moments after the men left it was discovered that a bracelet was missing. The police were notified, but the thieves could not be found.

J. H. Engel, Bergen, N. Y., is now settled in new quarters in Brockport, N. Y., having purchased the business of Scott Rowley, at that place.

## Kansas City.

TRADE CONDITIONS.

Conditions continue good in this territory. The rn is beginning to be marketed in the territory st south of this city, and retailers are evidently king collections, for they are remitting promptly the jobbers. There is a very noticeable improve- nt in the watch business now, as the season s arrived when the January dating can be se- red.

The Green Jewelry Co. has increased its orking force.

The Meyer Jewelry Co. has just added ree new jewelers to its force of workmen.

C. B. Kionka, of Kionka & Stuhl, is ex- cted back next week from his northern ip.

J. H. Bennett, formerly watchmaker for Perrenoud, is now with the Meyer Jew- ry Co.

A. W. Thistlethwaite, formerly of the anta Fe Watch Co., Topeka, Kans., is ow with E. Vail & Co., Wichita, Kans.

The show windows of the Jaccard Jew- ry Corporation's store were filled last eek with prizes for the horse show.

C. W. Mills, Eldorado Springs, Mo., was Kansas City last week, attending the eeting of the Grand Lodge of the Knights Pythias.

The handsome cut glass punch bowl hich Gurney & Ware gave as a prize for he horse show this year was won by the rnout of Geo. H. Nute, a Kansas City an.

L. Meyer, manager of the Meyer Jewelry o., who has been at the Hot Springs, Ark., r his health for a couple of weeks, is im- roving slowly, and will probably not be ome for two weeks.

R. C. Vanderbilt won the silver service hich was offered as a prize by McLaughlin ros., at the local horse show last week. he service was supplied by the Jaccard ewelry Corporation.

A. E. Pittinger, of the Kansas City Poly- chnic Institute, is one of a number of lead- ng spirits who are organizing a society of ciences in this city, to be known as the Kansas City Technological Society.

The following pupils were enrolled during he past week by the Kansas City Poly- chnic Institute: S. M. Blatt, Fred Geh- iger, B. J. Sproule, Luther Craver, Roscoe layer, Kansas City; C. W. Struby, Green ity, Mo.

Leslie Wallace, who represents the Ed- ards & Sloane Jewelry Co., in Iowa, Mis- ouri and Arkansas, is very ill at his home n this city with typhoid pneumonia. J. H. Whitney, of the house force, has been sent ut to cover this territory.

E. E. Richards, manager of the local of- ce of the Rogers Silver Plate Co., has just ome in from his northern trip, having re- rned via Milwaukee, Chicago and St. ouis. He reports prosperous business con- itions in the places which he visited.

The beautiful sterling silver cup offered s a special prize by the Cady & Olmstead ewelry Co. at the Horse Show for the best olo pony carrying 150 pounds, judged for anners, handiness and quality shown at lay, owned and ridden by a member of the Missouri Hunt and Polo Club, was won by anshee, exhibited by Lieut. Reginald Mc- ally. This trophy becomes the property f the Missouri Hunt and Polo Club, and ill be engraved with the name of horse and owner. The cup is an annual donation by this firm.

Among the out-of-town jewelers visiting Kansas City jobbers during the past week were: W. W. Whiteside, Liberty, Mo.; Gus. Catchadal, Superior, Nebr.; Geo. W. Lewis, Herington, Kans.; Mr. Wayland, of Wayland Bros., Plainview, Tex.; Chris. Johnson, Alta Vista, Kans.; E. O. Green, Carbondale, Ill.; F. H. Robertson, Blackwell, Okla.; E. A. Church, Claremore, Ind. T.; Mr. Martin, of Skaggs & Martin, Lebanon, Kans.; C. W. Wyman, Maitland, Mo.; S. J. Huey, Excelsior Springs, Mo.; H. E. Turck, Ellinwood, Kans.; Mr. Herthel, Claflin, Kans.; J. B. Hayden, Topeka, Kans.; W. D. Brotchie, Scandia, Kans.; C. L. Wright, Webb City, Mo.; J. B. Hampton, Colby, Kans.; A. F. Gantz, Stewartsville, Mo.; W. H. Meyer, Lawson, Mo.

## Canada Notes.

I. T. Marshall, Acton, Ont., has sold out.

G. B. Richardson, Humboldt, Ont., has assigned to H. D. Pickett.

C. H. Wallace, London, Ont., has sold out his branch store on Talbot St.

A. I. Wheatley, Wolseley, Sask., is succeeded by the firm of Wheatley Bros.

W. G. Widdis, Rocanville, Sask., has sold his furniture stock to Miller & Quarrie.

W. H. Kalbfleisch, Tavistock, Ont., died recently.

P. E. Pope, Chicago, is conducting an auction sale of stock for Fowlie Bros., Collingwood, Ont.

C. R. McLachlan, Winnipeg, Man., has returned to that city after a business trip to the Pacific Coast.

Walter J. Barr, manager of the Goldsmiths' Stock Co., Toronto, Ont., paid a flying visit to Montreal last week.

Diamonds said to be valued at $6,000 were stolen, early Wednesday morning from the store of C. E. Redfern, Victoria, B. C. Two trays of gems had been left by mistake on a show case during the night.

Thomas Gillean, London, Ont., was recently defrauded by Jules E. Rosa, alias Mora, a Frenchman, who claimed to be a chauffeur in the employ of Mr. Christie, Toronto, and who passed a forged check purporting to bear the signature of the latter upon Mr. Gillean, obtaining therefor a $50 diamond ring and $20 in cash. Rosa, who is a well dressed and plausible young man of about 25 years of age, was arrested in Sarnia, Ont., on Friday, Oct. 13, and taken to London for trial. When arraigned the following Monday he obtained a remand until Friday for the purpose of communicating with relatives to obtain money with which to repay Mr. Gillean.

The George M. Murphy Pottery Co., East Liverpool, O., some time ago brought suit against the Pennsylvania Co. to recover something like $105,000 because of the loss of the plant by fire. The case was put on trial before Judge Tayler of the Federal Court last week. The pottery company claims that a long freight train was standing across the only street reaching the plant when the fire broke out and that for 20 minutes or more the fire department could do nothing for that reason. In the meantime the first gained such headway that it destroyed the property. The suit is being fought hard by both sides.

## New Stores and Enterprises.

G. W. Loper is a new jeweler in Cumberland, Ia.

G. Mohlman will shortly begin business in Lafayette, Ind.

D. McCulloch has just opened a store in Marysville, Tenn.

Mr. Suchanee has engaged in business at Hazel, S. Dak.

Mr. Burton will open a store in Wilton Junction, Ia., in the near future.

The Kansas City Watch Case Co. is a new concern in Kansas City, Mo.

George M. Franklin has opened a store at 1356 Market St., San Francisco, Cal.

John Coons has completed arrangements to begin business in Poughkeepsie, N. Y.

S. A. St. Cyr opened a retail jewelry store at 312 S. 2d St., Clinton, Ia., Oct. 23.

A Mr. Enroe opened a store at 129 E. Washington St., New Castle, Pa., on Thursday.

Putnam & Reese have just commenced business at 207½ Main St., Deadwood, S. Dak.

G. F. Wood recently began business in Charles City, Ia., where he has secured quarters in the *Star* building.

Among the new jewelers of Kingston, N. Y., is Thomas Chulick, who has begun business on Main St., that city.

F. L. Ellis is a new jeweler in Ensley, Ala., where he has leased quarters on Ave. E, between 18th and 19th Sts.

H. J. Parks has opened a watch and jewelry repairing establishment on W. 19th Ave., near Railroad St., Houston, Tex.

The H. Barnard Co. was incorporated Oct. 23 in the State of New York, to deal in watches. The capital stock is $10,000. The directors are Harris Barnard, New York; H. B. Moore, Brooklyn, and W. M. Fletcher, Philadelphia, Pa.

The Whittlesey, Wood & Hayes Co., of Cleveland, O., was incorporated Friday with a capital stock of $10,000, by F. E. Wood, J. R. McQuigley, George B. Riley, K. G. Grant and H. L. Smith. The company will deal in optical instruments.

The Wright-Richey Cut Glass Co. is a new concern which has just been organized in Anderson, Ind., by Thomas W. Wright. Associated with Mr. Wright will be his son, George Wright, and his son-in-law, Hunter Richey, until recently of Indianapolis.

Watch dials are to be made by the Napier-Browning Co., of New York, which concern last week filed a certificate of incorporation. The capital stock is $5,000 and the directors are: Gordon Gordon, Massy Holmes and A. L. Miller, of New York.

The Novelty Pearl Co. was recently incorporated in the State of Maine to deal in pearls and imitations of precious stones, with a capital stock of $25,000. The president is F. A. Hobbs, South Berwick, Me.; treasurer, William Tompson, of the same place.

F. W. Wormelle, who for the past four years has been in charge of the optical department at the jewelry store of V. C. Smith, Brockton, Mass., has left that position to open a store of his own in the same place. He is author of a recently issued volume on "The Eye and Its Care."

## Baltimore.

Irving McG. Walker, of Hennegen, Bates o., was out of town last week on a busi-ess trip.

The silver service presented to County ommissioner Mann last week was made y the Samuel Kirk & Son Co.

A set of silver was ordered from Jacobi Jenkins recently by a prominent Balti-orean, to be sent to Tien Tsin, China.

William F. Jacobi, of Jacobi & Jenkins, eturned last week from a trip to Europe. V. Talbott Jenkins, of the same firm, is at tlantic City with his family.

Last Thursday a stubborn mule backed cart into the show window of the store f the Hennegen-Bates Co., smashing the rge plate glass, but doing no other dam-ge. The broken glass was replaced the ext day.

Robert James Lyman was committed for ourt Wednesday morning by Justice Gran-an at the Central police station, charged vith getting a gold watch from G. T. Sad-ler & Sons on a forged order from his ather, Dr. Albert B. Lyman.

The suit of August Lemmert for a di-orce from his wife, Barbara M. Lemmert, vas dismissed last week, Judge Dennis hav-ng decided that a deed of separation signed by Mr. and Mrs. Lemmert on May 24, 1901, vas a complete bar to Mr. Lemmert's suit or a divorce. Mrs. Lemmert was charged by her husband with having abandoned him for Dowieism.

Gov. Warfield pardoned Mrs. Irene T. Fleming last Thursday, after considerable effort had been exerted by her friends in her behalf. Mrs. Fleming was convicted of obtaining articles of jewelry from many of the largest establishments in the city on false pretenses by representing herself as a woman whose credit was unquestionable. All of those defrauded signed the petition for her pardon, as her health had become quite bad and the articles that were gotten from them had been returned.

A settlement with the creditors of Harry nd Morris Cohen, trading as Cohen Bros., wholesale and retail jewelers at 924 E. Baltimore St., having been effected, Judge Dennis, of Circuit Court No. 2, signed an order Oct. 18 discharging Daniel Green-baum as receiver of the firm, and directing him to turn over all the remaining assets in his hands to the firm. The bill for a re-ceiver was filed on March 27, 1905, by Harry Cohen against Morris Cohen, his brother and partner, alleging temporary financial embarrassment, and Morris Cohen assented to a receivership.

R. S. Voss, who opened a store in Rich-land, Ia., only a few weeks ago, has closed out and moved to Waterloo, where he will continue business.

## Providence.

TRADE CONDITIONS.

The local manufacturers continue to enjoy the best business that has fallen their way in some time, and the factories are hustling to fill orders that have poured in from all parts of the country as a result of the "good times" that appear to be general from coast to coast. Night work continues to be the order in many of the establishments, and the difficulty of securing trained help is as much of a thorn in the sides of the employers as was the case a week or two ago.

Young Bros., box manufacturers, have started an annex factory on Dudley St

William A. Schofield and George H. Holmes were among the delegates to the mayoralty convention held last week.

John Hobson, die cutter, has disposed of his business and tools to Kranz & Co., and is now in the employ of that concern.

Charles Bolt, representing William Bramley, of Montreal, was one of the visitors among the members of the trade last week.

Among the imports at the port of Providence last week were one package of imitation precious stones from Havre and one of manufactures of metal from Hamburg.

William J. Feeley is one of the members of the committee having charge of the preparations for a dinner at the Trocadero in the near future in honor of Bishop Harkins.

Harry M. Mays, of the George W. Dover Co., was confined to the house last week by illness, but it is expected that he will be able to be up and attend to his usual duties within a short time.

Grand Master Harry Fulford, of the Odd Fellows, accompanied by his board of officers, visited Mechanics' Lodge of Hope Valley, last week, and also paid a fraternal call upon Oakland Lodge of South Portsmouth.

Local manufacturers are taking considerable interest in the proposed national marking law, and Congressman E. B. Vreeland, of New York, and A. L. Sackett were here last week interviewing manufacturers in relation to the subject.

A lighted pipe dropped into a drawer under one of the work benches in the factory of the Clark & Coombs Co., on the second floor of the Fuller building, was the cause of a slight fire one evening of last week. The fire was confined to the drawer and the work bench, and was extinguished without much difficulty by the firemen.

Joseph P. Burlingame, who served in the General Assembly as Speaker of the House of Representatives, will not be the candidate of his party for legislative honors this year. Mr. Burlingame comes from the Warwick district. He is at present in Indiana, where he has been in the interests of the Golden Cross, of which he is the Supreme Commander.

The annual meeting of the New England Manufacturing Jewelers & Silversmiths' Association has been called for this week, and it is expected that there will be a large attendance, as there are several amendments

**A PHANTOM PENCIL**
When held in writing position, the lead drops into place as shown in the cut, and cannot be forced back into the tube until pencil is reversed, at which time it drops without assistance. Made of gold, silver and gold plate in two sizes. Plain, chased, engine turned and fancy cut, ranging in price from $13.00 to $19.50 per dozen. Send for Samples.
**W. S. HICKS' SONS,** - Manufacturers of Gold Pens and Pencils, - **235 Greenwich Street, New York**

the by-laws to be acted upon. The asso-
ction has grown in strength and influence
ery year, and has come to be a represen-
tive organization of the jewelers of this
y and the Attleboros.

At the caucuses of the Republican party,
ld last week, George W. Parks was nomi-
ted for Councilman from the First Ward,
orge H. Grant was nominated as Alder-
n from the Sixth Ward and Frank B.
ynolds as Councilman from the same
rd, while E. Merle Bixby, who now has
rge of the silverware department at
epard's, and Henry Fletcher were named
Councilman from the Seventh Ward.

## Harrisburg, Pa.

G. E. Eicker, 1804 N. 6th St., and Miss
atilda E. Weimer, also of this city, were
ited in marriage last week, Rev. J. Rauch-
in performing the ceremony in St. John's
formed Church. Ralph K. Elicker, a
other of the groom, was best man and
ss Mae Snyder bridesmaid. During Mr.
icker's wedding trip his business is being
nducted by his brother, Ralph.

While returning from a firemen's banquet
ednesday night Policeman Charles W.
um discovered several small colored boys
the act of attempting to force an en-
nce into the jewelry store of Lewis
dlestine on N. 3d St., and started after
em. When they disregarded his com-
nd to stop, the officer pulled his revolver
d fired two shots, both of which lodged
the body of 12-year-old Harold Hall. One
llet struck him in the back and the other
the right side, passing through the left
ng and fracturing a rib. Hall was taken
the City Hospital, where he died the next
ening from internal hemorrhages, leaving
ante-mortem statement, in which he con-
ssed to the attempted burglary and also re-
aled other robberies in which he had been
gaged. The coroner's jury promptly met
d held the officer responsible for the kill-
g of the youthful criminal. At the in-
ance of the District Attorney, Saum was
aced under arrest, charged with murder,
d at a preliminary hearing before Alder-
an Hoverter he was held for court. Hall's
nfederates have been arrested and con-
ssed. One of them had broken open the
llar door and was half way down the steps
hen warned of the officer's approach. No
oty was secured.

## North Attleboro

Charles H. Clark has started on a trip in
e interests of W. G. Clark & Co.

Alpin Chisholm has returned from a west-
rn trip for Bugbee & Niles Co.

George L. Paine, of the G. L. Paine Co.,
as been in New York during the past few
ays.

John Eiden has resigned his position as
reman of the Plainville Stock Co. and
rank O. Corbin has been selected to fill
e vacancy.

The result of last week's games in the
ewelers' Snop Bowling League follows:

## Attleboro.

TRADE CONDITIONS.

High-water mark in jewelry shipments was reached, one night last week, when the tally of outgoing packages reached and slightly passed the one ton record. This was the first time in years that the output for a single day has been so large. In jewelry, which goes principally packed in light cardboard boxes, a ton stands for a large value, for many separate pieces of jewelry, for the work of a small army of bench hands and shippers. The rush in the factories continues unabated; the volume of orders from the traveling salesmen is still pressing, and several of the firms have been forced to curtail the trips their men would normally make in order to keep pace with the demand for their goods.

Joseph L. Sweet, of the R. F. Simmons Co., left last week for a visit to Minneapolis.

William C. Tappan, of the D. F. Briggs Co., with Mrs. Tappan, has returned from a western trip of several weeks.

Col. Sidney O. Bigney, of S. O. Bigney & Co., was last week elected member of the Republican State Committee from this Senatorial district.

Frank C. Gray removed his family last week to Brooklyn, as he has assumed charge of the New York office of W. H. Wilmarth & Co.

A liberal check from the James E. Blake Co. was received last week by Miss Louise Nihan, a trusted office employe, who was wedded to Edward J. Harlow.

Emmons D. Guild, of the W. H. Wilmarth Co., was last week, at Waltham, elected president of the Massachusetts Association of ex-Prisoners of War.

Ezekiel Bates Lodge of Masons last week elected to office Albert S. Ingraham, of A. S. Ingraham & Co.; Frank W. Weaver, of F. W. Weaver & Co., Benjamin P. King and Willard A. Engley.

William P. Sackett, manager of the New York store of Reed & Barton, paid a visit to the silver works in Taunton last week, accompanied by a party of friends. An auto tour about the city was a feature of the visit.

Frank M. Bates, son of the late Joseph M. Bates, of Bates & Bacon, has taken active charge of the real estate interests of his father, and also of the extensive restaurant interests. He has also taken charge of the Bates Opera House.

Hysteric newspaper reports sought Attleboro at high speed last week owing to the distribution by wire of a false dispatch that a jewelry factory had collapsed with deplorable results. All the shops in town are still present or accounted for.

Mrs. Sally Lincoln died Saturday, the result of a serious fall. She leaves a daughter, Mrs. Emily Lincoln, who has for several years held a responsible place in the office of Smith & Crosby, and another daughter, Mrs. Carpenter, wife of J. Perry Carpenter, of Ford & Carpenter, Providence.

The retirement of Joseph G. Hutchinson, salesman for Smith & Crosby, from his post as manager of the Attleboro Opera House, erected by the late Joseph M. Bates, of Bates & Bacon, has attracted no small attention in theatrical circles. Mr. Hutchinson resigns to devote his whole time to his jewelry interests. He supervised the erection of the leading Attleboro, Taunton and Woonsocket theaters, has been a consulting expert for other houses on questions of stage mechanism, and was manager of the Bates Opera House for 19 years.

Fire broke out Wednesday afternoon in a small shed used as a general storehouse in the rear of the Steam Power building on Railroad St. and considerable commotion was caused among the jewelry shops in the vicinity by the flames that lighted up the surroundings for a few minutes. The blaze was not a serious one, although it appeared menacing to the shops in the vicinity until effectually under the control of the fire department. It was confined to a small shed used as a storehouse for the six jewelry firms in the Steam Power building. Nearly all of the jewelry firms in the adjoining buildings took immediate precautions, and in some cases the employes were ready to leave at short notice. The entire building was enveloped by the time a stream of water could be turned on, the rubbish and chemicals contained in the building being highly inflammable. The cause of the fire has not yet been ascertained.

J. B. ASH, Rockford, Ill.

## Pittsburg.

The members of the Merchants and Manufacturers' Association, traveling in a special train, left Pittsburg, Monday, on a five-day tour of the eastern and central portions of Pennsylvania. About 50 houses are represented on the tour.

The Pittsburg Association of Credit Men gave its annual banquet Thursday night at the Union Club, about 250 business men being present. O. G. Fessenden, of Hayden W. Wheeler & Co., New York, and the president of the National Association of Credit Men; C. E. Meek, of the same city; J. Harry Tregor, Baltimore, and O. H. Powell, president of the Columbus Association, made addresses.

The following out-of-town dealers were in the city last week: J. E. Beck, New Martinsville, Pa.; Mrs. Lowery, East Palestine, O.; William Heckman, Meadville, Pa.; T. B. Bellers, Brookville, Pa.; F. M. Benner, Lisbon, O.; A. Mascher and wife, East Palestine, O.; Frank Bloser, New Kensington, Pa.; D. A. Murray, Canal Dover, O.; Frank Murdock, Ligonier, Pa.; Margilcth & McFarland, Springfield, O.; D. A. Murray, Canal Dover, O.; B. E. Brown, St. Mary's; C. A. File, Mars, Pa.; J. Linnenbrink, Rochester, Pa.; W. F. Brehm, Rochester, Pa.

The closing of the doors of the Enterprise National Bank in Allegheny, Wednesday, owing to the suicide of the cashier, T. Lee Clark, whose accounts are being questioned, has tied up some of the accounts of Allegheny jewelers. None of them are, however, very much involved. Jacob Grafner, of Grafner Bros., this city, is a stockholder in the bank, owning 10 shares, but the bank is expected to pay every dollar it owes and shortly resume business. This bank carried a large amount of State deposits. Before the suicide of the cashier every one had the greatest confidence in the institution.

Samuel Shamburger, who was arrested in Butler more than a week ago and lodged in jail on a charge of setting fire to his jewelry store in S. Main St., was released from jail, Oct. 17. His bail was reduced from $5,000 to $3,000, and the bond was furnished by Samuel Lando, of this city. At the hearing it was alleged by Shamburger that there are $5,000 worth of diamonds in the safe now in the ruins of his store, and it is expected that the insurance people will insist on Shamburger opening the safe in their presence as soon as he returns to Butler. Officers have been on guard night and day at the store to prevent anything about the place being disturbed. Shamburger stoutly denies that he is guilty of any wrongdoing. It is expected that he will be placed on trial at Butler, which is the county seat of Butler County, within the next month or six weeks. Shamburger's friends here place no credence in the charge that Shamburger would wilfully or otherwise commit such a crime as that with which he is charged.

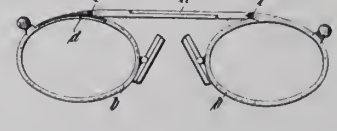
A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN AND UNITED STATES PATENTS THAT HAVE EXPIRED.

## UNITED STATES PATENTS.

ISSUE OF OCT. 10, 1905.

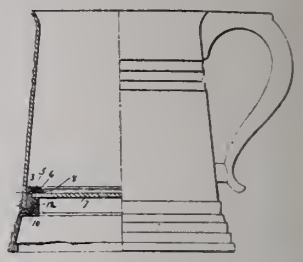
**801,306.** TIME-ALARM. CYRUS J. EMERSON, JR., Westfield, Mass., assignor to Samuel E. Thayer, Westfield, Mass. Filed March 1, 1905. Serial No. 247,917.



The combination with a time-movement and the usual center arbor thereof, of a gear and a disk loosely mounted on the same axis to rotate as one

in one direction, the disk being independently rotatable in the other direction, a pinion fixed on the center arbor and meshing with said gear; and a cam rotatable with said arbor; an arm supported to swing in the plane of the disk, the upper end of which bears on the edge of said disk and the lower end of which constitutes a striker, a spring to normally press the end of said arm against said disk, there being a radially-disposed slot in the latter into which the end of said arm may fall to sound the alarm, together with means operated by the movement of the arm to stop the time-movement when the end of said arm enters said slot.

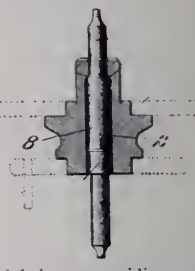
**801,333.** PINCE-NEZ FRAME. AUGUST OEHLSCHLAGER, Rathenow, Germany. Filed Jan. 23, 1905. Serial No. 242,269.



As a new article of manufacture a pince-nez

frame consisting of two grooved members, *b*, adapted for the reception of the glasses, and a bridge, *a*, having a break, *c*, near the point of connection with the said members and having a groove, *x*, for the reception of the bent end of the frame member to be united therewith.

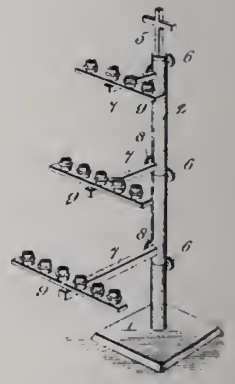
**801,564.** GLASS-BOTTOM JUG. HORACE H. ALLEN, San Francisco, Cal., and EUGENE P. GOLDEN, Meriden, Conn., assignors to the International Silver Co., Meriden, Conn. Filed April 27, 1905. Serial No. 257,792.



A glass-bottom mug consisting of a body open at the bottom and having an internally-threaded ring at its lower edge, said ring formed with an inwardly-extending lip having a rib in its under face combined with a glass bottom adapted to set aside the ring, a washer located between the upper face of the bottom and the said lip, and a base adapted to be connected with said bottom and having

bushing engaging with said ring and holding the bottom in place.

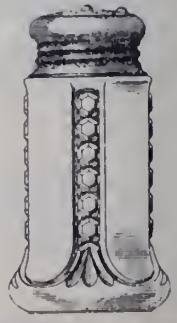
**801,443.** BALANCE-STAFF FOR WATCHES. CHARLES E. DE LONG, South McAlester, Ind. T., assignor to Fred McIntyre, South McAlester, Ind. T. Filed June 15, 1904. Serial No. 212,725.



The combination with a balance-wheel hub hav-

ing a differential bore providing a stop-shoulder within the hub, and a staff extending through the hub and having supporting contact with the hub only at points other than the middle portion thereof.

**801,677.** CANDELABRUM. RICHARD C. MKILIGET, New Orleans, La. Filed May 2, 1905. Serial No. 262,483.

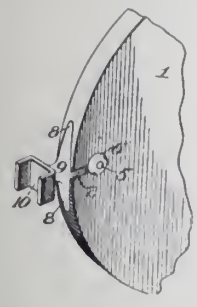


A candelabrum, comprising a pedestal, a standard mounted on said pedestal composed of a plu-

rality of superposable sections detachably connected together, radially-disposed branch arms of different lengths detachably connected to the several sections, a cross-arm secured to each of the branch arms and each provided with a plurality of sockets, and candleholders provided with tenons fitting in said sockets.

DESIGNS.

**37,570.** GLASS RECEPTACLE. JAMES PAUL

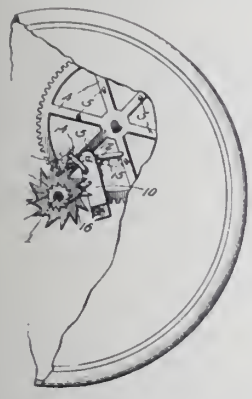


and ALBERT R. GROTE, Wellsburg, W. V

Filed Aug. 9, 1905. Serial No. 273,483. Term of patent 14 years.

ISSUE OF OCT. 17, 1905.

**1,875.** CLIP FOR EYEGLASSES AND SPECTACLES. William W. Hoffman, Rochester, N. Y., assignor to E. Kirstein Sons Co., Rochester, N. Y. Filed Jan. 26, 1903. Serial No. 140,502.



n a lens-mounting for eyeglasses, the combinon with a lens having a slot therein, the walls

which are substantially parallel, of a clip memr having a portion resting in said slot, and means sting in the slot and having a portion engaging surfaces of the lens for securing the clip in sition.

**1,914.** DIAL-TRAIN FOR TIMEPIECES. Benjamin H. Rhoads, Mooreland, Okla. Filed April 27, 1905. Serial No. 257,634.

In a watch-movement, the combination with the nute-hand shaft, of a spur-gear pinion mounted

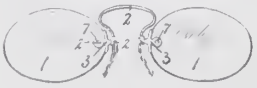
ereon, a spur gear-wheel driven by said pinion, p devices carried by said wheel, a ratchet-wheel osely mounted on the minute-hand shaft, means hereby the hour-hand is secured to said ratchetheel, and a trip mechanism actuated by the trip vices on said spur gear-wheel to turn said tchet-wheel and hour-hand at each complete revotion of said minute-hand pinion, substantially as scribed.

**1,935.** LENS. Edward A. Trapp, New York. Filed Nov. 7, 1904. Serial No. 231,677.

The lens having cylindrical concave opposite

es, the concavities extending at an angle to h other, substantially as set forth.

**2,045.** ROLLER-JEWEL SETTER. Francis Hyde, Sioux Falls, S. D. Filed June 26, 1905. Serial No. 267,031.



A tool of the class described made up of a der; a solid block of conducting metal mounted

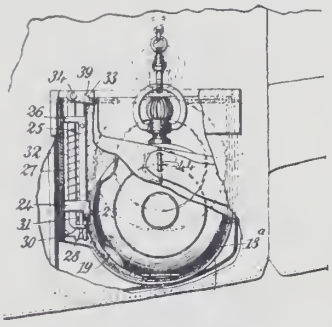
said holder and having a flattened top in which formed a slot for the reception of the balanceff; and flat spring one end of which is mounted said holder and the other end of which is ched to engage between the roller-table and the a e wheel and which normally presses said ler-table against said block and said balanceff into said slot.

**2,138.** METHOD OF FIXING THREADED PARTS TO EACH OTHER. Ernest T. Bysh Geneva, N. Y., assignor to the Standard Optical Co., Geneva, N. Y. Filed Feb. 16, 1905. Serial No. 245,978.

The hercin-described method of fusing threaded parts to each other consisting in immersing one of

the parts in a molten metal composition which is fusible at a temperature below the boiling-point of water to form a coating upon such part and then assembling the threaded parts one upon the other and afterward immersing them in a heating liquid at a temperature below 212° Fahrenheit.

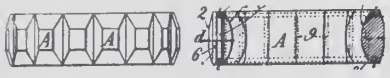
**802,140.** SAFETY ATTACHMENT FOR WATCH-FOBS. Arthur G. Doane, Northampton, Mass. Filed April 29, 1905. Serial No. 258,111.



A device for holding watches in pockets compris-

ing a snap-hook having a shank portion with arms which are curved and resilient, eyes at the ends of said arms, a tongue pivotally connected to said arms and having an end adapted to bear against the shank portion of the hook to cause the arms to yield, and a ring attached to said tongue.

**802,225.** WATCH-PROTECTOR. John Middlebrook, Barre, Vt. Filed Jan. 14, 1905. Serial No. 241,035.



A watch-protector comprising a casing, a seg-

mental plate mounted to swing therein, a lug extended from said plate. a locking-latch for engaging with said lug. and means for releasing the latch from the lug.

**802,267.** ARTICLE OF JEWELRY. Jean B. J. Chaumet, Paris, France. Filed Oct. 11, 1904. Serial No. 228,075.

The herein-described article of jewelry, compris-

ing a number of juxtaposed stones with grooves in their edges and a wire frame, the wires being embedded and hidden in the grooves.

**802,326.** ORNAMENTAL FINGER-RING. Louis E. Sadler, Attleboro, Mass., assignor to the F. H. Sadler Co., Attleboro, Mass. Filed April 27, 1903. Serial No. 154,544.

An ornamental ring, consisting of a band formed

into a hoop with abutting ends, an aperture extending through the ends, a groove in the side of each of the ends and means consisting of a rivet for permanently securing the abutting ends of the band together by forcing or spinning the ends of the rivet into the groove in the ring.

## AMERICAN WALTHAM WATCH CO.

**WALTHAM, MASS.**

## The New Sector Watch.

'HE search for new designs and dec- orative effects, says the *Deutsche irmacher Zeitung*, so noticeable during last two decades in the architecture of r houses and the furnishing of our rooms, d consequently in the construction of our cks, has at last affected our watches. therto decorative art has confined itself the engraving, enameling and chasing the case without essentially altering its ditional lens-like shape; square watches joyed only a brief vogue. The Record atch Co., of Tramelan, Switzerland, has last broken this tradition and constructed watch with a peculiar method of indicat- g the time. The watch is in the shape of sector, or segment, to correspond with e dial-plate required by this method. Our st three illustrations show the shape of e watch clearly, Fig. 1 showing the dial- ate, Fig. 2 a similar watch with open lid, posing the works, and Fig. 3 the back of e same watch. The case represented in igs. 2 and 3 differs from the case of Fig. in the shape of the pendant. Fig. 3 will ve an idea of the peculiar manner in hich these cases may be decorated.

In this case the ornamentation consists of a copy of a picture by Roybet in relief. The bow is here evidently intended for a handle, for it must be held below in order that the picture may be vertically before the eye. The knob, on the other hand, is at the joint of the case and will therefore lie at the bottom of the pocket. The method of indicating time shown in Fig. 1 is frequently met with in watches made from 100 to 150 years ago, but in this watch a new method of construction has been employed, which, together with the shape of the case, has been patented.

Fig. 1.

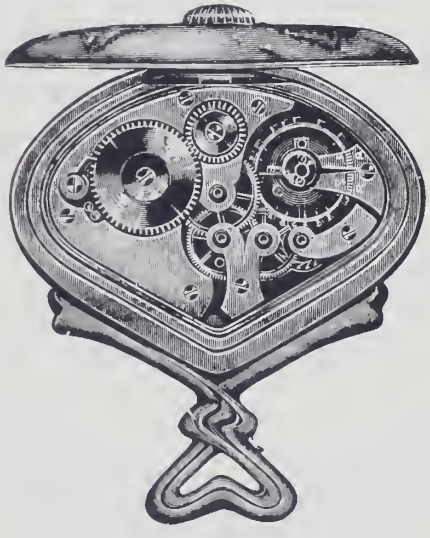

Fig. 2.

Fig. 3.

An important improvement is seen in the circumstance that the flying back of the hands when they are set does not take place with a jerk, but with a moderate movement. This is rendered possible by the device of making the set-hands pinion gear with a small intermediary wheel, on the arbor of which a second larger wheel is placed, catching into the cannon pinion. This large wheel, however, is not firmly fixed to the arbor, but works with elastic friction, its collet being split open as with the balance-spring. A moderate braking therefore occurs when the hand springs back, a powerful jerk being thus prevented.

The rest of the arrangement of the dial work will be seen in Figs. 4, 5 and 6. On a steady pin (Fig. 5), fixed near the lower edge of the pillar-plate, is a freely revolving cannon-pinion bearing the minute hand. The latter catches into a small-toothed sector or rack (c), revolving round a shoulder screw and having a larger rack (c′) opposite its pivot. A small spiral spring is inserted below the two toothed segments or sectors in such a manner that it constantly tends to bring back the cannon pinion (b) and the minute hand attached to it to zero.

The larger rack (c′) meshes with the wheel (d), the arbor of which is placed in the cannon pinion which, with the center wheel, completes a revolution every hour. During this revolution (from right to left in Fig. 4) the wheel (d) brings the toothed sector (c′) into the position shown in Fig. 4, in which the minute hand stands over the 59th minute division. To permit it to spring back at the 60th minute, a tooth is removed from the transmission wheel (d). The resulting gap is large enough to prevent the rack (c′) from catching in the wheel (d) when this moment arrives; hence, owing to the action of the spiral spring on the racks (c) and (c′), the hand springs back to zero and the sectors to their original positions. In order that the minute hand may at once resume its advance without any lost

way, the last tooth of the rack (c') is provided on the lower side with a projection with which the first tooth of the wheel (d) coming after the gap at once engages again. Then the teeth catch in regular order till the time arrives for the next fly-back.

The same method is employed for the hour hand. The hour pipe is mounted on the cannon pinion (e, Fig. 6), which carries a toothed rack (f) instead of an hour wheel. With the aid of the motion work,

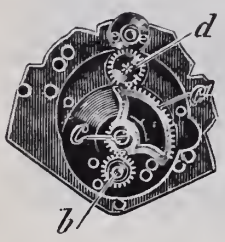

Fig. 4.

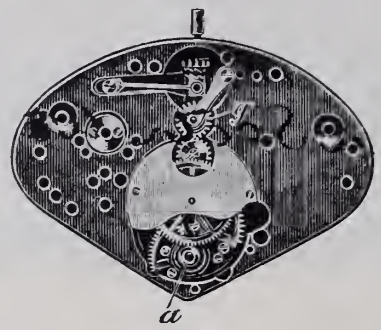

Fig. 5.

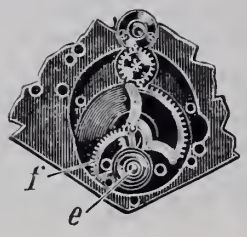

Fig. 6.

not shown in the figure, this toothed rack likewise revolves for 12 hours and is then released from the guiding wheel in the same manner as with rack (c').

In order that the train may not be injured by the jumping back of the racks, two stops are provided on which the racks strike. As stated by the *Revue International de l'Horlogerie*, from which we have taken our illustrations, the mechanism is reliable and durable in its action.

## Electric Turret Timepieces.

THE application of electricity to the driving of turret clocks, says a writer in the *British Horological Journal*, opens, perhaps, a more promising field than is the case with smaller clocks of the household, principally in consequence of the reduced space into which the movement may be encompassed, and in the saving of winding. The total initial expense of installing turret clocks is one in which the clock itself forms the smaller item—the main portion going to the builder for adapting the site to receive the clock, and to the joiner for the necessary protective woodwork, yet so far as the purchaser is concerned, the clockmaker is considered responsible for the high cost, and perhaps rightly so, seeing that the bulky construction of his mechanism necessitates the costly preparation to accommodate it.

The advantage claimed for the small household electric clock, that it does not require winding, is one which is only of moment where a considerable number is concerned, but the actual manual labor involved and the almost universal inaccessibility of the movements, cause the winding of turret clocks to become a matter of sufficient importance to justify the application of some form of driving energy which does not require replenishment by manual labor once or oftener per week.

The frequent attempts to utilize electricity for driving large clocks have not so far succeeded in giving the electric turret clock that reputation for reliability which the weight-driven clock possesses, but nothing can be more certain than that the electrician who has solved such weighty problems as the propulsion of heavy machinery, vehicles, and the lighting of towns, will sooner or later produce the reliable electric clock.

Hitherto one of the great difficulties has been to find a source of electric energy of sufficient magnitude and constancy for the work required. Primary batteries, with their limited capacity and uncertainty of output, are, by the best authorities, considered unsuitable, secondary batteries being but an interposition between the main source of energy and the point at which it is used, cannot be considered for the purpose; but the current from lighting mains is now available in almost every town, and is sufficiently certain for long periods. Occasionally, however, it may be turned off, or interrupted from some unforeseen cause, in which case, unless the

# THE WATCH A TEST OF CIVILIZATION.

EXPLORERS in untraveled lands have sometimes given watches to the aboriginees. Such gifts were entirely unappreciated; time was of no consequence. The natives preferred beads or a taste of salt.

The higher the development of civilization, and the more complex its nature, the greater is the emphasis placed upon the importance of time. The perfection of the modern watch is due to this impulse. Watches handled by this office satisfy the most cultivated and exacting communities.

# An Argument for the ELGIN Dealer

The records of the Weather Bureau show a difference of 181 degrees between the extremes of heat and cold in the United States. A watch to be adapted to the use of the traveler must be able to maintain its accuracy under widely varying conditions of temperature. One reason why the

## ELGIN Watch

is pre-eminently the traveler's watch is found in the fact that all Elgin Watches are tested by oven heat and by refrigeration before leaving the factory. Their wonderful timekeeping qualities are undisturbed by extremes of temperature, damp or drought, jar or jolt, or by varying positions.

LOWEST UNITED STATES TEMPERATURE 63° BELOW

HIGHEST UNITED STATES TEMPERATURE 118° ABOVE

The above is one of the many good arguments for the Elgin Watch, all of which help the dealer to sell Elgins.

See Jobbers' list for prices or write the Company.

Every dealer is invited to send for the Elgin Art Booklet, "Timemakers and Timekeepers," illustrating the history and development of the watch.

3 MAIDEN LANE, NEW YORK.

clock is furnished with an alternative source of energy, it will stop. It follows, therefore, to ensure the same amount of reliability as is possessed by a weight-driven clock, an electric clock should be capable of taking current from two independent sources of energy, and of doing this automatically, without human intervention.

Electric turret clocks of the past possess almost universal similarity, inasmuch as in principle they were weight-driven clocks in which the weight was lifted at short predetermined intervals, and usually propelled the hands by minute or half-minute impulses. Uneconomical use of energy, much of which was uselessly expended in producing noise, soon led to exhaustion of the batteries, while the mechanism more or less rapidly hammered itself out of adjustment.

The late Professor Hipp, of Neuchâtel, who may safely be credited with the design of the first really practical electric clock, converted his pendulum into an electric motor, which, besides measuring the time, propelled the hands through ordinary train. He accomplished this by causing the pendulum to lift alternately two gravity arms, which in falling alternately moved the escape wheel one tooth, the resting arm acting for the moment as a detent to prevent the train running backward.

The energy for driving the hands was in this case limited to that given by the weight and fall of each gravity arm, and was consequently not variable to the variable requirements of a turret clock exposed to wind pressure, and could only be used by establishing a superabundance of weight to overcome the possible maximum of resistance.

The Hipp contact system affords immense possibilities in the construction of time-measuring electric motors, by reason of its automatic action in taking only such current as is required by the work it is performing, and the elastic way in which it accommodates itself, when connected with suitable mechanism, to the resistance it has to overcome. These possibilities were apparently not appreciated by Hipp, and it has remained for his successors to realize them.

A four-foot dial turret clock, erected by the Standard Time Co., for the Indemnity Mutual Marine Insurance Co., at No. 1 Old Broad St., is constructed upon a modification of Hipp's principle, and its performance, so far, leaves nothing to be desired.

The entire movement is contained in a box 24 in. by 14 in. by 9 in. Energy is obtained from the electric light main, with an alternative source provided by a few small dry cells, which come automatically into operation if the current is off the main.

The pendulum weighs 20 lbs., and beats 80 to the minute—a pawl connected with the rod, hooking the escape wheel tooth by tooth, at each alternative swing. The train consists of a worm and wheel, and the ordinary motion work. Under normal conditions, the pendulum takes current every 100 swings, and with heavy wind pressure from 75 to 90 teeth are reeled off between contacts. Of these there are two sets, operated simultaneously, one connected with the lighting main, the other with the battery; so long as there is current on the lighting main the closing of the first contact breaks the battery circuit, but should

this current fail, the battery circuit is closed, and excites the magnet which pulls the armature attached to the pendulum bob.

The movement is quite noiseless, and has sufficient energy at the point of the minute hand to lift a five-pound weight. There would appear to be no limitation to the power to which time-measuring motors on this principle might be constructed, or to the size of the clock to which they might be applied. The dual contact system has been made the subject of an application for a patent.

Incidentally, it might be mentioned that existing turret timepieces, especially those requiring winding oftener than once in eight days, may advantageously and economically be converted to electric clocks upon this principle.

Opportunity would be furnished to interested horologists to inspect the clock above described.

## New Horological Tools.

### A Practical Oiler.

THE oiler represented in the figure taken from the *Deutsche Uhrmacher Zeitung* is in many respects more practical than any of those hitherto in use. It is made of a piece of watch spring inserted into a thin wooden handle, and has a lancet-shaped point, to which the oil adheres well without dripping. On account of its small size and its flexibility, this oiler can be used with advantage for oiling clocks from the inside when it is desired not to remove the dial-plate. The handle must be just s

A NOVEL CLOCK OILER.

thick that the oiler when placed lengthwise on a table does not touch the table

### Hands-Stake with Work-Holder for Watches.

The hands-stake illustrated on page 9 a new type of this tool, according to the *Deutsche Uhrmacher Zeitung*. The inventor, Herr Paul Deumling, Spandau who has protected the stake as a German design patent (No. 246771) started with the principle that the operator employed in setting on the hand should have both of his hands free. He has therefore constructed an apparatus which holds the watch-works tight automatically. Other features of this stake are also worthy of note.

The foundation of the whole contrivance is the brass pedestal (a). In the latter is inserted a rather long steel shaft which is not shown in the figure as it is a few millimeters below the mouth of the bore (b). The upper end of this steel shaft serves as a support for the set-hands square. Over this shaft a tube (c) is placed, which is raised from below by a cylindrical screw

# Rockford Watches Speak for Themselves

# "The Best Watch in the World for the Money."

THIS has always been the trade slogan of the New York Standard Watch Co. *Our new watch for jewelers* is making it more emphatic than ever before. This is a watch worthy of any trade—*compensating balance, breguet hairspring, 7 jewels, lever escapement;* two finishes—nickel damaskeened, and combined fancy gilt and nickel damaskeened; *pendant set*, in 18 size Open-Face and 6 size Hunting and Open-Face; fully guaranteed.

18 Size Hunting and Open-Face.

**A Low-Priced Watch Made Especially for Jewelers**

6 size Hunting and Open-Face.

This watch has a thoroughly good finish throughout—in all its parts, and is carefully constructed to give the jeweler a watch he can sell with perfect confidence and that will satisfactorily meet the very large demand that exists for a low-priced watch. Made in one of the largest American factories, running full time *on this one thing.* That is the reason the price is so low.

Write to us for price-list. Your jobber has a full stock, but early orders are necessary—the demand is great.

Est'd 1842. Boston, Mass., U. S. A.

spring. The diameter of the tube (c) is calculated so that the dust-pipe of the set-hands square of a lady's watch may be inserted into it; the steel shaft, on the other hand, is sufficiently thin to fit inside the dust-pipe. The bore of the outer tube (b) is large enough to contain the dust-pipe of a gentleman's watch.

The tube (c) is, in its turn, inclosed in a tube (b), which slides easily over it, and is also continually pressed upwards by a screw-spring (shown in the figure).

Two horizontal arms are attached, opposite to each other, to the tube (b), serving as guides to the jaws. Two screw-springs (S S) wound 'round these arms and kept in position by the serrated nuts (i i) continually press the two jaws toward each other. Each of the latter can also be fixed to any part of its guiding rod by means of an attachment screw (h). Besides the

A NEW TYPE OF HANDS-STAKE.

work-holders (e e) the essential part of the invention consists in the mobility of the two tubes (c) and (b). If in using the tool the two holders (e) and (e) are pushed apart, the works inserted between them and the set-hands square placed on the bore (d), the works are automatically centered. It is immaterial whether there is a dust-pipe or not, or whether the dust-pipe projects over the setting square or lies back of it.

In either case the square (or the head of the center-staff corresponding to the square) fits on its support, the steel shaft. The works, therefore, when pressed downwards, lie quite flat and concentrically on the stake, and can be kept firmly in this position by means of the two attachment screws (h h), both of the operator's hands remaining free for the adjustment of the hand. The inventor is prepared to transfer the right of using the invention.

## Astronomical Cycles and the Calendar.

By W. Banks, in the Watchmaker, Jeweler, Silversmith and Optician.

THE movement of the heavenly bodies is intimately associated with time, as it is only from a consideration of the former that the latter is obtained. From the records of ancient history we find that the associated movements of the sun and moon were clearly understood, and their times of revolution over long periods were well known. It was also very early known that a year consisted of no exact number of days, a fact which has caused no end of scheming and calculating in order to make up for the fraction of a day lost in each year.

One of the earliest results of this was the discovery by the Chaldeans that if the sun, moon and one of the nodes were in conjunction on a certain day they would all occupy the same position relative to each other again in 18 years and 10 or 11 days. The above position of the sun, moon and of the nodes is that which is necessary to produce an eclipse—the node being that point where the paths of the sun and moon intersect. This cycle of 18 years and some few days is known as the Saros and has much to do with the calculation of future eclipses.

Another cycle discovered by Metori, an Athenian, B. C. 433, is of much more importance, however, as it forms the basis of the determination of the falling of Easter. Metori discovered that 235 luminations take 6939.69 days, or so little less than 19 years of 365¼ days that there is only a difference of one day in 322 years. In these 19 years there may be four or five leap years, and on this account there will be a whole day's difference, and to form a complete cycle we must take 4 times 19 years = 76.

If we neglect, however, the effect of leap years, and the moon's coming a day earlier in 322 years, we may state that the full moons come again on the same days of the same month every 19 years, and that there are only 19 out of the 30 days after the vernal equinox on which the equinoctial full moon can fall. We are thus led to a consideration of the absurd system of the fixing of the time of Easter, by the first Council of Nice, in the year 325, which decreed that the Sunday after the full moon next after March 20, should be Easter Day. It is difficult to understand why this most unreasonable system has so long been perpetrated on an intelligent community resulting in the shifting of the dates of Easter and subsequent feast-days by a space of several weeks.

## Cross Section

**The heavy lines indicate the Solid Gold in the Boss Case**

**All the outside or wearing surface of the case is a heavy sheet of Solid Gold, of sufficient thickness (proved by 50 years' wear) to justify our guarantee which is stamped in the 25 and 20-year cases.**

**The inner sheet of very hard and tough stiffening metal, between the two sheets of Solid Gold, adds much to the strength of the case, takes nothing from its beauty, and reduces its cost.**

## OF COURSE YOU KNOW HOW THEY ARE MADE

But do you stop to think what a great amount of gold these black lines represent?

And how little may be on the other kind that is a little cheaper?

More on these Boss Cases than is ever worn off a solid case. In some instances 48 years' straight wear has not brought the composition to sight.

You remember how often the others come back with dissatisfied customers back of them.

Certainly, the Boss Cases cost more. It is a *matter of gold;* nothing more.
It is an exchange of gold for gold.
The Boss Cases are *made better*, but you pay no more for *that*—our organization and specialization work at less cost than the smaller makers.
See the hundreds of rich new designs at your jobber's.

THE KEYSTONE WATCH CASE CO.
Philadelphia
New York Cincinnati
Chicago San Francisco

BY THIS MARK  YOU KNOW THEM

The question is further aggravated by the fact that the Council left the time of full moon to be found any way, causing further misunderstandings. This was compromised by Pope Hilarius in 463, who ordained that the Paschal moon should be that which occurs on the 14th day of the metorize cycle, and not the actual astronomical full moon. This Paschal moon often differs from the true equinoctial moon by one or two days, with the result that Easter may be as much as five weeks earlier or later than if it had followed the real moon.

*The Calendar.*—The scheme of having three years of 365 days and a fourth of 366 days to make up for the fraction lost in each year, was introduced by Julius Cæsar, B. C. 45, and lasted till the time of Pope Gregory XIII. When owing to the fact that the addition of a day every four years over-corrected the deficiency, it was found that the real equinox fell 10 days before the nominal one of March 21, and there was also a discrepancy in the date of Easter from the error in the metoric cycle. To make the calendar right, 10 days were struck out, and, to prevent further errors, it was arranged that every 100th year should lose its leap day, except those divisible by 400. By this arrangement one day is dropped in every 133.3 years, and to keep the calendar right, the proportion is one day in 128.47 years, therefore, the present error accumulates at the rate of one day in 35.24 years. A further correction, suggested by Sir J. Herschel, proposes to make every 4,000th year lose its leap day, which would keep the calendar right for 28,000 years.

A further suggestion by Lord Grimthorpe was to let every 128th year lose its leap day, which would keep the calendar right for 35,440 years. One of the best suggestions for keeping the calendar correct was made by a friar named Bacon, in 1267, who proposed that a leap day should be dropped every fifth century instead of the fourth. This, however, did not suit Pope Clement IV., and the poor friar was imprisoned for 10 years, thus suffering an undeserved penalty in the same manner as Galileo did for his untimely announcements of astronomical discoveries. It will thus be seen that some method of dealing with this fraction of a day is absolutely necessary. What an amount of time and calculation would have been saved had this earth of ours, when it decided to "go on its own," also elected to perform its annual excursion in an even number of days.

The change which is slowly going on, due to the contraction of the earth along with all the other members of the solar system, and the consequent increase of the specific gravity may in future decades so alter the time of evolution that it may coincide with some even number of days, but as the alteration is so slight, it need only be mentioned. On the other hand, there seems no necessity whatever to make the time of Easter dependent on the occurrence of full moon, either before or after March 20, and it does appear that it would be more convenient to have the holidays falling on a definite date each year, same as Christmas.

The arguments in favor of the present system are purely ecclesiastical and of no public moment; they have reference to the time of celebration of the Resurrection, but owing to the corrections that have from time to time been made in the calendar, it is now admitted that this is from two to 3 days wrong. The present system is a relic of ancient ceremonials, which will be superseded by a more rational and convenient arrangement, more adaptable to modern ideas and requirements.

## A Subscriber's Query Answered.

YONKERS, N. Y., Oct., 1905.

*Editor* THE JEWELERS' CIRCULAR-WEEKLY

*In the issue of* THE CIRCULAR-WEEKLY *Oct.* 11, *I read a review of a new book called "Illustrated Studies in Horology." Will you kindly let me know where I could secure a copy of this book, and also tell me the price of the same?* R. C.

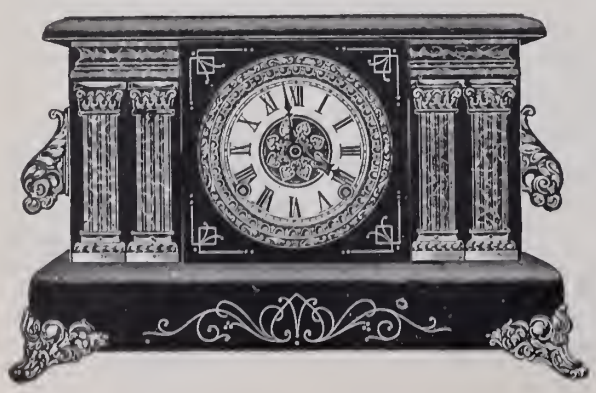
ANSWER:—The book entitled "Illustrated Studies in Horology" may be ordered direct from the author, George G. Koeberl 1340 W. 30th St., Los Angeles, Cal., or through the Jewelers' Circular Pub. Co. The price of the book is $10. It is 11x1 inches in size, and neatly bound in cloth The drawings are 11x30 inches, folded the center. The binding is done in such manner as to allow the drawings to lie perfectly flat when the book is opened.

## A "Husher" for Loud Ticking Clocks.

A SHOPPER in a large store in New York bought a clock. Before sending it away to be wrapped the clerk said:

"Oh, here is the cushion that goes with it. I almost forgot that."

"Cushion?" exclaimed the customer. "You don't mean to tell me that clocks are so delicate nowadays that they require cushions to sit on."



"It isn't their delicacy that makes the cushion desirable," said the clerk. "It is their noise. These are the best clocks in the market, but they tick so loud that no body can stand their racket. On that account sales were comparatively light until somebody discovered that by standing the clock on a cushion its noise was partly drowned. As soon as we got hold of the idea we began to throw in a prettily covered little pad with every clock, and now the sales have increased fourfold."—*N. Y. Sun.*

# BUYERS' INFORMATION BUREAU

Questions as to the makers of certain lines of goods, where to buy certain lines, where certain kinds of work are done, the owners of certain trade-marks and other matters relating to the buying branch of a jewelry business will be cheerfully answered under this department. *All queries are also answered promptly by mail.*

MONTGOMERY, Ala., Oct. 10, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Can you inform me where I can get literature on window dressing? I would like to take a correspondence course on the subject. J. M.

ANSWER:—We do not know of any literature devoted entirely to this subject. Correspondence courses may be secured from the Bond Institute of Mercantile Training, 1931 Broadway, New York; the International Correspondence School, Scranton, Pa., and probably the Page-Davis School, 90 Wabash Ave., Chicago.

KIRKSVILLE, Mo., Oct. 5, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Kindly tell me who manufactures the Shakespeare bracelet. T. J. H.

ANSWER:—La Pierre Mfg. Co., of Columbia St., Newark, N. J.

DAVENPORT, Ia., Sept. 26, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
We are sending you by to-day's mail, one teaspoon, and will ask you to kindly inform us who the maker of it is, as we are unable to find out. By so doing you will greatly oblige,
M. E. N. & SONS CO.

ANSWER:—This spoon was probably sold by a retail jeweler, Sidney D. Smith, Lansingburg, N. Y., about 45 years ago, as the initials, "S. D. S.," appear on it, and it was probably made in Albany. The maker's mark, "D," and the eagle, was used by Hall, Hewson & Co., Albany, who were in business about 1836. The silver trade was well represented by the Hall family in Albany for many years, as our records show they date from 1781 to 1845, going through various firm styles.

PITTSBURG, Pa., Sept. 19, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
I have an old grandfather's clock (English), which is said to be 175 years old. I would like to know the approximate age if possible. The plate is marked "Wm. Vale, Lichfield." C. H.

ANSWER:—Our records show a William Vale, clockmaker at 6 Colmore Row, Birmingham Eng., in 1770; another William Vale was at 12 Bunhill Row, London, Eng., from 1776 to 1794, while there was also a William Vale, a musical clockmaker, at 32 Paul St., Finsbury, Eng., from 1816 to 1840. Our records do not show any William Vale, of Lichfield.

ALBANY, N. Y., Sept. 16, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Will you be kind enough to advise us who makes sterling silver bead necklaces? V. H. C. Co.

ANSWER:—We are unable to find any manufacturer who makes sterling silver bead necklaces in this country. I. Emrich & Co., 42 E. 14th St., import them in small sizes and will take import orders for larger sizes if desired.

LOCKPORT, N. Y., Sept. 20, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Please send us the address of the E. Ingraham Co. as we want to get material for one of its clocks. E. M. R.

ANSWER:—The E. Ingraham Co.'s clocks are made in Bristol, Conn. The New York agents are Henry Terhune & Son, 25 Murray St.

STURGEON BAY, Wis., Sept. 14, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
I would like to have a few names and addresses of manufacturers of watch mainsprings in Europe, and also a few in this country. Also tell me what the duty is on mainsprings and whether there is any other charges besides the duty and freight.
G. M.

ANSWER:—Among the watch mainspring manufacturers are: A. Dubois Lebet, Locle, Switzerland; A. Herzog, Geneva, Switzerland; C. Jeanjaquet, Neuchatel, Switzerland; C. Robert, Chaux de Fonds, Switzerland; A. Schwab, Chaux de Fonds, Switzerland; Washburn & Moen Mfg. Co. Worcester, Mass.; F. N. Manross, Forestville, Conn.; Hirst Bros. & Co., 8 Curzon St., Oldham, Eng.; C. H. Wolf, Glashutte Germany. The duty on main springs is 40 per cent. ad valorem; there is no other charge for importing these goods except freight and customs brokers' fees.

Vernon D. W. Carlton, Old Town, Me. has been succeeded by O. T. Brown.

MADE in Oak, Mahogany, Circassian Walnut and Rosewood—MOUNTED with Sterling Silver, also Gold-plated Brass Trimmings—Copper or Porcelain lined—various sizes to hold from 50 to 1,000 Cigars.

**PRIZE ESSAY COMPETITION, No. 16.**

**SUBJECT:**

## How and Under What Conditions Should Auction Sales be Conducted?

UNDER what conditions may a retail jeweler conduct an auction sale with a reasonable certainty of advantage to himself? To reach a fair consideration of this question, it is essential for the average man to disabuse his mind of prejudice, for most men are so constituted that the very words "auction sale" convey an unnallowed impression. They cannot conceive of "auction sales" as being legitimate, or, rather, as having any proper reason for being. This is unfortunately due to the fact—for fact it is—and it would be folly to deny it, that such "sales" have fallen into disrepute, because they have so long been abused in numberless ways—they have been conceived in iniquity, conducted without principle, and been so often the merest cloaks for unloading upon a gullible public, inferior or spurious wares, inveigling that public to pay for them, all sorts of prices little less than those which would be paid for goods of intrinsic worth.

Let us, however, start out with the statement—a very reasonable one—that the auction sale, when conducted honestly, with only genuine goods, has its proper, and even meritorious functions. Indeed, we may go very much further than that, and justly claim that the honest auction sale is a beneficent transaction, good for the retail jeweler conducting it, not only good for him, but also of benefit to the manufacturing jeweler, to the jobber, and even to the public.

Nor are the conditions under which the retailer conducts such an auction sale necessarily complex. Furthermore, if this retail dealer is shrewd, as well as honest, he may be reasonably sure of coming out of the sale with advantage to himself, for it is not at all inconsistent for a shrewd dealer to find himself in such a condition that an auction sale is the best, the safest, the quickest and the most advantageous solution of his difficulties. But there is one essential premise, otherwise this solution is indeed precarious. The dealer, to begin with, must be well, even favorably known to the community in which he lives and does business, otherwise the transaction may well be regarded with suspicion. Indeed, if the community did not look askance upon an auction sale, in which the principal was not one who by long residence in their midst had thoroughly won the confidence of all, it would be an impugnment of themselves.

One of the results of the fierce competition in trade which is a notable feature of business to-day, is that it has extended the period of credit, so that it is not unusual to find that the manufacturer or jobber will give the retailer four months' time, and even longer, in which to pay the indebtedness the latter has contracted for the goods he is during that period selling over his counter. Another development of the same condition is that in the mad race for fads, novelties and sensations, goods which to-day are all the rage, in a few months will probably be passé, superseded by other new designs. Yesterday pearls may have reigned; to-day turquoises may be in vogue; next month the emerald will be swagger, and it is *de regle* to wear only what Dame Fashion decrees. Dare the jeweler show a splendid line of gems set in Roman gold, when it has been decreed that the day of Roman gold is over, and yesterday rococo designs had succeeded the former, while the far-seeing decry the coming in of *art nouveau?*

And to complicate this situation, when the dealer makes out his order for new goods, he is confronted by two problems which may feaze even the shrewdest and most honest buyer. In the first place, it is so hard to estimate just how much of a new line of goods he can dispose of. In the second, if he buys too little or too few, will it not be impossible to get more of the same class or line? Add to this that not only do manufacturers and jobbers extend long credit, but they also urge him to buy more.

The foregoing is merely an illustration to show how easy it becomes for the retail dealer to overstock. This being so, does it not follow that an honest, shrewd, even far-seeing retailer, can easily find himself in a congested condition? Every one can readily follow the obvious inferences—the consequences upon himself, and indirectly upon the manufacturer and the jobber.

Now then, being more or less tied up what shall he do? Let us suppose that two three, four seasons have passed, each leav ing him and his feeders in a worse condi tion. Rapidly turning to the best solution for those who supply him as well as himself he has decided upon an auction sale.

The first essential is to secure an hones auctioneer. There are such. But the auc tioneer must not alone be honest. To mak the sale efficient—a benefit to the dealer, an through him a benefit to the manufacture and the jobber, and last, but not least, t the public—the auctioneer must be a supe rior in other ways; he must be a ready an fluent talker; he must be quick at reparte quick to see a point and as quic to take advantage of it; must b able to parry every interjection and i terruption; be able to retaliate, yet in goo humor. In short, he must be an excelle entertainer. It must be obvious that h sense of humor should be keen and well-d veloped, and a good voice is a prime pr requisite.

Then, too, the auctioneer should be level-headed fellow of good business jud ment, an excellent student of human natur and he ought to have a great memory f names and faces. If thereto he adds a tho ough knowledge of jewelry, and of desig how they are manufactured and a store technical information concerning the then, indeed, he is the ideal auctioneer.

Not to trench on your space, I would a that if during the auction the public guarded against paying too much for t wares bid for, not permitted to pay in e cess for a single article, and if absolute not one single bit of spurious goods "Brummagem" is rung in, then the auct cannot fail to be of benefit to the deal Of benefit to him immediately, and in t long run, too. And, through him, of ben fit to the manufacturer, to the jobber, a last but not least, to the general pub which through its means is able to secu at a more reasonable price than regula many an article which the individual bu might not otherwise buy, and which oth wise might continue to clog the shelf a keep dealer, jobber and manufacturer i congested state. B. S

---

The trouble with a lot of people in t world whose "opportunity" never seem come is, that when it does, they have to so much mental arithmetic about it, it's g before they get the answer.—*White's S ings.*

## Storekeeping Department.

### nely Suggestions for Enlivening Business During the Holiday Season.

'HE time is close at hand when jewelers should be sending out suggestions for itable presents. Christmas is the great esent-giving time of the year, and the weler should do everything in his power, ch year, to make this part of the observce greater than the year before. Good eer at Christmas time is helped along by e exchange of gifts. Nothing makes an ıployе feel more like working harder for e interest of his employer the following ar than to be remembered with a present Christmas. He feels that past efforts ve been appreciated, and it causes his st manhood to arise within him, to show at he is capable of even better efforts in e time to come.

Many employers are well aware of this ct and they take particular pains not to rget a single employe, but they are genally at a loss to know exactly what to buy r such times, and jewelers are not gena'ly prompt in offering the right kind suggestions. Many employers make it a ıint each year to give every employe a ırkey for Christmas, but this does not rike the unmarried man, or woman, as ıng the best thing for him. Others give l men in their employ a box of cigars and ill others pick out other presents, but the gars do not fill a long felt want to the ıan who does not smoke, so he only gets ıe good feeling which goes with the presıt. Even that is appreciated, but with the ght kind of work on the part of the jewer between this time and Christmas there ught to be no trouble in getting the proper ınd of presents to please all employes.

A small catalogue or well prepared cirılar would be a great help in this campaign f education—something filled with attracve illustrations of articles suitable for resentation to employes by the employer, nd there is such a wide variety of these oods in the stock of every jeweler that ach can use his own judgment regarding hat to include in the circular and what to mit.

I would suggest the grouping of these resents according to their price. Several mployers will be found who want to give present of the same value to a large numer of employes, and this grouping will nable him to choose according to value, nd still not be compelled to take the same hing for each employe.

If a jeweler can get a large firm interested in this proposition, and furnish a line ı presents on which the name of the recipent and the giver may be engraved, it not ınly gives the recipient something very ıandsome by which to remember his firm or years to come, but also an article which ıe will display to all his friends. Again t advertises his firm in the right way, and ıossibly the jeweler who did the work. This class of advertising will appeal largely o some employers, and would be the clinchng argument of the jeweler in landing the ırder. Other firms would care nothing for he advertising suggestion, but would like he idea of having the name of the firm ınd that of the employe on each article, together with the date, for appearance sake. It shows that the individual employe was remembered when the present was bought, and not that all had been counted, and so many articles ordered to go around.

This little touch of personality will make the present doubly appreciated. On the other hand, once a jeweler has a firm started along this line, he is nearly sure to keep it in line from year to year. Practically the same list of presents will be made the next year, and it is up to the jeweler to have something new to offer, so the presents will be acceptable all round and will add beauty to the collection already started.

An argument in favor of the offerings of the jewelry store is their value as keepsakes. They are not like a turkey or a box of cigars, which may be consumed on Christmas day and forgotten in a week. They are constant reminders of good feeling.

Jewelers in larger cities, who have an established reputation for the quality of their goods, will find it to their advantage before long to supplement the circular or catalogue with a good solicitor, who can get an interview with the head of each business house and have a little talk with him, leave the catalogue or circular, and, if enough interest is shown, go through it with the right kind of suggestions as to what might be done to apply to each particular case. This solicitor should not be a cheap man. He should be the best that money can hire, if he is to make the right kind of an impression, and should know when to talk and when to let the other fellow talk. He will often find the head of the house ready to accept suggestions. The Christmas present business is generally looked upon by that man as a necessary nuisance. He does not mind the cost of the presents half so much as making the selections, and that is the reason so many fall back on turkeys and cigars. This solicitor will be able to show the advantages of his offerings, their appeal to the finer feelings of each employe, the fact that they are a constant reminder of the appreciation of the firm, etc. In smaller places the jeweler himself ought to make it a point to call on the head of firms which annually give their employes a present, and do the work outlined for the solicitor.

Work along this line is bound to be remunerative if done in the right way. It is not only the results of this year you should look for, but for years to come. Next year the same man will be looking for you for suggestions, and in a few years he will be willing to take your advice on such matters without question and will probably turn the entire matter over to you, after prices are settled upon. This puts you in closer touch with him and with his employes than you could get otherwise.

You will find that employes who receive presents of this kind, stamped with your name, or packed in your boxes, will display the name with the presents, as it will be a kind of guarantee of excellence, and they will also be inclined to patronize the same jeweler that their employer has patronized when they want to buy something in your line.

Another thing each jeweler should remember when conducting a campaign of this kind is the fact that if he fails to succeed and another jeweler gets the contract, he is still a partial winner. The fact remains that a new customer has been gained for the jewelry line, and, while you did not get him, you stand as good a chance the following year. Jewelers should act together in their advertising campaigns. The more of their wares they sell, the more other people will want to buy of them. It is seeing things in the home which gives the desire for possession, which eventually brings the customer to the store for something like it, or a little better, as most women would rather have something which will outshine the other, and that opens up possibilities for the jeweler.

By all means try to get some of this business between now and Christmas, and if you cannot get it, try to help some other jeweler to do so. The trade will benefit and jewelers should boost their own trade in preference to all others. F. A. P.

### A New Sale Idea.

I SAW in a bit of ancient history a suggestion for a sale that will stir up the dull season of the year and get rid of a lot of merchandise that is cluttering up the store and tying up good interest money, recently remarked a writer in the *Advertising World.*

The old method of auction sales used in England and in this country during the 16th century was "sale by cant" or, as we would say it, "by candle." The plan was to take an exact inch of candle and set it burning where all present could see. Then any one might bid. The highest bid received before the candle burned itself out took the article.

This curious custom is described by Master Pepys in his diary, in 1662, as follows: "After dinner, we met and sold the Weymouth, Successe and Fellowshippe hulks; where pleasant to see how backward men are at first to bid, and yet when the candle is going out how they bawl and dispute afterwards who bid the most. And here I observed one man cunninger than the rest, that was sure to be the last man and to carry it—and enquiring the reason he told me, that just before the flame goes out, the smoke descends, which is a thing I never observed before, and by that he do know the instant when to bid last."

"A Sale by Candle," if attractively described and run with all proper conventionalities, would at least make a welcome change from the "Overstocked Sale," "End of Season Sale," etc.

### Ideas and Schemes.

SEVERAL persons were recently attracted to the store of Steinmetz & Kaylor, Peoria, Ill., by a display consisting of about 500 pieces of hand-painted china. The china was decorated by Anna Picard Atkins, who had personal charge of the exhibition.

O'Dyce Chapman, Coldwater, Mich., recently displayed in his show window a diamond-studded medal, which was awarded as a prize to the successful competitor in the oratorical contest held under the auspices of the local branch of the W. C. T. U. in that city.

# MURINE

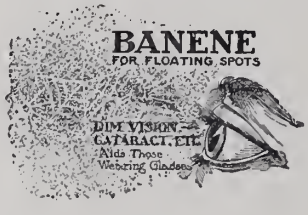
## Optical Aids

**Have Stood the Test of Time and Criticism**

### Gone to success on the wave of good opinions of Physicians, Opticians and the People

*Murine rapidly reduces an Inflamed Eye to its normal condition preparatory to its proper measurement for Glasses.*

*Murine Clears the Transparent Media and obviates the use of a dangerous Mydriatic.*



*Banene Stimulates the Blood Supply which nourishes the Eye, removes Floating Spots, strengthens vision, and with Murine greatly aids those wearing Glasses, hence their value to the Optical Profession.*

THE maximum per cent of those ordering Glasses seek your aid only after continued urgings from over-worked and defective Eyes—urgings that have left inflamed tissue and local irritation. Correct Eye Defects with Properly-fitted Glasses. Correct Effects of Defects with *Murine*.

**(Unguentum Hydro-Murine)**

*A REMEDY FOR THE EYELIDS*

**Restores lost Eyelashes and promotes a healthful growth. Cures Cysts, Styes and Ulcers**

THE Eyelashes often fall out in consequence of neglected disease, both at their roots, and of the Lubricating Glands which open near them, resulting in a thickened and crusted condition. This condition is intensified by an *Error of Refraction*, and properly-fitted Glasses should be worn in addition to applications of *Murine* and *Murine Eye Salve.*

**NOTE**—The law does not confine the sale of these preparations to any class. Jewelers and Opticians have a right to sell them, but not the right to compound or administer.

**"There is always one by which the rest are measured."**

## sh Opticians Seek Legislation Governing the Practice of Optometry.

E following is the text of the bill, known as the "Sight-Testing Act," ared for presentation to Parliament on lf of the General Board of Opticians by Hon. Alban Gibbs. It received its final oval at the general optical board meetheld May 31.

THE SIGHT-TESTING ACT.

*Act to regulate the practice of opticians as regards the testing of sight.*

*Whereas* it is expedient that persons proing to test sight should possess a comnt practical knowledge of the subject, that provision be made for the regulaand registration of persons specially ified to test sight in the United King-, and that the law relating to persons ractieing be otherwise amended,

*it enacted* by the King's Most Excel Majesty and with the advice and conof the Lords Spiritual and Temporal Commons in this present Parliament mbled and by the authority of the same ollows:

*Short Title.*

This Act may for all purposes be cited The Sight-testing Opticians' Act 1905."

*Interpretation.*

In this Act "sight-testing" or "testing it" and the practice of sight-testing and ing sight means the science of measurthe refraction of the tye and the adapta- of lenses for aiding defective sight and practice of the said science.

Sight-testing Optician" means a person istered under this Act.

The Company" means the Master Wars and Company of Spectacle Makers.

The Central Board" means the Central ard as constituted by this Act.

The Registrar" means the Registrar to appointed by the Company as hereinafter vided.

The provisions of this Act shall not ly to any legally qualified medical pracner.

*person to be registered without compliance with Act.*

No person shall be registered under Act until he has complied with the rules regulations to be laid down in pursue of this Act.

*gistration not to imply medical qualification, etc.*

Registration under this Act shall not fer upon any person the right or title be registered under the Medical Acts, to assume any name, title or designation plying that he is by law recognized as a medical practitioner, or that he is qualified to practice ophthalmic medicine or surgery.

*Qualifications for registration.*

6. Subject to the provisions of this Act any person who

(*a*) prior to the first day of January, 1906, has been *bonâ-fide* engaged in the practice of sight-testing or testing sight, or is at the passing of this Act an assistant over the age of 21 and has been *bonâ-fide* engaged in the practice of sight-testing, or testing sight for three years provided that in either case application for registration is made before the first day of January, 1907, or

(*b*) after this Act comes into operation shall pass the examinations in sight-testing required by the Master and Wardens and Company of Spectacle Makers

and has duly complied with the rules and requirements of the Company shall be entitled to be registered under this Act.

*Registered persons may practice anywhere and recover fees.*

7. A person registered under this Act shall be entitled to practice sight-testing or testing sight in any part of His Majesty's Dominions, subject to any local law in force in that part and from and after the first day of May, nineteen hundred and six, a person shall not be entitled to recover any fee or charge in any Court for practicing and advising as a sight-testing optician unless he is registered under this Act.

*Persons not to assume title, etc., implying registration under this Act.*

8. (*a*) After the date on which the register comes into force a person shall not be entitled to take or use the name or title of "Sight-testing Optician" or any other name title designation addition or description, whether by means of initials or letters placed after his name or otherwise implying that he is registered under this Act, or that he is a person specially qualified to practice sight-testing or testing sight unless he is registered under this Act.

*Penalties.*

(*b*) Any person who after the date aforesaid has not been registered under this Act takes or uses any such name, title, designation, addition, or description as aforesaid shall on summary conviction be liable to a penalty not exceeding 20 pounds.

*Constitution of Central Board.*

9. On the passing of this Act the Master Wardens and Company of Spectacle Makers shall take steps to secure the formation of a Central Board to be called the Board of Optical Registration (hereinafter called the Central Board) which shall consist of

(*a*) Four persons to be appointed for the term of three years by the Lord President of the Council.

(*b*) Twelve persons to be appointed for the term of one year by the Master Wardens and Company of Spectacle Makers of whom in the first instance the British Optical Association shall have the right to nominate four.

(*c*) Nine persons to be appointed for the term of one year by direct election by the members of the register (as in previous Acts).

The election of members to the Central Board under the sections (*a*) and (*b*) shall take place at the passing of this Act and yearly thereafter and under the sub-section (*c*) on the first day of May, 1908, and yearly thereafter.

Any vacancy occurring by resignation or death shall be filled up in the case of a member appointed under sub-section (*a*) by the Lord President of the Council and in the case of a member appointed under sub-sections (*b*) and (*c*) by the body which appointed such persons. Members appointed under this section shall on the termination of the period for which they have been appointed be eligible for re-appointment for a like period.

*Duties of the Company.*

10. The duties and powers of the Company acting on the recommendations of the Central Board shall be as follows:

1. To frame rules

(*a*) establishing keeping and controlling a register and regulating the conditions of admission on the register.

(*b*) fixing the date on which the register shall come into force.

(*c*) regulating the course of training and the conduct of examinations.

(*d*) regulating the admission on the register of persons already practicing sight-testing or testing sight at the passing of this Act.

(*e*) regulating supervising and restricting within due limits the practice of sight-testing or testing sight.

(*f*) deciding the conditions under which persons registered under this Act may be struck off and

## Optical Department.

may be re-admitted to the register.

(*g*) deciding as to the proper title or titles to designate fitly the practice of sight-testing.

2. To appoint a Secretary, Registrar, and other officers and assistants.

3. And generally to do any other act or duty which may be necessary or expedient for the due and proper carrying out of the provisions of this Act.

Rules framed under this section shall be valid only if approved by the Privy Council and the Privy Council may confirm any such rules without modifications or with such modifications as the Privy Council may think fit and any rules so confirmed shall have effect as if enacted in this Act.

Any rules made under this Act may be rescinded, revoked, amended or varied by rules made in the same manner and subject to the same approval.

*Provisions as to register.*

11. (*a*) A register shall be kept by the Registrar to be styled the Register of Sight-testing Opticians which shall contain a list in alphabetical order according to the surnames and shall state the full names and addresses of registered persons, and subject to the provisions of this Act shall contain such particulars and be in such form as the Central Board may from time to time direct.

(*b*) The register shall be deemed to be in proper custody when in the custody of the Registrar appointed by the Company, and shall be of such a public nature as to be admissible as evidence of all matters therein on its mere production from that custody.

(*c*) The Company shall cause a correct copy of the register to be from time to time and at least once a year printed under their direction and published and sold which copy shall be admissible in evidence.

(*d*) Where a person entitled to be registered under this Act produces or sends to the Registrar the document conferring or evidencing his license or qualification with a statement of his name and address and other particulars if any required for the registration and pays the registration fee he shall be registered in the register of Sight-testing Opticians.

*Registration fees.*

12. There shall be payable in respect of the registration of any person who before the first day of May, 1906, applies to be registered under this Act a fee not exceeding 10 shillings and sixpence, and in respect of the registration of any person who after that day applies to be registered a fee not exceeding five pounds.

*Appeal from decision of the Company.*

13. Any person deeming himself aggrieved by any decision of the Company removing his name from the register may appeal therefrom to the High Court of Justice within six months after the notification of any such decision to him but no further appeal shall be allowed. When any person deems himself aggrieved by any determination of any Court of Summary Jurisdiction under this Act such person may appeal therefrom to a Court of Quarter Sessions.

*Parties to be heard by the Central Board.*

14. No person shall have his name removed from the register without having been previously given an opportunity of being personally heard by the Central Board.

*Penalty for obtaining registration by false representations.*

15. Any person who procures or attempts to procure registration under this Act by making or producing or causing to be made or produced any false and fraudulent declaration certificate or representation either in writing or otherwise shall be guilty of a misdemeanor and shall on conviction thereof be liable to be imprisoned with or without hard labor for any term not exceeding 12 months.

*Penalty for falsification of register.*

16. Any person wilfully making or causing to be made any falsification in any manner relating to the register or forging or issuing or assisting in forging or issuing any certificate purporting to be a certificate under this Act shall be guilty of a misdemeanor and shall be liable on conviction to imprisonment with or without hard labor for any term not exceeding 12 months.

*Change of address and death of a practitioner.*

17. Every person registered under this Act shall forthwith notify to the Registrar any change in his name or address and any person neglecting so to notify shall be liable at the discretion of the Central Board to be struck off the register and every Registrar of Deaths on receiving notice of the death of any person registered under this Act shall forthwith transmit by post to the Registrar a certificate under his own hand, of such death with the particulars of time and place of death and may charge the cost of such certificate and transmission as an expense of his office.

*Duty of Registrar to make and keep register.*

18. It shall be the duty of the Registrar to make and keep a correct register in accordance with the provisions of this Act of all persons who shall be entitled to be registered under this Act and to erase the names of all registered persons who shall have died or whose names shall have been removed from the register and from time to time to make the necessary alterations in the addresses of the persons registered under this Act. To enable the Registrar duly to fulfil the duties imposed upon him it shall be lawful for the Registrar to write a letter to any registered person addressed to him according to his address on the register to enquire whether he has ceased to carry on business or has changed his residence such letter to be forwarded by post as a registered letter according to the Post Office regulations for the time being and if no answer shall be returned to such letter within the period of six months from the sending of the letter a second or similar purp shall be sent in like manner and if no swer be given thereto within three mon from the date thereof it shall be lawful erase the name of such person from register provided always that the same m be restored by the direction of the Cen Board should they think fit to make order to that effect.

*Accounts to be kept.*

19. The Company shall enter or cause be entered in books to be kept for that p pose a true account of all sums of money them received and paid under this Act such accounts shall be certified as correc an accountant who shall be a member e of the Institute of Chartered Account or of the Incorporated Society of Acco ants and a statement of such accounts s be annually laid before the Privy Coun

*Service of notices by post.*

20. Subject to the other provisions of Act all notices and documents required and for the purposes of this Act to be may be sent by post and shall be dee to have been received at the time w en letter containing the same would be d ered in the ordinary course of post an proving such sending it shall be sufficien prove that the letter containing the n or document was prepaid and properly dressed and put into the post.

*Recovery of penalties.*

21. All fees under this Act may be covered as ordinary debts due to the C pany and all penalties under this Act be recovered and enforced in accord with the provisions of the Summary J diction Acts.

### Forthcoming Banquet of the Optical So ty of the City of New York.

THIS year's annual banquet of the Op Society of the City of New York be given Wednesday evening, Nov. Reisenweber's Circle Hotel, Columbus cle, 58th St. and Eighth Ave., New Y At the last regular meeting of the s about 50 tickets were sold, and the mand since that time has been so pre that without question all available sea the tables will be taken.

The dinner a year ago was a most g fying success, and naturally this enter ing organization determined that the ing event should surpass its predece The presence of the ladies at the last ner added much to the social enjoy so of course this feature will be contin and it is even expected that there w an increased representation of the fair There will be excellent music and high class entertainment, and the me is promised, will please the most fastid

A number of speakers well known i tical circles will deliver addresses that be of general interest. The tickets s $1.50 each, and no covers can be guara after Oct. 28, for then the hotel people be informed as to the number of gue

Charles H. Kittrell and C. A. H last week formed a co-partnership engaged in the optical business at 31 St., Macon, Ga., under the firm sty Kittrell & Hilburn. Mr. Kittrell w main in Dublin, where he will have c of the firm's retail jewelry business.

## Mother-of-Pearl Shell from Tahiti.

ME interesting details of the mother-of-pearl shell industry of Tahiti are to ound in the report for the year 1904 on Trade and Commerce of the Society Is-s, submitted by Mr. Simons, the British ul.

e exports from Tahiti to all countries nted to the sum of £140,325 in value, crease, as compared with 1903, of £13,- principally in copra, shell, and vanilla. quantities, values, and destinations of hells were declared as follows:

| | *Mother-of-pearl shell. Quantity.* | |
|---|---|---|
| *untry.* | *Tons.* | *Value.* |
| d States | 105 | £8,316 |
| d Kingdom | 125 | 9,907 |
| Zealand | ½ | 26 |
| e | 403 | 31,931 |
| otal | 633½ | £50,190 |
| otal, 1903 | 622½ | 61,632 |

r. Simons explains that the tax of 150 s imposed on all shell exported to for- markets is subsequently remitted in ase of shipments declared for France, ding that satisfactory proofs are forth- ng of their actual landing in that coun- With this privilege in view, 403 tons ell exported during 1904 were declared ansit for France, but Mr. Simons says generally understood that the bulk, if the whole, of that shipment will ulti- ly find its way to London.

aling with the mother-of-pearl shell Consul says:

ome 20 years ago a comparatively l price was offered in London for Ta- black-edged shells. In the early 90's, ever, prices augmented, and re- ed fairly firm at remunerative rates 1903, when best clean, sound shells, ed as much as £200 to £220 per ton, st second and third grades brought t £160 and £110 per ton respectively. 10 years previous to 1903 the annual rt of shell from Tahiti had averaged t 400 tons, the yearly output varying 550 to 290 tons according to the pro- iveness of the lagoons opened to divers. all appearance, therefore, the demand Tahitian shells had become regular and dy, and no sudden change was appre- led.

n the month of January, 1903, however, volving storm of unprecedented violence hese waters caused heavy seas to sweep r certain of the low-lying atolls of the moto group, drowning some 550 na- s, amongst whom were about 150 divers ork. Exaggerated reports of the catas- he and of the assumed destruction of shell beds were immediately put into cir- tion, with the result, it is said, that lers of shell in London at once took antage of the occasion to raise their es, and that thereupon, and in anticipa- of a future dearth of black-edged shells onsequence of the disaster, button man- cturers and those responsible for the ions in dress decided to change the le from buttons of mother-of-pearl to e of metal, or of other suitable material. Meanwhile the authorities at Tahiti, in er to succor the survivors, and inci- tally to add to the revenues of the col- , stimulated the output of shells at the moto Islands by throwing open most of the best lagoons in that region and by sanctioning the employment of diving machines, of which about 40 were at work by the end of 1903. These measures have brought about the export hence of 622 tons of shell in 1903, and the output of 660 tons (634 tons exported) in 1904, an over-production which, combined with the decreased demand following the change in fashions before mentioned, has diminished the price of Tahitian shells in the London market to practically one-half of what it was two years ago. Remunerative sales, therefore, cannot be effected, stocks are unduly accumulating, and Tahiti traders are finding themselves more or less financially embarrassed.

"The authorities at Tahiti stopped all diving operations at the shell islands from Oct. 1, 1904, to Feb. 1, 1905, and extended this prohibition to diving machines until May 1, 1905. These precautions, added to the inactivity of Tahiti traders, who cannot afford to raise shells at present prices, should restrain within reasonable bounds the output for 1905, and thus relieve the London market and prevent, it is hoped, the accumulation of stocks in excess of trade requirements."

## Precious Stones, and Gem Minerals.

IN introducing a chapter on the "Properties of Gems," in his recent work on the "Gems, Jewelers' Materials and Ornamental Stores of California," Dr. Geo. F. Kunz says:

"It is difficult to define to-day what is meant by 'a precious stone,' for the mineralogist would give one definition, the jeweler another, the archæologist still a different one, while the scientific collector and the gatherer of curios and souvenirs would not agree with any of the others. A gem-mineral or a 'precious stone' may be defined as a mineral of any sort, distinguished for its beauty, durability or rarity, especially when cut and polished. There are only a few really precious stones: the diamond, the ruby and sapphire (identical in composition), the emerald, and occasionally the pearl (which is of animal origin) is included; formerly also the opal.

"Some 20 years ago jewelers sold only a few varieties of stones; to-day they keep in stock anything known to the mineralogist and demanded by the public. The consumption of gems is larger than most people realize. Take one trade alone, for example. The watches manufactured annually in the United States use from seven to 21 jewels for each watch. The consumption annually amounts to over 5,000,000 ruby and sapphire watch-jewels, and over 7,000,000 garnet jewels; while over 15,000 carats of bort diamonds are consumed in cutting these jewels.

"In looking for gems, the prospector should be provided with a few specimens representing the scale of hardness, and have the means in camp to determine the specific gravity. In this way he can separate the positively worthless from the possibly valuable, even though he can not fully identify the minerals."

M. E. Wold, Thief River Falls, Minn., has moved his stock to new quarters.

*[Answers are also solicited from our readers to the questions published on this page.]*

QUESTION No. 1359.—**To Color Chrysoprase.**—*Kindly let me know how chrysoprase is colored. Do you know any one who does that kind of work?* M. G.

ANSWER:—We were unable to find anybody in this country who colors this substance. Bauer, in his work on "Precious Stones," says that the color is due to the presence of about 1 per cent. of nickel. This element is probably present in the form of a hydrated silicate, which, when heated, loses water and becomes decolorized, since the stone itself, when exposed to the action of heat, becomes paler and paler, and finally quite white. The temperature necessary to produce this change is not very high, and a seal of chrysoprase, if frequently used, will gradually lose its color. The same thing happens, moreover, when the stone is exposed to the direct rays of the sun, the decolorization in the latter case being due, not to the action of the heat, but to that of light. That the decolorization of chrysoprase is due to loss of water is demonstrated by the fact that the color is restored by burying the stone in moist earth or cotton-wool. The color of the bleached chrysoprase can be restored, or that of a pale stone improved, by immersion in a solution of nickel sulphate. It is even possible to produce chrysoprase artificially by immersing chalcedony for some time in a green solution of a nickel salt. This is sucked up into the pores of the chalcedony and imparts to it the fine apple-green color of true chrysoprase. It is sometimes almost impossible to distinguish these artificially colored stones from true chrysoprase, and a great many are sold as genuine stones. Natural chrysoprase is rather difficult to work, being very liable, on account of its brittleness, to crack and splinter at the edges. Moreover, it must not be allowed to become overheated during grinding, since this has a prejudicial effect on the color. A stone which has been overheated not only loses its bright apple-green color, but also, to a great extent, its translucency. If reasonable care be taken in the process of grinding, the color is retained unaltered, and after polishing the stone acquires a very fine luster. Chrysoprase is usually cut with a convex or plain surface, which is frequently bordered with one or two series of facets.

QUESTION No. 1360.—**Bright and Matt Dip for Brass.**—*I noticed a formula for a dip for brass in your Workshop Notes, which I used with success. I now want a dip that will produce a dead or matt finish on brass.* B. T. L.

ANSWER:—A dip for producing a matt or dead finish on brass is made in the same manner as the bright dip, with the exception that the dead dip has an addition of sulphate of zinc—enough to saturate the solution. Without the zinc the dead color cannot be obtained. The most recent mode of making the matt dip is to produce the sulphate of zinc directly in the solution and in the precipitated form. The method of making the sulphate of zinc directly in the solution is as follows: One gallon of nitric acid is placed in a stone jar and surrounded by cold water. Add pieces of zinc gradually until no more zinc will dissolve; then add enough fresh acid to supply the acid evaporated during the agitation. Finally, add one gallon of sulphuric acid. The dead matt dip is used hot and the jar is therefore placed in a vessel containing hot water. Clean and polish the brass pieces in the usual way; stir the dip well with a wooden paddle, and dip the brass pieces into this and let remain until the desired matt is obtained. Then remove, rinse and dip into the regular bright acid dip. This is necessary to remove the dark coating on the surface. If the matt be too fine, add more nitric acid; if too coarse, more sulphuric acid is required. Water should be kept out of the solution, as it usually spoils the dip. When the dip becomes weak, add a little nitric acid. The dead matt dip can be used for both brass and German silver.

QUESTION No. 1361.—**Preparing Knives for Plating.**—*Please inform me how to prepare table knives for silver plating.* P. W.

ANSWER:—Steel knives and forks are usually covered with an oil to prevent rusting. This should be removed by immersing the steel goods for several hours in benzine. The articles are then potashed and scoured with pumice. The pieces are then immersed in a 10 per cent. solution of potassium cyanide, using a copper anode with a very small piece of silver attached and applying the electric current. This requires only a small deposit on the knives, and the pieces may then be placed directly in the plating solution.

QUESTION No. 1362.—**To Refinish Pickled and Chased Silver.**—*I have some fancy chased silver toilet pieces which I repaired by soldering. I pickled the pieces, but cannot remove the white in the crevices without injuring the chasing. What should I do with it?* S. D.

ANSWER:—After the pickling the pieces should be thoroughly rinsed and then scratch-brushed on the lathe with a revolving brass wire scratch brush, using bran water for wetting. This will remove the white from the crevices, and the article can then be polished with rouge and buffed.

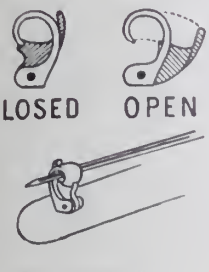
QUESTION No. 1363.—**Black Nickel Oxidizing.**—*How can I produce black oxidizing with a nickel solution on various metals?* H. & V.

ANSWER:—The nickel oxidizing can be produced by dissolving in water sulphate of copper and sulphate of nickel in equal proportions. Use a nickel anode. The metals to be oxidized should be cleaned in the usual manner before placing in the bath.

QUESTION No. 1364.—**A Cheap Grey Finish Solution.**—*I am using a platinum solution in order to give silver a grey finish, but find it too expensive. Can you suggest something cheaper?* G. F.

ANSWER:—An imitation of platinum is made by dissolving sulphate of iron in muriatic acid and adding an equal amount of this solution to the platinum solution. A heat should be used in drying this, as it brings out a reddish brown tone, due to the iron.

QUESTION No. 1365.—**Water Lacquer.**—*Please give me the formula for making a lacquer which I can use for cheap brass articles.* B. C.



ANSWER:—A lacquer that is suitable for brass articles and which may be produced at about 10 cents per gallon is made by dissolving 4 ozs. of imported gelatine in one gallon of boiling water, and using the solution as a lacquer. The goods are dipped or prepared in the usual way and immersed in the water lacquer at a high temperature. The heating should be done by means of a water bath or steam pipe. After lacquering shake off the superfluous lacquer and place in a heater to dry.

QUESTION No. 1366.—**To Clean Show Cases.**—*Will you kindly give me a good polish which I can use to renew the polished and varnished surfaces of wood, stone and metal trimmings about my jewelry store? I want it especially for the show cases.* C. I.

ANSWER:—In a recent number of *Fran Horlogue*, the following is recommended and may answer the above question: A good polish is composed of the following ingredients, though the proportions may be varied: Cereal flour or wood pulp, 38 per cent.; hydrochloric acid, 43 per cent.; chloride of lime, 18 per cent.; turpentine, ½ per cent. After mixing the ingredients thoroughly in order to form a homogeneous paste, the object to be treated is smeared with it and allow to stand for some time. The paste on the surface is then removed by passing over it quickly a piece of plush, leather or a brush, which will remove dirt, grease and other deleterious substances. By the application of a little friction with a cloth or piece of leather a polished surface will be imparted to wood and objects of metal will be rendered lustrous. An addition of chloride of lime tends to keep the paste moist for a considerable time, whatever the temperature, thus allowing the ready removal of the paste without damaging the varnish or polish, while the turpentine serves as a disinfectant and renders the odor less disagreeable during the operation. The product is rapid in its action and devoid of ingredients which might affect the varnish or polished surfaces of wood or marble. While energetic in its cleaning action on brass and other metal objects, it has no corrosive effect

LIGHT is the *sine qua non* of Art. It is the Revealer—the indispensable accompaniment. It is a felicitous combination that unites Light and Beauty in one creation, that uses an Art product as the vehicle of Light.

This consummation is attained in the most admirable manner in our Electric Lamps and Illuminated Figures. It is really marvelous what a variety of charming effects are represented, ranging from the more conventional types to the most unique and fanciful conceptions. All the richest and most modern examples of artistic lampmaking.

Lamps for everywhere: piano and desk, parlor and library, smoking-room and den, hall and cosy-corner. Their glow awaits you.

## Merit in Manufacture of Pottery.

By Charles F. Binns, in the *Glass and Pottery World.*)

DOES merit always win out? Does it ever? The tale of the modern manufacturing backed up by that of the retail store would seem to be that it is price that wins always; but is this true? And if it be true, why is it true?

There is a strong demand for old pottery. So constant is the demand that numbers of imitations are made and sold, for the supply of the genuine old wares can not keep pace. This demand is caused partly by the fact that all china is in fashion and partly by the fact that those who know a good thing when they see it cannot find modern wares suited to their tastes. That the second reason is the more potent is proven, because there is some old ware which has little or no merit, and for this there is little or no demand.

In making a comparison between old china and modern, like must be compared with like. It would not be fair to contrast Greek pottery with the stoneware of to-day, nor Sèvres porcelain with hotel china, but the English earthenware of 100 years ago may very well be pitted against the modern staple of East Liverpool, and old Worcester procelain may be placed in the same class with the best factory product of to-day.

This comparison is instituted upon the quality which appeals to the purchaser, not upon body composition or any technical point. It is of no consequence to the average purchaser whether the ware be bone china, spar china, granite or c.c., if only it be pleasing. Of course, the quality of translucency is a factor in giving pleasure, but it is not the most important. To illustrate this, it is a fact that a well-known European house has lately introduced a new earthenware. It is, frankly, an earthenware; it pretends neither to translucency nor vitrification. It is given no fancy name, such as "porcelaine opaque," but it is so beautifully made, decorated with such reserve and finish, is, in a word, such a perfect earthenware, that it is selling well. The wares of 100 years ago were produced under conditions very different from those which prevail to-day. Then each factory had something of a specialty, each manufacturer was an enthusiastic potter. Then the desire was to make as well as could be made, to earn a reputation and consequent emoluments. Now the controlling impetus is competition, a struggle, not of quality, but of cheapness. Now the manufacturer is, or seeks to be, a great financier. In some cases he scarcely knows one clay from another, but he must, at all costs, make money.

As it is hoped that these lines will be read by manufacturers, an apology is here offered, with the assurance that the author is attributing no blame to them. They are in the toils of a system, but the system should be broken down.

To resume: The plan of the last century was to make each piece carefully and to decorate it with taste, with the result that the work holds the field for merit to-day. The plan of this 20th century is to rush as much as possible ware through the shops and kilns to base the claim for orders upon a low selling price. It would be absurd to expect the same quality in the latter case as in the former, and yet we wonder at the demand for old things. Glance for a moment at the procedure in each instance.

In the olden time the manufacturer was a master potter. His capital was not large, nor were his workmen numerous. He managed the factory himself, and it was his individuality which produced the shapes and decorations. No vast amount of business was done, but he had a comfortable home and a reasonable balance at the bank. His product was sought after and his name became a household word among the lovers of pottery.

The manufacturer of to-day controls large finances. Besides the money invested in pottery he has interests in steel or in rubber or in real estate. The direct management of the works is in the hands of a superintendent. The models are bought from a trade modeler and the decalcomania prints from a large producer. Pottery is shipped by the carload, but in a trainload one might search in vain for a reputation. And in the face of this contrast is the fact that six new potteries are lying idle because they cannot be made to pay, and that a new pottery of mammoth capacity is being erected. Truly, a paradoxical state of affairs. The six idle potteries represent the past, the mammoth plant the future. The separate plants, properly managed, would mean diversity of product, individual expression, interest and merit. The large plant, evenly managed in the best way, must mean one-man control, uniformity of product, bulk not beauty.

This reverts to the proposition that the salable quality of pottery is the power of giving pleasure. None of these plants was expected to produce bath tubs or sanitary ware, but that called "general" table furnishings, bedroom services, jugs and the like. These things are mostly bought by women, and they buy that which will please. It is, therefore, reasonable to suppose that in the work of six different producers there is more chance of pleasing than if the work came all from one hand. But, alas! there is here the shadow without the substance. These six plants were, in all probability, no better off than the one, for the same trade modelers would supply their shapes, the same print merchants their decorations. There is separation, but not individuality.

Is there no way out? Manufacturers are rushing themselves and their employes, with very little profit to either. Is there not a way by which good work can be done in a quiet, thoughtful way, with as much profit and a great deal more peace? In other words, would it, necessarily, be a retrograde movement to revert to the practice of 100 years ago?

We must be prepared to distinguish between goods produced by pure mechanical skill and those manufactured in the spirit, nominal at least, of the artist. In the former, as in the production of iron and steel, brick and sewer pipe, the world was never better equipped than to-day, but in the latter the contrary is the fact. It has already been pointed out that general pottery sells because of its power to please, which means that the æsthetic sense prevails to a large extent. But it is recognized among artists that the past was more fruitful than the present. The "old masters" are honored because of their unrivaled power and in the cycle of ceramics there is nothing finer than the old work emanating from Sèvres and Berlin and Worcester and Chelsea.

The remedy for the present depression and collapse of American general ware is to be found in a revival of the spirit which made every master potter an enthusiast for his art. If the wealthy manufacturer of to-day will spend his money upon fine specimens of old china and will place these where they can be studied by his workmen, something worth while will be accomplished. But such action as this savors of shop and the money had better be spent on an automobile and a yacht. Then the factory and all its doings can be shaken off for a while and he can forget that such a thing as pottery exists.

But it is not by shaking off shop that

reputations can be or will be made.

Why harp upon reputation? Nine people out of 10 do not know what they are buying. They select a service which pleases them, no matter who made it. This is, unfortunately, true of the American product, but not of imported wares. On the contrary, the average purchaser in the city knows at least the name of Minton, Cauldon, Coalport and Worcester, and it is against these reputations that the American manufacturers must compete. Reputation can only be met by reputation, but the competition here is all on other lines. A dealer imports a fine service. It is seen by an enterprising manufacturer and he argues that he can produce something like it a good deal cheaper. Thus does degeneration set in. Instead of this the argument should run that he can make something just as good, or, possibly, a little better. Then the ideal set before the factory will be quality rather than cheapness, perfection rather than push. It may not be possible to acquire this spirit at once, but it is quite certain that only along some such lines can the pottery of America attain its rightful place in competition with the world.

## General Appraisers' Decisions on Glass and Terra Cotta.

DECISIONS by the Board of United States General Appraisers, New York, in cases involving the duties on manufactures of glass and on terra cotta were published last week by the Treasury Department as follows:

GLASS MEDALLIONS.—Protest of Geo. Borgfeldt & Co. against the assessment of duty by the Collector at Boston. Protest sustained on the authority of G. A. 6064 (T. D. 26446), relating to glass medallions.

GLASS BLANKS.—Protest of B. Gunthel against the assessment of duty by the Collector at New York. United States *v.* Durand (T. D. 26123) followed, relating to glass blanks.

TERRA COTTA WARE.—Protest of Aimone Mfg. Co. against the assessment of duty by the Collector at New York. The Board affirmed the action of the Collector in classifying certain terra cotta ware as decorated earthen ware under Par. 95, Tariff Act of 1897.

Wm. E. Tracy, Norway, Ia., has sold out his business to K. E. Smith.

## THE COMMENTATOR

HIS VIEWS AND CRITICISMS

### The Development of Color Effect in Ceramic Works.

IT is doubtful if any age has ever excelled the present in the skillful handling of the element of color. One may sometimes hear expressed a tradition (it can hardly be called anything else) to the effect that the ancients possessed color secrets unknown to-day and were able to produce effects now unattainable. Such assertions should be taken with a grain of salt. Certainly a ray of sunlight has the same qualities now that it had of old, and there are just as many colors revealed by the spectrum. The assumption is warranted that facility in handling color has greatly increased in modern times, owing to the greater variety and availability of pigments, improved methods of mechanical treatment, more scientific study of color and the development of fine taste as to colors, singly and in combination.

The history of porcelain, for example, has been progressive, and not retrogressive with regard to color. The original hard paste porcelain, the secret of which was brought from China in 1512 by a Jesuit missionary, was difficult to decorate, as only two ground colors could be used to advantage, a deep cobalt blue and a dark chrome-green. Soft-paste porcelain, introduced later, was capable of incorporating a variety of colors. The distinction is no longer so important, because the development of the art has brought hard-paste, as well as soft-paste, under the dominion of the colorist, and one may see both types of porcelain manufactured in the same establishment. Certain limitations as to color have been imposed also by the relation which the design bears to the glaze, whether applied under it or over it. But these limitations present no real obstacles, because the manufacturer has the option of using either underglaze or overglaze trea

THE EXCLUSIVE ART GOODS HOUSE

# The Glory of Art.

Bronzes, of all the products of the fine arts, appeal most strongly to human sympathies. They represent man's study of man—man's own ideal and apotheosis. They unite the most solid realism with the highest poetry. Their technique almost touches the secret of creation, for their semblance of life stops just short of the breath of life.

The inspirations of the great masters are here brought before us. Pieces depicting the gay chivalry of the tournaments, Bravery and Beauty. Figures of Labor showing the naturalistic tendencies of present art—the Miner, the swarthy Blacksmith, the Woodchopper with uplifted ax, realistically and effectively posed, full of life, energy and vehement action; the athletic Mower, so finely and fitly presenting the modern peasant type.

Barye subjects, vividly showing the spirit and power of this eminent sculptor of animals. The lions seem to roar with their open jaws and one hears the cracking bones which the tigers are crunching. There are cows, sheep, bulls, displaying an intimate acquaintance with the habits and anatomy of the domestic animals, mostly in the green finish.

A masterpiece is the imposing and spirited Colleone showing the stalwart and haughty warrior boldly seated on his pawing horse, a superb reproduction of Verrocchio's heroic statue in Venice. There are Vases in entirely new decorations. Busts and Fancy Pieces in profuse variety. Vienna Bronzes, Sevres Bisque and figures showing a happy and picturesque combination of bisque and bronze.

ment, according to the effect he desires to produce. Thus the products of to-day revel in color, and ring the changes in every conceivable tint and shade.

Important as are considerations of form and design, the matter of color is scarcely less so. It is not a mere incident, a minor detail; it is a prime object in itself. Color has an appreciable commercial value. It responds to influences of supply and demand, like a merchantable commodity. That there is an appetite for color is evidenced by the displays. Nor is the emphasis of this feature confined to art wares, but the same tendency is apparent in all the finer lines of manufacture where color is a feature; and it is being made an object in lines where formerly it was slighted. Color follows the caprices of fashion, has its vogues, and even its fads.

Different seasons bring different colors into predominance. This is not a matter of chance or caprice, but is the result of some definite impulse felt and responded to by the manufacturer. Any one browsing among the ceramics now being displayed will notice a variety of colors, but one or two in particular will impress him as predominating. He will note the prevalence of certain greens and blues. What is the influence that singles out certain shades and colors, and decrees that this and that shall come to the front in any particular season? On first thought one might hazard a guess that the house furnishers and decorators of Paris have something to do with it. When in doubt look to France; that is a good rule in matters artistic. Every one is familiar with the tendency to follow definite color schemes in the furnishings and equipment of individual rooms. Thus we have red rooms, blue rooms, green rooms, etc. The manufacturer naturally is impelled to have his wares conform with such requirements. But on further thought this explanation may appear inadequate, and one may be disposed to look farther than the manufacturer of art wares and the house furnisher and decorator. What impels the latter to give prominence to this color or that in providing artistic environment in the domestic establishments of wealthy patrons? Here we come to the eternal feminine. The *grand dames* naturally want appropriate settings for their personal graces and their gowns; and so the modiste has a hand in the matter, too. This may not explain the whole of the color impulse, for we must allow a margin for independence and originality on the part of the manufacturer; but the theory is plausible.

There is a positive charm just in mere color. It may often be more pleasing alone and in itself than extravagant overelaboration. Ginger-bread effects are admittedly inartistic. Special interest attaches to certain unfamiliar tints and shades, what may be called "off colors." For example, several persons recently examined an effect in light blue with just a touch of yellow in it, so as to place it on the very border line between blue and green. Some referred to it as light blue; others as pale green. One would never imagine they were referring to the same thing. There were heated arguments over it. Agreement was hopeless. On such trivial themes are controversies born.

# THE RAMBLER'S NOTES

**NOTABLE DISPLAY OF ARTISTIC CLOCKS.**

PARISIAN manufacturers of novel and beautiful clocks have sent to Harris & Harrington, 12 Barclay St., New York, an assortment so rich and varied that the retailer will take a distinct pleasure in inspecting it. The firm has been lavish in assembling for the American trade the most artistic productions of the present season in the French studios and factories, so that to take even a glance at the well-filled shelves and tables will give a delightful occupation for a few hours to the admirers of the best in these artistic products. The visitor will notice the full line of French 400-day clocks, mounted in all sorts of patterns, simple and elaborate; these clocks are guaranteed to keep time with a single winding for 400 days. There is a wide collection of striking and repeating clocks of the traveling class in sizes from two and a half inches up, and also regulators in equal variety. In *art nouveau* there are bronze cases finished in a new process, in which the etching is first completed, after which the coloring is applied. Among the larger clocks may be mentioned particularly a chiming clock in heraldic style of real bronze, with mercurial gilding. This clock stands nearly three feet high, and accompanying it are candelabra in harmony of size and form. Another set that is especially attractive is of real bronze, with mercurial gilding, in Louis XVI. style. Perhaps the most enthusiastic admiration will be expended on a clock in a red gold finish of bronze, in rococo architecture and with cloisonne enamel. The carving, from the ornamental base to the beautiful columns and top, is most elaborate and artistic. The dial is an excellent example of raised and pierced enamel work. The half hours are struck on a gong. At the hours a deep gong strikes the number. Then a bird of gay plumage, standing directly over the dial, opens its beak, flaps its wings, spreads its feathers, and sings sweetly—not a few notes only, but a lusty, cheerful song, such as greets you from the throat of your favorite canary. As the sweet-toned warbler's notes cease they are followed by the clear and pleasing melody of a music box, which plays a different air for each of 12 hours and will repeat as often as desired. These are a few of the clocks that may be seen, but all who are interested are advised by all means to see for themselves the splendid assortment which gives to the buyer so wide a choice.

*

**RICH NOVELTIES IN VARIOUS LINES.**

BEAUTIFUL and novel productions in many lines are to be seen in the salesrooms of Glaenzer Frères & Rheinboldt, 28 Washington Pl., New York, and show results of the searches made in the studios and workshops in Europe in the past season by this enterprising firm. In marble busts there is a larger display than has ever before been made by this house, which is already distinguished for its success in obtaining desirable and effective works of the foreign sculptors. There is a line of historical subjects like Dante and Napoleon, etc., carved in Carrara marble in an antique polish and finish. The muses and other mythological subjects are represented by graceful heads. Another line is named after various flowers, each maiden gazing at a blossom. A child in repose shows the head dropping with fatigue, and conveys an idea of the little one resting after a day's hard play. Another bust shows the child at study, with inimitable expression of face and pose. Among the life-sized heads the "Peasant of the Alps" is one of the most pleasing, the subject being a modern Swiss girl. The Sèvres china has received many additions this Fall, including new pieces in *pate tendré*. The plates in old gold, dark green and brown colors show the latest products in form and decoration. The Dresden ware is also enlarged by the receipt of plates and other chinas executed in new and pleasing forms and ornamentation. The visitor cannot fail to pause in admiration before the line of pure white plates with borders decorated in garlands. In the center is a wreathed medallion in raised gold and with a figure in colors. Perhaps the most striking novelty is the *gres flammé*, shown this season for the first time. The vases, urns and other classical shapes come in deep red, blue, green jasper and soft blends, in handsome gold bronze mountings. Potter and metal workers have combined their labors in producing wares that appeal to the most discriminating taste.

THE RAMBLER.

## Pâte Sur Pâte.

THE "Slip" process of pottery decoration which is simply pressing liquid decoration through a nozzle upon the unbaked surface, is closely connected with *pâte sur pâte*. In Italy a ware of this sort is extensively fabricated, and it requires a very skillful hand to dash on at one stroke with the liquid slip, the conventional flowers and animals that suit the taste of people who understand pottery.

A Milan manufacturer having engaged for that special work a pastry cook who was extremely clever at embellishing his cakes with designs in syrups and currants, has found his talents so successful when they directed to pot painting, and his work meets with such a demand that he realizes more profit out of the extemporized artist than he would out of a half dozen china painters.

J. Hensley, Decatur, Ill., formally opened his new store a short time ago. A feature of the opening was the serving of cigars and the distributing of carnations by the jeweler's two little daughters.

TH YEAR. NEW YORK AND CHICAGO, WEDNESDAY, NOVEMBER 1, 1905. VOL. LI. No. 14.

# AN ARTISTIC TESTIMONIAL TO A FAMOUS RAILROAD MAGNATE.

N artistic and attractive silver loving cup, designed and manufactured in surprisingly short time, was presented J. J. Hill, the president of the eat Northern Railway, at a dinner given pt. 16, in Minneapolis, Minn. In this testi- simple, modest bearing which is characteristic of the western man in his personal relations. As will be seen by the accompanying photograph, the driving-wheel of a locomotive forms the base of the cup, and above is seen the paddle-wheel of a steamship, thus suggesting the success of Mr. Hill in building up important transportation systems on land and water. The recipient's portrait, in relief, is placed in a frieze at the top of the bowl, and two other medallions contain the seals of the State of Minnesota and the city of Minneapolis. Laurel and oak leaves, palms and festoons are tastefully used in the scheme of decoration. The handles are horns of plenty, recalling the abundant fruits of Mr. Hill's many enterprises.

MASSIVE SILVER LOVING CUP PRESENTED TO JAMES J. HILL ON HIS SIXTY-SEVENTH BIRTHDAY.

ne ial of good-fellowship the entire ornamentation expresses in symbolic form the entiments which Mr. Hill's friends desired o convey to him.

The body of the bowl is strong in its olonial simplicity, emblematic of the

This inscription is placed on the bowl: "To Mr. James J. Hill, Builder of an Empire, Presented by Minneapolis Friends on His 67th Birthday, Sept. 16, 1905."

This fine example of the silversmith's art

LEATHER EBONY

# Leather:

## Its Adaptability.

FEW SUBSTANCES are more adaptable than Leather to social and artistic uses. There is no form into which it cannot be shaped; no quality of texture, light or heavy, for which a suitable leather cannot be found; no tint or shade in all the range of the spectroscope that cannot be applied; no style of finish that cannot be adopted at the behest of fashion.

The products of this house are concrete examples of the adaptability of leather to beauty's standards and society's demands.

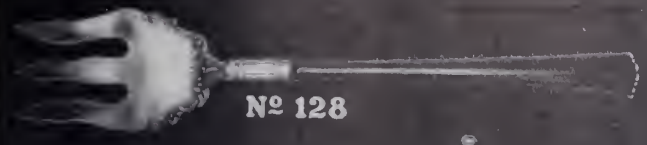
## DIAMOND-PLATINUM JEWELRY.

**Jewelry Fashions.** There is no doubt that Jewelry is affected by varying vogues and fashions, as are other popular trade products. It is a characteristic of SCHICKERLING creations that they are not only high class in themselves, but they are strictly in keeping with the demands of the best taste of the period.

**Collarettes.** At the present time the Collarette is especially prominent among the finer showings; and its nature permits of a variety of rich effects, to which gems and decorations both contribute. The finest pieces in this line range in price from $250 to $2,000.

**Bracelets.** Another product enjoying increased popularity this season is the Bracelet. This welcome revival affords opportunity for the daintiest and richest craftsmanship. The qualities of style which mark the general product of this house are present to a marked degree in the Bracelets shown. Superb examples ranging in price from $20 to $300.



**Exclusive Designs.** In the finer grades of Jewelry produced at these factories, only one piece of each kind is made, rendering the designs "exclusive" in the strictest sense. This policy is consistently carried out with regard to all the more expensive pieces.

| Other countries | 8,390 | 8,410 |
| Totals | $66,300 | $223,629 |

A novel clock has just been patented by the Goldsmith Co., Philadelphia, Pa. It is called the "Time is Money Clock Bank." Enclosed in a highly ornamental case, finished in Flemish brass, is a perfect alarm movement and a strong steel bank. To look at this ingenious device one would never suppose that it served any other purpose than that of a timepiece. It is only when you turn to the back to wind it that you are aware of its real purpose. The winding keys are thoroughly protected, and cannot be reached until a coin is inserted. Any piece of money will answer, from a penny to a dollar, only something must be saved each night in order to wind the clock. The novel and attractive features of this clever creation are exciting a great deal of public comment throughout the country, and it gives promise of being a good holiday seller.

# AIM

to buy gold jewelry that you can thoroughly recommend to your customers in the essential points of QUALITY and CONSTRUCTION.

¶ To do this successfully buy only gold jewelry that has a trade-mark stamped upon it; this is the safest way to prevent the purchase of goods sailing under false colors in quality or construction.

¶ Trade-Marked jewelry readily identifies the maker and holds him responsible if any piece does not measure up to the above qualifications.

¶ We stamp every ring, button, locket or stud with this registered  trade-mark and back of that trade-mark stands many years of honest manufacturing.

¶ No stronger argument can be used to convince any retail jeweler to buy liberally from our salable line of goods.

Vera Cruz: 4 packages plated ware, $288; 2 packages watches, $375.

Vienna: 1 package engraving machinery, $530.

---

The safe in the store of J. C. Vicker Hull, Ia., was dynamited, last Wednesday, by thieves, who got away with $1,500 worth of jewelry.

According to a daily exchange of Wakita, Okla., George W. Six, a retail jeweler, of that place, "has announced that he has added a junior partner to his jewelry business by the arrival of George Six. The boy will 'sub' as an apprentice for several years yet before he puts him on the repairing bench."

## Information About the International Exposition at Milan, Italy.

IN order to appropriately celebrate the completion of the Simplon Tunnel (one of the greatest known triumphs of engineering) an International Exposition under Royal Patronage will be held in Milan from May to November, 1906. It will be the largest European Exposition ever held outside of Paris, and practically all of the European countries will participate officially as well as several Asiatic Nations.

The dominant feature will be Motion. All products, as far as possible, must be shown in connection with the processes, thus filling the halls with *live* exhibits. Arrangements will be made for field tests and competitive trials in all classes where it is expedient.

The marvelous industrial and economic development of the Kingdom during the past decade has made Italy the best European market for those products that the United States can well supply. This prosperity places at the disposal of the people the means to purchase amusements and luxuries as well as the necessities of life. Consequently a large attendance at the Exposition is confidently expected.

The great success that attended the Turin Exhibition of Decorations has prompted the Milan authorities to set aside a special pavilion for Decorative Arts. They are very desirous to see the United States well represented in this section. One of the large buildings will contain all forms of welfare work, grouped under the several heads: Mutual assistance and insurance, co-operation, savings institutions and popular credit, protection of labor and insurance against enforced idleness.

Milan is the centre of the most productive section of Italy. Its population is 1,500,000, while Lombardy, no part of which is more than three hours distant, has nearly 5,000,000 inhabitants.

Genoa, the port of entry, is less than 100 miles distant. The cost, therefore, of transporting exhibits from the United States will be comparatively cheap.

The American commissioners visited Milan during the past Summer and carefully inspected the preparations that are under way for the Exposition, and also investigated the conditions to see if they promised satisfactory returns in the way of new business for such firms as might exhibit from this country. The evidences were so unmistakably favorable that they, on their own responsibility, engaged, before it might prove too late, a large section for the exhibits from the United States.

For terms of space or information as to the Exposition, application should be made to J. H. Gore, George Washington University, Washington, D. C., or L. S. Ware, 54 Rue de la Bienfaisance, Paris, France.

M. J. Averbeck, 19 Maiden Lane, New York, has just mailed a handsome catalogue to the trade. The book contains 96 pages of description, photographs and prices, all interesting to retail jewelers. It shows a general line of high and medium priced goods that are in constant demand. The first five pages show brooches of various designs. Then follow pages illustrating scarf pins, rings, hat pins, cuff buttons, etc.

# DAY-CLARK DECORATIONS.

EVERY MANUFACTURER, no doubt, has some characteristic tendency as to decoration, whatever variations of form and effect his goods may possess.

Probably the adjective "refined" best expresses the quality or phase of taste exemplified in the decorations which adorn the products of this establishment.

The aim is that effects should be rich, rather than merely "showy"; and this richness indicates genuineness throughout.

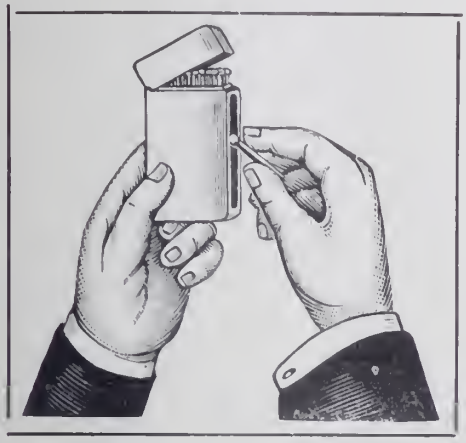
### Decisions of the United States Circuit Court in Customs Cases on Various Subjects.

L. W. Levy & Co. won their case in relation to the duty on miniature opera glasses used as World's Fair souvenirs at the hearing which took place last Friday before Judge Hazel in the United States Circuit Court. The merchandise was assessed by the Collector of New York at 60 per cent ad valorem as jewelry under Par. 434. The Board of United States General Appraisers held that the articles were not jewelry and were properly dutiable at 45 per cent., under Par. 193, as articles not especially provided for in the act. The court affirmed the Board's decision.

A number of cases involving the duty on imitation pearls and half pearls were decided by Judge Hazel in the United States Circuit Court last Friday in accordance with recent precedent. In each case the Board of United States General Appraisers was sustained, thus giving the victory to the importers. Among the importers who had cases so decided were Albert Lorsch & Co. Nordlinger & Mamluck, R. C. Hahn & Co., Hensel, Bruckmann & Lorbacher. In these cases the Government had assessed duty at 45 per cent., under Par .112, relating to manufactures of paste, except when the imitation pearls were pierced or mounted on wires. The pierced imitation pearls were assessed at 35 per cent. as beads, under Par. 408, and those mounted on wires as jewelry at 60 per cent., under Par. 434. The importers uniformly claimed a duty of 2[illegible] per cent., under Par. 435 relating to imitations of precious stones and the court acquiesced. Some of the cases have been pending for six or seven years.

### Death of Adelbert Merz.

PITTSBURG, Pa., Oct. 27.—Adelbert Merz, one of the best-known jewelers in this section of the country, who retired a number of years ago, died Thursday at his home in Sewickley, Pa., aged 76 years. He was ill but a short time, pneumonia being the cause of his death. For a number of years Mr. Merz was engaged in business at Fifth Ave. and Market St., this city, under the name of Grogan & Merz, the successors being the present firm of J. C. Grogan & Co., one of the most prominent jewelry establishments in Pittsburg.



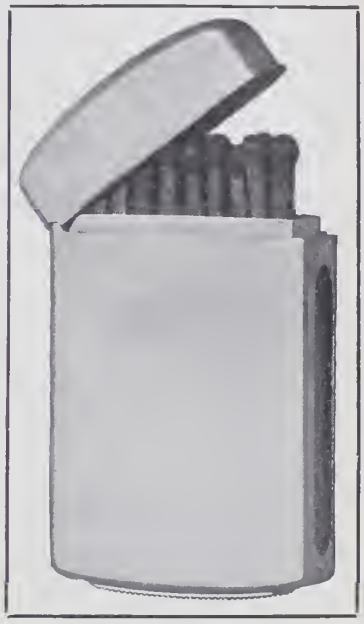
Mr. Merz was born in Hessen, Germany, and came to this city from New York in 1857. A few years later he went to Augusta, Ga., but came back to Pittsburg in 1885. Two years later he moved to Sewickley, and for the last 18 years had been proprietor of a jewelry store there, which of recent years has been conducted by his son, August Merz, the father having retired from active business some time ago.

Mr. Merz is survived by a widow and the following children: Mrs. Eleanor Nesholson, Allegheny; Mrs. Frank Hite, Mrs. William Hite, Mrs. Sophia Baltz and Kate, Louise, Augusta and Adelbert, Jr., all of Sewickley.

The wife of J. H. Taylor, a watchmaker of Trinidad, Col., died recently, at the latter place, as the result of an overdose of gelsemium, which she had been taking as a heart tonic.

# The Standard Patent Safety Pocket Match Box.

A TWENTIETH CENTURY CONVENIENCE. Made in Gold and Sterling Silver.



## For Safety and Ordinary Matches.

Compact and Convenient. Dispenses with the clumsy original box.

For safety matches, a solid cake of igniting composition (not a mere strip) is inserted in the edge of the box. This will last about six months, and can easily be replaced when worn out, by a new cake.

For ordinary matches the usual scratcher is provided on the bottom of the box.

ALL BOXES ARE STAMPED WITH OUR REGISTERED TRADE MARK GUARANTEEING BOTH QUALITY AND FINISH.

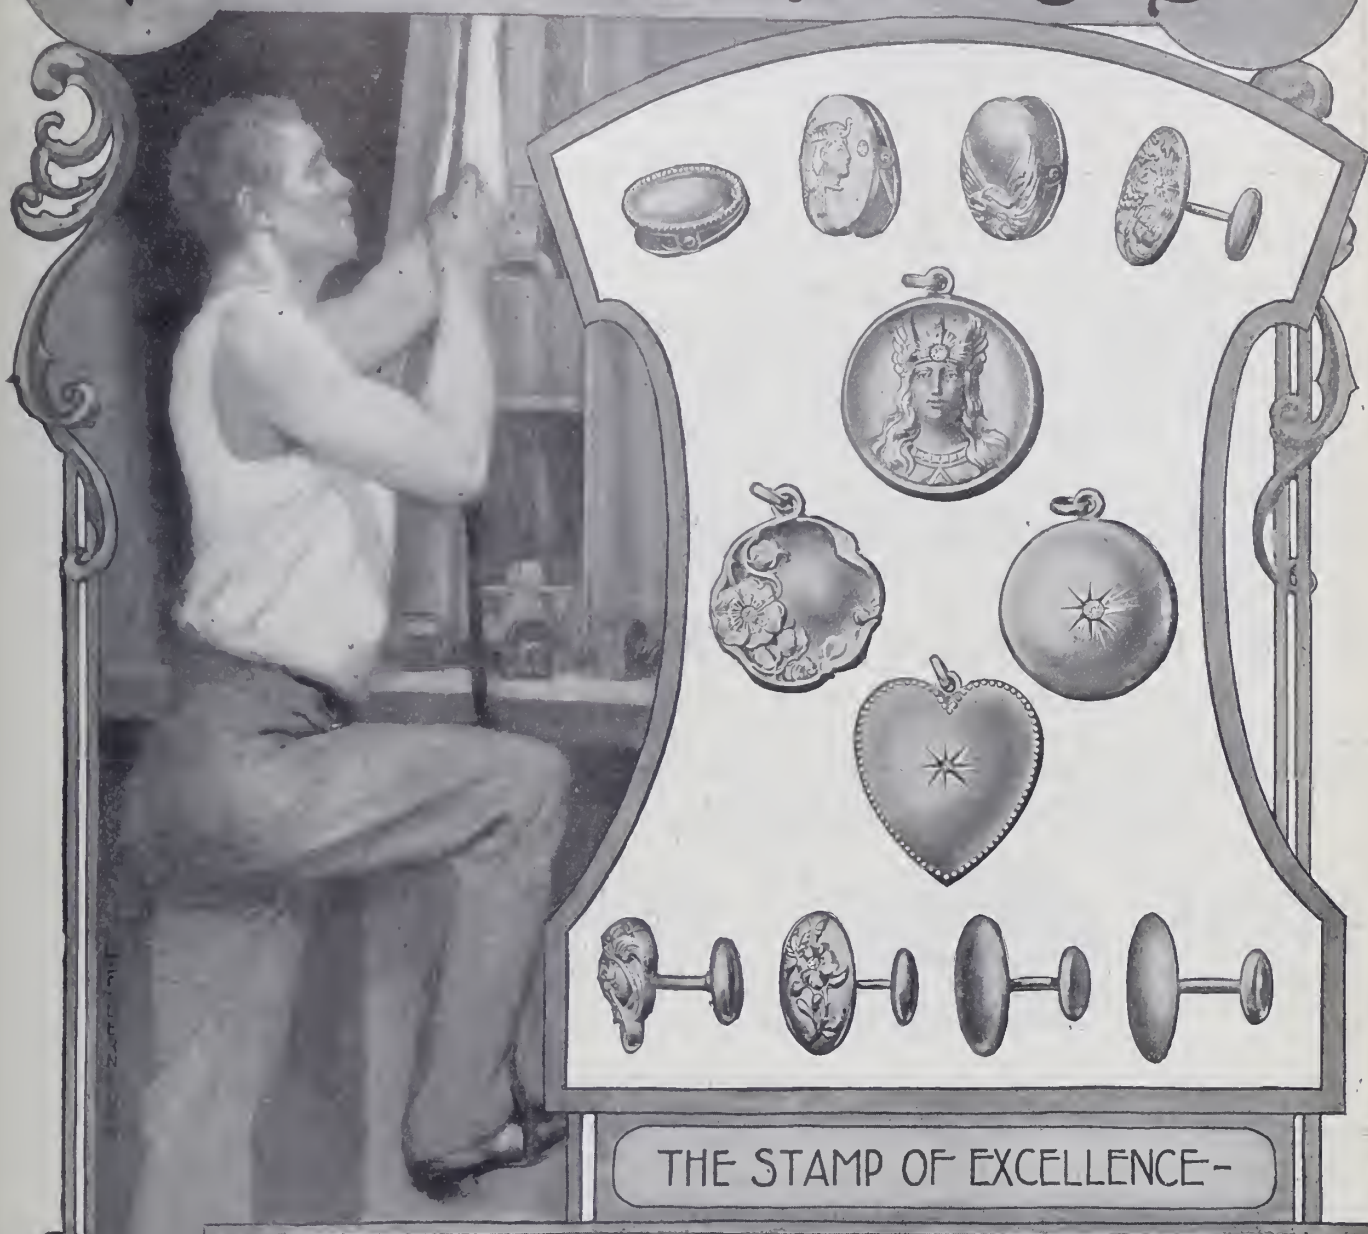
## Demurrer to Asher Green's Suit for Conspiracy Sustained by Court of Appeals.

ALBANY, N. Y., Oct. 25.—In the Court of Appeals a decision was rendered yesterday against Asher Green, respondent, on the demurrer to his case against Andrew J. Davies, Wolf Green and Israel Oppenheim, appellants, and James S. Gorman, defendant. This victory for the defendants comes after several defeats in the lower courts. There has been as yet no trial of the merits of the action. The plaintiff is a salesman for M. J. Averbeck, 19 Maiden Lane, while Wolf Green is head of the firm of W. Green & Co., 6 Maiden Lane, New York. Gorman was a bookkeeper for the latter concern.

The case before the Court of Appeals came as an appeal from an order of the Appellate Division, First Department, affirming an interlocutory judgment of the Special Terms, which overruled a demurrer to the complaint. The decision says: "The order of the Appellate Division and the interlocutory judgment of the Special Term should be reversed and judgment rendered for the defendants on demurrer, with costs in all the courts, with leave to the plaintiff to serve an amended complaint within 20 days on the payment of such costs."



All the judges concurred, Judge O'Brien being absent. In the opinion written by Chief Justice Cullen, the antecedent litigation is briefly reviewed and the court gives the reasons for sustaining the demurrer and overruling the lower courts. The opinion recalls that in the complaint made by Asher Green he charged the defendants with slander and with maliciously causing his arrest in a civil action.

To this complaint the defendants demurred on two grounds. The first was that there was a misjoinder of causes of actions; that a cause of action for slander and one for abuse of legal process could not be joined in one action. The second ground of the demurrer was that a cause of action for slander uttered by one person could not be joined to causes of action for slanders uttered by other persons. The lower courts overruled the demurrer. As to the first ground of the demurrer, the lower courts held that the alleged slander and the alleged malicious arrest were only manifestations of a conspiracy charged against the defendants, on which the suit was really based by the plaintiff.

The Court of Appeals reverses the lower courts by upholding the first ground of the demurrer. The Chief Justice in his opinion says that a suit for slander cannot be joined to one for malicious arrest, even when conspiracy is alleged. In a criminal proceeding, for conspiracy, combination is the gist of the offence, but this principle cannot be applied to actions in tort, as proposed by the plaintiff in this case.

In relation to the second ground of demurrer, the court upholds the complaint. The Chief Justice says that, while the utterances of different slanders by different persons would not give ground for uniting the several causes of action, yet it is conceivable that the same slander might be uttered by various persons hired or incited to repeat it, and in that case all who uttered

the slander might properly be joined as defendants.

The decision practically ends the action in its present form, because the claim for conspiracy as a cause of action is destroyed, and the plaintiff if he desires to insist on both claims, for slander and arrest, must amend his complaint so as to divide the action into two suits.

In the litigation S. Livingston Samuels appeared as attorney for the defendants, while Laurence G. Goodhart represented Asher Green. Mr. Goodhart says that he will continue the litigation by amending his answer according to the approval given by the Court of Appeals and dividing the causes of action. On the defendants' side it is said that if the plaintiff will now put his pleadings into proper shape they will promptly serve their answers and will be ready to try the merits of the case in court.

### Origin of South African Diamonds.

AN interesting paper on "The Diamond Pipes and Fissures of South Africa" was recently read before the British Association by H. S. Harger. The author considers that the age of the Orange River Colony and Cape Colony pipes is Triassic (late) or Jurassic, and that the Pretoria pipes are contemporaneous. "They are," he said, "the latest eruptives of South Africa."

The origin of the blue ground in the pipes Mr. Harger considers due to the shattering of the ultra basic rocks, such as eclogite, pyroxenite and lherzolite, all of which are commonly met with and are made up of the minerals which form the bulk of the blue ground. In these rocks garnet occurs plentifully, and also olivine and pyroxene. The diamond has frequently been found crystallized in garnet, and more rarely in olivine; hence the gem must have had its genesis in the ultrabasic zone in which those minerals originated.

The experiments of Crookes and Moissan suggest that the presence of iron was necessary for the formation of the diamond; but to this Mr. Harger objected, owing to the fact that the necessary iron does not exist in the diamond mines, and also because Dr. Friedlander's experiments proved that diamonds can be formed in olivine without the enormous pressure and heat aimed at by other experimentalists.

In conclusion, the author expresses the opinion that a deep-seated ultra-basic zone, in which garnet and ferro-magnesian silicates predominate, was the medium in which the crystallization of the diamond occurred.

## Annual Meeting and Banquet.

### Officers Elected by the New England Manufacturers and Silversmiths' Association.

PROVIDENCE, R. I., Oct. 28.—The annual meeting of the New England Manufacturing Jewelers' and Silversmiths' Association, held Thursday evening in Masonic Hall, on Dorrance St., was distinguished by the presentation of encouraging reports and the election of a new president, William A. Copeland, of Martin, Copeland & Co., of this city. Henry G. Thresher, of the Waite,

WILLIAM A. COPELAND,
President-elect.

Thresher Co., who has served with distinction, declining a re-election.

There were 112 active and a large number of associate members in attendance when the meeting was called to order. Dinner was served at 6.30 o'clock, after which there was a business meeting. The dinner was wholly informal and was thoroughly enjoyable in every respect. It was one of the occasions which the jewelers find all too few, and business acquaintanceships were renewed and friendships made stronger as a result of the "reunion."

President Henry G. Thresher presided at the business meeting, and presented his annual report, which was listened to with interest. It was in the nature of a review of what the association had done during the past year, and showed that the organization had been far from idle and that the 12 months of endeavor had been far from profitless. Treasurer William P. Chapin reported that the finances of the association are in a flourishing condition, and Secretary Charles E. Hancock told of matters of interest to the association members. There are at the present time over 300 members on the rolls, and the organization is very much alive. A new set of by-laws was submitted by the committee having a revision of the governing rules in charge, and there were the customary reports from

other standing committees of the organization.

When the election of officers came up it was announced that President Thresher had declined to allow his name to be presented as a candidate for re-election, and accordingly the following list of officers submitted was approved:

President, William A. Copeland, Providence; vice-presidents, Albert A. Bushee, Attleboro; Theodore W. Foster, Providence; George K. Webster, North Attleboro. Treasurer, George H. Holmes; secretary, Charles E. Hancock, Providence.

Directors: Roswell C. Smith, Providence; Frank B. Reynolds, Providence; Charles M. Robbins, Attleboro; Harry Cutler, Providence; Arthur O. Ostby, Providence; Charles T. Paye, North Attleboro; Everett L. Spencer, Providence; Everett I. Rogers, William P. Chapin.

Executive Committee: Frank B. Reynolds, Charles M. Robbins, Harry Cutler. Membership Committee: Everett L. Spencer, Charles T. Paye, Arthur O. Ostby, Everett I. Rogers. Auditing Committee: Ralph S. Hamilton, George H. Cahoone. Honorary Committee: Henry G. Thresher, John M. Buffington, Frank T. Pearce.

Advisory Council: William P. Chapin, Providence; George K. Webster, North Attleboro; Roswell C. Smith, Harry Cutler, Arthur O. Ostby, Providence; Albert A. Bushee, Charles M. Robbins, J. Thomas Inman, T. S. Carpenter, Attleboro; Charles T. Paye and Walter B. Ballou, North Attleboro; E. Crees, Everett L. Spencer, Everett I. Rogers, George H. Holmes, Charles E. Hancock, Wade W. Williams, Alfred Potter, Harry Mays, George H. Cahoone and Theodore W. Foster, all of this city.

Speechmaking was in order after the election, the newly elected president being pledged, and Vice-President Foster, Past-President Joseph H. Fanning, who is the oldest living ex-president of the association, Charles T. Paye and E. Crees making remarks appropriate to the occasion. It was well along in the evening when the meeting adjourned, and the members believe that the association has started on another year of progress and prosperity.

### Wm. C. Osman, Marshalltown, Ia., Goes Into Voluntary Bankruptcy.

MARSHALLTOWN, Ia., Oct. 28.—It was with surprise that the many friends of William C. Osman, who conducts a jewelry store at 15 W. Main St., of this city, learned that he had filed a voluntary petition in bankruptcy in the United States Court.

Mr. Osman, who was in business here for a number of years, succeeded his father, who died in May, 1901. He is well regarded in the community, and has many friends in the jewelry trade who hope his embarrassment is but temporary. His principal creditors are in Chicago and New York.

A fire was discovered in a barrel of rubbish in the basement of the store of W. C. Bryant, Bangor, Me., last week, but was extinguished before doing any serious damage. Its origin is unknown.

MADE in Oak, Mahogany, Circassian Walnut and Rosewood—MOUNTED with Sterling Silver, also Gold-plated Brass Trimmings—Copper or Porcelain lined—various sizes to hold from 50 to 1,000 Cigars.

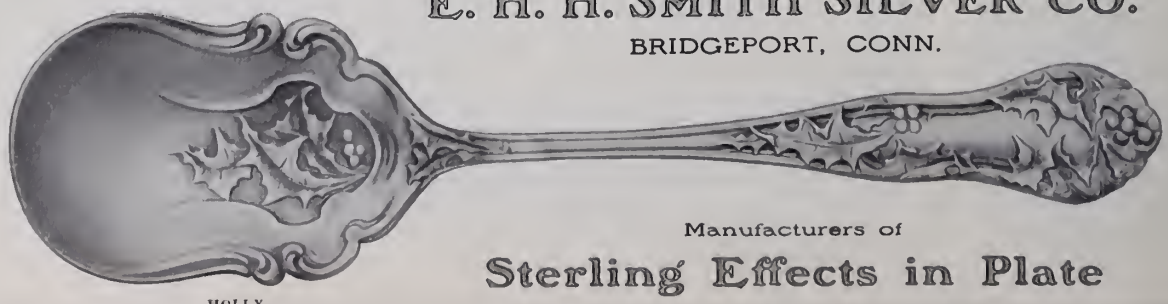
### Thos. J. Bradley, the Missing Bankrupt Jeweler of Newark, N. J., Arrested at New York.

Thomas J. Bradley, the jeweler, of Newark, N. J., who has been involved in a great deal of litigation for a number of months, including bankruptcy and divorce proceedings, was arrested, last Friday, in the Lackawanna Hotel, 152 West St., New York, where he had been living for some time. The warrant, based on testimony taken in the Bankruptcy Court, charged him with secreting from his creditors diamonds valued at $3,000. The application for a warrant was made by Carl Saenger, the trustee in bankruptcy, who was appointed at the request of New York creditors, as related in THE CIRCULAR-WEEKLY of Sept. 20. Mr. Bradley was taken before United States Commissioner Ridgeway and released after furnishing $2,500 bail to appear for examination.



About the time that the bankruptcy proceedings were begun against Bradley he left Newark, and for some time the creditors were not able to locate him. Lawyers representing his wife were also desirous of finding him, as they had a warrant for his arrest for contempt in failing to obey the directions of the court regarding alimony. It was supposed that he had gone to Canada, but not long ago the lawyers heard that he was in New York, and detectives began a search, which ended in his arrest.

Mr. Bradley was named as one of the incorporators of the Bradley Jewelry Co., of Newark, N. J., which was incorporated a couple of weeks ago with an authorized capital of $10,000. The stock in his retail store, at 372 Broad St., Newark, was sold a few days prior thereto, the amount realized being about $2,500 and the largest purchaser being Mrs. Helen McConville, who had a claim of $5,000 against him. The validity of this claim is contested by the other creditors. The total amount of his unsecured liabilities, according to the schedules, was $13,416.

Charles Holeman, Mapleton, Kans., is now located at Bayard, in the same State.

Word was recently received at Davenport, Ia., of the death of Cornelius Simmons Durfee, for many years a leading jeweler of that town. Mr. Durfee died, Oct. 18, at the home of his brother, Stephen Durfee, Millville, N. J., after an illness of a few weeks. The deceased was a resident of Davenport until about four years ago, when he came east. He is survived by one son, Elbert L. Durfee.

### Wayne M. Reed, Greenfield, Mass., Files Voluntary Petition in Bankruptcy.

BOSTON, Mass., Oct. 26.—Wayne M. Reed, a jeweler and optician, of Greenfield, Mass., has filed a voluntary petition in bankrutpcy in the United States Court. The schedules filed with this petition show liabilities of $1,685.38, of which amount $1,259 is secured. The assets amount to $1,236.46. There are 19 unsecured creditors.

Mr. Reed, who is a young man about 32 years old, started in business at Greenfield about two years ago. He had previously been in the adjusting department of the American Waltham Watch Co. factory, and is an expert workman.

J. F. Butler, Potsdam, N. Y., has been appointed local watch inspector for the New York Central Railroad.

Thomas McKee, until recently in the employ of William H. Wilson, Cranbrook, B. C., was taken into custody, a short time ago, on a charge of larceny.

### Death of Barnett Laurence.

TORONTO, Ont., Oct. 26.—Barnett Laurence, of this city, and recently president of the Dominion Optical Co., died on Tuesday afternoon, after an illness of only a few hours. He was a leading member of the Jewish community and took an active part in religious and benevolent work.

Mr. Laurence was born in Exmouth, England, and settled in Canada in 1883. He was one of the first Hebrews in England to hold a military commission, and was a member of the Royal Geographical Society. He is survived by a widow, one son and two daughters.

Extensive improvements are being made in the interior and exterior of the store of Nelson & Sons, Marion, O.

The Mills Jewelry & Piano Co., Streator, Ill., will hold a meeting, Nov. 10, at its office, when the question of dissolving the corporation will be submitted to the vote of the stockholders.

## Trade Gossip.

Manufacturers report that the demand for silver hand bags is unusually strong as a result of which the factories are crowded to fill orders, and in some instances the output is sold a considerable period ahead.

The Commissioner of Trade and Customs of New Zealand has made a ruling to the effect that rolled gold brooches, etc., together with pieces for repair work on same, are dutiable as fancy goods at 20 per cent. ad valorem.

A novelty in the way of a thimble, which is considered a decided improvement by its inventor, has been patented in England and an application for patent on it in the United States has just been made. This thimble is decidedly different in form from those of ancient as well as modern times, inasmuch as the straight lines and symmetrical form now used give place to an outline which exactly conforms to the top of the finger, from the tip almost to the first joint. The back of the thimble, if it may be so called, which covers the nail and back of the finger, has a smooth surface, while the front has the rough surface, used in pushing the needle. It is claimed that the new thimble, which is known as the "trueform," avoids pinching the fingers, and is more comfortable, as well as handier to use, than any of its predecessors.

The Larter Gold Book for 1906-1907 has just been issued by Larter & Sons, 21 Maiden Lane, New York, and is certainly one of the finest examples of art in photographing and printing which has been used for any similar purpose in the jewelry trade. In its introduction, the firm explains that this booklet is not a catalogue, because in all the lines shown many patterns other than those illustrated are made at its works. The purpose of the publication is to give a general idea of the various kinds of goods made, and certainly this is accomplished. There are 24 pages besides the cover. The plates illustrating the rings, engine-turned jewelry, vest buttons, shirt studs, stiff bar studs, mother-of-pearl buttons and link buttons are all handsome and give a faithful idea of the articles represented. The letter press shows up clean-cut and attractive on the coated paper. The striking feature of the publication, however, is the cover, the outside of which is a solid sheet of gold, with the title and the year in embossed letters. There is also in raised work a representation of a Government gold bar with the stamp of the United States Assay Office, the eagle on the top and below the mark "999 fine." A convenient feature of this booklet is that each article is numbered underneath, and in an accompanying key the price is given. This enables the retailer to show the book to a customer, if desired, without giving to the latter knowledge as to the prices.

A watch, which, it is alleged, was stolen from a woman in Dalton, Mass., by a negro named George Mallory, was located, last week, in the store of Seacord & Ingham, Lee, Mass., where it had been pawned by Mallory for the sum of $3. It is claimed that the value of the watch is $25.

¶ The extraordinary demand this Fall, for our "10 K. Line," has taxed our factory to its fullest capacity.

¶ We highly appreciate the attitude of the trade in favor of our goods, and request indulgence in case there may be any slight delay in shipments.

¶ All orders will be filled at the earliest possible moment, and duplicate orders will also receive our very best attention.

## Attleboro.

Dr. Ralph P. Kent, son of Harry P. Kent, of F. W. Weaver & Co., will be married, Nov. 8, to Miss Eva Brown.

Mrs. Sophia W. Brown, widow of Lowell Brown, one of the town's pioneer jewelry manufacturers, died last week.

Col. S. O. Bigney, of S. O. Bigney & Co., has been invited to address a public mass-meeting, Nov. 3, in Fall River.

Thomas D. Gardner, for 21 years foreman for the Horton, Angell Co., left last week for Los Angeles, his future home.

Marshall, son of Dolliver S. Spaulding, Mansfield, was thrown from his father's carriage and cut about the head last week.

Loring W. Barnes died, last week, aged 71. He was a retired manufacturer, once postmaster, and a prominent Mason and a Republican. His old factory was one of the buildings swept away in the fire of May 18, 1898, when 17 firms were burned out.

A 90-horse-power Westinghouse electric generator was installed recently at the Wm. A. Sturdy Mfg. Co.'s plant. It will furnish light and power for two other firms also, Sturdy Bros. and Freeman, Daughaday & Co. A large steam engine was recently installed to run the generator. The installation of the generator completes one of the finest power and lighting plants in this section.

Attleboro manufacturers have received letters urging them to make a display of their goods at the coming World's Fair at Milan, Italy. While, under ordinary circumstances such a proposition might pass with little or no attention, there is said to be a possibility that one or two of the firms most interested in working up a foreign trade will do something about it. One Attleboro firm making goods suitable for women's wear expresses itself as particularly interested.

Attleboro will have an important addition to its jewelry industries this week, when the American Wire & Supply Co. formally enters business on Wednesday morning in the H. M. Williams & Co. factory, on Forest St. The concern is one just organized by W. Manton Dailey, who for a number of years has been general manager of the American Seamless Wire Co., of Providence. The company has purchased the entire machinery, tools, stock, etc., of the H. M. Williams Co., and will begin the manufacture of its products this morning. The company has been capitalized under Rhode Island laws for $250,000.

Miss Ella A. Pollard and Ralph C. Thompson, treasurer and manager of the Charles M. Robbins Co., were married, last week, at the apartments of W. N. Fisher, head of W. N. Fisher & Co. The ceremony was performed by the Rev. Dr. W. H. P. Faunce, president of Brown University, assisted by Rev. James L. Tryon, of All Saints' Church. The wedding was quietly observed, only immediate friends and relatives being present. Miss Pollard is the daughter of Mrs. W. N. Fisher, and has resided in Attleboro for seven years. After the ceremony Caterer Lyman, of Providence, served a banquet. As only the immediate friends and relatives of Mr. and Mrs. Thompson were present, no formal reception was held. They will immediately take up their residence at 87 Pleasant St.

We will make them equal to new. We also make fine Gold and Silver Jewelry. Patented Safety Lock Chain Key Rings.

J. N. PROVENZANO, 114 East 14th St., NEW YORK CITY.

## Rochester.

TRADE CONDITIONS.

Trade continues fair in this city. The jobbers report many and satisfactory sales and look forward to a big holiday business. Retailers although saying things are a little quiet, nevertheless admit that sales are good. Preparations are being steadily pushed to take care of the large trade expected during the next few months. Conditions in Rochester are generally good. People have money and are willing to spend it. Building operations in the city and the proposed new trolley lines have also given an impetus to the city and suburban trade.

Morris Present, of Philip Present, is slowly recovering from the effects of a strained knee.

Julius R. White was the donor of a handsome gold watch at the fair of the G. A. R. held in this city, last week.

Morris Rosenbloom and William Levinson, of Morris Rosenbloom & Co., are both out on their final trip before the holidays.

One year in the penitentiary was the sentence imposed on A. A. King, last week, in County Court by Judge Stephens, after King pleaded guilty to a charge of stealing diamonds from J. R. White, of this city, the crime being committed over a year ago.

Solonsky Bros. opened their new store in this city last week. The store was tastefully decorated and every courtesy shown to callers. A fine orchestra was in attendance the first day. The firm will carry a full line of silverware, diamonds and jewelry and will do a cash and credit business.

Moll Bros., jobbers, 104 Main St. E., have added a full line of jewelers' materials and tools to their stock. Martin Moll will take the road for this firm shortly after the holidays and will cover Pennsylvania, West Virginia and other points. This is the first time in the history of the concern that it has had a salesman on the road.

William C. Smith, the man who, several weeks ago, attempted to secure a gold watch from E. S. Ettenheimer & Co., on a forged letter, was released from custody, a few days ago, on the failure of the Grand Jury to indict him. Smith went out of the court room whistling, but was met at the door by Detective O'Brien, who asked how he had come out. "Oh, they didn't have anything on me!" replied Smith. "Well, then, here is an invitation to go to Auburn; the Auburn police want you," said O'Brien. And Smith stopped whistling and went to Auburn to answer the charge preferred in that city.

# To the Retail Trade.

While we have greatly enlarged our capacity during the past year, there will, nevertheless, be a greater scarcity of Illinois movements during the next two months than ever before in the history of our company. Therefore we advise dealers to anticipate their wants as early as possible, as we will not sacrifice quality to secure an increased output.

Our product is distributed by twenty special selling agents—twenty of the best wholesale watch houses in the country. If none of these solicits your business, we will be glad to supply your wants direct from the factory.

There is no surplus of Illinois movements, consequently we are not continually reducing prices or discontinuing undesirable grades, the inevitable effect of which is to depreciate the value of your stock.

W. Cravens will shortly engage in business in Elkhorn, Ind.

W. J. Withers has just begun business at 119 Galina Ave., Dixon, Ill.

A. Williams is about to commence business in Chippewa Falls, Wis.

D. V. Morris has engaged in the retail jewelry business in Ogallala, Nebr.

C. V. Bates has completed arrangements to open a store in Bartlesville, Ind. T.

Sylvester Gredzinski recently opened a store at 622 O'Fallon St., St. Louis, Mo.

J. B. McIntosh recently commenced business at 64 Grand River Ave., Detroit, Mich.

A. J. Morton has opened a watch and jewelry repairing shop in Madisonville, Tex.

E. J. Mullin recently opened a watch and jewelry repairing establishment at Los Gatos, Cal.

A Mr. Wiener recently opened a store on 12th St., between Grand and McGee Sts., Kansas City, Mo.

A new store was recently opened in the Gormley building on Main St., Condon, Ore., by F. T. Saunders.

J. J. De Frees, formerly of Nappanee, Ind., left Oct. 24 for Haines, Ore., where he intends to open a jewelry store.

Rollo Junge will shortly engage in the retail jewelry business in North Freedom, Pa., where he has leased quarters in the Carpenter building.

Doffling & Co., Exira, Ia., have just added a line of jewelry to their general stock. Mr. Turner, formerly of Adair, Ia., has been placed in charge.

The H. Remey Jewelry Co. was incorporated about a week ago, in Demopolis, Ala., with a capital stock of $2,000. The incorporators were: H. Remey, G. T. Breitling, J. F. Hood and J. C. Minge.

## New Orleans, La.

TRADE CONDITIONS.

Business showed great improvement during the past few days, and the increase the jewelers attribute to the visit of President Roosevelt. People from all over the State, where the quarantines had been lowered, trooped into town to get a view of the nation's Chief Executive, and they bought wares of all description, including watches and jewelry. Several country merchants took advantage of the cheap rates to come to the city to make Fall purchases, and one or two of the big jewelry firms drove an enormous trade, Tuesday and Wednesday of last week.

The *Times-Democrat*, of this city, has offered to assist in collecting the fund for presenting a silver service to the battleship *Mississippi*, and is acknowledging through its columns funds which have been sent to it.

The golden key presented to President Roosevelt by the Fraternal Order of Eagles, Aerie No. 78, during the Chief Executive's nine-hour stay in New Orleans, last week, was specially designed by the M. Scooler Jewelry Co., Canal St. The key is as unique as it is attractive, and is the exact counterpart of an ordinary steel latch key, fitting the door of the Eagles' New Orleans Aerie, Canal St. and Exchange Pl.

Three traveling men were in this city during the week, and it looked like a return to ordinary conditions to see so many "knights of the grip" all here at one time. The visitors were Fred Caspar, of Mauser Mfg. Co.; Mr. Whitmarsh, of the Alvin Mfg. Co., and H. N. Van Bergen, of Snow & Westcott. They dropped in on the dealers and told of experiences dodging the bewhiskered quarantine guards in the rural communities. Pretty nearly all the quarantines are raised by now, and the drummers will soon come in at a lively rate to catch orders for the holidays.

The business of the estate of Bothwell Pulford, Savanna, Ill., has been discontinued.

The firm style of the business conducted by J. C. Culbertson, Piper City, Ill., will in future be known as S. D. Culbertson & Son.

## Philadelphia

The Joseph Castelberg Jewelry Co. is opening another attractive store at 1111 Market St.

J. J. Zimmern, of M. Sickles & Sons, has returned from a three months' tour of the extreme south.

John Ernst, watchmaker, 125 S. 7th St., has accepted a position with F. L. Shaw, 544 Federal St., Camden, N. J.

George W. Koehler, watchmaker, 1935 Willard St., Tioga, has fitted up a shop for trade repair work at 735 Sansom St.

J. C. Thomas, a well known Pittsburg jeweler, was a visitor to this city last week. J. T. Moore, of Chicago, was also in town.

Louis Sickles, of M. Sickles & Sons, is still quite ill and unable to resume business. He was confined to his home all of last week.

The Joseph Castelberg Jewelry Co. entered judgment on a bond last week in the local courts against Barney Wolberg for $5,000.

P. J. Osterman, watchmaker, formerly of the Hamilton Watch Co., has accepted a position with George Katz, 1943 Germantown Ave.

The grinders', polishers' and platers' supplies of the Metal Manufacturing Supply Co., bankrupts, were disposed of at public auction Monday.

Fred. G. Sutor was among the prominent citizens who acted as a vice-president of the reform party meeting at the Academy of Music last week.

D. Hart, watchmaker for Francis B. Wallen, 405 Broadway, Camden, N. J., has returned from a visit to his brother, S. W. Hart, a Kennett Square, Pa., retailer.

All arrangements are made for the election night festivities Tuesday at the Jewelers' Club. A smoker is to be arranged for shortly after the election.

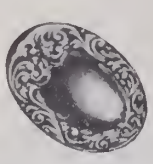
W. J. Adler, Boardwalk jeweler, at Atlantic City, N. J., announced to his friends in this city last week his intention of retiring from business in Atlantic City on Nov. 1, and going to Pittsburg. Mr. Adler recently caused the arrest in the latter city of a friend whom he charges with obtaining diamonds from him under false pretenses.

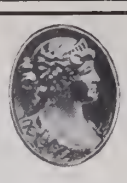
Out of town retailers buying here last week included: H. S. Kratz, Souderton, Pa.; John Sheldon, Norristown; M. Keeport, Reading; David Krouse, North Wales; E. K. Bean, Lansdale; Joseph Shuler, Norristown; M. K. Laudenslager, Souderton; C. M. Banks, Wilmington, Del.; George A. Oliver, Burlington, N. J.; John McPherson, Mauch Chunk, Pa., and A. M. Kendall, Millville, N. J.

In the Camden Court last week Richard Lewis and Thomas White, both colored, charged with the daring theft of diamonds valued at $1,000 from the jewelry store of T. H. Smedley & Son, 920 Broadway, that city, Aug. 2, were given two years in State prison. Lewis pleaded guilty and White was speedily convicted. The robbery was committed at noon while many people were passing the store. Most of the jewelry was recovered by the police.

Schoen & Mosher, Owatonna, Minn., have rendered their cut glass department dust-proof, having enclosed it in glass partitions.

Simmons Simmons Simmons
Watch Chains





THERE'LL never be a better time for the jeweler who doesn't carry Simmons Chains to put the question of their salability to the test.

Candidly, don't you believe it would be worth while to try an assortment of them at this period—when, if ever, a jeweler can "move" good goods of any kind?

Your jobber has, or should have, a representative line of Simmons patterns from which you can easily select a most attractive showing of watch and lorgnette chains and fobs of known quality and guaranteed dependability.

Ezra F. Bowman's Sons have just finished some handsome memorial tablets for the First Reformed Chureh of Lancaster.

William Fohl, who left the jewelry trade 16 years ago to engage in the hotel business, has returned to the beneh, and is now with S. Kurtz Zook.

Jerome Welch, a watchmaker from Buffalo, was killed on the railroad near Parkesburg, last week. He fell from a train on which he was stealing a ride.

Claude Ridenour, reeently a student of the Ezra F. Bowman Technieal Sehool, went to Bluefield, W. Va., last Thursday, to take a position with Charles J. Kinzer.

The ereditors of L. C. Reisner & Co. were paid a dividend of 10 per cent. of their elaims, last week. It is believed this and an additional 10 or 12 per cent. balance is all the bankrupt estate will pay.

The Bates property, in whieh Charles Bisehoff's jewelry manufacturing and diamond setting establishment is loeated, was sold last week to P. E. Slaymaker for $60,000. He will either rebuild or remodel the building.

The H. S. Meiskey Co. has eompleted its new establishment on W. Chestnut St. and has now one of the finest business plaees in the city. F. A. Huber, one of the representatives of this house, has just returned from a trip on the road.

An auetion sale was held, Friday, by Receiver John C. Carter of the plant of the Biehl Mfg. Co. There were a number of bidders, and the machinery, ete., was sold piecemeal. The appraiser's valuation of assets was $1,420, but the sale did not realize that figure. The liabilities were $8,000.

An unusually large number of jewelers from different parts of Pennsylvania visited Laneaster, last week, and all are sure they will have a big holiday trade. They are stoeking up aeeordingly, whieh is most expressive evidence of their eonfidence. Among the visitors were: H. A. Neece, Williamsport; A. J. Baker, Glen Roek; George Hepp, Lititz; E. P. Zane and Jaeob Fisher, Christiana; E. E. Coble, Elizabethtown; Charley M. Reiling, Philipsburg; H. E. Oberlin, of Oberlin Bros., Columbia.

# REAL CORALS

**at 25 per cent. under the market price.** I bought the entire stock of an Italian importer of Corals, Amber and other beads; real Mosaic jewelry. **Coral Necklaces, $1.75 per dozen and up.** I have no travelers. Will send memo. packages of Coral, Amber and Real Pearl jewelry to well-rated jewelers and save you 25 per cent. on many goods.

**DAN I. MURRAY,** Importer and Broker, 3 Maiden Lane, **NEW YORK.**

## Buffalo, N. Y.

Thieves recently broke into the store of John W. Frazier, 848 Main St., and stole five dozen stickpins, a dozen fobs, four dozen studs and a quantity of fountain pens and other articles, as well as $5 in cash.

Judge Volger, in the Municipal Court last week, awarded a judgment for $102 and costs to Morris Dreshfield and Maurice Schiff in their suit against Herman and Julius Boasburg. The suit was to recover the value of some small precious stones which the defendants claimed were not genuine. This contention was overruled.

Burt Marshall, who says he is a traveling salesman for a jewelry firm, reported to the police recently that his grip, containing a sample assortment of gold jewelry, had been stolen from him at Shelton Sq. while he was talking to a friend. He laid the bag on the sidewalk for a minute and when he turned around it had disappeared.

T. C. Tanke, 278 Main St., and his son, Eugene, were badly cut in a street car accident which occurred early on the morning of Oct. 24. As Mr. Tanke and his son were about to alight from the platform, the car they were riding in collided with another car in front, and both men were knocked off their feet. Father and son were taken to the office of Dr. Pierce nearby, where their wounds were dressed.

Heintz Bros., manufacturing jewelers of this city, received some free advertising in the press of the country, last week, owing to the fact that their trade-mark appeared on one of the rings found on the fingers of the woman's arms which were discovered in the suit case in the Charles River, Boston, Friday. The police are trying to use this clue to discover the identity of the murdered woman, through the jeweler from whom the rings were purchased.

## Utica.

Watson T. Dunmore, as a special master appointed by Judge Ray, last week, completed, this week, the taking of the evidence in the Samuel Orbach bankruptcy case. Orders were secured by Charles B. Mason, the trustee, to compel Orbach to turn over to his estate in bankruptcy about $8,000, representing the money which, it is claimed, he lost in steel stocks, and loans to his son, and about $7,000 additional in amounts which he paid to his daughter and in jewelry and other assets, which, it is alleged, he secreted. Mr. Dunmore was appointed special master because Orbach's lawyers objected to Bankruptcy Referee Comstock serving, claiming that he was biased. Hearings have been in progress several months and the testimony has been largely a repetition of the testimony given at the other bankruptcy hearings. Orbach has quit Utica. He is now living in New York, but he has to answer to various matters arising out of his failure in Oneida County.

J. D. Hendershot has sold the building which he occupies as a watchmaker in Parker's Prairie, Minn., but will continue business at the old location.

George Eckstein, Boone, Ia., has presented a hall clock, over seven feet high, to the local branch of the Order of the Eastern Star, for the organization's new hall.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

**WHY?** *Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had **FREE** for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

**All Krementz Collar Buttons—of every quality—are manufactured by**

Strasburger & Co.; J. W. McClannin, Wilcox Silver Plate Co.

A new front has just been added to the store of M. I. Cohen, Jacksonville, Fla. A cement walk has also been laid in front of the establishment.

The exterior of the store occupied by F. S. Hester, Lawrence, Kans., is being remodeled. When completed, the building will be better adapted for the display of jewelry stock.

## Savannah, Ga.

Word was received here last week of the destruction by fire of the store of J. P. Sain, Covington, Ga. The amount of the loss is not now known, but it is thought to be covered by insurance.

S. E. Theus, of Theus & Co., has been appointed chairman of the Decoration Committee and a member of the Reception and Entertainment Committee during the reunion of the Ancient and Accepted Scottish Rite Masons, which will be held in this city, Nov. 14-17.

J. I. Killorin, trustee of the bankrupt estate of Solomon Wachstein, has filed his report with Referee in Bankruptcy A. H. MacDonald, who has ordered a sale of the property. The inventory and appraisement show assets valued at $2,410, which is $410 more than the schedule filed by the bankrupt.

Wesley Huff, Garnett, Kans., has admitted his son as a partner in the business, and the firm style will hereafter be known as Wesley Huff & Son.

## Optical Notes and Briefs.

F. W. Binford recently opened an optical establishment at Santa Cruz, Cal.

Harry W. Thompson has opened an optical office in East Douglas, R. I.

H. T. Hite, optician, San Jose, Cal., was a visitor to San Francisco, Cal., last week.

H. J. Penfold, president of the H. J. Penfold Co., Omaha, Nebr., has returned from a trip to Hot Springs, S. Dak.

A. B. Conery, formerly of Chicago, has just opened optical parlors at 18 E. 3d St., Sterling, Ill.

John Morehouse, of the Kennedy Optical Co., was a visitor to Omaha, Nebr., last week, in the interests of his firm.

C. J. Klein, Santa Cruz, Cal., is putting in an optical department and has secured the services of a skilled optician as manager.

The California Optical Co., San Francisco, Cal., has negotiated for a five-year lease of the premises at 207 Kearny St., that city.

Dr. Frank Buller, an eye specialist of considerable ability, died, recently, at his home in Montreal, Can., after an illness of about four months.

T. R. Wood, with the Julius King Optical Co., opticians, New York, was in Omaha, Nebr., last week, calling on the trade and visiting old friends.

A. Wilton, optician, recently returned to his home in Alexandria, Minn., from Chicago, where he had been taking a post-graduate course in optometry.

W. D. Fennimore, vice-president of the California Optical Co., San Francisco, Cal., was absent from business several days of last week on account of a severe illness.

T. C. Brown has just opened an optical parlor in room 408 of the Malley building, New Haven, Conn. Mr. Brown was until recently employed by C. J. Monson, Jr., & Co., of the same place.

E. N. Nelson, formerly of John Day, Ore., has opened a jewelry and optical establishment in the Brown building, Burns, Ore. Mr. Nelson has received his certificate of registration from the Oregon State Board of Optometry.

Budd & Ramshaw, a new drug firm who have just established themselves in Haileybury, Temiskaning District, Ont., have an up-to-date optical department. The senior partner, A. T. Budd, was in business for many years at Arnprior, Ont., with C. A. Ramshaw, as his assistant.

W. H. Walmsley, optician, died Oct. 24, at his home, 4228 Pine St., Philadelphia, Pa., after a brief illness. The deceased was 75 years of age and was born in Byberry. Mr. Walmsley had been a contributor to various scientific journals, and was the founder of the American Microscopic Society. He is survived by a widow and three children.

W. L. Watts, manager of the Clark Optical Works, Cambridge, Mass., where the big telescope lenses are made, sailed recently for Montevideo, Uruguay, South America, to conclude the details for installing the largest astronomical plant in the southern hemisphere and the most extensive scientific plant ever planned to be set up at once. The plans include a large telescope of 18 or 20 inches aperture, for general astronomical work; a smaller one for a meridian

circle; a 24-inch reflector for photographic work; an extensive battery of prisms and related apparatus for spectroscopic study; meteorological instruments, physical laboratory apparatus, time clocks and a certain amount of machinery of the more delicate kinds for the equipment of a scientific workshop in connection with the proposed observatory. The lenses, prisms (which constitute much the largest portion of the plant) and some of the other apparatus will be made in Cambridge, the rest to be secured by Mr. Watts wherever the kind desired is most available.

## Canada Notes.

Milton W. Lackie, Toronto, Ont., was married recently.

G. B. Richardson, Humbolt, Man., has assigned to H. D. Pickett.

A. L. Wheatly, Wolseley, Man., has been succeeded by Wheatly Bros.

C. H. Bowman & Co., Toronto, Ont., have removed from 426½ to 390½ Yonge St.

James A. Pitts, Montreal, has just returned from a purchasing trip to New York.

The American Watch Repairing Co., Antigonish, N. S., has given a bill of sale for $75.

I. L. Michalson & Sons, Montreal, have obtained a bill of sale from Albert Ufford, Vancouver.

C. H. Grant, of the M. S. Brown Co., Montreal, is traveling through the west to the Pacific Coast.

Fred A. Mansfield, managing director of the Smith, Patterson Co. in Montreal, was in Boston, Mass., last week.

J. C. Barlow, manager of the American Waltham Watch Co. in Montreal, paid a visit to Waltham, Mass., recently.

W. G. Young, London, Ont., held his annual Fall opening on Monday, the store being brilliantly decorated for the occasion.

D. R. Dingwall, Winnipeg, Man., has gone on a purchasing trip to New York and eastern jewelry centers to obtain novelties for the Christmas trade. Early in the new year he will leave for an extended European tour.

A daughter of W. D. Birchall, of the Toronto Silver Plate Co., who resides at Westmount, Montreal, was married recently in London, Eng., to G. M. Bosworth, fourth vice-president of the Canadian Pacific Railway Co.

E. L. Thayer & Bro., Rockford, Ill., have leased new quarters in 306 W. State St., into which they will move their stock in the near future. The old store front will be replaced by a new iron front, with large plate glass windows, and the interior of the building will be entirely renovated. The old building occupied by the concern will be razed.

Charles L. Mercereau, formerly of Mercereau & Connell, Scranton, Pa., retired from business, Oct. 24, on account of his advancing years. Mr. Mercereau had been engaged in the retail jewelry business in Scranton for about 39 years, having come to that city from Union, N. Y., in 1866. In 1885 the partnership was formed with Mr. Connell, who will continue the business under the name of Mercereau & Connell, at the old location, 136 Wyoming Ave.

## TO WHOM IT MAY CONCERN:

Everyone knows that specialties in Precious Stones and Pearls are not to be picked up every day; no one knows what day they may appear in the market.

A dozen short trips to Europe might not hit upon the accepted time.

In view of these facts, does it occur to you that a reliable expert of 27 years' experience, *always* on the *spot*, and continually on the *watch*, can serve your interests to great advantage?

Both time and money can be saved by collecting your goods in advance through the only American Commission Merchant in Precious Stones and Pearls located in Paris.

Julius M. Johnsen has succeeded Hans Johnsen & Son, Ringsted, Ia.

W. E. Clingenpeel, Roseburg, Ore., has sold out to S. H. Landstrom.

F. L. Chenoweth, Monroe, Wis., has been succeeded by E. A. Huffman.

J. J. Agee, formerly of Cherokee, Ala., is now located at Iuka, Miss.

M. J. Lindahl, Saint Hilaire, Minn., has sold out to Swenson & Thompson.

Aaron M. Booker, Washington, D. C., has been succeeded by H. J. Booker.

A. F. Bankston, Felsenthal, Ark., moved, recently, to Strong, in the same State.

J. B. Maund, Geneva, Ga., is now located in a new territory in Spartanburg, Ga.

U. S. Miller has disposed of his jewelry business in Beatrice, Nebr., to R. Stratford.

Robert J. Patterson, formerly of Glen Rose, Tex., is now at Moran, in the same State.

J. B. Johnson, Albia, Ia., has admitted a partner and the firm style is now Johnson & Johnson.

C. R. Awbrey has succeeded to the business of the old firm of Awbrey & Evans, Magnolia, Ark.

Mason's Pharmacy, Afton, Ind. T., has sold its drug business and will continue in the jewelry line.

S. J. Stieglitz, Crookston, Minn., has just added two new show cases and a large wall case to his store.

P. H. Watson moved, recently, from Belle Plaine, Ia., to Abingdon, Ill., where he will continue business.

O. C. Fields will shortly close out his business in White Rock, S. Dak., and move to Valley City, N. Dak.

Albertson Bros. are now located at Montgomery, Minn., having moved recently from Liverne, in the same State.

CUTTING WORKS,
Cor. Union & Nevins Sts., Brooklyn.

of Schmidt & Fox, Hartford, Conn., was broken one day last week by an intoxicated man, who, when subsequently arrested, gave the name of James Ginty. The latter said he was pushed through the window.

A. M. Thomas, Niagara Falls, N. Y., was in New York, Monday, and said that the police at Utica, N. Y., had communicated with him in relation to a man who obtained a Ball watch in that city under false pretences, and who is believed to be the one who played the same trick on Mr. Thomas in February last. The man, in each instance, wearing a railroad uniform, entered the store and said that he was an employe of the New York Central Railroad. He is a good talker, and Mr. Thomas did not hesitate long in allowing him to take a nickel case watch, for which payment was to be made a few days later. At Utica the man obtained a watch in a gold filled case. He is of middle age, sandy complexion, with a square chin and is of a somewhat heavy build.

### Gilt and Enameled Glass Vases.

THE beauteous ancient ceramics of Murano, in Venice, which imitate the most precious stones when the clays are not mingled in such a manner as to simulate jasper or the veins of onyx, call for an additional decoration either in gold or in vitrifiable colors, put on with the brush, and fixed by the aid of refiring. In this style of production the Venetians were the imitators of the Greeks, whom they replaced at the fall of the Oriental Empire; but they brought into the work entirely new elements of ornamentation. Graceful scenes, delicate portraits, small figures prettily designed, knights with their coats of arms, charming ladies whose long braids of hair fell below their waists, young cavaliers with clothing which outlined their forms, genii, cherubs, gods of paganism or pious personages framed and entwined with garlands of flowers, and flying bands bearing inscriptions, formed the basis of this beautiful decoration, which is developed between light friezes in the Grecian key design, or of lines of gold, attractively bordered with pearls.

Pictures can give little idea of these superb works; the effect produced was unparalleled. So precious are these glass vases of Murano that they would equal vases of gold and silver, or even those adorned with precious stones, were they as solid as the metal is.—HENRY HAVARD in *Les Arts de l'Amenblement.*

## Newark.

The American Pearl Co., 81 Orange St., this city, filed, last week, a certificate of incorporation to deal in pearls as well as in oysters and shell fish. The company has an authorized capital stock of $60,000, the incorporators being: Stacey Wilson, 200 Broadway; James Burton, 25 Broad St., both of New York; Albert G. Mabee, 81 Orange St., Newark, N. J.

A. Feiss, who has a jewelry and second-hand store on Main St., Paterson, N. J., was arrested Saturday last on an indictment charging him with receiving stolen property. It is said that a servant girl sold to him a diamond ring, a gold stick pin, and other articles which were stolen from the house in which she had been working. After her arrest she made a confession, and said that she had sold the articles to Mr. Feiss. He denied that he had any knowledge that the articles were stolen.

A hearing took place last week before Edwin G. Adams, Referee in Bankruptcy, in relation to the validity of a chattel mortgage of $600 given on the stock of Max Menein, formerly in the jewelry business at Paterson, N. J., to Herman Heinrichs. After Mr. Menein was forced into bankruptcy, the holder of the mortgage made a demand for its payment upon Edward F. Merry, the Trustee in Bankruptcy. Other creditors objected, and the question was sent to the referee for decision. If he decides that the mortgage is valid the trustee will be directed to pay it out of the money of the estate.

# MONTANA SAPPHIRES

## From Mines to Market!

Among precious stones none adapt themselves to moderate-priced jewelry as does the Montana Sapphire.

Its evenness of color and the many shapes to which it lends itself appeal to the manufacturer.

We carry this stone in all sizes, including large and important pieces.

# If You Know the Marks

you are not confined to the limitations of your stock, but will be able to supply any goods desired. Frequently a resident of a town or city will return from a visit to a larger city, bringing back an attractive novelty or piece of jewelry that is greatly admired by her friends, who will probably want to obtain others like it. They will first call on the local jeweler and if he is not an up-to-date jeweler he will turn them away disappointed because he has not the articles in stock. If, however, he is a progressive dealer, he will examine the trade-mark on the article, identify the maker and send for a line on memorandum. He will tell his prospective customers that he has not the goods in stock just at present, but will have them in a few days. He will make a sale, and every sale counts. But more than this, he will agreeably surprise and please his patrons and will convince them that it is not necessary to go out-of-town to obtain the latest and best productions of the jeweler and silversmith.

"TRADE-MARKS OF THE JEWELRY AND KINDRED TRADES"

(Second Edition)

will enable the jeweler to identify the maker of any article embraced in the jewelry and kindred trades. It illustrates 4,000 marks and covers every branch of the trade. It also contains much interesting and valuable reading matter on the subject of trade-marks in general.

One jeweler, after having the book for a while, wrote: "This book has been invaluable to us upon many occasions. Like the cowboy's pistol, 'tis not required every day, but when needed it is wanted quite bad."

### Another Advance of Five Per Cent. in Price of Rough Diamonds.

For the third time this year an advance of 5 per cent. in the price of rough diamonds has been announced by cable messages received in the last few days by importers, who buy from the London syndicate controlling the output of the De Beers Consolidated Mines, Ltd. The mêlée sizes are advanced as well as the larger stones, this being the first increase in the price of mêlées in three years. The previous advances this year came in January and August, and there was also in September a special increase of 5 per cent. in the price of Jagersfontein stones. Last year there were four general advances of 5 per cent. Some of the importers believe that there will be another before the end of the present year.

"With two more advances of 5 per cent. each," said Henry Fera, of Fera & Kadison, 65 Nassau St., "the total will be 200 per cent. inside of eight years. As an instance of the way prices have gone up, I may mention that one kind of stone which now costs us 195 shillings, we formerly bought for 70 shillings."

The importers say that the advances in the last year are really more than those that are shown in the figures, because of the fact that the syndicate is constantly increasing in its shipments the quantity of larger stones which do not cut to advantage, and on which the cutters make proportionally less profits than on the smaller gems.

"We would accept the advances with more equanimity," said one importer, "if the average quality were improved, but instead of that we are getting a larger and large proportion of inferior stones mixed with the fine gems in each shipment."

All the importers agree that the advance is not at all likely to curtail the demand from the trade. The cutters take all the diamonds that the syndicate offers, and are ready to accept much larger quantities if they could get them.

A representative of a French diamond house said that diamond merchants in the European countries are taking all the desirable stones that they can get, France and England buying heavily. "The European buyers," he said, "are constantly in the market looking for the better grades of diamonds, which are the harder to get, because the American dealers take so large a proportion. The only country where there is a decline in the trade is Russia, and there, unless the present troubles are quickly settled, the diamond business is likely to come to a standstill. That country has been taking many brown diamonds which undoubtedly the syndicate will now unload on other countries, including the United States."

In relation to the possibility of the Premier mine in the Transvaal supplementing to any material extent the De Beers supplies, the figures of the September output are taken to be significant. According to the reports in South African papers the total output of the Premier mine in September was 59,687 carats of diamonds, which were taken from 128,199 loads of earth, a percentage of .47 carats to the load. In August 66,735 carats of diamonds were obtained from 118,250 loads, a percentage of .56 carats to the load. This shows a falling off in the total output and in the percentage of diamonds to the total quantity of earth that is worked.

Recent letters indicate that the first reports of the damages caused in the Premier mine by the recent mudflow were somewhat exaggerated. The diamond cutters say, however, that the Premier output has as yet no particular effect on the market, because so small a proportion is available to be cut into the high grade gems required by the American trade.

Peck & Vermillion, Oak Grove, Mo., have dissolved partnership and the business will in future be conducted by S. E. Peck alone.

F. W. Alley, New Madrid, Mo., has been succeeded by F. W. Alley & Co., Cornelius C. White, of that place, having been admitted into the concern.

### o mments on the Jewelers' League.

OUR reporter had no more than entered the old jeweler's office when he broke out with the ejaculation, "See here, Mr. Reporter, you and I have enjoyed frequent merry interviews, in which I have supplied some of the talk, and, as you know, I have done it readily, cheerfully.

"I just now was scanning some old Jewelers' League literature when it occurred to me that you nowadays get no news of our league. Why not seek the managers and keep that beneficent institution of our trade and its good work before our tradespeople?

"We hear and read of the financial profligacy of some of the so-called old line (he pronounced that word almost as if it were 'lying') insurance people; but never has a dollar of our league funds been actually misappropriated. Every dollar appropriated to the purpose has been paid to the widows and orphans of deceased fellow members of our guild, and, except a phenomenally small percentage, for actual, necessary expenses, the remainder has been set aside and wisely invested for the guarantee of its future permanence."

This reporter is not a stenographer, therefore the old jeweler's language—as rapidly as he put it forth, like a gatling gun—is reproduced in, as nearly as practicable, his own words.

"Yes," continued he in response to a question, "I am an early member, and have continuously felt a profound interest in the league's welfare, success and stability.

"When forwarding my monthly contribution I have never realized that I was paying for my own insurance; but, rather, that I was putting it where it would do the most good to the family of some deceased fellow-jeweler, and at a time when it was most needed. I feel that when I go to the 'happy hunting ground' my fellows will do as much for my own beneficiaries.

"I became a member when my hair was not as white as now represented in my portraiture at the top of this talk with you.

"I well remember that in our early days THE JEWELERS' CIRCULAR was, at one of the annual sessions, voted to be the 'official organ of the Jewelers' League.' Now, why not get that organ to sing the contrasting merits of an institution which expends its income for the sole benefit of its members? Why not get from the league some of the sort of information about itself, and in a manner, the like of which you have so successfully pumped from me about everything else than the league.

"Mayhap you might suggest what has been suggested to me many times during my Summer of jogging around among the jewelers, viz., that at our next annual meeting some of the elder members of our board of active management retire with their well won and worn laurels, and permit the substitution of some young men; one old member has proposed that one-half of the repetitious older officers retire in favor of the same number of younger candidates, full of comparatively youthful energy, ability and ambition; thus, he insisted, fulfilling the old aphorism of 'old men for counsel, young men for action.'

"It has also been pointed out that the league in its earlier days was built up by men from 25 to 35 years of age; men who were among the people of their own ages; among whom there was a bond of mutual sympathy and comradeship which led up to the acquisition of those of their own approximate age as members. Like draws like unto itself. Our league would be wise if it rejuvenated itself by this ready at hand means.

"Indeed, THE CIRCULAR-WEEKLY, conjointly with its other good works, is just the means by which some activities may be prompted from without. The 'trade' owns the solid foundation upon which our league of to-day stands. Why not improve and revivify the superstructure, especially by the infusion of young men managers? This 'why not' is a query to be responded to by the nominating committee, or possibly by the assuredly pardonable innovation of independent nominations of young, capable men, at the annual meeting in January next.

"Now, Mr. Reporter, I am glad that you came in to give me something to talk about other than breast pins and ear knobs; I turn the table and give you a better topic.

"Get occasional league information which will interest the trade, or get the league officials to establish an information bureau, with THE CIRCULAR-WEEKLY as the disseminator thereof, as it was in the years agone. Then we shall not have so many jewelers—many of whom I have recently found—who know nothing about the good work done and to be done by our league. Of our young tradespeople lamentably few know even of its existence for their benefit, and still fewer among our artisans in the jewelry and kindred trades.

"The busy elephants that, back and forth over the *same ground,* drew the plough at Bridgeport, Conn., years ago, in sight of thousands of passengers on the passing trains, kept themselves and incidentally their owner's name and pursuit before the people.

"We should not hide our league light under a bushel.

"The managers should act, as did the man who fell off a high bridge in Kentucky, who prayed as he was falling, 'Oh, Lord! have mercy upon me, and have it quick'!"

### Recent Customs Decisions.

Decisions by the Board of United States General Appraisers as published recently by the Treasury Department included:

MILLINERY ORNAMENTS—STRUNG BEADS.—Protests, etc., of Wm. Maas & Co. *et al.* against the assessment of duty by the Collector at New York. Protests sustained as to a portion of the merchandise, consisting of millinery ornaments, metal beads temporarily strung, etc., which were held to be dutiable as manufactures of the component material of chief value.

R. Goldstein, Topcka, Kans., has given a bill of sale for $678.

### Important Trade Mark Decision.

THE Commissioner of Patents, in a decision holding that the coats of arms of Maryland is not registrable as a trade-mark under the Trade-mark law of Feb. 20, 1905, although it had been used by the applicant for 10 years prior to the passage of that act, enunciated a number of law points of vital interest to trade-mark owners. The Commissioner held that the use of the flag or the coat of arms of a State or nation for purposes of trade is against public policy.

The policy which prohibits the registration of such a mark is not dependent upon or affected by the length of time the mark has been used. Its use is in the nature of a wrong, and persistence in that wrong is to be condemned rather than rewarded. The "10 years" clause of the trade-mark act does not provide for registration where the applicant was the sole user of the mark for 10 years, but requires that he shall have "exclusive" use. To have "exclusive" use of a mark, the applicant must have the right to shut out or debar other from using the mark, and it is not sufficient that he was the only one in fact using the mark.

Since the trade-mark act does not confer upon users property rights in marks, but presupposes the existence of such rights and merely provides that registration shall be *prima facie* evidence of that ownership, the Commissioner held that it does not contemplate the registration of any mark which is incapable of ownership by any one.

### National Stamping Bill Approved By the Trade.

THE bill proposed by THE CIRCULAR-WEEKLY, which will be introduced in the next session of Congress, with the view to putting a stop to the shipment, in interstate commerce, of articles of gold and silver not properly marked as to their quality, seems to have met with universal favor in all branches of trade in practically every section of the country. Not only has the purpose of the bill been thoroughly approved, but the plan and scope of the measure has received unqualified endorsements in every quarter.

The only point on which even a slight difference of opinion has been expressed is in regard to the proper margin of allowance to be taken into consideration in determining whether the article is up to the standard or grade represented by the mark upon it. In some sections of New England a margin of one full karat is suggested, partly to meet the variation that may occur in the stock or alloy used, and partly to compensate for deterioration due to assaying articles which must necessarily contain some solder. Among New York and Newark manufacturing jewelers a half-karat allowance is proposed, while in the watch case trade some manufacturers hold out for an allowance of not more than .010 or .015, while other case makers insist that no allowance at all is necessary. This difference of opinion will doubtless disappear and a proper compromise be reached before the bill is brought before Congress for final passage.

E. W. Reynolds has been succeeded in the wholesale jewelry business in Los Angeles, Cal., by the E. W. Reynolds Co.

### Interesting Facts About South African Diamond Mines.

A. F. WILLIAMS, a young California mining engineer, who has for the past seven years been the assistant general manager of the De Beers Consolidated Mines, Ltd., at Kimberley, Cape Colony, is in Washington, D. C., visiting his mother, who is spending the Winter there. In an interview Mr. Williams said:

"I have been residing in South Africa for the past seven years, and consider it a country with a splendid future. The annual output of the Kimberley diamond field is approximately $25,000,000. Of this the De Beers Co. disposes of about 60 per cent. in the United States. We employ in the five mines, which are in near proximity, all of them being in the limits of Kimberley, 18,500 native workmen. These Kaffirs are not very energetic, but they are the best labor we can get, unless, perhaps, Chinamen, who are now employed in large numbers in the gold mines of Johannesburg.

"Quite a great number of diamonds are found at or near the surface, but in some of the mines a depth of 2,500 feet has been reached, with good results.

"The output of the Kimberley district might be increased, but the company does not care to overstock the market and only gets out what it will absorb."

### Jewelers Gold Bars Withdrawn and Exchanged at New York.

*Week Ended Oct. 28, 1905.*

The U. S. Assay Office reports:

| | |
|---|---|
| Gold bars exchanged for gold coin | $420,162.40 |
| Gold bars paid depositors | 150,504.08 |
| Total | $570,666.48 |

Of this the gold bars exchanged for gold coin are reported as follows:

| | |
|---|---|
| Oct. 23 | $71,036.93 |
| " 24 | 112,532.94 |
| " 25 | 77,494.63 |
| " 26 | 56,446.50 |
| " 27 | 61,122.11 |
| " 28 | 41,529.29 |
| Total | $420,162.40 |

## New York Notes.

I. J. Roe, 36 Maiden Lane, sailed, last week, for Europe on the *Amerika*.

I. E. Anthony, a pearl merchant of Camanche, Ia., was in the city several days last week.

John Frick, 8 Liberty Pl., and Miss Rosalie E. Chatellon, 17 Central Park West, were married last week.

Fire, one day last week, slightly damaged the stock of jewelry of A. M. Smith, 3370 Third Ave., the loss being covered by insurance.

H. J. Sayers, secretary of the New York Credit Men's Association, has sent out circulars containing the new list of officers and committees.

W. J. McKinney, of W. J. McKinney & Sons Co., East Liverpool, O., is in the city buying for the holidays, his headquarters being with A. Roseman, 9 Maiden Lane.

Among the occupants of the building at 18 Desbrosses St., which was almost destroyed by an explosion and fire, last Thursday, was D. A. Van Horn, cut glass manufacturer.

Sympathy is extended by many friends to Benjamin S. Sugarman, 14 John St., whose wife died early last week of pneumonia, after an illness of only three days. The funeral took place Thursday.

Henri E. Judels, of Judels Bros., 46 Rue de Paradis, Paris, France, arrived in New York last week on the *Noordam*, and will remain here for a few weeks, visiting his brother, Joseph Judels, 14 Maiden Lane.

After cutting through the plate glass window in front of the "Lucios" store, 228 Fifth Ave., last Wednesday night, burglars helped themselves to a quantity of jewelry which was exposed for advertising purposes. There have been a number of robberies of late in this part of the avenue.

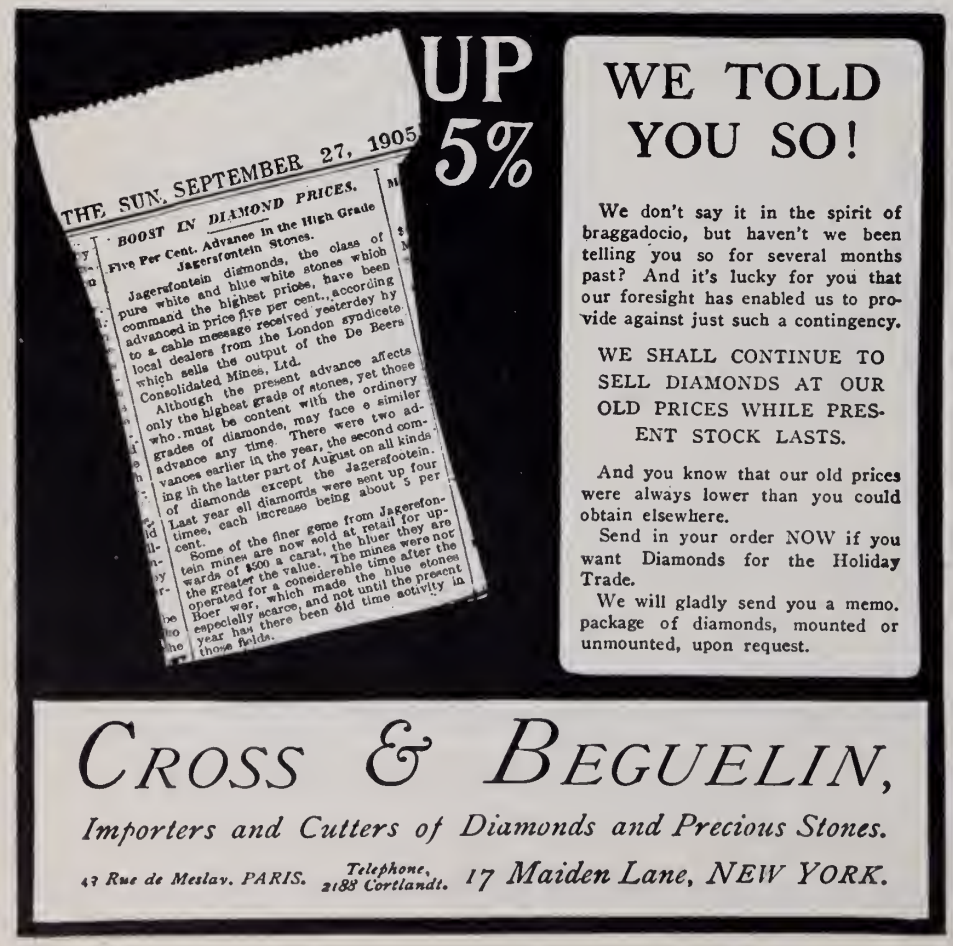
Lancaster pottery from the works of the Pilkington Tile & Pottery Co. is to be exhibited for a couple of weeks, beginning in about 10 days, at Tiffany & Co.'s, Fifth Ave. and 37th St., under the supervision of A. V. Rose. It is promised that some fine colors and glazes will be shown in the vases.

Miss Bessie Stern, who has been employed by Schiff & Dreshfield, 82 Nassau St., for the last five years, was married last Wednesday to Joseph Rosenfield. Congratulations were extended by many friends and there were a number of valuable presents. Among the guests at the wedding were Mr. Schiff and family.

Because he failed to file an application within the prescribed time, a discharge in bankruptcy is refused to Wm. Jacobus, formerly a dealer in metals and also a diamond broker at 250 Water St., in the report filed by the referee, John J. Townsend. The liabilities of Jacobus were estimated at $62,272, a comparatively small portion of which was in the diamond trade.

Miss Emma Dietz, 251 Hart St., Brooklyn, on her way to the Brooklyn Bridge, while going home a few evenings ago from the gold chain factory in which she is employed, was accosted on Nassau St. by a man, whose arrest she caused on the charge of insulting her. In the Tombs Police Court he gave the name of Paul Grafton, which was probably fictitious, and was fined $10.

Charles Bassett, a young man who was sent to Sing Sing last Spring for burglary in entering the jewelry store of Nicholas J. Weinberg, 86 Fifth Ave., Brooklyn, and who was also a member of the gang which attacked Henry J. Bridger, the jeweler of 478 Fulton St., Brooklyn, was recently released on a pardon by Governor Higgins, and was immediately rearrested on the charge of murder made by Connecticut authorities.



Manufacturers in various lines are renewing the agitation for free alcohol for use in the arts and industries, and it is understood that a bill removing the internal revenue tax will be offered at the coming session of Congress. A long list has been made public of the lines of manufacture which, it is claimed, would be benefited by the adoption of the proposed law, included in which are clocks and lacquers used in some branches of the jewelry industry.

In the last week the Jewelers Association and Board of Trade has sent out several dividends to creditors. A dividend of 25 per cent. was paid to the creditors of Clapp & Cowl, Chicago, this being a composition in bankruptcy, the terms of which were approved by the court. A final dividend of 4½ per cent. was sent out to the creditors of McLaughlin & Raines, Philadelphia, Pa. Creditors of C. W. Zimmerman, Poughkeepsie, N. Y., received from the Board a second dividend of 11 per cent., the first having been 10 per cent.

Diamonds made in recent experiments in Paris, said Dr. George F. Kunz, of Tiffany & Co., yesterday, did not weigh more than a hundred-thousandth (.000001) of a carat each. More than 300 experiments were required to produce a sufficient number of these infinitesimal stones to weigh half a carat. The cost of the material consumed in these experiments was $2,000, and the cost of labor, rent of laboratory and other items must be added, to get the real expense of producing the tiny stones, which have no commercial value.

Window smashing of unusual kind occurred yesterday morning about 10 o'clock at the store of Wm. Barthman, Broadway and Maiden Lane, when a heavy hook crashed through the plate glass. A derrick was being used in the building operations at 176 Broadway, where a new home is being erected for the Title Guarantee & Trust Co. The man in charge of the guide rope lost control of it temporarily, with the result that the derrick swung toward the jewelry store and the hook, suspended on the cable, did the rest. As the hook fell inside the show window it damaged several watches. Mr. Barthman and his clerks were naturally startled, and their first thoughts probably were that window robbers were at work. The total damage is about $100, which the building contractor will doubtless pay.

Burglars, last Thursday night, broke into the building occupied by Wm. R. Elfers, silversmith, at 140 Sullivan St., and carried away sheet silver, umbrella handles, cane heads and ferrules to the value of several hundred dollars. It is supposed that the thieves obtained entrance from the adjoining tenement, and that they car-

*43 Rue de Mesiay. PARIS.* *Telephone, 2188 Cortlandt.* *17 Maiden Lane, NEW YORK.*

ried away their plunder in a wagon that had been left outside with a lookout. The scuttle was pried open, enabling the burglars to reach a mirror factory on the top floor, and after this was rifled they went down into Mr. Elfer's factory, making a hole in the floor and ceiling.

H. R. Benedict, of Benedict & Warner, 21 Maiden Lane, is one of the incorporators of the American Sapphire Co., which on Monday filed a certificate at Albany. The other incorporators are H. E. Fansshawe and J. P. Morrows, both of New York.

Edward Lewis, a 15-year-old boy employed by J. Ulmer, a diamond cutter at 22 Maiden Lane, last Friday lost an envelope containing diamonds valued at $300, while he was carrying them through Nassau St. The boy thinks that he dropped the envelope on the street.

Alfred Guggenheim, 529 Broadway, a dealer in novelties and jewelry, was forced into bankruptcy last Monday by a petition filed by three of his creditors, A. Strauss & Co., Henry Rosenstein and Jacob Busch. A small portion of his liabilities are in the jewelry trade. He began business on his own account in March, 1903, with a small capital and the total indebtedness is said to be light.

Arthur Reichman, who recently returned from the pearl fisheries on the Wabash, while he was there, heard of the finding of a pearl worth $200 in a hogpen 20 miles north of Vincennes. The mussels taken from the shells are fed to the hogs, which refuse to eat pearls when there are any which escape the eyes of the fishermen. Mr. Reichman says that the falling off in the number of fishermen has continued all season, due doubtless to dull times in the button industry. Since his return he received a letter saying that between Vincennes and Terre Haute, the center of the fishing on the Wabash, not more than 25 men are now busy.

Affairs of Isaac Katz, now in bankruptcy and formerly in the jewelry business at 19 Maiden Lane, are again to be considered in court in December. An order was granted by Judge Holt, of the United States District Court, as related in THE CIRCULAR-WEEKLY of Dec. 14, 1904, directing that the bankrupt be committed to jail, because of his failure to pay to Dearborn C. Fox, the Trustee in Bankruptcy, $2,000 for the benefit of his creditors. From this order the bankrupt took an appeal, which will be argued before the United States Circuit Court of Appeals. Mr. Katz will be represented by Joal M. Marx, his attorney, and Hastings & Gleason will appear for the Jewelers Association and Board of Trade.

The second Office Appliance and Business System Show, under the management of Cochrane & Payne, opened Saturday evening at Madison Square Garden, and was well attended by the business men of the city and many visitors from out of town. The marked interest shown by the business interests clearly demonstrates the value of the show—in fact, it would be hard for business men to find a better place to spend a few hours and get the ideas and benefits offered by the various office systems and labor and time saving devices. There are over 100 exhibitors and everything from a paper clip to a calculating machine is shown and demonstrated. Among the interesting exhibits was that of the L. E. Waterman Pen Co., which has an extensive display of pens, and the collection of watchmen's and employes' clocks by the International Time Recording Co.

Evidence has been closed in the bankruptcy proceedings of W. W. Randall, formerly of 209 Greenwich St., and the attorneys are to submit new briefs on the motion to order the jeweler to return to the Trustee in Bankruptcy stock valued at $5,000, which he is accused of secreting. At the final hearing last week Mr. Randall's attorney called witnesses to testify in relation to the incidents just before his bankruptcy, in which a widow named McDonald figured. The attorney for the creditors argued that this testimony was not relevant. He said that it made no difference whether Randall was scared away from the city by this woman or went away for some other reason, but the real question was, what did he do with the missing diamond jewelry? The referee in admitting the testimony said that it might explain Mr. Randall's motives in leaving the city about the time of his bankruptcy.

Two cases involving the duty on drilled opals and rondelles of rock crystal were brought before Judge Hazel of the United States Circuit Court, last Wednesday, and both were decided from the bench in accordance with the precedent established in the case successfully fought by the American Gem and Pearl Co., as reported in THE CIRCULAR-WEEKLY May 31, 1905. Shreve & Co. and the California Jewelry Co., both of San Francisco, Cal., were the importers in the cases tried this week. The opals and rondelles were classified by the Collector as beads dutiable at 35 per cent. ad valorem, under Par. 408 of the Tariff Law. The importers contended that the merchandise should be classified under Par. 435, as precious stones advanced in condition, dutiable at 10 per cent. The Court agreed with the importers.

OUR MOTTO is still—NOT HOW CHEAP, BUT HOW GOOD!

This does not mean fancy prices, but it does mean genuine

### Morris and Joseph Klein, of Klein Bros. Co., Indicted.

Morris and Joseph Klein, of the Klein Bros. Co., who were manufacturers of jewelry at 51 Maiden Lane, New York, were indicted yesterday on several counts.

The charges were made by Eduard Van Dam, H. A. Groen & Bro., Charles F. Wood & Co. and David C. Townsend & Co. In the Van Dam and Groen cases Jos. Klein is charged with selling merchandise entrusted to him on memorandum. In the Townsend and Wood cases the charge against Jos. Klein is that he obtained merchandise by means of a false statement as to the financial condition of the corporation. It is understood that Morris Klein has been indicted only on the Groen and Wood charges. The third and youngest member of the firm, Samuel D. Klein, has not been indicted.

A petition in bankruptcy against the Klein Bros. Co. was filed by Abraham Roseman, as related in THE CIRCULAR-WEEKLY of Sept. 20. Directly afterward the three brothers were arrested on complaint of Mr. Van Dam, who charged that he had confided to them on memorandum merchandise valued at $10,000, and that all of it had disappeared. The brothers were arraigned in the Tombs Police Court and were released on bail, Morris and Joseph giving bonds in $3,500 and Samuel D. in $2,500.

The liabilities of the corporation, according to Mr. Roseman's estimate, were $25,000.

After the arrest of the brothers in the Van Dam case, other creditors, it is understood, consulted counsel for the purpose of bringing charges against the brothers before the Grand Jury. The Jewelers Association and Board of Trade made an investigation of the memorandum features, and its attorneys, Hastings & Gleason, took an active part in presenting facts to the District Attorney's office.

District Attorney Jerome apparently determined that there should be a thorough inquiry, as last week upwards of 20 merchants in the Maiden Lane district were summoned to his office, and doubtless gave the testimony before the Grand Jury on which the indictments have since been found.

The two brothers who were indicted, being out on bail, the county detectives, as soon as the indictments were found, notified them to appear in court for the purpose of answering the new charges.

---

W. R. Mosley has moved from Lothair to Soperton, Ga.

Richard A. Brown, Gaston, Ind., has moved to Albany, Ind.

E. S. Saunders, Wyoming, Ia., last week moved into more commodious quarters in the Crisick Block.

### Recent Announcement of 24-Karat Club.

The following circular has been sent to members of the 24-Karat Club of New York:

Oct. 30, 1905.

*Dear Sir*—At a meeting of the 24-Karat Club of New York City, a committee was appointed to obtain the opinions of the members upon the following propositions, viz.:

(1) To enlarge the membership of the club.
(2) To regularly serve luncheon.
(3) To secure suitable uptown premises.

The limit of membership is 100, and the number now enrolled about 90.

The club could not undertake to serve luncheon unless the membership were increased to at least 300, with an increase in initiation fee to $50, and in annual dues to $50. To obviate increase in membership, a combination might be formed with a downtown luncheon club already established. The rent of the requisite rooms convenient to Maiden Lane would be approximately $5,000 per year.

In order to open a home in the residential portion of the city, a similar increase in membership, initiation fee and dues would be necessary.

In the opinion of the committee, either of the latter two propositions would require the issuing of bonds to the extent of $10,000.

Will you please express your opinion concerning the above on the enclosed postal card?

Yours truly,

LEO WORMSER, Chairman.
JAMES R. GLEASON,
CHAS. F. BRINCK,
PERCY H. SAVORY,
HARRY C. LARTER, Committee.

The annual dinner will be given Tuesday evening, Jan. 16, at Delmonico's.

## Chicago Notes.

Loftis Bros. & Co. are redecorating their premises.

Carl J. Ricker, of S. F. Ricker & Son, Emporia, Kan., was here last week.

M. A. Mead visited the Pittsburg office of M. A. Mead & Co., last week.

J. Fleckenstein, of John P. Fleckenstein & Co., Sioux City, Ia., was here last week.

Spaulding & Co. and C. D. Peacock donated valuable silver cup trophies to the horse show last week.

George Kucharik, 699 S. Halsted St., has enlarged his store to double the space formerly occupied by him.

H. P. Cutter has recovered from his injuries sustained in a railroad accident and is now on a western trip.

The case of C. H. Seaman, diamond dealer, against Mr. and Mrs. Louis H. Berg has again been postponed.

The regular meeting of the Swedish Watchmakers' Society of Chicago will be held to-day at 80 Dearborn St.

G. A. Clickt, an optician, was found dead in his room, 1051 Milwaukee Ave., Thursday. The cause of his death is unknown.

Charles Spencer, manager for Norris, Alister & Co., has returned from a vacation spent at his home town, Oswego, N. Y.

A fire which started in a shed at the rear of B. A. Kirner's jewelry store at 906 Armitage Ave., one day last week, did no damage to the store.

T. L. Combs, of T. L .Combs & Co., Omaha, Nebr., and L. W. Swem, West Liberty, Ia., were among the out-of-town visitors here last week.

The second and final dividend of the estate of George B. Moore & Co. has been declared. It amounts to 3 per cent. The first dividend was 4 per cent.

Besides being the proprietor of a retail jewelry store at 1124 S. Kedzie Ave., J. Jurena is a good violinist and is now the leader of a West Side band of musicians.

Retail merchants of South Dakota are credited with a plan to make a fight against the large mail order houses here by combining and going into the mail order business themselves.

Samuel Bomash, pawnbroker, 249 Clark St., was arrested, last week, charged by a customer with disorderly conduct. The latter and Bomash quarreled over the interest due on a pledge. Bomash was discharged.

At the horse show last week Miss Florine Kaiser's "Peggy" won a prize in Class 72, for cobs under saddle. Miss Kaiser is the daughter of Sol Kaiser, of Louis Strasburger's Son & Co.

Chris Falkenberg, formerly a watchmaker for C. H. Knights & Co. and for nine years a resident of Alaska, has opened a jewelry store in the Hotel Dacres building in Walla Walla, Wash.

News was received here, last week, of the death of L. M. Warren, a pioneer jeweler of Sycamore, Ill. Mr. Warren was 86 years of age and was the father of George O. Warren, who conducts a retail jewelry store in Sycamore.

Charles E. Child, who had been one of the selling staff of Frank H. Noble & Co., Chicago, recently associated himself with the Charles M. Robbins Co., Attleboro, Mass., by whom he was employed several years ago.

News was received here with regret that W. C. Osman, of Marshalltown, Ia., is in financial trouble. Creditors here have received notices to the effect that a number of claims against Mr. Osman are being pressed and this caused his bankruptcy.

B. I. Wyatt, formerly with Carson, Pirie, Scott & Co., is now conducting the optical department for Gelder's Loan Bank, 1732 State St. This house recently removed from 1716 State St. and has much larger quarters than formerly.

Herbert W. Allen, of Herbert W. Allen & Co., is at the West Side Hospital, where he underwent an operation for appendicitis last Saturday. Mr. Allen had been troubled with appendicitis for the past two months. Reports from the hospital say he is doing well.

Members of the board of directors of the National Association of Credit Men held their annual meeting at the Auditorium, last week. A resolution recommending the formation of an adjusting bureau was introduced and referred to the executive committee.

Jewelry instalment houses were approached last week by a constable who seeks to establish a bureau for the purpose of exchanging information regarding the responsibility of people who buy jewelry on the easy payment plan. A number of credit jewelry stores have been swindled lately by people who open accounts wherever they can and then neglect to settle their bills.

The stock and fixtures of N. Bernhardt, doing business as the Potter Watch Co., who is in financial difficulties, have been inventoried at $2,000. The business will be continued by the creditors for the present, until they can definitely decide what action shall be taken.

J. G. Neumeister was barred from service on the Grand Jury, last week, on his declaration that he would not vote to enforce the law against a man who stole to supply his family with food. Mr. Neumeister is a politician, and is the proprietor of the Roberts Mfg. Co., manufacturing jewelry in the Champlain building, of which Gus A. Huber, formerly J. Huber & Enos, is the manager.

A meeting of the Retail Jewelers' Association of Cook County and the Retail Jewelers' Protective Association was held in the Masonic Temple, last Friday. By-laws for the protective association were read and adopted. The next meeting takes place on Nov. 10, when the question of merging the two associations will be discussed. Should it be decided to have two separate organizations, an election of officers for the protective association will be held.

C. J. Dodgshun, who was knocked down by a horse, some weeks ago, and who was thought to be on the road to recovery, has suffered a relapse and is confined to his home. It is believed that Mr. Dodgshun sustained injuries more serious than those which were apparent at the first diagnosis. None but his physician and members of his family is allowed to see him. Mr. Dodgshun was painfully hurt about the head and is suffering from a severe nervous shock.

---

Several distinct styles are shown in some exquisite brooches: One displays a large opal cut *en cabochon* and set in a row of emeralds bordered with diamonds; another is a disk in diamond openwork of fancy scrolls set with rubies, while still another shows an elongated diamond-shaped stone—a beautiful pink topaz, framed in diamond openwork—each in its own way being a beautiful example of the jewelers' fine art.

## Cleveland.

J. C. French, of Toledo, has accepted a position with the Wingate-Nusbaum Co.

G. L. Sigler, of the Sigler Bros. Co., is spending several days in Philadelphia on business.

R. E. Friese, for some time with Knittle & Longtin, 556 Pearl St., has gone with Louis A. Ott, Mansfield.

William Kennon and William Wagner, traveling men for the Sigler Bros. Co., left Monday on their last trips for the year.

Charles Groth, head bookkeeper for the Bowler & Burdick Co. for a number of years, has resigned and gone to Dayton, O., to engage in another business.

The Sigler Bros. Co. has put in three handsome 10-foot center cases, each over four feet high, containing three shelves. They were designed by C. C. Sigler, a member of the corporation.

Mr. Hammond, with Davis & Sons, of Galion, for some years, has gone to Bristol, Conn., taking with him his bride of a few days. He expects to locate there permanently.

The Whittlesey, Wood & Hayes Co., incorporated a short time ago, will put in a stock of jewelry on Erie St. and will probably be ready for business within a few weeks.

The business of the Harburger Bros. Co., mentioned in THE CIRCULAR-WEEKLY two weeks ago, is starting off well. The company has a handsome room on the second floor of the Citizens' building.

Frank E. Force, who opened a watch business in the Cuyahoga building, last February, has taken his brother, Fred W. Force, into partnership with him, under the firm name of Force Bros. They will still make a specialty of watches and fine watch repairing.

Among the jewelers visiting this city last week were: George H. High, Medina; H. S. Sumner, Akron; D. A. Beswick, Berea; Harry Downs, Bellevue; J. H. Heiman, Barberton; George H. Dickinson and wife, Geneva; G. L. Gunther, Bellevue; W. C. Fisher, Lorain; O. H. Pitkin, Galion, Henry Nix, with the Critz-Haserodt Co., Elyria, and Walter H. Deuble, Canton.

The suit of the George M. Murphy Pottery Co., East Liverpool, O., against the Pennsylvania Co., which was heard before Federal Judge Tayler, has been settled out of court. The pottery company brought suit to collect $105,000 loss sustained by the burning of their plant, said to be due to the fact that the fire department could not reach it because a long freight train was standing across the only approach to it.

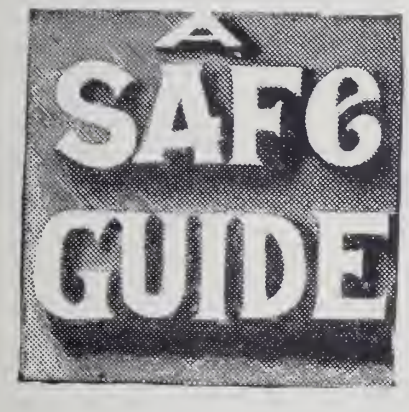
Leon von Kanel, who committed suicide on the porch of a residence on Logan Ave., this city, Wednesday, is said to have been an expert jeweler and traveling man for a jewelry house. He made his home at Clarington, O., but did not stay there much of the time. He has a brother there in the jewelry business, Ulysses von Kanel, and his parents resided at Massillon. Both are now dead. The man came here to see a young lady, who was temporarily visiting at the home of her sister, to escape his attentions. He called there several times and asked for her, but was never admitted. Becoming despondent, he shot himself in the mouth while seated on the front porch of the residence, expiring at once. For a time Von Kanel traveled for a large watch company. His brother came here Thursday and took the body to Massillon for burial.

## Pacific Coast Notes.

C. J. Klein, Santa Cruz, Cal., has just added new fixtures to his store.

E. C. King, formerly identified with the trade in the State of Oregon, has opened a new store at Santa Cruz, Cal.

R. W. Cummings, Ventura, Cal., is making improvements in the interior and exterior of his jewelry store at that place.



H. E. Fox, Albuquerque, N. Mex., is now en route for Chicago, where he will select a large stock of goods for his holiday trade.

Henry Melluish, Tucson, Ariz., recently moved his stock into new quarters directly opposite his old location. He has fitted up a complete optical department.

Mount & Ross, Petaluma, Cal., are making extensive improvements in their store. They are installing new show cases and entirely renovating the establishment.

Harry Baugh, a young negro, who was recently arrested when about to leave the store of the Union Mercantile Co., Topeka, Kans., with 13 watches and a large amount of jewelry in his possession, was tried and convicted in the Local District Court, on Tuesday of last week.

## St. Louis.

Harold Weidlich, with William Weidlich & Bro., spent several days at headquarters in this city, last week.

Morris Eisenstadt, president of the Eisenstadt Mfg. Co., spent last week in Chicago, combining business and pleasure.

Albert M. Dueber, general sales agent of the Dueber Watch Case Mfg. Co., spent several days in St. Louis last week.

Edward Gerson, diamond merchant, has removed from the Holland building to the third floor of the Commercial building.

James J. Burke, president of the Brooks Optical Co., will shortly enlarge his salesrooms to take care of the increasing business.

George Weidig, western agent for Joseph Fahys & Co., with headquarters at Chicago, was among the visitors in this city last week.

C. V. Bates, formerly of Huron, S. Dak., passed through St. Louis, last week, on the way to Bartlesville, Ind. T., where he will open a jewelry store.

Joseph Auer, with the Bauman-Massa Jewelry Co., returned from a trip in his territory and started out again last week for a trip over Louisiana, Mississippi, Alabama and Arkansas.

R. W. Lucius, Mascoutah, Ill., and his son, Philip Lucius, were in St. Louis, last week, buying the opening bill of goods for the new store which Philip Lucius will soon open at Wyoming, Ill.

An illustration and graphic description of the "silver room" of the Mermod, Jaccard & King Jewelry Co.'s establishment at 400 Fifth Ave., New York, appeared in a recent issue of the New York *Tribune*.

The commemorative medal which was recently presented to President Roosevelt by the citizens of Birmingham, Ala., while he was a guest there, was made by the Mermod, Jaccard & King Jewelry Co., of this city.

H. K. Slauter, who has been with the Mermod, Jaccard & King Jewelry Co. for the last year, has resigned to go to Oregon for his health. On the way west he will visit his brother, Perry M. Slauter, a jeweler at Farmington, Ill.

Nicholas Courvoisier, 7109 S. Broadway, used his launch, the *Adele*, in the attempt to rescue persons who were in a boat which exploded in the Mississippi River, on Sunday, of last week. Two men lost their lives and two others were barely saved. The propeller broke and the launch drifted downstream.

The many St. Louis friends of S. W. White, Hope, Ark., were grieved to learn of his sudden death in that city on Thursday. Mr. White was one of the oldest jewelers in that section of the Southwest. He was a frequent visitor to St. Louis, where he was well known among the wholesale and retail trade.

A package was lost recently by an employe of the Eisenstadt Mfg. Co. containing the following job work: Diamond stud, diamond and emerald cluster ring, diamond wreath Christian Science pin, gold wreath Christian Science pin, three set rings, locket, button, two signet rings. A reward of $100 was advertised and the package was returned intact two days later.

Among the out-of-town jewelers in St. Louis, last week, were: M. Harris, Leloge, Mo.; Joseph Mazer, South McAlester, Ind. T.; T. H. Vinyord, Piedmont, Mo.; A. J. Blackstock, Van Buren, Ark.; J. A. B. Keith, Vandalia, Mo.; Carl Shibley, Van Buren, Ark.; H. W. Foerste, Okawville, Ill.; E. D. Mathews, Baldwyn, Miss., a representative of Hightower & Moreland, Minden, La.

Information has been received from Houston, Tex., that at the trial of M. D. Skinner on the charge of fraudulent use of the mails and operating a lottery, he was ordered removed for trial to the Southern Federal District Court of Illinois, unless he gave bonds for $700, which amount was given. Skinner is alleged to have been connected with the Illinois Tontine Investment Co., which is said to have conducted a lottery scheme of selling diamonds.

August A. Bausch, of this city, last week, recognized a charm on the watch chain of a stranger at the horse show in St. Louis as an heirloom of the Busch family. The bearer of the charm proved to be John Goff, who said he purchased it from Sam Brenner, 311 *Globe-Democrat* building. The latter stated that he secured it from W. A. Gill, 612 Olive St. Mr. Gill consulted his books, which showed that the charm had been purchased for $25. The charm is part of the diamonds and other jewelry, valued at $2,000, stolen from the home of Arthur Magnus, of Chicago, a brother-in-law of Mr. Busch.

J. D. Cunningham, an insurance agent of Fort Wayne, Ind., was arrested on Monday of last week, on a charge of fraud preferred against him by Rosco Freel, of Huntington. Cunningham is also wanted at Wabash, Ind., where, it is alleged, he gave a worthless check to Joseph Miller, a retail jeweler of that place, in payment for articles of jewelry which he purchased.

## Indianapolis.

TRADE CONDITIONS.

Local manufacturers say that they are receiving orders for higher-priced pieces of jewelry than any time for two years. They speak encouragingly of the prospects for a fine holiday trade. Merchants report an increase in business, last week, over any previous week this Fall. There is a noticeable improvement in the watch trade. Out-of-town jewelers here, last week, report that business in nearly all parts of the State shows an increase. Elaborate arrangements for an unprecedented Christmas trade are being made. Collections are reported satisfactory.

Carl L. Rost and family spent Sunday of last week in Crawfordsville, Ind.

Augustus P. Craft, head of the A. P. Craft Co., spent part of last week on the road.

Charles Ham and Claud Howard, both of Frankfort, Ind., were greeting friends in this city, last week.

H. B. Dean, watchmaker for J. H. Reed, has resumed his old position with B. U. Tapken, New Brunswick, N. J.

Mrs. George Towns, who has been visiting her brother, Horace A. Comstock, this city, returned to her home in Springfield, Ill., last week.

The police are still searching for the cracksmen that blew open the safes in the stores of R. M. Smith & Co., Franklin, and of B. H. Harrison, Clayton. No clue has yet been obtained.

Out-of-town jewelers calling upon the local manufacturers last week included: J. Hummel, Jr., Muncie; Mr. Martin, of Martin Bros., Cartersburg; C. A. Bassett, Anderson; C. W. Neal, Franklin; F. C. Sheldon, Shelbyville; P. C. Seaton, Clayton; A. W. Owens, Greenwood; D. S. Whittaker, Lebanon; J. M. Washburn, Anderson; A. Pursel, Noblesville; J. A. Miessen, Cicero; George L. Spahr, Lebanon, and Leslie E. Heaps, Spencer.

The shoplifters who robbed a local cloak house of $1,000 worth of stock and who visited J. H. Reed to look at diamond brooches are now in the Marion County jail, pending a hearing next week. They were captured in Chicago by Detectives Gerber and Bray. Nearly all the stolen goods have been recovered. The trio gave their names as George Mackey, May Armstrong and Georgia Mackey.

## Cincinnati.

William Pflueger, of Joseph Noterman & Co., is traveling through the south.

Sol. Gilsey, of S. & H. Gilsey, has returned from a trip through the south.

Alexander Stirling, formerly with Peck, Selmeier & Peck, is now with E. H. Croninger.

J. H. Bovard has returned to New Castle, Ky., after taking a course in engraving in this city.

J. C. Farrell, formerly in business at Evansville, Ind., was a visitor to this city last week.

Charles Brock, of Brock & Feagans, Los Angeles, Cal., surprised the trade with his presence the past week.

Frank G. Meyer, Dayton, O., paid the local trade a visit, last week, while en route from West Baden, Ind.

Wallenstein, Meyer & Co., 16 W. 3d St., are looking for larger quarters to accommodate their growing business.

Herman Keck, of the Herman Keck Mfg. Co., returns this week from Europe, where he has been purchasing diamonds.

Arno Dorst, of the Dorst Co., has returned from Kansas City, and reports that business is "booming" in that vicinity.

A. A. Spiegel, of the Gustave Fox Co., will soon make a business trip to Chicago and go through Texas. L. J. Fox has returned from the Pacific Coast. B. Ganz, a representative of this house, was called in from the road by the sudden death of a relative, last week.

Leo von Kanel, who recently committed suicide in Cleveland, O., was well known to some of the Cincinnati jewelers, who deeply regret his death. Mr. Von Kanel stayed at the Grand Hotel here when not on the road collecting old gold. Deceased was about 26 years of age.

Out-of-town jewelers who visited the Cincinnati trade during the past week, not elsewhere mentioned, included: Mr. Jepson, Washington, Ind.; J. S. Throp, Greensburg, Ind.; W. W. Turner, Cedartown, Ga.; Saul Klein, Greenville, Miss.; A. S. Carroll, of the Carroll Jewelry Co., Bessemer, Ala.; J. S. Barnett, Troy, O.; H. Murray, Danville, Ky.; Frank Emmerling, Hillsboro, O.; J. Power, Owensburg, Ky.; Mr. McWaters, Somerset, Ky.; Frank C. Taylor, Carlisle, Ky.; Mr. Russell, Columbia, Ky.; H. D. W. English and wife, Hartford City, Ind.; W. W. Roberts, Nicholasville, Ky.; R. H. Dilley, Cambridge, O.; Mr. Smith, of McIntyre & Smith, Brannon, Ky.;

It was recently reported in a southern newspaper that Sig. Strauss, of Lindenberg, Strauss & Co., and a New York lady had been married. Mr. Strauss, however, stated to his friends that such a statement is erroneous and that he is still a single man. He will be in the east this week.

Between five and six o'clock Thursday morning a large plate glass window was smashed on the Race St. side of George H. Newstedt's store, at the corner of 4th and Race Sts. A tray of diamond studded Masonic rings, valued at $1,000, was stolen, and as far as the inventory shows this was all that was taken, as the rest of the display was left intact. It is supposed the robbery was planned the day before, as two well-dressed men who entered the store acted in a manner that aroused suspicion. They asked to see some diamonds, but Major Lovell, who waited upon them, not liking their appearance, was very cautious. The window then seemed to attract their notice greatly. Mr. Newstedt's loss is covered by a burglary insurance policy. No trace of the thieves can be found.

E. R. Smith has succeeded to the entire business of E. R. Smith & Bro., McGregor, Tex.

The jewelry store and pawnshop of H. J. Surtman at 601 St. Clair St., Toledo, O., was broken into early one morning, last week, and several hundred dollars' worth of jewelry was stolen, together with a large sum of money. The burglars broke open the show cases, took many watches and rings, and by some means opened the safe and rifled it of its cash and jewelry contents.

## Minneapolis and St. Paul.

L. P. Sandberg, Red Wing, Minn., is now working for W. C. Leber, Minneapolis.

Philip M. Kohl and bride last week returned to Minneapolis from their wedding trip, spent in the east.

Mr. Overby, son of G. Overby, Rice Lake, Wis., is taking a course of watchmaking and engraving in Minneapolis.

Wm. F. Blair, Granite Falls, Minn., has decided to leave town and move back to St. Paul, his former home.

Harvey Stark, indicted for stealing a diamond ring from the store of Fred. H. Harm & Bro., St. Paul, was recently sentenced by Judge Orr to three years in the penitentiary.

The watch sign which was hanging outside of the store of Van. R. Chase, Minneapolis, mysteriously disappeared, a short time ago. Its disappearance is supposed to be merely a pre-halloween prank.

The R. G. Winter Jewelry Co., Minneapolis, whose store at 327 Nicollet Ave. was formerly divided to allow for a portion being used for other purposes, is about to remodel and enlarge the store to occupy the entire room.

The Anchor Silver Plate Co., St. Paul, whose factory was recently destroyed by fire, is recovering some salvage from the ruins. An auction sale of the recovered goods will be held soon, in charge of S. Martin, Milwaukee, Wis.

Among the out-of-town jewelers in the Twin Cities, last week, were: L. Diacon, Chaska, Minn.; J. J. Birkebak, Lester Prairie, Minn.; A. L. Mealey, Delano, Minn.; Wm. Krohn, Annandale, Minn.; E. C. Bennett, Red Wing, Minn.

## Pacific Northwest.

Charles W. Williams, Detroit, Mich., has opened a store in Condon, Ore.

H. C. Madsen, formerly of Cottage Grove, Ore., has opened a store in Springfield, Ore.

Will Totten has been delayed in opening his store at Glendale, Ore., because part of his shipments were delivered at Salem, and the balance at Gold Hill.

The $6,000 worth of diamonds and emeralds which were stolen from C. E. Redfern's store, Victoria, B. C., Oct. 19, were recovered, last week, at Vancouver, B. C., where they had been hidden by the persons who took them from the store. There will be no arrests.

L. M. Hoyt, a jeweler of Hillsboro, Ore., has been awarded a Bunn gold watch as the prize in a scientific contest. The problem was: "Given, a watch wound at a certain time, the spring having a certain length and resiliency, the circumference of the wheels, when, if not re-wound, would the watch stop?" The watch was wound at noon, and when opened by the judges Mr. Hoyt's computation was within six minutes of the time of stopping.

R. L. McClaughry, Coffeyville, Kans., has gone out of business.

Damage amounting to about $1,000 was done to the store of Lewis P. Chambers, Alturas, Cal., Oct. 17, during a fire which swept over the business district of that place. There was no insurance.

## Detroit.

J. B. McIntosh, recently started in business at 64 Grand River Ave.

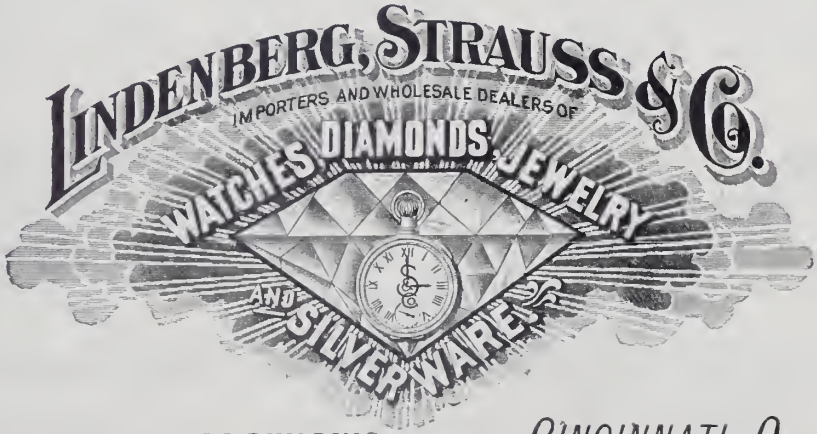
The Detroit Show Case Co., 490 Fort St. W., suffered a loss of $15,000 by fire, last week.

C. R. Frank, 487 Gratiot Ave., and Henry E. Krug, 44 Gratiot Ave., have installed new fixtures in their respective stores.

Frank Mathauer, of Mathauer & Koester, has started on a four weeks' trip to Michigan. Harry Koester has just returned from his territory.

Otto Stoll, who recently started an optical business, has combined it with a fire insurance business and removed from the Valpey building to 464 Gratiot Ave.

Herman T. Schneider, formerly with Horace W. Steere, 68 Woodward Ave., will shortly open a store at 57 Fort St. W., with Thomas S. Richards, optician.



Fred S. Palmer, formerly of Rochester, Mich., who recently started in business at 2058 River St., will open a new store at the River Rouge, below Detroit, on or about Nov. 15. He will go to New York next week to purchase stock.

Frank Kennedy, president and general manager of the Kennedy Optical Co., has rented new quarters in the rear of his establishment at the corner of State and Rowland Sts., formerly occupied by the Detroit Press Club, and will enlarge the business.

F. M. Knorst, Cashton, Wis., has gone out of business.

# The Simple Way

TO INSURE BUSINESS, BUY FROM OUR FIRST CLASS LINE AT RELIABLE PRICES.

25-29 CAREW BUILDING. CINCINNATI, O.

## San Francisco.

TRADE CONDITIONS.

Last week's report of trade conditions in San Francisco, Cal., shows that business during the week just passed was not as large as the business of the two or three weeks previous. Prospects continue bright, however, and the trade continues to prepare for a large holiday season. The present falling off in the volume of business is attributed to the approaching election.

John Christensen, Rio Vista, Cal., visited this city, last week.

Louis C. Koberg, Healdsburg, Cal., made Fall purchases in this city, last week.

H. Dana, of Shreve & Co., returned, last week, from a buying trip to New York.

J. D. Bennett, San Rafael, Cal., was here the first of last week, replenishing stock.

A. F. Dobrowsky, Redding, Cal., is now in the metropolis arranging for his holiday lines.

Mr. McKenzie, of Cook & McKenzie, Monticello, Cal., is at present sojourning in this city.

Bert Blangy, formerly with A. I. Hall & Son, has taken a position in the retail store of Paul V. Garin.

William Frazer, formerly watchmaker for F. E. Smith, San Jose, Cal., was in San Francisco, last week.

Frederick H. Weber, of this city, will be married, Nov. 5, to Miss Ada Louise Holm, Petaluma, Cal.

Radke & Co. put on an additional force of men, recently, to facilitate the handling of their holiday trade.

Mr. Epstein, manager of the Frank Golden Jewelry Co., Carson City, Nev., is spending a few weeks in this city.

Frank Mitchell came down from Livermore, Cal., last week, to visit friends in the trade and do his holiday buying.

Mr. Pennyman, who took a position with M. L. Levy & Co., a few weeks ago, has severed his connection with that concern.

Miss Leonora Eaves, daughter of one of the leading jewelers of Santa Barbara, Cal., was in San Francisco on a visit, last week.

John Hammersmith, of Hammersmith & Field, is now on a pleasure trip in Los Angeles, where he expects to spend two weeks.

C. W. Weinshenk, of the big supply house of Armer & Weinshenk, is just back from a successful trip through Washington and Oregon.

Samuel Cohn, formerly with Armer & Weinshenk, has accepted a position with the Alexandria Diamond Palace, on Market St., this city.

Frank Maguire, bookkeeper for the Baldwin Jewelry Co., is taking advantage of the opening of the duck shooting season and is on a hunting trip.

Howard Barbier, of the W. K. Vanderslice Co., returned, last week, from a four weeks' stay in the east, during which he bought the holiday supplies for the concern.

M. Van Kammen, San Mateo, Cal., paid the San Francisco jobbing trade a visit last week. Mr. Van Kammen recently secured the services of J. C. Hadler, formerly with Alfred Butt, Tacoma, Wash.

Henry Bohm, of the Bohm-Bristol Co., has returned from a recent purchasing trip to New York. He is at present in Denver, where he expects to remain about a month, coming to San Francisco in time for the holidays.

D. Conejo, Lapaz, Lower California, who controls the pearl fisheries on the Lower California coast, has just shipped $20,000 worth of pearls to China for the Dowager Empress. These pearls were ordered by a Chinese house in San Francisco.

Julius Auerbach, with M. Adelsdorfer, manufacturers' agent, has just returned from a trip through the San Joaquin Valley. The trip was his first since his somewhat serious illness resulting from an operation which was performed several weeks ago.

Among the out-of-town jewelers here, last week, not elsewhere mentioned, were: George Bangle, Vallejo, Cal.; J. C. Ward, Visalia, Cal.; M. K. Giant, Vallejo, Cal.; J. H. Langhorst, Jackson, Cal.; E. B. Lewis, Pacific Grove, Cal.; Alex. Lewis, Klamath Falls, Cal.

Hammersmith & Field have on exhibition at their store a piece of tourmaline weighing 14,880 carats. It is considered one of the finest specimens of this stone that has ever been found. It was taken from the mines of the Tourmaline Gem Co., at Mesa Grande, San Diego County.

The H. A. Forbes Co. is the name of the firm which has succeeded to the business of Walsh & Forbes, agents for the Dueber Watch Case Mfg. Co., on the Pacific Coast. Mr. Walsh is now in Los Angeles, where he opened a wholesale gold and gold plated jewelry establishment Oct. 16.

Shreve & Co. have offered a challenge cup to California students, to be known as the "Shreve Perpetual Chess Trophy," in order to promote interest in chess at the University of California. The trophy is a very handsome piece of work and uniquely designed. It is a large cup, mounted on an ebony base, the whole standing about 12 inches high and appropriately engraved. It is the intention of the donors to have the name of each year's champion marked on the side.

## Omaha.

T. L. Combs, of T. L. Combs & Co., recently made a trip to Chicago.

C. L. Shook, of the Shook Mfg. Co., has returned from a two months' western trip.

Elmer E. Freeman has sold his jewelry business at Oakland, Ia., to Edward A. Shepard, Villisca.

At the recent meeting of Supreme Council of Scottish Rite, C. L. Shook was elected to take the 33d degree.

D. V. Morris, who recently opened a new store at Ogallala, Nebr., bought his opening stock in this city, last week.

Sol Bergman has just returned home from a short trip in the west. He reports business conditions there as being very satisfactory.

Fred Brodegaard & Co. have added a new watch rack, to hold over 400 repaired watches, to their 16th St. stock. The rack is said to be the largest in the west.

The trade here was notified, last week, of the robbery of $1,500 worth of stock from the store of J. C. Vicker, Hull, Ia., by safe blowers. The robbery took place Oct. 24.

The following out-of-town jewelers were in this city, last week: B. C. Martin, Belden; John Crabill, Plattsmouth; C. A. Luce, Republican City, and P. W. Napier, Decatur.

W. H. Wilker, formerly of Chadron, was in this city, last week, buying the opening stock for his new store in Spaulding, Nebr.

P. E. Flodman and Jacob L. Jacobson are

helping to raise a fund for Albert Sjoberg, who was injured here a few years ago.

John Patterson, with Hayden W. Wheeler & Co., was here, last week, visiting old friends. Mr. Patterson formerly covered Nebraska as part of his territory.

Fred Jacobson has taken a position with Fred Brodegaard & Co. at the firm's S. 10th St. store. He will have charge of the catalogue and mail order business.

Max and Louis Reichenberg, formerly of the firm of the Reichenberg-Smith Co., have decided to remain in this city, where they are both engaged in the real estate business. They have formed a stock company with J. J. Deright in the automobile business.

## Kansas City.

TRADE CONDITIONS.

Business has dropped back into the old channels with the jobbers. The crowd of visitors earlier in the month caused a general neglect of business in various directions, and this is now all straightened out. The rush of business caused by the visitors is also over, and all the houses are working steadily, filling orders. The lack of excitement has made some of the jobbers believe that there is a lull in business, while others state that they are doing more real business now, as they are able to do it without being interrupted. Retailers report sales good, especially in diamonds. Manufacturers state that a great amount of business is being done in diamond setting.

Joseph Rifkin, with L. Heller & Son, passed through this city, last week, on his way home from a trip to Colorado.

F. M. Chamberlain, who was a regular salesman for J. R. Mercer several years ago and who has been traveling for some time, is again with Mr. Mercer.

S. F. Rieker, a retailer of Emporia, Kans., was here, last week, having stopped off while on his return trip from Chicago.

C. P. Kionka, of Kionka & Stuhl, returned, last week, from his northern trip, and will leave for a southern trip, Nov. 7.

C. E. Russell, who was engaged in business here for several years, is now with the Jaccard Jewelry Corporation, helping out during the holiday trade.

Paul Preston, of the repairing department of the Edwards & Sloane Jewelry Co., has been sent out on the road to cover the territory in Kansas formerly covered by D. P. Ingram, who has resigned.

Mrs. W. J. Gurney, wife of Mr. Gurney, of the retail jewelry firm of Gurney & Ware, left for California, last week, accompanied by her mother and daughter. They will spend the Winter in that State.

Friends of Guy M. Shriner, with Gurney & Ware, say "he is floating around the store these days, his feet only touching the floor at intervals." It's a bouncing baby boy, which arrived at his home, Oct. 25, that is causing all this elation.

J. W. Kerns, who has a jewelry repairing shop in the B. F. Shouse drug store, on the Southwest Boul., was held up the other evening, in his store, together with a couple of the drug clerks, and the cash register robbed. The watches left for repair were not disturbed.

The following retail jewelers from the surrounding country called on the jobbers here during the past week: W. L. Howe, Almena, Kans.; S. P. Shipley, Neodesha, Kans.; Charles L. Wright, Webb City, Mo.; Gustave S. Catchadal, Superior, Nebr.; T. S. Terry, Downs, Kans.; H. M. Siglock, Keytesville, Mo.; H. E. Fox, Albuquerque, N. Mex.; Gorton Rushmer, Pueblo, Colo.; A. Rosenfield, Leavenworth, Kans.; Mr. Campbell, of Campbell Bros., Oskaloosa, Kans.; Isidor Eller, Richmond, Mo.; G. H. Methe, Council Grove, Kans.; J. S. Lang, Coffeyville, Kans.; Otto Burklund, Osawatomie, Kans.; Mr. Davies, of Davies & Owen, Falls City, Nebr.; T. S. Lidston, Dearborn, Mo.; C. H. Frederick, Cabool, Mo.; J. L. Potts, Marceline, Mo.; W. R. Pearce, Gardner, Kans., and J. M. Coffman, Salisbury, Mo.

# The Bachelor's Alarm.

## A Most Novel Alarm Clock.

The figures on the dial are represented by groups of tiny men in dress suits, each group a separate picture, forming by their varying attitudes the numerals one to twelve.

### In Place of Hands on the Clock's Face

there is a dainty, beautifully colored ballet girl, whose pointed toes in her journey about the dial designate the time of day—*can you imagine her position at a quarter of three?*

### The Bachelor's Alarm

has been universally pronounced the cleverest novelty produced in years. In the bedroom, the cozy corner—the den—it's wonderfully attractive.

### A Very Big Holiday Seller.

**Every Clock Guaranteed For One Year.**

From your jobber or us direct.

## $9.00 Dozen.

We prepay carriage on dozen lots.
No time to be lost.
Filling Holiday orders right now.

## The Goldsmith Co.,

## Pittsburg.

TRADE CONDITIONS.

Some of the Pittsburg dealers express the belief that the local merchants will enjoy the best Christmas trade that has been experienced in this city since 1892. Business is splendid and merchants are happy. There is a demand for almost every kind of goods which the jeweler handles, the market in no way being narrow. Collections are good and there is every indication that the coming holiday trade will be the best in years.

It is reported here that S. Shamburger, who several weeks ago was arrested on the charge of causing the fire at his store in Butler, will again open in that city for business. Shamburger denies the charge, and when his case comes up for trial expects to clearly establish his innocence.

The members of the Merchants and Manufacturers' Association who last week toured a portion of central Pennsylvania completed a very delightful trip, Friday afternoon, after having visited 30 towns. Among the local jewelers on the trip was Henry A. Barrett, whose large sale of diamonds was commented on by some of the Pittsburg daily papers.

The following out-of-town merchants were in Pittsburg, last week, buying holiday stock: C. W. Schmid, New Castle; F. H. Hayes, Washington; A. C. Mehl, Woodsfield, Joseph Hauger, Berlin; Mr. Wittlig, Marietta, O.; W. C. Schmid, New Castle; F. M. Headley, Mt. Morris; Carl Rivinius, Ebensburg; A. H. Coleman, Massillon, O.; Harry Furtwangler, Greensburg.

The store of S. Silverstein, Breckenridge, Pa., was entered one night last week and stock valued at $400 was carried away. The burglars gained entrance by breaking a panel of the rear door. In a shed at the back of the building Mr. Silverstein found an old suit of clothes and a case of jewelry, which had been left there by the robbers in their flight. There is no clue to the thieves.

J. P. Thorn, Tarentum, Pa., whose financial embarrassment was announced in THE CIRCULAR-WEEKLY last week, was in this city several days ago, and it is stated by some of his creditors that Mr. Thorn has succeeded in getting quite a number to agree to accept a settlement of 30 cents on the dollar, to be paid in cash. It is stated that creditors to the amount of $6,000 have agreed to this settlement. Mr. Thorn had offered only 25 per cent. when he first announced his troubles and later increased this amount 5 per cent.

## Boston.

Samuel G. Smith has sold out his stock at auction.

John F. McKnabb, a Newton jeweler, died after a brief illness of diabetes, Friday last.

E. A. Cowan, of the Jewelers' Building, starts south this week for a two months' trip.

August Sweetland, of C. W. Sweetland, is on a business trip in Rhode Island and Connecticut.

Buyers in town during the week included: I. I. Harper, Upton; Benjamin Shogam, Fall River; Messrs. Hathaway & Son, Ware; J. W. D. Forbes, Ashland, N. H.; L. F. Terry, South Royalton, Vt.; G. E. Stevens, Middlebury, Vt.; C. L. M. Bugbee, Newport, Vt.; C. H. Place, St. Albans, Vt.

What is probably the most beautiful gold and jeweled communion service in New England was exhibited in the Church of the Advent, early last week, at the close of the morning service. The service, which is a memorial to the late Rev. George Frederick Daniels, formerly a curate of the Advent, consists of four pieces, the chalice, ciborium, patent and pyx, all of which are gold except the ciborium, which is silver-gilt.

South African advices say the Premier Diamond Co. recently introduced a novel plant for the conveyance of ground to the washing plant by means of shaking conveyors, somewhat similar to the underground conveyors now in use in several mines on the Rand. Upon the conveyor grease is smeared, with the result that diamonds are caught in this manner on their way to the washing plant.

The W. J. Feeley Company

Ecclesiastical Art Metal Workers in Gold, Silver and Brass, Medalists,

203 Eddy Street, PROVIDENCE, R. I.

IMPORTERS AND JOBBERS OF

DIAMONDS
WATCHES
JEWELRY

9-11-13 MAIDEN LANE, NEW YORK.

100 STATE STREET, ALBANY, N.Y.

A LARGE ASSORTMENT OF DIAMOND MOUNTED JEWELRY CARRIED IN STOCK.

## Connecticut.

George S. Bedient, with the Rogers Silver Plate Co., was in Danbury for a few days, last week, for the firm.

Frank Young, with the Middletown Silver Plate Co., Middletown, returned, last week, from a three months' trip to the west in the interests of the concern.

Theodore Drescher, Waterbury, and Miss Adeline Sandland, Newark, N. J., were recently united in marriage. The groom is at present in the employ of Unger Bros., retail jewelers, of Newark, N. J.

Cyrus Booth, one of the oldest employes of the International Silver Co., Bridgeport, last week, was remembered by gifts from his fellow employes, the occasion being the celebration of his 75th birthday.

The Hon. John Birge, of Bristol was thrown from his carriage about 100 feet north of the office of the E. Ingraham Co., last week, and received injuries from which he died 25 minutes later. He was cared for in the office of the Ingraham Co.

Arnold Brayton Crandall and Miss Elizabeth Jane Newell, until recently timekeeper at the factory of the Waterbury Clock Co., Waterbury, were married last week. After the ceremony the couple left on a honeymoon trip to North Adams, Mass.

An engraver of New Haven recently presented to Uriah C. Smith, of Brockton, Mass., a unique gift in the shape of a cherry stone containing one dozen spoons. The stons is in two parts, which screw together, the spoons being arranged on the inside. The spoons are perfect in every detail and just about large enough to be distinguished with the naked eye.

While one of the workmen was engaged in excavating for the foundation of the new boiler house at the H. C. Thompson Clock Co.'s factory, in Bristol, on Wednesday afternoon, he unearthed a diamond ring valued at about $250. The ring was lost about 28 years ago by the late Noah Pomeroy, who owned the factory at that time. Mr. Pomeroy sold the plant to H. C. Thompson in 1878 and retired from business on account of ill health. He then moved to Hartford, where he resided until the time of his death in 1896.

The case of Clarence C. Markham, the bankrupt jeweler of Guilford, was heard before Referee in Bankruptcy H. G. Newton, New Haven, Oct. 23, in the New Haven Bankruptcy Court. The check books belonging to Mr. Markham were asked for in order to place the time and amounts by the stubs, but Mr. Markham declined to surrender them, his attorneys asserting that his private business had nothing to do with the case.

G. Hogendubel, formerly an assistant department superintendent in the factory of the New Haven Clock Co., died, about a week ago, at the New Haven Hospital. The deceased had been connected with the New Haven Clock Co. for a period of nearly 30 years and was a member of the Adelphi Lodge 63, F. & A. M.; East Rock Lodge 38, A. O. U. W.; Winthrop Castle, No. 10; Knights of the Golden Eagle, Fair Haven Lodge, No. 2, and several other organizations, including the Clockshop's Mutual Benefit Association. The deceased was also at one time an active member of the New Haven Turn Verein.

# PACKETS LIKE THIS

Advertise your business. They're easily tied with

## Reis' Advertising Tape.

It's strong and dainty with a silk-like finish, and may be had in almost any bright color you choose; widths vary from 1-16th to ¼ of an inch.

It's admirably suited to making up jewelry packages—because it sets flat and snug, never slips and gives the packet a look of distinction. Almost as cheap as string.

THE MANIPULATION OF STEEL IN WATCHWORK.

Price, 60c. The Jewelers' Circular Pub. Co.

## Providence.

James Peacock has been admitted to the firm of Stone, Markham & Co.

The factory of the Hercules Safety Clasp Co. has been removed from 117 Point St. to 91 Sabin St.

Harry Mays, of the George W. Dover Co., who has been confined to his home by illness for the past few days, is reported on the road to recovery.

Among the imports at the port of Providence last week were five packages of imitation precious stones from Bremen and one of the same from Hamburg.

Frank T. Pearce and Christopher M. Lee have been named as executors of the estate of the late Aldridge B. Gardiner. Mr. Pearce and Mr. Lee are sons-in-law of the deceased.

The United Wire & Supply Co. has declared a regular quarterly dividend of 1¾ per cent. on the preferred stock and a dividend of 1 per cent. on the common stock of the company, payable at the office of the concern Nov. 1.

W. Manton Dailey, who for almost 10 years has been manager of the American Seamless Wire Co., has resigned to engage in another business. Thomas B. Nichols will succeed him as manager and F. A. Aborn will continue as superintendent.

The proposition to form a local branch of the National Civic Federation has interested several of the jewelers, as well as other business men in the city. At the preliminary meeting among those present were J. F. P. Lawton, of the Gorham Mfg. Co., and George E. Brady, international president of the Jewelry Workers' Union.

The department in jewelry designing at the School of Design, which has been helped in the past by contributions from various manufacturing jewelers, opened last week under the direction of Joseph Aranyi, who is the head designer for the Ostby & Barton Co. Mr. Aranyi is a Hungarian and a resident of this city. He was highly recommended for the place and succeeds Charles E. Hanson, who tendered his resignation the week before Mr. Aranyi was appointed. He was for eight years with Tiffany & Co., New York, and received a special diploma for the excellence of his individual work at the World's Fair, Chicago. For three years he was with the Pratt Institute, Brooklyn, where he introduced the department of art metal. For a little more than three years he has been in the employ of the Ostby & Barton Co.

Charles H. Hinges has re-engaged in business in Salem, Ore.

## North Attleboro

Fred S. Gilbert spent last week in New York.

Henry Wilson, New York salesman for the Plainville Stock Co., is spending a few days here.

William Lowe has returned from a successful business trip in the interests of Johnson Bros.

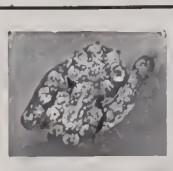
The engagement of Thomas W. Johnson, of Johnson Bros., to Miss Margaret Millea, of Worcester, Mass., is announced.

James Smith, employed by Riley, French & Heffron, had a finger amputated Monday by a circular saw.

William Lowney, employed as a polisher by R. Blackinton & Co., had two fingers on his left hand broken, Wednesday, while at work polishing a bracelet.

William R. Peckham left, Wednesday, for New York to take charge of the office of J. H. Peckham & Co. He succeeds George Angell, who has accepted the management of the New York office of the G. L. Paine Co.

An alarm of fire early on the morning of Oct. 24 called the department to the handsome residence of Anthony H. Bliss. The fire proved a disastrous one and was confined principally to the interior of the house and particularly to the partitions. The fire spread so rapidly that the occupants had much difficulty in getting out. Mrs. Bliss was obliged to tie a towel about her head in order to come safely through the smoke and flames. Mrs. Joseph Crandall and Miss Theresa Kelley, a servant girl, lost their way owing to the density of the smoke and were rescued by the coolness of Charles H. Pardee. Several others were obliged to jump from the windows. The fire came at an unfortunate time, as Mr. and Mrs. Bliss were making preparations to give a reception to Mr. and Mrs. Pardee. A piano, valuable bric-à-brac, oil paintings, silverware, books and other household furnishing were destroyed either by the fire or the water. The cause of the fire is unknown. The damage is estimated at about $5,000.



The result of last week's games in the Jewelers' Shop Bowling League follows:

| | | | |
|---|---|---|---|
| Oct. 23, H. F. Barrows Co. | 413 | 563 | 434 |

# TRADE MARK INFORMATION

**Note.**—The publication of our work, "Trade-Marks of the Jewelry and Kindred Trades," Second Edition, containing 4,000 marks, the accumulation of various works of reference, and the ramifications of our business enable us to trace to their origin nearly all marks that may be found on jewelry, silverware, art pottery and kindred lines, of both American and foreign make. All questions in regard to trade-marks will be cheerfully answered. We would be pleased to have the trade seek the benefit of our facilities regarding the identity of any marks they cannot trace. We would prefer to receive the article for examination; for, if the mark is of foreign origin, the slightest difference between a drawing and the original is of great importance.

***All queries received are also answered promptly by mail.***

It is used on chains. L. J. Co.

ANSWER:—W. & S. Blackinton Co., No. Attleboro, Mass. See page 49, second edition of "Trade-Marks of the Jewelry and Kindred Trades."

## Trade-Marks Recently Received.

(The following marks have been recorded by THE JEWELERS' CIRCULAR-WEEKLY since the publication of the Second Edition of "Trade-Marks of the Jewelry and Kindred Trades:")

*(On gold jewelry.)*
Kohn & Co., Camp and Orchard Sts., Newark, N. J.

*(Ploting solution.)*
E. E. Orvis, 201 State St., Chicago.

*(Jewelry mork now discontinued.)*
Chas. K. Grouse & Co., 41 N. Clinton Ave., N., Rochester, N. Y.

*(On jewelry.)*
L. W. Hirshman, 176 Euclid Ave., Cleveland, O.

*(On bodges and medals.)*
Glouskin & Fox, New Haven, Conn.

*(On umbrellas.)*
Hirsh & Bro., 396 Broadway, New York.

Kryptok Association.

New Haven Clock Co., New Haven, Conn.

*(On jewelry and silver goods.)*
Thomas J. Dunn & Co., 101 Chambers St., New York.

*(Jobbers' mark.)*
Wallenstein, Mayer & Co., 16 W 3d St., Cincinnati, O.

# BUYERS' INFORMATION BUREAU

Questions as to the makers of certain lines of goods, where to buy certain lines, where certain kinds of work are done, the owners of certain trade-marks and other matters relating to the buying branch of a jewelry business will be cheerfully answered under this department. *All queries are also answered promptly by mail.*

VANTTA, Ind. T., Sept. 25, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Can you tell me who will supply me with a copy of the "Guide to the Art of Engraving," by Paul Haff- A. S.

ANSWER:—It can be obtained from Herm. Schlag, Leipzig, 1820 Reichstrasse, and will cost about $1.

NEW HAVEN, Conn., Oct. 3, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Can you give us the address of some reliable party who can refinish French traveling clock cases? F. Co.

ANSWER:—Harris and Harrington, 12 Barclay St.; Bawo & Dotter, 26 Barclay St., New York.

BOSTON, Mass., Sept. 13, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Can you inform us where we can secure small pictures of the Kimberley mines? A. S. & SON.

ANSWER:—George Grantham Bain, 15 Park Row, New York, can furnish six views, 6 x 8 inches in size, at $3 each.

NEW YORK, N. Y., Sept. 23, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Can you inform us who makes a life size elk's head in zinc or copper? S. S. & Co.

ANSWER:—The W. H. Horstmann Co., 459 Broadway, can furnish such an article in sheet copper, and it can also be had for incandescent lights, with wiring, etc.

CHAMPAIGN, Ill., Oct. 7, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Can you tell us who makes the following patterns in toilet articles with the "Lily," "Lady Violet" and the "Carnation"? F. M. C.

ANSWER:—The "Lily" pattern is manufactured by Unger Bros., Newark, N. J., and the "Carnation" by the Woodside Sterling Co., 11 John St., New York. We have been unable to learn who makes the "Lady Violet" design. Can any reader supply the information?

PITTSBURG, Pa., Sept. 10, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
We would deem it a favor if you could furnish us with the address of the Joliet Electrical Clock Co., formerly at Joliet, Ill., as we want another street clock. We have tried to reach the concern on various occasions but without success, and if it has been succeeded by another firm we will be pleased to either have you name the successor or advise us where we can get something of this nature. Thanking you in advance.
J. D. R. & SONS.

ANSWER:—In 1894 the Joliet Electric Clock Co. failed. The machinery, etc., was purchased by William Hennion. The above is all the information we have on the subject. The Standard Electric Clock Co., Waterbury, Conn., makes street clocks of a similar nature.

## Sir William Crookes' Lecture on Making Diamonds.

IN the course of a lecture on "Diamonds," before the British Association at Kimberley, recently, Sir William Crookes explained to the assembled company how the precious gems might be manufactured.

"The first necessity," he said, "is to select pure iron free from sulphur, silicon, phosphorus, etc., and to pack it in a carbon crucible with pure charcoal from sugar." The crucible must then be put into the body of the electric furnace. "After a few minutes' heating to a temperature above 4,000° C., a temperature at which the iron melts like wax and volatilizes in clouds, the current is stopped and the dazzling, fiery crucible is plunged beneath the surface of cold water, where it is held till it sinks below a red heat.

"The sudden cooling solidifies the outer layer of iron and holds the inner molten mass in a tight grip. The expansion of the inner liquid on solidifying produces an enormous pressure, and under the stress of this pressure the dissolved carbon separates out in transparent forms—minutely microscopic, it is true—all the same veritable diamonds, with crystalline form and appearance, color, hardness, and action on light the same as the natural gem."

Attention was called to the suggestion that the diamond is a gift from heaven conveyed to earth in meteoric showers. According to this hypothesis, said the lecturer, holes were bored in the earth by the impact of monstrous meteors, the larger masses boring the holes, while the smaller masses, disintegrating in their fall, distributed diamonds broadcast.

"Bizarre as such a theory is," observed the great scientist, "I am bound to say there are many circumstances which show that the notion of the heavens raining diamonds is not impossible." In proof of this he showed the audience photographs of diamonds he had extracted from a meteorite.

The lecture abounded in interesting passages. Here is one:

"It is not uncommon for a diamond to explode soon after it reaches the surface; some have been known to burst in the pockets of the miners or when held in the warm hand, and the loss is the greater because large stones are more liable to explode or fly in pieces than small ones.

"Valuable stones have been destroyed in this way, and it is whispered that cunning dealers are not averse to allowing responsible clients to handle or carry in their warm pockets large crystals fresh from the mine. By way of safeguard against explosion, some dealers imbed large diamonds in raw potato to insure safe transit to England."

By the end of 1904, 10 tons of diamonds had come from the Kimberley mines, valued at £60,000,000 sterling. This mass of gems could be accommodated in a box five feet square and six feet high.

According to the lecturer, one of the most remarkable gems in existence is a phosphorescing diamond in the possession of Mrs. Kunz, of New York, which will phosphoresce in the dark for some minutes after being exposed to a small pocket electric light, and if rubbed on a piece of cloth leaves a long streak of phosphorescence.—*London Mail.*

# The Thimble House.

No. 149.

Thimbles are not a side line with us—They are our main business. We study Thimbles, our designers study thimbles, our workmen study thimbles—The result is the finest and largest line of Thimbles on the Market.

## UNITED STATES PATENTS.

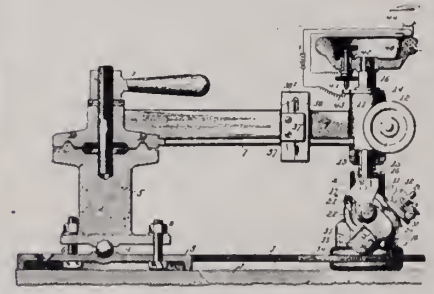
ISSUE OF OCT. 24, 1905.

**802,364.** WATCHMAKER'S TOOL. CHARLES ARTHUR, Newark, N. J., assignor to the Newark Watch Case Material Co., Newark, N. J. Filed April 15, 1905. Serial No. 255,742.

A tool of the character described, comprising a holder having its central portion removed and

formed with openings through the same for the reception of the wrenches, wrenches fitting in said holder and having their rear ends slotted, and means contained within the central opening of said holder and extending transversely across the inner ends of the wrench-receiving openings and fitting in the slots in said wrenches to prevent the latter from turning.

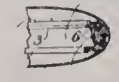
**802,365.** WATCHMAKER'S WRENCH. CHARLES ARTHUR, Newark, N. J., assignor to the Newark Watch Case Material Co., Newark, N. J. Filed April 15, 1905. Serial No. 255,743.



In a wrench of the character described, the combination with a handle having a centrally-located

tube projecting beyond its lower end, and a bar extending diametrically across the tube-opening above its lower end, of a removable wrench, said wrench having one end slotted to engage said bar and the opposite end forming a wrench proper.

**802,368.** GRINDING OR POLISHING GEMS. CLYDE COLEMAN, Chicago. Filed Dec. 6, 1898. Serial No. 698,481.



The combination in an apparatus for grinding or polishing gems, of a carrier-head, a centrally-ar-

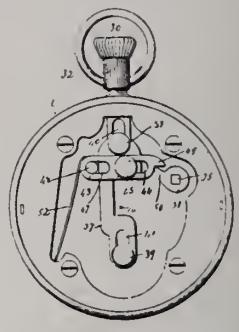
ranged holder carrying the gem, a detachable abutment on the lower end of the carrier-end, and a spring engaging the gem-holder to force it toward said abutment.

**802,507.** WATCH CASE HINGE. LOUIS S. HANSON, Huron, Wis. Filed April 11, 1905. Serial No. 254,958.

A case comprising in combination a case-center having a centrally-directed flange and a recess

formed therein, a lid having a knuckle formed thereon adapted to project into said recess, and a spring positioned within said case-center and provided with a tip adapted to extend through a slot formed in one side wall of said recess and further extending into a recess formed in the contiguous side of said knuckle.

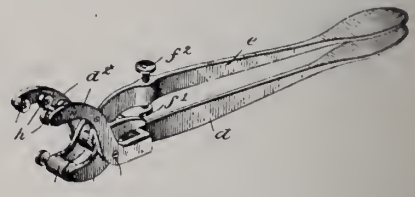
**802,668.** FOUNTAIN-PEN. HUSTON TAYLOR, Waterville, N. Y., assignor to Aikin, Lambert & Co., New York. Filed Oct. 22, 1904. Serial No. 229, 600.



A self-filling fountain-pen provided with a pump-

ing device, and separate air and ink ports, the ink-port having a greater frictional resistance for the ink, than the air-port for the air, on the air-expeling stroke of the pumping device.

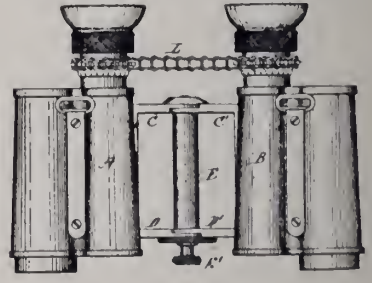
**802,782.** GAME-WATCH. WILSON E. PORTER and DANIEL J. HURLEY, New Haven, Conn. Filed July 22, 1904. Serial No. 217,661.



In a game-watch, the combination with a case having a pendant, of a push-pin located in the said

pendant, a spinning dial arranged concentrically within the case, and an automatically-released spring-actuated dial-spinning mechanism including a push-bar located in line with the said push-pin.

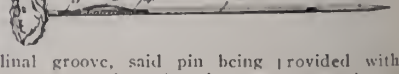
**802,784.** RING-EXPANDER. ALFRED M. REMINGTON, Fitchburg, Mass., assignor to the Novelty Engineering Association, Fitchburg, Mass. Filed July 30, 1904. Serial No. 218,835.



A ring-expander comprising a pressing device adapted to be oscillated around a mandrel, said

pressing device comprising a pair of levers pivoted together and having rollers designed to operate upon the ring and bear upon the mandrel, the roller of one lever being adjustable with respect to the main portion of that lever.

**802,817.** FIELD-GLASS. ANDREW J. LLOYD, Boston, Mass. Filed March 29, 1905. Serial No. 252,748.



In a binocular instrument of this class; eyepieces independently adjustable having attached sprocketed

rings; and a sprocket-chain constructed to engage with said sprocketed rings.

**802,844.** HAT-PIN. ALBERT E. BRADLEY, Wilmerding, Pa. Filed March 6, 1905. Serial No. 248,600.

A hat-pin formed adjacent its head with a longi-

tudinal groove, said pin being provided with a spring-tongue of arc-shaped curvature seated in said

groove, one end of said tongue being fast to the body of the pin, and the other end of the tongue being free and having a limited movement under pressure in said groove.

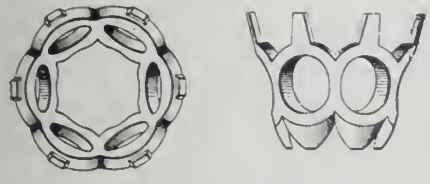
**802,910.** CLOCK. HENRY BURMEISTER, New York. Filed June 21, 1902. Serial No. 112,573.

In a clock, a stationary dial, in combination with a casing containing a time-movement, a clamping

device for securing the movement to the dial, and a winding device having a winding-shaft passing through the clamping device.

DESIGNS.

**37,574.** POCKET-PIECE. JAMES H. GAULT, Philadelphia, Pa. Filed June 15, 1905. Serial No.



265,457. Term of patent 14 years.

**37,575.** MEDALLION. GEORGE L. PRICE, Seattle, Wash. Filed May 17, 1905. Serial No. 260,-

902. Term of patent 7 years.

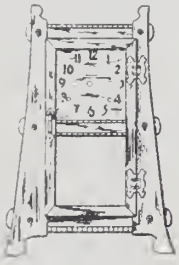
**37,576.** SETTING FOR GEMS. JULIUS WODISKA,

New York. Filed June 15, 1905. Serial No. 265,459. Term of patent 3½ years.

**37,577.** COVER FOR BOXES OR SIMILAR

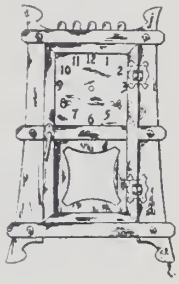
ARTICLES. THEODORE W. FOSTER, Providence, R. I. Filed July 27, 1905. Serial No. 271,553. Term of patent 7 years.

**37,578.** TOILET-POWDER RECEPTACLE. WILLIAM ARNOLD BRADLEY, New York. Filed



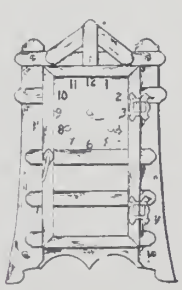
July 28, 1905. Serial No. 271,701. Term of patent 14 years.

**37,583.** CLOCK-CASE. CHARLES H. BARNES, Poughkeepsie, N. Y. Filed Aug. 16, 1905.



Serial No. 274,483. Term of patent 7 years.

**37,584.** CLOCK CASE. ARTHUR W. OWEN, Winsted, Conn., and GEORGE B. OWEN, JR., New York, assignors to the Wm. L. Gilbert Clock



Co., Winsted, Conn. Filed Aug. 16, 1905. Serial No. 274,479. Term of patent 7 years.

**37,585.** CLOCK CASE. ARTHUR W. OWEN, Winsted, Conn., and GEORGE B. OWEN, JR., New

York, assignors to the Wm. L. Gilbert Clock Co., Winsted, Conn. Filed Aug. 16, 1905. Serial No. 274,480. Term of patent 7 years.

**37,586.** CLOCK CASE. ARTHUR W. OWEN, Winsted, Conn., and GEORGE B. OWEN, JR., New

York, assignors to the Wm. L. Gilbert Clock Co., Winsted, Conn. Filed Aug. 16, 1905. Serial No. 274,482. Term of patent 7 years.

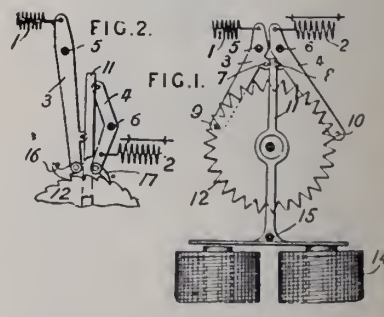
## BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1904, FROM *The Illustrated Official Journal.*)

ISSUE OF OCT. 11, 1905.

**13,596.** ELECTRIC ALARM CLOCKS. F. W. BAYNES, Exeter. June 16.

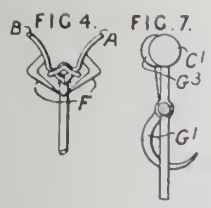


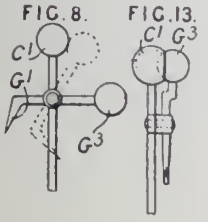
An alarm clock is fitted with an insulating-ring C, drilled with holes D at positions corresponding to the quarter-hours, and surrounded by the metal disk or band E connected to one terminal of the

battery K, the other terminal of which is connected to the framework of the clock through the bell G. The battery and bell are placed in the hollow base of the clock, together with a piece of celluloid or other material on which are written the times of appointments at which it is desired to set the alarm. The U-shaped plug F is placed in the requisite hole, making contact with the disk E, and, at the prearranged time, closing the circuit through a spring contact attached to the hour hand.

**13,686.** ELECTRIC CLOCKS. F. W. HOWORTH London. — (Magneta Fabrik Electrischer Uhren, Zurich, Switzerland.) June 16.

In secondary clocks controlled by reversals of electric current, by the action of the current in the coils of an electromagnet 14, Fig. 1, a polar





ized armature 11 is rocked alternately to the left and right on its axis 15, striking in turn the pins 7, 8, Figs. 1 and 2, on the actuating ratchet levers 3, 4, pivoted on axles 5, 6, and thereby turning the levers and alternately moving the pins 9, 10, Fig. 1, or pawls 16, 17, Fig. 2, from engagement with the teeth of the driven wheel 12, against the action of tension springs 1, 2. The two tension springs may be replaced by a single spring connecting the long arms of the levers.

**13,815.** HAT-PINS, SCARF-PINS, COMBS, ETC. A. T. HART and F. DANIEL, both in Worksop, Nottinghamshire. June 18.

To lock a hat-pin, hair-pin, scarf-pin, comb, etc., in position, two curved or bent projecting pointed

arms F, Fig. 4, are pivoted to the top of the pin, and, when placed in position, the points are drawn together by a spring, thus gripping the material between them. The pin can be removed by pinching together the wings A, B. In modifications (4), Fig. 7, there is only one projecting point $G^1$, which is curved and is locked in position by the ball $G^3$ being forced past the ball $C^1$ at the head

of the pin; (2) Fig. 8, the point is bent as shown, and is secured by the head $G^3$ being brought up to the head of the pin $C^1$; (3) the pin is locked as described with reference to Fig. 7, except that the heads are beveled on their adjacent sides; (4) Fig. 13, the head $C^1$ is provided with a recess in which the ball $G^3$ fits; (5) there may be two of the bent points shown in Fig. 7, and the ball $C^1$ at the head of the pin can be retained or dispensed with; (6) instead of being pivoted, the bent arms may slide on the pin, springs being provided for holding in the locking-position.

**14,160.** ELECTRIC CLOCKS, ETC. S. Palmer, Tonbridge, Kent. June 22.

Consists of electromotive apparatus for driving clocks and other mechanism. When the parts are in the position shown in Fig. 1, inclined contact-surfaces 9, 12, preferably faced with platinum, are separated, and an electric circuit through an electromagent 1 is broken, the armature 2 thus being unattracted. A spring 16, or weight or other accumulator, therefore pulls the armature over on its pivot 2a, causing a pivoted pawl 4 to drive a ratchet-wheel 6, and hence the clock-train 7, 8 or other mechanism. At the same time a screw, 3, presses out the catch 13 against the action of a spring 15, and releases the spring-pressed lever 11, causing the surfaces 9, 12, to make contact. A circuit 19, 10, 9, 12, 23, 1, 19a is thus made, and the armature 2 is attracted back, during which motion the pawl 4 slides over the surface of a ratchet tooth, and the surface 12 is depressed by the sliding of the stud 9 upon it. The lever 11 is thus caught again by the catch 13, while the stop 9 is lifted off the surface 12 when a spring 5 depresses the pawl 4 over the crest of a tooth into the recess behind it. The electric circuit is thus broken, and the spring 16 again comes into action. The tail of the pawl 4 may carry a vertical arm with a stud 9, the lever 13 being horizontal and engaging a vertical pivoted contact, which is moved by a spring so as to make contact with the stud 9 when the lever 13 frees the vertical contact. In this case the lever 13 would carry the screw 3, and a spring attached to the pawl 4 would carry a block or piece having a sloping surface for moving the lever 13 and releasing the vertically-arranged contact. Instead of the pawl 4 driving the clock, etc., an additional pivoted piece on the armature may be used, suitable stops being provided, in place of the teeth of the pinion 6, for permitting and controlling the downward motion of the pawl 4; or the pinion 6 may be used for that purpose alone.

*Complete specifications accepted Oct. 4, 1905.*

## The Isochronism of the Pendulum of Astronomical Clocks.

OBSERVATIONS that I have been pursuing since 1901, says M. Ch. Féry, on a regulator of Callier, overhauled by M. Boudeaud, his successor, appear to show that the relation which exists between the amplitude of the pendulum and the rate of the clock is not in conformity with that of the free pendulum; these variations of amplitude are chiefly due to the thickening of the oils.

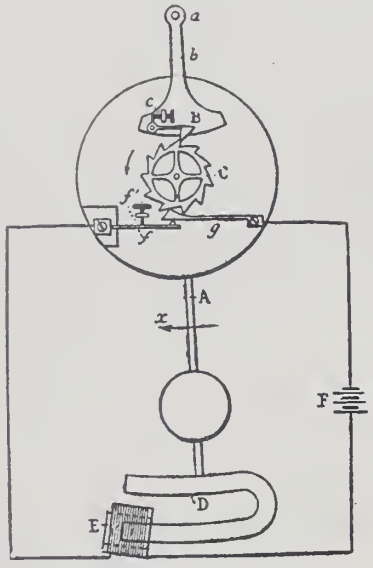
I therefore resolved to study the pendulum in question by systematically varying the amplitude by changing the driving weight. The results obtained are as follows:

| *Driving weight. kg.* | *Amplitude.* ° ′ | *Daily rate observed. s.* | *Rate calculated supposing the pendulum to be free.* |
|---|---|---|---|
| 1 | 1 17 | — 0.57 | — 1.3 |
| 2 | 2 02 | + 0.50 | — 3.3 |
| 3 | 2 29 | + 0.50 | — 5.0 |
| 4 | 2 45 | + 0.14 | — 6.3 |

The observations were conducted throughout one week. The time was taken at the Observatory by means of a good chronometer.

The comparison made on leaving was repeated on returning, and always gave the same result. The time separating these two comparisons was only about three-quarters of an hour. It was independently proved by means of a thermometer giving the mean temperature of the clock room, which thermometer I had had specially constructed for this experiment, that the variation of the rate due to difference of temperature was of the order of 1/10th of a second only.

It results from the preceding table that between two 2°02′ and 2°29′, that is for a variation of amplitude of about 9 mm., the variation of rate was nil. The curve shows that for 2° 3′ the pendulum performs its oscillations in minimum time.



I propose to call "amplitude de réglage" of a pendulum driven mechanically, that which corresponds to a minimum time of oscillation, and for which a variation of amplitude produces the minimum variation of rate.

This happy disturbance of the defective isochronism I attribute to the escapement, which is always arranged in such a way that the impulse takes place after the pendulum has passed the vertical.

As M. Lippman has so well pointed out, such an impulse delays the pendulum, but one easily sees that this disturbing effect increases when the amount of the amplitude diminishes.

On the contrary, for very large arcs, which it was impossible for me to attain, the rate would probably tend toward that of the free pendulum.

Without wishing to say that the disturbance due to the escapement fully accounts for the observed phenomenon, of which a part is, perhaps, due to the suspension, I think that this note replies to the question so often asked: At what amplitude ought an astronomical clock to work?

PENDULUM CONSTRUCTED BY M. CH. FÉRY.

The clock illustrated above consists of a driving pendulum which causes the escapement wheel (C) of an ordinary train of minute wheel work to advance by one tooth at each complete oscillation.

When the pendulum oscillates in the direction of the arrow, the pawl (B) carried by a fork (b), or fixed directly to the stem of the pendulum, chases before it the tooth with which it is engaged; this movement is terminated and limited by the light jumper spring (g).

This last spring is so arranged as to give a fresh impulse to the pendulum by throwing into the bobbin (E) the current from the battery (F). The duration of the contact is regulated by the screw ($f^1$), which controls the spring (f), and the current from the battery circulates in the bobbin so as to attract the magnet (D), which constitutes part of the pendulum.

On its return, that is to say, when the pendulum is displaced in the direction opposite to that of the arrow (x), the pawl (B) is simply raised, the escapement wheel being maintained in place by the jumper (g).

Properties of this escapement: The escapement thus described is exactly analogous to the escapement called a detent, employed in marine chronometers. The pendulum controlled in this way possesses an "amplitude de réglage," such as I have demonstrated in connection with the Graham escapment.

Let us suppose that the impulse is given when the pendulum is at the vertical, it will not affect its time-keeping, but the disengaging which precedes it and which has a slowing effect, occurring before the vertical, will tend to have a slowing action on the small arcs.

Let us suppose, on the other hand, that the disengaging takes place exactly in the vertical, the impulse which occurs later will again tend to retard the small arcs: the direction of the effect is therefore a slowing one in both cases; that is, it is independent of the exact point at which the disengaging takes place.

Experiment has fully confirmed this view. Below are given the going rates of the clock obtained with various amplitudes in the case of a half-seconds clock on this system:

| *Amplitude. mm.* | *March daily rate. secs.* |
|---|---|
| 10 | — 100 |
| 15 | — 25 |
| 20 | — 8 |
| 25 | + 1 |
| 30 | — 1 |
| 35 | — 15 |

These variations of amplitude were obtained by inserting resistance in the circuit of the battery, but analogous results may be observed by varying the amplitude in any other way (such as putting a brake on one

of the movements of the moving wheels of the going train, or deadening it by a sheet of mica fixed to the pendulum).

This fortunate disturbance adding itself to the natural imperfection of isochronism has already been noted in marine chronometers.

Electric working: The combination of bobbin and magnet of this system constitutes an electro-magnetic motor, of which the efficiency, in spite of its feeble force (two to three gramme-millimeters per second), is about 70 per cent.

Direct measurements show that the counter e.m.f. developed at the normal amplitude is .75 volt when the battery which works the system has an e.m.f. of 1.09 volts (silver chloride cell).

This explains the small consumption of the apparatus, less than .5 of a watt per annum.

The diurnal variations of a half-seconds clock, worked by a standard battery sufficient to provide this feeble current are less than .3 of a second.—*British Horological Journal.*

## The Fad of Collecting Clocks Keeps the Clockmaker Busy.

"FORTY clocks in one house is not by any means uncommon," said a clockmaker. "In some private residences the timepieces exceed even this number. Almost any house of fair size will have from 15 clocks up to 20 or 30."

With 40 or more clocks in operation it can be imagined that a rare treat may be in store for the restless guest at his friend's country place. As he tosses sleepless on the pillows of his strange bed the hour of 12 approaches.

Suddenly the slow, sweet tones of the chimes of the great clock in the dining-room break forth upon the silence in glorious melody. Scarcely have the chimes died away, followed by the deep measured, deliberate strokes that mark the hour, than another clock bursts forth upon the scene with its message.

This time the hour is announced in rather a saucy, emphatic manner—one stroke banging after the other like shots from a rapid-fire gun, the entire 12 consuming little more time than one stroke of the big clock. Then from another room in the opposite side of the house comes the faint and barely distinguishable notes of a bar of music that is still another timepiece's way of demonstrating that the midnight hour has arrived.

These notes are closely followed by a grand chorus of rings, bangs and tinkles as the score or more remaining timepieces whirl into action.

Silence more intense by contrast follows this unexpected and somewhat startling outbreak upon the night's quietness, which is again undisturbed save by the occasional striking of the quarter and half hours. The guest's sleeplessness disappears in the perfect silence that follows the charming midnight concert.

"How are so many clocks kept in good running order?" repeated the clockmaker. "Easily enough. No one in the house is supposed to touch or wind a single clock. That duty is left to the clockmaker.

"I spend one day each week winding clocks. In one house alone in this city an hour and a half of my time each week is taken up in winding the clocks. Of course, I regulate them, too. And if there is any slight repair to be made, I attend to that, too.

"This constant and careful attention is economical in the long run. When a clockmaker attends to your timepieces you may be sure the work is done thoroughly. For he is regular in his work, and regular winding means better time.

"A lady in Tarrytown has more than 40 clocks in her Summer home. I make a trip one day each week up there through the Summer season to keep her clocks in good shape. She is a great lover of timepieces, and has many rare and beautiful specimens, and never tires of adding a new clock to her collection.

"Many persons buy clocks just the same as they do bric-à-brac, and the number they already have never seems in any way to affect their purchase of new ones that may strike their fancy. There is an old saying that there's always room for another clock, and I guess that's about right.

"We now have clocks that suit the laziest and most forgetful person down to the ground. These are imported, and run for 400 days with one winding. Anybody ought to be able to remember to wind a clock in that time, and this style of timepiece seems to be meeting with great favor, for we have recently sold a great many of them."—*N. Y. Sun.*

Mrs. Sarah J. Fox, Carson City, Nev., has discontinued business.

## Proposal to Correct Chronometers by Wireless Telegraphy.

(Translated for the JEWELERS' CIRCULAR-WEEKLY from *La Nature.*)

CERTAIN things of life apparently very simple are frequently very complex. A lover of precision buys a superb chronometer that should not vary more than a few seconds a month. But how is he to know whether it is as accurate as it should be? Shall he compare it with the regulator of a watchmaker of reputation? To what purpose, when nothing assures him that the regulator keeps better time than his own chronometer? Shall he consult a railroad clock? That would be worse than useless, since these clocks vary as many minutes as his chronometer varies seconds. It is, therefore, a difficult task to ascertain the time with perfect exactness. Will the seeker be better off at Berne, where the time is corrected every morning by the Neuchâtel Observatory? It has been said that in Switzerland the exact time is always known. According to our French observation, Swiss railway clocks sometimes vary one or two minutes from each other. However, the time in Switzerland is generally known within one or two minutes, and that is something after all.

At Paris the town and railway clocks—that at the War Office and that at the Orleans Station—often vary several minutes. The clock at the Institute points at midday when that at St. Germain-l'Auxerrois shows two or three minutes to 12. There is almost as great a difference in time as indicated by one clock as there is in the styles of the clocks themselves.

We now have the pneumatic clocks. It is true that these do not vary more than three minutes, so that not *every* train need be missed. Shall we rely on the electric clocks installed by the Observatory? In these there is real progress, but, alas! they are not perfect, as the deviations in time sometimes amount to several seconds. We once observed a difference of 25 seconds between the clock of the Trinity Chancel and that of the Marie de Saint Supplice.

How then shall the purchaser of the fine chronometer that does not vary more than a few seconds a month console himself? Must he give up in despair; for he cannot ascertain the exact time at Paris or in some other cities of Europe?

It is now more than a quarter of a century since Paris clocks were connected with

# An ELGIN
# Art Treasure for You

This large "Father Time and Lady Elgin" calendar, because of its matchless beauty and superiority of execution, compels the admiration of the most discriminating lovers of art. Hanging on the walls of any home, it will share attention with the most highly prized masterpiece of painting. It is entirely free from all advertising matter. Size 8x15 inches.

The calendar is the work of Maud Humphrey, the well-known artist. It illustrates in four beautiful pictures the popular periods of English fashion—the fifteenth, seventeenth, nineteenth and twentieth centuries. Its strikingly delicate color effects, combined with remarkable originality of conception, places it among the treasures of art. It is instructive and valuable from a historical point of view as well. Send for sample calendar.

**ELGIN NATIONAL WATCH CO., General Offices, 131 Wabash Ave., CHICAGO.**

the Observatory, in order to receive the time of the first meridian. This connection is telegraphic and should give the exact time. The electric current regulates the rate, but the mechanism of transmission is such that some teeth may escape and differences in the working of the hands result. The deviations of a watch may be ascertained by using one of these electric clocks as a standard. Each clock works well individually, but there may be small differences between them. The system is complex, costly and of limited use.

M. Bigourdan, of the Academy of Sciences, astronomer at the Observatory, is of the opinion that he has found a simple solution of the problem by merely having recourse to wireless telegraphy. The principle is very simple. At the Observatory a controling clock commands at every second a relay that sends a signal through space. This signal may be received anywhere, even in an apartment. The technique is easily understood. The electric current discharged by the master clock penetrates an induction coil, which gives every second an oscillating discharge of short duration. As in wireless telegraphy, each discharge causes an undulatory movement, which is projected into space, and its waves are taken up by the receivers at the various stations. Place a receiver anywhere and it will indicate the beating each second of the controlling clock. Thus the exact time at the Observatory could always be known at any point.

M. Bijourdan, aided by M. Ducretet, a well-known constructor, has made various experiments. At first he used the Popoff-Ducretet radio-telephone. The transmitted wave gave sounds through the telephone; every beat of a second by the controlling clock could be heard distinctly. Then he had recourse to the registering apparatus used in telegraphy with the Morse system, and with a chronograph furnished with a pen and ribbon. With the chronograph, which unrolls about one centimeter of ribbon per second, the signals obtained are clear and the time of each may be ascertained within about .02 or .03 of a second.

With this very modest provisory arrangement a very good transmission has been obtained at a station two kilometers distant, and certainly the distance might have been increased. M. Bijourdan does not doubt that with inexpensive means it would be possible to distribute the time at all points in Paris, and even in the suburbs. A small and very simple receiver, installed at the place where the exact time is needed, would suffice. The waves of wireless telegraphy, as is well known, are propagated circularly, like the waves formed on the surface of water by a pebble. Every receiver within a given radius would, therefore, be impressed. This kind of distribution would be of great service everywhere, especially for scientific researches.

H. E. Dekle, Quitman, Ga., has purchased the Snow building, the first floor of which he occupies with his jewelry business. The building is being remodeled. The floor will be raised until it is even with the new cement sidewalks.

## Rating Chronometers.

BY H. REINECKE.

THE increased travel on our railroads, the greater distances traversed and the greater value of "time" to a more numerous population where its loss is great in the aggregate calls for more accurate time measurement for the nation at large, and for a higher education of our horologists, who are required to determine time for cities. Some years ago it was customary for nearly every watchmaker or jeweler to have in his establishment a pendulum regulator. Of more recent years, however, these ponderous fixtures have been superseded by the use of ship chronometers, for which it is claimed by the makers of superior instruments of this sort that correct time may be determined at any time by an arithmetical computation concerning its rate. Mariners are in the habit of determining their longitude at sea in the first instance by these instruments. Geographical scientists do the same on land, and it was therefore only a little step further for horologists to imitate their example and to keep the record of correct time for their particular use.

Between the latter and the two former, however, there is this difference: that the mariner and the geographer could have recourse at times of more or less duration to the chronometer maker to inspect and give a closer or newly verified rate to their chronometers. The horologist, on the other hand, following his daily routine of business in his limited abode, uses his chronometer day after day, and often weeks, relying for

STANDARD TIME AND TIME STANDARDS.

THE YEAR 1883 witnessed the introduction of a system whereby certain sections covering 15° longitude should reckon a time-difference of one hour for each section, commencing with the 75th meridian. This is known as Standard Time. Accordingly, when it is 12 noon in our New York office (eastern time), it is 11 a. m. in our Chicago office (central time). But there is no difference in the high quality of Watches handled, or in the good service rendered by these two offices.

a check only, when within reach of a Government telegraph, generally at long intervals of time. He then quietly sets his chronometer to approximate correct time, and allows his customers to set their watches blindly day after day without ever taking into account or even knowing the exact daily rate of his chronometer. It must be borne in mind that there is hardly ever a chronometer without a daily rate of variation. Such a daily rate is never permanently equal, but will change from time to time, as the best chronometer-maker is unable to make the adjustment of a chronometer perfect, either on account of mechanical reasons or on account of meteorological and atmospheric influences, the latter not being subject to scientific calculation. What is to be done? When a mariner on his sea voyage is fortunate enough to come within sight of land of which he knows the correct latitude and longitude, he simply takes his sextant, and by an altitude of the sun in the morning or in the afternoon gets local time, which he compares with the time indicated by his chronometer, making due allowance for its rate. If he discovers an unforeseen error he will be able to correct the rate of his instrument.

How easy would it be for an individual always on land and on a spot of which he knows or ought to know the latitude and longitude to perform the same operation by an instrument which the mariner uses or a similar one. The only thing which such an individual on land has not is the horizon of the sea. But this can be supplied by an artificial horizon with the assistance of a square cast iron basin filled with quicksilver and covered by a frame fitted with plate glass, which will prevent the surface of the quicksilver being agitated by the wind. This is not the only way by which an individual on land can procure for himself the correct time, but it can in this way be demonstrated that a horologist may in like manner do what a mariner, who does not excel an average horologist in intelligence, can do at sea. The calculation necessary for obtaining the practical result of such an observation at sea or on land is purely mechanical with the assistance of a book or two.

This is an age of progress, and why cannot our boasted horological schools take hold of the subject and teach their scholars something in this line; not the business of rating chronometers, but to enable men of the horological profession to give to their customers the correct time, which they claim to do? Of what use is it to produce such splendidly adjusted watches if their accurate running cannot be verified by a reliable horologist? In using and rating chronometers it seems proper and judicious to study their requirements, their superiority as timekeepers and their shortcomings. With these points in view, the following may be appropriate:

A chronometer is a watch of an abnormal

Rockford Watches Speak for Themselves.

# "The Best Watch in the World for the Money."

THIS has always been the trade slogan of the New York Standard Watch Co. *Our new watch for jewelers* is making it more emphatic than ever before. This is a watch worthy of any trade—*compensating balance, breguet hairspring, 7 jewels, lever escapement;* two finishes — nickel damaskeened, and combined fancy gilt and nickel damaskeened; *pendant set*, in 18 size Open-Face and 6 size Hunting and Open-Face; fully guaranteed.

18 Size Hunting and Open-Face.

**A Low-Priced Watch Made Especially for Jewelers**

6 size Hunting and Open-Face.

This watch has a thoroughly good finish throughout—in all its parts, and is carefully constructed to give the jeweler a watch he can sell with perfect confidence and that will satisfactorily meet the very large demand that exists for a low-priced watch. Made in one of the largest American factories, running full time *on this one thing.* That is the reason the price is so low.

Write to us for price-list. Your jobber has a full stock, but early orders are necessary—the demand is great.

size, of peculiar construction, of great perfection and of the best of workmanship, used as a portable instrument, where time must be measured with great accuracy, and where such accuracy must be maintained for a length of time, more or less limited. Chronometers differ from all ordinary watches in the principle and construction of their escapement. A chronometer escapement is an escapement in which the escape wheel is locked by a jewel fastened in a spring detent. The impulse to the balance is given by the teeth of the escape wheel directly upon a jewel fastened in a steel roller and carried on the lower end of the balance staff, where the impulse is delivered at every alternate vibration. To allow the return of the balance after having received its impulse, the steel spring detent carries a gold discharging spring, which allows a small roller with a jewel to pass to its normal state of rest, when it will be ready to lift the spring detent, thus allowing the escape wheel to give the next impulse.

The superiority of the chronometer escapement is often demonstrated among horologists by a comparison with the lever escapement. While such a comparison is often instructive it cannot be intended to show that either the one or the other may fill the office for which the other is intended. The chronometer escapement is to be used for the purpose enumerated, while the lever escapement is *par excellence* the proper escapement and the best known thus far for pocket watches.

It may be in order here to mention that we have marine and pocket chronometers. Marine chronometers generally beat half seconds; they are hung in gimbals in boxes of about six to eight inches square. Pocket chronometers have a quicker beat and do not differ in appearance from ordinary watches except that they are generally a little larger. They are principally used for recording observations on the decks of large ships and for comparisons with the box chronometer, which is kept in a safe and stationary position on board the ship.

For the benefit of the less well informed a limited comparison between the chronometer and the lever escapement may be acceptable. First, in detached escapements the unlocking of the escapement, when subject to variations from one cause or another, has a disturbing influence on the isochronous vibrations of the balance. Among adjusters of watches to positions it is a common practice when adjusting lever watches for isochronism to lessen the unlocking resistance on the pallets when the short vibrations are too slow, which is mostly the case in pocket watches.

Second, the disturbance in the unlocking of the lever escapement is twice as great as in the chronometer escapement, on account of the double pallets, whereas, in the chronometer escapement the balance unlocks the escapement and receives an impulse for each alternate vibration, although in both cases the escape wheel progresses 1/15th part if the wheels have 15 teeth. The effect on the isochronism of the motion of the balance in the case of a marine chronometer is widely different from the effect produced in case of the pocket watch with the

# New England Watches

"Best Value" Watches Made.

Are being advertised to more than one-third the entire population of the United States.

New England WATCHES

The busy man's time keeper

TIME is money in modern business. Whether your work is indoors or out, an accurate timepiece is a necessity. New England watches, besides keeping absolutely perfect time, are made in so many different styles and designs that suiting your particular taste is a certainty. Go over the New England watch trays with your dealer and ask him about their reliability.

SOLD EVERYWHERE AT FROM $5 TO $24

The New England Red Book of Men's Watches and the New England Blue Book of Ladies' Watches fully illustrate the entire line. Sent free on application.

New England Watch Co., 34 Maiden Lane, New York City

This is one advertisement of the series appearing in the

*Ladies' Home Journal,*

lever escapement, which will be explained further on.

Third, the unlocking of the chronometer escapement is met by a uniform and constant resistance, *i. e.*, by the bending of a hardened steel spring without any lubricant, while the unlocking of the lever escapement, the pallets of which need oil, is subject to continued and gradual changes.

Fourth, the unlocking of the pallets in the lever escapement in pocket watches is subject to a constant change by the varying motive power of the main springs in going barrels, which are almost exclusively employed in our present pocket watches, while in the construction of the present marine chronometer the fusee, which furnishes an equal motive power, has been retained.

(*To be continued.*)

## Horological Notes.

A PECULIAR clock was recently constructed by A. M. Lockhart, of Pittsburg, Pa. The clock is more than nine feet high and supports a dial four feet in diameter, upon which is adjusted a correct map of the world that revolves and by means of which it is possible to ascertain at a glance the exact hour at any point on the earth's surface. It moves according to the movement of the world, which is contrary to the hands of a clock, and what is more, the hands of this particular timepiece are stationary.

The clock in the tower of the New Naval College, at Dartmouth, Eng., which will be opened shortly, will mark time as kept on board ship, striking eight, six, four bells, etc., and will be the only clock of its kind in England.

In wiring the court-house at Gettysburg, Pa., for electric light, T. P. Turner discovered on the clock bell the following inscription. "Geo. Hedderly, Founder, Philadelphia, 1804. Cast for Adams County Court House."

One of the inmates of the Northampton, Pa., almshouse is Lewis Julien, an horologist of considerable genius. Mr. Julien was born in Vast, department of La Manche, France, in 1827. At the age of 12 years he went to Belgium and learned the trade of clock and watch making from his father. About five years ago he made a greatly admired eight-day clock, which is so constructed as to work automatons to represent the advent of the birth of Christ in the manger, surrounded by the ox and ass, the visit of th ewise men, the flight of Joseph, Mary and the Child seated on an ass to Egypt, and the coming of Herod and the soldiers. Besides this the clock has a dial giving the day of the week and the month and the signs of the zodiac every 24 days. It also shows the rising and setting of the sun and moon in a separate department. There is a time dial, and the clock strikes hourly and quarter-hourly. If the clock is placed near or within reach of a person lying in bed, when it strikes its quarter, half or three-quarter taps and it is dark, one merely has to reach to the side of the clock and on pulling on a small cord, which hangs beside it the hour will strike at once, thereby saving the trouble and time of getting out of bed and making a light.

# RETAIL JEWELERS ADVERTISING

*The use of this department is open to every retail jeweler and optician. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters as full and particular as you desire. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed several weeks.*

## Holiday Advertising by Retail Jewelers.

IN the issue of THE CIRCULAR-WEEKLY of Oct. 18 several examples of Christmas advertising were shown. A few more advertisements of this kind which may offer suggestions to readers are published this week. The first, with the catch phrase, "Christmas Diamonds," was used last season by Fred. Rolshoven & Co., Detroit, Mich., in a space of five inches, double column. The ring, set with a solitaire flashing forth its sparkling rays, is used to good advantage as a border for the text, the introduction of which reads as follows: "Let this be your diamond Christmas—bright, sparkling, precious as the beautiful gem. Let your Christmas gifts be diamonds—a pin, ring, pendant, brooch, locket, cuff buttons, charm. Everybody loves diamonds, and you can well afford to buy them if you come here."

H. E. Herman & Co., Williamsport, Pa., used the adjoining watch ad., also in a space of five inches, double column, thus leaving a generous amount of white space to enhance the ad.'s attractiveness.

"That Christmas Gift," is the catch phrase of the timely and suggestive advertisement of A. W. Susen, El Paso, Tex., which occupied a space of five inches, double column. This ad. has a simple but neat typographical display.

The Jaccard Jewelry Co., which is now the Jaccard Jewelry Corporation, Kansas City, Mo., advertised watches in a well-set ad. of four inches, single column. The suggestive power of this little ad. is strengthened by the fact that the border illustrates the articles advertised.

A. N. Wright, in the thriving city of Portland, Ore., has a well-constructed announcement bearing a strong double caption, "Christmas Shopping While the Stock Is Fresh." The orginal of this ad. measures 4½ by 6½ inches.

The script ad. of A. Stowell & Co., Boston, Mass., is sufficiently "different" to make it conspicuous among other ads., perhaps even more attractive than a larger ad. set up "in the same old way." The Stowell ad. occupied only four inches, single column.

## What Some Jewelers Say.

FALL gifts! For Fall gifts we have a beautiful assortment of articles appropriate for brides, anniversaries and birthdays—for all gift occasions of the season. We are confident that you will see no choicer collection of jewelry, silverware, cut glass, fine clocks, etc., elsewhere, nor find things more attractively priced. John D. Greene & Co., Utica, N. Y.

In buying that bridal present remember this—Chapman is not only showing many jewelry novelties, but at prices considerably lower than you are usually asked. We do this by buying at first hands, paying spot cash, and being contented with a fair margin of profit. If you have a bridal present to give, see Chapman's goods and get his prices—you'll like both. Dr. J. W. Haskell, scientific optician, in attendance. Consultation free. William Chapman, Norfolk, Va.

A FEW MORE EXAMPLES OF HOW SOME JEWELERS ADVERTISED DURING THE LAST HOLIDAY SEASON.

# STORE KEEPING DEPARTMENT.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## A Representative Store of Chillicothe, O.

A VIEW of the newly furnished store of O. J. Fuchs, of Chillicothe, O., is shown on this page. The furniture is of cherry and the glass used in the show cases, etc., is of French plate.

The first wall case seen on the left in the accompanying illustration is used for the display of cut glass and is lined with beveled edge mirrors, the shelves being of plate glass. All the wall cases are eight feet in length and have single glass sliding doors. Electric lights are placed inside of each case. The counter cases, five in number, are also each eight feet in length. A "silent salesman" case, eight feet in length, extends across the rear of the store.

Immediately on the right as one enters the store are two umbrella cases, a settee and a large mirror for the accommodation of customers.

All the cases and rails resting on the floor have marble bases. At the entrance to the store, on the right and left, are two highly polished rails, made in bent panel work, with copper grills and marble bases.

The ceiling is painted white down to the picture-moulding and from the latter down to the wainscoting the color is sky-blue. The wainscoting is painted turquoise blue. The general effect of this color scheme is very striking.

The front of the store has prism glass above and the patent glass without corner posts below. The store is illuminated by 135 electric lights and 12 gas burners.

## Wit of a Western Philosopher.

WIT is a good thing, but the advertiser should prefer to find it in the comic section, not in an advertisement.

Success in advertising don't consist in what we say we are going to do, but in the things we really do do.

Every advertiser has a right to do "just as he pleases," but it isn't the wisest man who always takes advantage of this right.

The man who says he knows all about the business of advertising is a good man to let alone—he hasn't found out yet.

The man who puts up the best talk about how advertisements should be written doesn't always make good when you give him pen and paper.

There is such a thing as false economy, for instance, the business man who is too economical to buy good advertising space.—*White's Sayings.*

## Advertising Gifts for the Employer.

Christmas is the time chosen by a good many employes to club together and give their employer something in the way of a present. Of late years there has been a great deal of Christmas presents given by employers to employes, and the feeling will be found just as strong the other way. Employes like a good employer, and are willing to part with their money to show it.

Newspaper advertising is good, as it will reach the employe and will start the idea of clubbing together and buying something for the "boss." This should be supplemented by some good window displays, and the displays should have good window cards, to call attention to their object.

Watch charms make good presents for this purpose, where a few want to club together, and a window well trimmed with them, with a card in the center reading:

CLUB TOGETHER
AND GIVE ONE TO
YOUR EMPLOYER

will put the idea in the head of men who would otherwise never think of it, and still feel that they really ought to do something of the kind.

It will be found that once a movement of this kind is started, it will nearly always meet with approval by employes. They will put in a certain amount, all around, and buy something good for the price, rather than give a present which they feel would be within their own reach.

INTERIOR VIEW OF THE STORE OF O. J. FUCHS, CHILLICOTHE, O.

Some employers would appreciate a cane, given by employes, and if they regularly use a cane this is sure to be desirable. A window trimmed with canes of different values, will cause the employe to think of this, and a window card reading:

YOUR EMPLOYER!
WILL A CANE PLEASE HIM?
CLUB TOGETHER
AND BUY ONE FOR HIM

will attract the attention of nine out of 10 of the men who pass the window and cause them to think of their employer.

Umbrellas, too, make a good present for an employer to whom they are always acceptable, no matter how many he may already

## Storekeeping Department.

possess. A window filled with these every few weeks will be a good thing, if you place a card to talk to the people right in the window with them.

Rings are appropriate gifts, especially those which would appeal to the employer on account of a lodge emblem, or anything of that kind. Lodge pins are equally suitable and a display of them every once in a while will keep the boys alive to the fact that you can furnish them anything they are likely to need in that line.

As Christmas draws near you will find that an occasional window devoted exclusively to a fine silver service will be a winner, and if a window card is used in this window announcing that nothing more appropriate might be purchased for an employer, where many employes can contribute it will make that class of employes think, and will probably cause a sale. In a case of this kind it is well to let them know that a ribbon can be placed across the chest, on which the entire list of names can be printed in gold. That feature would be appreciated by both giver and recipient, and the expense can be added to first cost.

Jewelers using this means of selling the highest quality and highest priced silverware will find that the possession of such a chest will cause the sale of others. No employer will get such a present and keep it hid away in the closet. He will show it to every caller for weeks, and the advertising you get will be no small item. Others will make good resolves, and you will get more business. F. A. P.

### A Jeweler's Experience With a Competitor's Absent-Minded Customer.

A JEWELER is frequently subjected to much trouble and annoyance by absent minded persons, and the following is an instance of how his patience is often sorely tried by such persons. A woman recently walked into the jewelry store of R. H. Stearns & Co., Pine Bluff, Ark., and demanded the charm she "left two weeks ago for repair." Having given her name, we looked in the proper place for the job, but it was not to be found.

The woman showed signs of great excitement and was positive she left it there. She even pointed out the very man who, she said, received the charm. We looked in every conceivable nook and corner, but in vain. Finally she walked out with a step that boded ill.

In a few minutes she returned.

"That charm must be found," she exclaimed, angrily, "and I demand that you show me all your jobs in the drawers. Place their contents on the show case and let me see."

We objected and advised her to go to the other jeweler's and inquire for it.

"But I left it here. I gave it to that man; I am sure!"

She left again, walking up toward the courthouse, we watching from the door to see if she called on the other jeweler for the article; but she passed by; then we telephoned that jeweler if he had a charm belonging to Mrs. ——, describing the same. The response was, "Yes, we have got it."

Soon the woman called again and demanded the charm in more emphatic terms than before. Her excitement had reached the fever point.

"Did you go to that other jeweler and ask for it?" one of our firm asked.

"Yes, I did. He hasn't got it. You had better let me see all your jobs. That charm has got to be found, or you will have to pay for it?"

"But we do not have to pay for it. We just telephoned and learned that your charm is in the possession of that jeweler whom we indicated and at whose store you said you called to inquire about it."

"Then," she gasped, "you have gone up and put it there"

With that she left, taking the same direction as before, but she now decided to call, as she was informed. She got the charm and sauntered back past our store. As she passed I stood at the door, hoping she would stop for a moment to acknowledge that she was wrong, or that she had found her charm. I believed she would apologize in some manner. But no—not a word.

As it was evident she did not intend to give us the least satisfaction I asked her from the door: "Did you get your charm, madam?" She turned her head just enough to show that she heard me and looked daggers. Talk about patience being necessary in the jewelry business! I thought that was the limit. C. B.

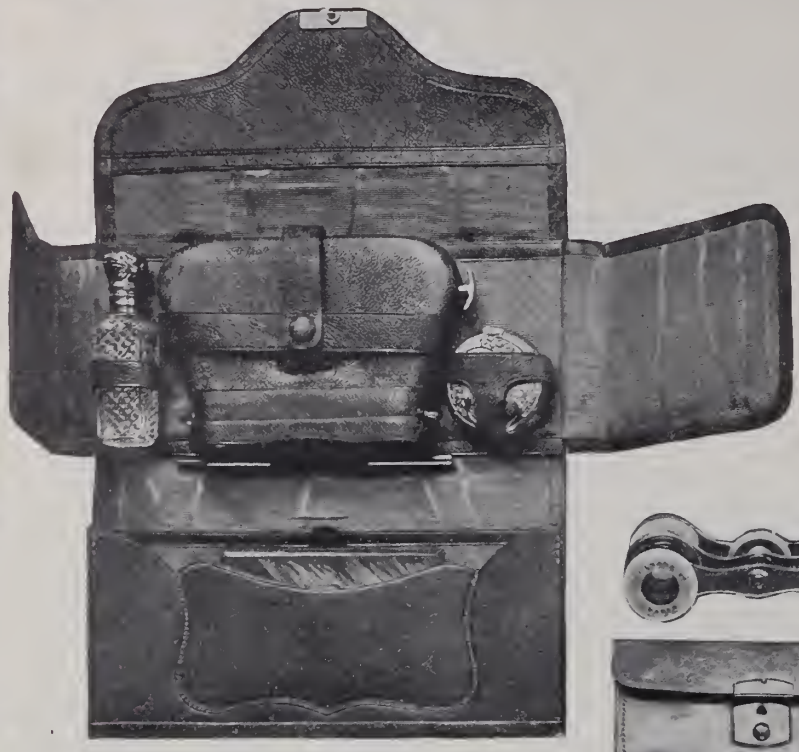
Morris Jossel, Steelton, Pa., has been declared a bankrupt.

Lionel E. Hubbard, Park City, Utah, accompanied by his wife, returned recently from a trip to Philadelphia, Pa., where he had gone as a delegate to the convention of the I. O. O. F. After the convention Mr. Hubbard and his wife visited several of the important cities in the east.

### The New Store of S. W. Tasch, Danbury, Conn.

ILLUSTRATED below is the new store of S. W. Tasch, Danbury, Conn., which was recently formally opened to the public with a concert by a local orchestra. The orchestra was stationed in the rear of the store, which was attractively decorated with palms and flowers. As souvenirs Mr. Tasch gave to the ladies who visited the establishment pretty little pin cushions set on tiny stands.

Although the new store is of only moderate size, it is very complete. It is equipped with entirely new fixtures of dark oak. At the right of the entrance is a diamond room and at the left is the watchmaker's workroom. Extending back from the jeweler's room are the jewelry show cases, and on the opposite side of the passage is the optical department.



A VIEW OF THE STORE OF S. W. TASCH, DANBURY, CONN.

The store is brilliantly lighted. In the rear of the main store is a special room for sporting goods.

### The Show Window in the Holiday Season.

DURING the holiday season special attention should be devoted to the show window. It should be made as attractive as possible. No matter how small a stock a jeweler may carry, he can arrange the window so that it will catch the eyes of passers-by. If you have no original display, at least keep the stock in the window clean and free from dust. Small pieces of jewelry should be exhibited either on neat cards or in clean cases.

Many jewelers make elaborate holiday displays which are designed especially for the yuletide season. Several of such suggestions will be published in a forthcoming issue of THE CIRCULAR-WEEKLY.

# The Optometrist's Catechism.

A SERIES OF QUESTIONS AND ANSWERS ON ELEMENTARY OPTICS, IN CATECHETICAL FORM.

By E. Le Roy Ryer.

Copyright, 1903, by The Jewelers' Circular Publishing Co.

*(Continued from issue of Sept. 27.)*

REFRACTION

Q.—(600) Is there any difference between the "Angle of Refraction" and the "Refracting Angle"?

A.—Yes. The angle of refraction is the angle made by the ray after passing into a denser medium with the perpendicular, whereas the refracting angle is the angle made by the two surfaces of a prism.

Q.—(601) What conditions determine the amount of refraction a ray of light will undergo in passing through a prism?

A.—(1) The angle which the two surfaces of the prism make with each other; in other words, the refracting angle of the

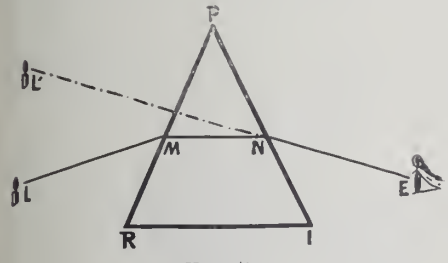

Fig. 45.

prism; (2) the index of refraction; (3) the color of the ray, red being deviated least, violet most; (4) the angle which the ray makes with the first surface.

Q.—(602) When is the deviation of a ray of light least for any given prism?

A.—When the incident and the refracted ray make the same angles with their respective surfaces, as in Fig. 42 (issue of Sept. 6).

Q.—(603) It is known that a prism refracts red rays less than orange, orange less than yellow, yellow less than green and so on, and thus breaks up white light with its various parts; can a prism then be made that will not cause this decomposition, but that will transmit a beam of white light without producing dispersion?

A.—Yes, achromatic prisms are made by cementing a piece of common glass and a piece of flint glass together. The crown glass prism should be about twice that of the flint, and the base of one is opposite to the base of the other, and as the prisms will have nearly equal dispersive powers they will counteract each other in this respect, and therefore neutralize all color effects, but as their denoting powers vary the prismatic bending or refracting power is not

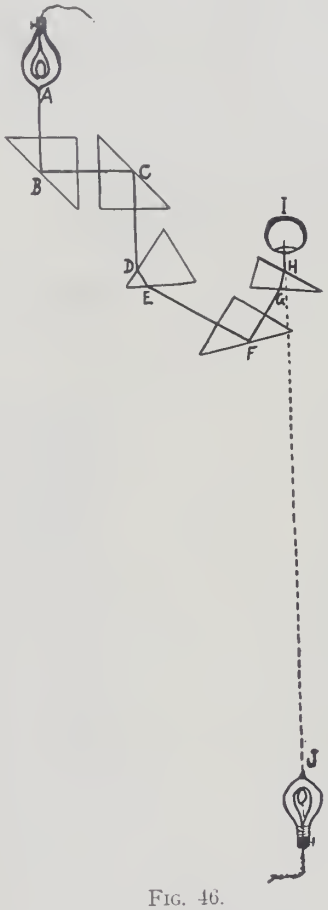

Fig. 46.

lost. Achromatic prisms, however, are employed much less frequently than achromatic lenses.

Q.—(604) What effect does a prism have on an object seen through it?

A.—An object looked at through a prism will appear displaced toward the apex of the prism. It is so well known that a prism always bends light toward its base that this statement is apt to seem incorrect. Both statements, however, are true, and the phenomenon may be demonstrated by reference to Fig. 45, wherein P, R, I represents a prism and L a candle from which a ray of light passes toward the prism in the direction of L, M, which is first refracted at M toward N and again from N into an eye at E. The eye is incapable of recording these bends, and the object always appears to an eye to be in line with the ray as it enters the eye; thus the candle L will not appear at L when looked at through the prism, but will seem to be at L', as far away as the combined distances of E N, N M and M L, but directly along the line E N or at L'. This point cannot be too well understood, viz., that the object always appears to the eye in the direction from which the rays are traveling at the moment of entering the eye. Nor does it make any difference how many prisms a ray may pass through nor in how many directions it may have traveled before reaching the eye, for in any case the object from which this ray comes will appear as far off as the combined distance of all the parts of that refracted ray, but in the direction of the last part as it enters the eye. Thus in Fig. 46, the ray starts from A, is refracted from B to C, from C to D, from D to E, from E to F, from F to G, from G to H and hence into the eye, I, but the bulb will appear to the eye to be at J, two and three-quarter inches away in the direction of the ray as it enters the eye, and this distance will be found to equal always the combined length of the broken ray.

The mind, through the eye, is not in any way conscious of all these bendings, and were the prisms hidden from view would really believe that the light bulb was actually at J, straight in front of it, instead of to the right and rear.

Q.—(605) Of what value is the knowledge of this principle to the optometrist?

A.—To understand the various tests made with prisms and to comprehend the workings of many optometrical instruments, one must have a thorough understanding of this phenomenon.

*(To be continued.)*

W. D. Nutting, a retail jeweler of Concord, N. H., was among those who lost heavily during a recent fire, at that place.

Robert Stokes, who was recently taken into custody in Reading, Pa., on a charge of attempting to pass worthless checks, was released, last week, owing to the withdrawal of the charges against him by Julius L. Cohen, a retail jeweler of Reading.

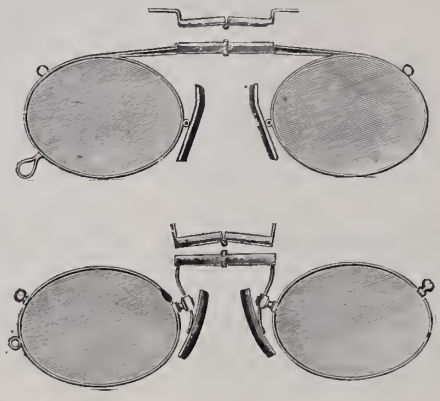
## The NEW Standard Prisoptometer.

The above illustration shows the Improved Standard Prisoptometer, an invaluable instrument for diagnosing errors of refraction, without which the equipment of any refractionist's office is not complete. The instrument is handsomely finished and can be attached to any table or stand. Illustrated circulars and directions mailed to any one upon application. The instrument can be obtained of any jobber.

## ANNOUNCEMENT.

A handsomely illustrated 32-page *Catalogue of Machinery* is now ready for distribution.

## QUALITY "STANDARD" QUALITY.



It has been in the past, and is now, our aim to increase the quality and style of our goods whenever circumstances warrant rather than to decrease the price, as is commonly the practice. We make special styles and quality for those of our customers who require something other than the regular styles. Our regular goods are the very best in quality and workmanship that can be turned out by skilled workmen and up-to-date machinery.

If you would be convinced, give us a trial order. The quality of our goods is our best advertisement.

**The Standard Opt. Co.,**
Geneva, N. Y., U. S. A.

## The "Optus" Eyeglass.

A NOVELTY in pince-nez which is now being manufactured in London, Eng., has been named the "Optus." As illustrations here show, the bar consists of two pieces of metal tubing, connected in the center by a hinge. Inside the tube are several pieces (generally three) of fine flat watch spring. When the eyeglass is opened (as shown at the top of the illustration) these springs cause the eye-wires to spring forward toward their original position, thus obtaining its grip on the nose. The advantages claimed are: (1) A firmer grip, combined with an easier pressure on the nose than any other form of eyeglass. (2) The entire movement of the bar is lateral, so the

A NEW STYLE OF PINCE-NEZ.

frame cannot sit otherwise than horizontally on the face, which, of course, is of great value in cases of astigmatism. (3) The strength of the spring can be altered by merely loosening the screw in the center and taking out or putting into the tube one or more pieces of fine watch spring (supplied for this purpose). These springs are not fixed in any way, being kept in position by the tubes, so this operation can easily be effected by any one. (4) There is nothing which can work loose or get out of order and they are easily repaired.

## Effects of Eyeglasses Upon an Epileptic.

A CASE is reported of a man who seemed to be about to recover from attacks of epilepsy after having been fitted with eyeglasses. He went without attacks from September, 1902, till January, 1904. In the latter month his glasses were broken, and while not wearing them he had several attacks, four in January, six in March, and four in April. The six in March and the four in April occurred after he had again put on glasses.

After April he had no more attacks during 1904, but they recommenced in January, 1905. In that month he had one; in February, five; in March, eight; in April, four; in May, seven; in June, four, and in July five. He had worn glasses constantly. A point to which Dr. W. P. Sprathing calls attention is that the glasses in this case seemed to repress the epileptic attacks in a manner not unsimilar to the repression that is often secured by the use of the bromides, and that like the bromides, while they may mitigate the disease, they cannot cure.

## An Ophthalmoscopic Lamp.

THE hand-lamp illustrated herewith has been devised to facilitate the examination of the eye by the direct method. Very little practice is needed to acquire the art of combining the movements of the lamp and mirror, so as to survey the fundus with great rapidity.

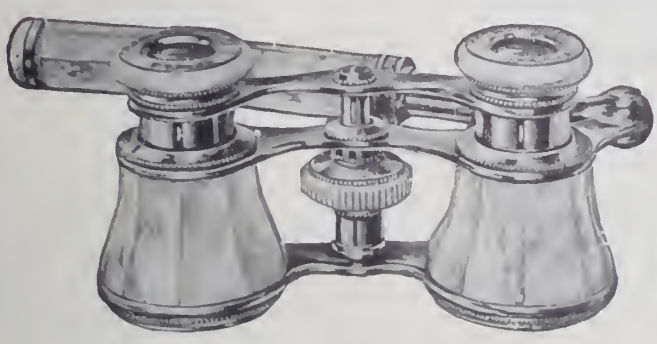
Briefly, the apparatus consists, states J. T. Gradon, in the *Ophthalmoscope,* of a vertically half-obscure electric lamp enclosed in a japanned box with double walls to floor and lid, by means of which ventilation is obtained without allowing light to pass through the perforations. But when total darkness is not required the lid may be thrown back, as the spring ferrule which is

A NOVEL HAND LAMP.

pushed on to the socket of the electric lamp after this has been placed in position in the box, provides a rest for the latter.

Three shutters are provided with light holes of various sizes, for muscle tests and exercises. A candle holder is also supplied to take the place of the electric lamp, when required. The price, with lamp holder and two yards of flexible cord, costs 21s.

## Effect of Bed Reading on the Eyes.



ASTHENOPIA has undoubtedly on occasion been induced through reading in bed, but cases generally occur in those who work with the eyes all day and give their accommodative powers no rest.

As an example of what may be done without dire results, Frank T. Bullen, of Melbourne, writes to the *Daily Mail,* and says: "While fully aware of the difficulty of confuting general statements by particular instances, I would like to say that I have been a constant reader in bed, or lying down, for nearly 40 years—in fact, nearly all my reading has been done in a prone position. Yet to-day I can read diamond type quite easily, and I never wear spectacles, while for long sight also my vision is almost as keen as an Indian's. But I never use my eyes as the prone reader must do. The relative position of the page to my eyes is just the same when I am lying down as when I am sitting up."

Robert Stratford, who for 13 years had been in the employ of George Arkwright, Beatrice, Nebr., has purchased the business formerly conducted by Upton S. Miller, of the same place.

Complete Catalog and Prices on Request.

*[Answers are also solicited from our readers to the questions published on this page.]*

QUESTION No. 1367.—**Bright Cutting.**—*How are the smooth, large cuts produced on satin-finished silverware? I want to engrave some metal cards in the same manner, but am unable to obtain the large, smooth cuts.* *E. C.*

ANSWER:—This style of engraving is termed bright cutting, and the large cuts are made with the graver, which has been highly polished. The finer the polish on the graver, the smoother the engraving will appear. To polish the graver a crocus cloth should be used. These may be procured from the supply houses, and the crocus is usually fastened to a piece of plate glass. It is used as an oilstone. The graver should be polished on the crocus glass very often, so that it will retain a smooth edge.

QUESTION No. 1368.—**To Temper Gravers.**—*Will you please tell me which is the best way to properly temper gravers that are too hard?* *C. M. B.*

ANSWER:—It is claimed that a graver which is too hard may be tempered by being covered with linseed oil and immersed in boiling water, where it should remain till cold.

QUESTION No. 1369.—**To Clean Mercury.**—*Kindly tell me how to clean mercury and how to pour it in a jar in order to get a smooth surface.* *C. B. A.*

ANSWER:—Mercury containing dust and dirt may be cleaned by passing it through filtering paper placed in a glass funnel. The paper must be pierced at its apex, making a small hole. It may be poured in a jar perfectly clean through a cone of smooth writing paper, the apex of which is also pierced with a small hole, the apex touching the bottom of the jar, and the cone being slowly and carefully withdrawn, thereby avoiding the access of air.

QUESTION No. 1370.—**A Tinning Bath.**—*We have several small parts of cast iron pieces that we use on lamps and clocks, which parts we want to cover with tin. Will you give us a formula for doing this?* *E. B. & Co.*

ANSWER:—A tinning bath for dipping iron is prepared by dissolving 300 grammes of ammonia-alum and 10 grammes of tin salt in 20 liters of warm water. As soon as the solution boils, the iron articles, which have been previously pickled and rinsed in fresh water, are plunged into the fluid; they are immediately covered with a layer of tin of a beautiful dull, white color, which can be made bright by treating in a tumbler. Small quantities of tin salt are added from time to time to replace the tin deposited on the iron.

QUESTION No. 1371.—**Hobson Britannia Metal.**—*Kindly give me a new composition of britannia metal.* *M. B. C.*

ANSWER:—One of the latest alloys of britannia metal has just been patented by A. E. Hobson, Meriden, Conn. The mixture is 109 lbs. of tin, 9 lbs. of antimony, 3 lbs. of copper and 3 ozs. of manganese. This alloy is claimed to possess great strength and ductility. The metal is hard and tough, close grained, and therefore capable of taking a high polish. The patent covers the adding of the manganese to the regular britannia alloy.

QUESTION No. 1372.—**Saving of Silver Waste.**—*Having a silver solution which I used for several years in a small way, I recently enlarged my plant and I now wish to know how I can save all the wastes in the plating room. Kindly describe to me how to save the different wastes usually occurring in that department.* *S. P. T.*

ANSWER:—The principal waste in silver plating is the drip, which drops from the articles when taken out of the bath. Near the silver bath should be placed a tank filled with water and in this the articles should be rinsed first; then the piece may be rinsed in the hot water kettle. The first rinsing tank will soon become charged with the solution, so that it can be used to replenish the silver bath. The second rinsing tank or kettle, containing the hot water, also becomes charged with silver, so that it can be used for the same purpose. Much silver goes to waste when the articles are rinsed in running water, as the silver disappears with the water.

QUESTION No. 1373.—**A Cheap Gold Solution.**—*Kindly let me know the cheapest way to make a gold solution for plating, and if there is any way to make it without using gold.* *C. D.*

ANSWER:—A gold solution can be made which will cost about $5 per gallon. It can be used for silver, copper or alloys rich in these. The formula is: Distilled water, 1 gallon; phosphate of soda, crystalized, 9½ ozs.; bisulphite of soda, 1½ ozs.; cyanide of potassium, ½ oz.; gold chloride, 160 grs. Dissolve in a portion of the water, heated, the phosphate of soda. Dissolve in another portion of the water the bisulphite of soda and cyanide of potassium. Dissolve the gold chloride in the remaining water; stir the solution slowly into the cold phosphate of soda solution, and finally add the solution of cyanide and bisulphite. The bath now ready should be colorless. The cost of gold plating can be reduced by using a copper or other gilding metal anode in place of a gold anode. Or a copper solution may be used, with a copper anode, and finished with a light deposit of gold. The copper solution is made by adding cyanide of copper to a sulphate of copper solution. There are many ways of staining acid coloring of various metals, but they are not durable and cannot be compared to electro plating.

QUESTION No. 1374.—**Watch Case Plating.**—*How can I plate a watch case so that it will retain its color.* *T. N.*

ANSWER:—If a watch case be gold plated with nearly pure gold and then burnished with a bloodstone burnisher, the case will not tarnish. But to deposit pure gold on light colored German silver or brass cases would require more gold than is required in most cases. Therefore, an alloy of copper is used, and this is what causes the changing of color, or tarnish. There are several ways of making the gold solution, one being to purchase the prepared gold salts. Another is by taking 1 gal. of distilled water; cyanide of potassium, 3 ozs.; gold chloride, 1 oz., and using a pure gold anode. A good color may be obtained by adding cyanide of copper to an old or weak gold solution, using a copper anode and depositing a coat of copper on the cases, then burnishing and afterward depositing a good gold on this. This produces the desired dark color which, with the pure gold deposited over all, will wear well.

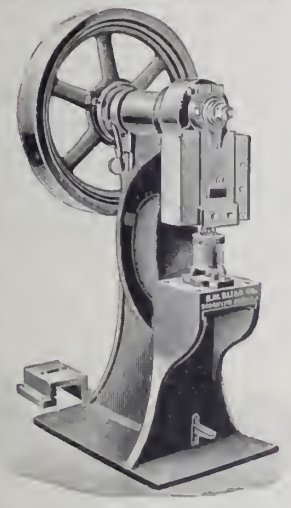
QUESTION No. 1375.—**Brush Finish on Brass.**—*How is the brush finish on some brass goods, especially on lamps and fire sets, produced?* *J. I. C.*

ANSWER:—The brush finish is produced with a fine brass wire scratch brush. The articles to be treated must be polished in the usual way and then thoroughly cleaned of anything that may gather in the crevices. The wire brush should not run above a speed of 600 revolutions, and the article should be treated so that an even finish will result. Some brass is very hard and it often requires the assistance of a coarse emory cake in connection with the brass wire scratch brush. A fast-running wire brush produces the finish very fast, but the result would be that the brush would wear out after a few hours' use, and therefore it is necessary to work with a slow speed.

QUESTION No. 1376.—**Ink for Writing on Celluloid.**—*What kind of an ink can I use to write on celluloid combs?* *J. K.*

ANSWER:—Take one part of acetone and dissolve in it 10 parts of chloride of iron, and in 99 parts of acetone dissolve 15 parts of tannin; then mix the two parts together The acetone is a dangerous poison and must be used with care.

QUESTION No. 1377.—**Liquid Polish for Silver Plated Ware.**—*Kindly give me a formula for making a silver polish suitable for plated ware. I don't want any of the chalk preparations.* *I. S.*



ANSWER:—A good liquid polish is made by dissolving three or four drachms of cyanide of potassium and eight to 10 grains of nitrate of silver in four ounces of distilled water. Apply with a soft brush, then wash the object thoroughly with water, dry with a soft linen cloth and polish with a chamois skin. Neither whitening nor powder of any kind should be used for cleaning and polishing. They only wear out and scratch the silver. In the case of solid silver some precipitated chalk is allowable in the solution.

THE EXCLUSIVE ART GOODS HOUSE

# The Glory of Art.

Bronzes, of all the products of the fine arts, appeal most strongly to human sympathies. They represent man's study of man—man's own ideal and apotheosis. They unite the most solid realism with the highest poetry. Their technique almost touches the secret of creation, for their semblance of life stops just short of the breath of life.

The inspirations of the great masters are here brought before us. Pieces depicting the gay chivalry of the tournaments, Bravery and Beauty. Figures of Labor showing the naturalistic tendencies of present art—the Miner, the swarthy Blacksmith, the Woodchopper with uplifted ax, realistically and effectively posed, full of life, energy and vehement action; the athletic Mower, so finely and fitly presenting the modern peasant type.

Barye subjects, vividly showing the spirit and power of this eminent sculptor of animals. The lions seem to roar with their open jaws and one hears the cracking bones which the tigers are crunching. There are cows, sheep, bulls, displaying an intimate acquaintance with the habits and anatomy of the domestic animals, mostly in the green finish.

A masterpiece is the imposing and spirited Colleone showing the stalwart and haughty warrior boldly seated on his pawing horse, a superb reproduction of Verrocchio's heroic statue in Venice. There are Vases in entirely new decorations. Busts and Fancy Pieces in profuse variety. Vienna Bronzes, Sevres Bisque and figures showing a happy and picturesque combination of bisque and bronze.

## The Marvels of Chinese Ceramics.

(Translated for THE JEWELERS' CIRCULAR-WEEKLY from the French of HAVARD.)

PRIMARILY, it is imperative to acknowledge the beauty, the delicacy, the purity and the plasticity of the Chinese clays, and to remark that they are obtained with the same ingredients of which are formed the hard European porcelaines, but in slightly different proportions. Upon this admirable material the Chinese have been clever enough to apply decorations which are superlatively appropriate. Even when they restrict themselves to coating their pieces with that white enamel which has earned for certain of their products the exclusive name of china white, and which, though it seems in its first stages not to be particularly attractive, they succeed in giving to its anti-decorative shade a tone so delicate, and which recalls so perfectly that of ivory or wax, that the article becomes not only agreeable, but charming to the eye. They know, too, how to vary the sides of a vase or pot or cup—all apparently so delicate that one fears breakage at the slightest contact—by the aid of amusing reliefs or by the concave impression of the local flora, the whole treated with a simplicity which is extremely scientific, and of an indescribable charm.

If they excel in white decoration, even more from earliest time have they been masters in the art of colored ware. Whether they coat their vases with that soft sea-green so delicious to the eye—a hue to which our ancestors gave the singular name of *céladon;* or whether they select for the basic color more decided tints, like the imperial yellow, or those fine copper reds that are known by the unpoetic name of "beans," the Chinese know how to give these strong colorings such warm reflections, such superb brilliancy, such delicate harmony! And, as a masterstroke, after having obtained—at first accidentally, it is stated—those porcelains whose jasper colors imitate agate, and which we call overfired or scorched, they produced these very articles commercially, thus taking advantage of a condition which fundamentally was an imperfection. Nor is this the only similar circumstance, in the history of Chinese ceramics, where an error has led to subsequent lucrative use. The much-sought-for "crackle," resulting from a splitting of the enamel like the crushing of an eggshell, is produced voluntarily by these wonder-workers, who have appropriated a defect and turned it to their uses with a tact, a skill, and a sentiment of the artistic conventions which is truly extraordinary.

Thanks to the religions of Buddha and Confucius which jointly rule their empire, the Chinese have at their disposal a double pantheon of gods, to which they add several familiar or constructive divinities, among which are *Pousa,* the god of contentment, and *Poutai,* the god of porcelain. Besides these worthies, they have created an emblematic menageric of great extent, figuring in the front ranks of which is the imperial dragon. Then there is another dragon named *Khilin,* a monster of good augury, but proud, and very scaly; the dog of *Fo;* the sacred horse, to which *Fou-li* owed his power to construct characters of writing; the *Fonghoang,* a singular and immortal bird which nests far up in the air, and to all these is added their marvelous skill in depicting their local numerous and beautiful flowers.

In the 17th and 18th centuries the Chinese flooded Europe with enormous quantities of their blue and white porcelain, reserving to themselves a wonderful originality, which the Dutch in Holland, those eminent art-counterfeiters, were unable to attain.

Having resolutely taken the stand, from the outset, not to consider truth, nor perspective, nor to give to their figures either relief or modeling, to arrange their scenes in such a manner that dreams appear to have presided at their invention much more than reality, the Chinese secure a freedom in the decoration of their vases which has a peculiar charm. Everywhere in these incoherent landscapes one finds the same disdain for exactitude, and the same fantastic interpretation of nature.

---

The etymology of the word porcelain cannot be very satisfactorily traced, and numerous and far-fetched are the speculations about it. Not the least curious is that of Dr. Johnson, who gives it as coming from the French, *"Pour Centaus,"* because it was a common belief that the materials for making it had previously to be buried for 100 years. Another strange derivation is the one from the name of King Porcena. Tradition says that in his endeavors to avoid being poisoned he used some cups made of a certain substance which would not hold poison without breaking. It is well known that for a long time all pottery vessels coming from the East were popularly credited with the same astonishing property, hence the name of Porcena's ware, or Porcellana.

## Reappraisement Board Investigating Charges of Undervaluation of Pottery.

BEFORE a sub-board of the Board of United States General Appraisers, New York, a hearing began recently in relation to the valuation of cheaper lines of pottery imported from Holland by Geo. Borgfeldt & Co., New York. General Appraisers Summerville, Waite and Hay heard the testimony.

The Board last Spring declared an advance of about 10 per cent. on a number of lines of Dutch imports which this company had been receiving. This action followed an investigation which was instigated by the domestic manufacturers, who sent Mr. Burgess, then the secretary of the American Potters' Association, to Europe, for the purpose of obtaining information. It is said that as a result of the Board's decision the company was called upon to pay about $50,000 in additional duties and penalty.

After the Board handed down its decision, the company enlisted the assistance of the Merchants Association of New York with a view to reopening the case. H. D. Dumont, representing this Association and W. Wickham Smith, counsel for the company, carried on an energetic campaign, even bringing the matter to the personal attention of President Roosevelt. Finally the sub-board was directed to make a full investigation of the subject. At the hearing last week the importers and the domestic potters were each represented by counsel. After taking considerable testimony the sub-board adjourned, and it is understood that much more evidence is to be presented before the hearing is finally closed.

It is reported that the question of the valuation of Limoges china is soon to be brought before the Board of United States General Appraisers by domestic interests which claim there has been undervaluation. If this is done there is likely to be a sharp struggle. The representatives of the Limoges factories have often denied that there is any systematic undervaluation, and say that if occasional errors are made the importers are always glad to see them corrected, as the uniformity in the assessment of duty is greatly desired by the legitimate trade. But action in the way of a general increase in valuations, such as domestic manufacturers might propose, would be strenuously resisted, it is understood.

## Recent Reappraisements of China, Glass, Etc.

REAPPRAISEMENTS of china and cut glass ware, announced recently by the Board of United States General Appraisers, as follows:

White china from Balleroy, Mandavy & Mavaleix, Limoges, exported Jan. 28 and Feb. 25, 1905, entered at Boston (File Nos. 34706 and 34947); findings of Sharretts, G. A.: 6 dozen assiettes coupes, 24c., entered at 5, reappraised at 4.77 francs per dozen; 24 dozen, do., 15c., entered at 2.50, reappraised at 2.38 francs per dozen; 8 dozen compotiers, 15c., entered at 2.10, reappraised at 2.38 francs per dozen; 12 dozen pairs tasses, the Vendome, entered at 3, reappraised at 3.69 francs per dozen; 1¼ gross assiettes coupes, 5½, Vendome, entered at 25.20, reappraised at 24.96 francs per gross; do., 6½, entered at 30, reappraised at 29.64 francs per gross; 2 dozen pairs tasses chocolat, Vendome, entered at 3, reappraised at 3.59 francs per dozen; ½ dozen theieres, 2 Belfort lig, entered at 7.80, reappraised at 8.04 francs per dozen. Discount on entered values, 5 per cent. and 2 per cent. Reappraised values are net. 8 dozen compotiers, 24c., Vendome, entered at 7.20 francs per dozen; 12 dozen plats a gateaux Louise, entered at 10.20 francs per dozen; 1 dozen plats a gateaux Vendome, entered at 9 francs per dozen; ⅓ dozen chocolatiers, Vendome, entered at 21 francs per dozen; 6 pieces vases condat, entered at 4 francs each; ½ dozen vases, 2e Darnet, entered at 24 francs per dozen; 6 pieces buires modernes, entered at 3.50 francs each; 2 pieces vases Bluets, entered at 4.50 francs each. And similar goods. Discounts, 5 per cent. and 2 per cent. No advance. Add packing on all.

Cut glass ware from J. Seidl & Co., Gahlonz, exported July 18, 1905, entered at New York (File No. 36622); findings of Sharretts, G. A.: 30,000 pieces drops, 185/3, entered at 4, advanced to 4.21 crowns per 100; 2,500 pieces prisms, 130/3, entered at 5.30, advanced to 5.40 crowns per 100; 2,500 pieces do., 130/3½, entered at 5.70, advanced to 5.80 crowns per 100; 10,000 pieces do., 130/4, entered at 6.80, advanced to 6.95 crowns per 100; 3,000 pieces do., 130/5, entered at 9, advanced to 9.20 crowns per 100; 3,000 pieces do., 130/6, entered at 13, advanced to 13.25 crowns per 100. Discount, 3 per cent. Add cases and linking.

White china from Balleroy, Mandavy & Mavaleux, Limoges, exported April 27, 1905, entered at New York (File No. 35501); findings of Sharretts, G. A.: 36 pieces plats a gateaux Louise, blanc; entered at .85 franc each, no advance; 24 pieces do. ronds 11, entered at 1.10, advanced to 1.45 francs each; 2 dozen compotiers, 21, Louise, entered at 7.80 francs per dozen, no advance; 6 dozen do., 15, entered at 2.10, advanced to 2.56 francs per dozen. Discount, 5 per cent. and 2 per cent. Add cases and packing.

Decorated china, bronzes, etc., from Sachse, Paris, exported July 29, 1905, entered at New York (File No. 36488); findings of McClelland, G. A.: 1 group Moutons bronze, entered at 90, advanced to 120 francs; 1 gueridon, entered at 100, advanced to 125 francs; 2 vases, porcelaine electrique, entered at 150, advanced to 225 francs for both; 1 bronze, "Le Reveil," entered at 115, advanced to 150 francs; 2 colonnes gaine, entered at 530, advanced to 650 francs for both; 2 vases, forme Louis XV., entered at 300, advanced to 400 francs for both; 1 garniture pendule, entered at 500, advanced to 700 francs; 1 bronze, "La Charite," entered at 150, advanced to 200 francs; 2 petite vases, entered at 45, advanced to 60 francs for both; 1 boite avec email, entered at 28, advanced to 35 francs; 1 lampe partative electr., entered at 50, advanced to 65 francs; 1 petite vase bleu; entered at 26, advanced to 35 francs. Add packing.

Decorated china from L. S. Mayer, Frankfort, exported Aug. 9, 1905, entered at New York (File No. 36400); findings of Sharretts, G. A.: Advanced by the addition of 5 per cent. for manufacturer's profit.

Cut glass ware from the C. de Verreries Cristalleries de St. Louis, Munzthal, exported May 12, 1905, entered at New York (File No. 35820); findings of Board No. 3: 48 water bottles, cut neck, 8 flutes, 1019-2 bis; entered at 1.57, advanced to 2.10 francs each. Discount, 5 per cent. Add casks. Cash discount, 2 per cent.

Decorated china from Erdmann Schlegelmilch, A. G., Suhl, exported Aug. 18, 1905, entered at New York (File No. 36744); findings of Sharretts, G. A.: Cuspidors, 45/177, entered at 8 marks per dozen; do., 45/8333, entered at 10.50 marks per dozen; toy tea sets, 582/0135, entered at 3.25 marks per dozen. And similar goods. Discounts, 5, 5 and 2 per cent. Add casks and case. Advanced by making discounts 5 and 5 per cent.

Decorated earthen ware from Henry Alcock, Birmingham, exported July 19 to Aug. 12, 1905, entered at New York (File Nos. 36509, 36552 and 36212); findings of Sharretts, G. A.: Blue Touraine and gold lines, entered at discounts of 22½, 5, 5 and 1 per cent.; Green Manhattan Illd., entered at discounts of 27½, 5, 5 and 1 per cent. Add crates on all. All no advance.

Decorated china from S. Maas, Limoges, exported May 30 to Aug. 31, 1905, entered at New York (File Nos. 36075, 36567, 36700 and 35962); findings of Sharretts, G. A.: Provence covered dish, 1485DO, 216, entered at 4.30 francs each; do., casseroles, entered at 3.80 francs each; do., soup tureens, entered at 7.60 francs each; flat plats, 6½ do., 49, entered at 5.75 francs per dozen; oval dish, 18 in., do., entered at 5.70 francs each; do., 12 in., entered at 1.90 franc each; do., 16 in., 216, entered at 4.30 francs each; do., 18 in., 393, entered at 5.70 francs each; do., 10 in., entered at 1.10 francs each; flat plats, 5½ in., 49, entered at 4.85 francs per dozen; preserves, 4½ in., entered at 3.45 francs per dozen; butter dishes, do., entered at 1.90 francs each; creams, 2, 216, do., entered at .90 francs each. And similar goods. Add 6 per cent. Add packing. All no advance.

Cut glass from Barta & Co., Franzenthal, exported July 20 and 31, 1905, entered at New York (File Nos. 36685-86); findings of Sharretts, G. A.: 16⅔ dozen oils, 203/1, entered at 16 crowns per dozen; 5-11/12 dozen do., 203/2, entered at 12 crowns per dozen; 3 dozen oils, 306, 273 and 274, entered at 13.50 crowns per dozen. Discount, 5 per cent. Add packing. No advance.

## Concession to Make Glass in Venezuela.

UNDER date of Aug. 25, 1905, William W. Russell, Esq., American Minister at Caracas, advised the Department of State in relation to a concession for the manufacture of glass and crystal granted by the Government of Venezuela to Carlos Zuloaga. The contract, which was approved by President Castro on Aug. 14, 1905, will remain in force 15 years. The principal provisions are as follows:

Article 1. Carlos Zuloaga binds himself to establish one or more plants for the manufacture of articles of glass and of crystal in the place or places in the territory of the Republic which may be chosen for this purpose. The first plant established must be mounted and in operation within two years subsequent to the date on which this contract is approved by the National Congress, save and except delays caused by the unforeseen and unavoidable circumstances, which must be duly proved to the satisfaction of the Federal Executive.

Article 2. As an official protection to this industry, entirely new in Venezuela, the Federal Executive makes the following concession to the party of the second part: The exclusive right to operate said industry in the Federal district and in the State or Federal territory where the plant may be established, during the existence of this contract; the right to make use of the prime materials found on the lands of the nation; the right to extract from the territorial sea water the soda and sulphite of soda necessary for the manufacture of glass and crystal in his plant or plants, free from all taxes; the right to import, free of taxes, for one single time for the plant, and for each one of the plants, which the party of the second part may decide to establish, machinery, apparatus, instruments, materials, and utensils designed for the installation and working of his plant or plants; in each importation all legal requisites must be fulfilled; the plant or plants which may be established, as well as the products thereof, are exempt from all taxation or national contribution created or which may be created during the existence of this contract.

Thomas D. Gardner, for 21 years with the Horton, Angell Co., Attleboro, Mass., was presented with a valuable watch by his fellow workers recently.

The silver factories of Taunton report an unprecedented rush, coupled with night work to a greater extent than ever before.

# THE RAMBLER'S NOTES

**BEAUTIFUL BOHEMIAN GLASS WARE.**

CRYSTAL and gold glass ware is shown this season in greater variety and wealth of decoration than ever before at the salesrooms of Bawo & Dotter, 26 Barclay St., New York. Most of the patterns come from the firm's factory in Steinschoenau, Bohemia, and there are also products from other noted factories in the same country. Since this style of ornamentation began to come into style, some eight or 10 years back, this house has made it a feature each year, but the present display far surpasses the exhibitions in any previous season. This ware is sometimes called in the trade, although not correctly, intaglio ware. The cutting is on the reverse of the object. The work of the cutters, as shown this year, illustrates many kinds of flowers, such as roses, tulips and lilies, and fruits, like peaches, pears and cherries. The gold is heavily applied in the cuts, which give the effect of relief designs, so much admired. The decorators are varying the gold ornamentation by using colors here and there, giving more realism to the representation of delicate effects, such as forget-me-nots, and the tints, backed with gold, have a special richness. The forms are graceful, including vases, tall and narrow bowls of many shapes, plates, plaques, loving cups, steins and other articles.

*

**COMING ASSORTMENTS OF FINE CHINA.**

NEW patterns for the American trade were selected by Max O. Doering, of Charles Ahrenfeldt & Son, 50 Murray St., New York, during his recent visit to the company's factories at Limoges and Carlsbad. The samples will arrive in January, and will then be exhibited to the trade, so that orders may be booked in time to make deliveries early in the following Fall. The lines which were introduced last January met with so much favor that Mr. Doering was encouraged to add quite largely to his offerings, at the same time retaining the most popular designs of this and former years. Several weeks ago quite a number of new specimens of hand-decorated china were received by the firm, strengthening the assortment which it has offered for the Spring trade. Odds and ends of china, which the company did not desire to carry over to another year, have been selling quite briskly to retailers in search of bargains for their holiday trade.

*

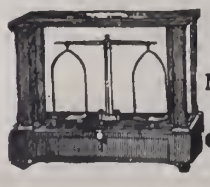
**A SUPERB CUT GLASS VASE.**

AT Tiffany & Co.'s show rooms, Fifth Ave. and 37th St., New York, there was recently unpacked and placed on exhibition a remarkable cut glass vase made by J. J. Niland & Co., Meriden, Conn. It is said that in height at least this vase excels any other ever made in this country. It stands 56 inches high, is 18 inches in diameter at the base, 14 inches in diameter at the saucer and weighs 100 pounds. The cutting is complicated, but thoroughly pleasing, the pattern being designated as the Planet. No metal fittings are used, but instead a system of stoppering similar to that used in decanters, is employed, and the parts have been joined so skilfully that the vase appears as one piece, deceiving the eye. The manufacturers have turned out another pattern almost equally as elaborate as the Planet, and which is known as the Hudson.

THE RAMBLER.

## Ancient Pottery.

IN Persia the productions of the most ancient potteries, even though mere fragments, are bought by their admirers at high prices, to be mounted in precious metals with all the skill that the modern workman can command. The same idea was carried out in France in the last century to enhance the beauty of antique Chinese pieces. The coarsest specimens of *"Céladon"* or *"Rouge Flambé"* have been set by Gouttieres and other celebrated chasers, in bronzes of the most refined workmanship. In England also this tribute of admiration has been paid by a few collectors of great taste to some of the rough fictile gems of the past.



Not to speak of the time when the first stoneware pots used to be elaborately mounted by the silversmith, we know of some instances where a similar setting has been successfully attempted. The contrast obtained between some roughly made and deeply colored earthen utensils, mellowed by age, and the sharply detailed and glittering metal work, produces an amazing effect.

C. N. Hetnzer, Peru, Ind., is convalescent after an attack of typhoid fever.

## The Revival of the Earring.

"IT must be a matter of fully 20 or 25 years ago, according to my recollection, since earrings went out of fashion. We men of middle age," and Mr. P., a progressive member of the trade, complacently stroked the gray side beard that bore silent testimony to his full three-score-and-five years, "can easily remember when earrings of one kind or another were worn by almost all the ladies, both of high and low degree. I doubt whether earrings of any kind are not a very unusual, a strange, sight to the young people of to-day. The survivors of the custom of wearing them are indeed as frequently men as women—sailors, foreigners coming from tropical countries, and similar unconventional folk. The women who have perpetuated the custom of wearing them have, to some extent, also been importations from exotic climes also."

"Since you are citing those who have continued to wear earrings through all the years since Fashion decreed that it was no longer the 'proper caper' to wear them, have you not forgotten one class of men, few indeed, who, in spite of the oddity that they imparted to their appearance, continued faithful to them?" queried THE WANDERER.

Mr. P. looked puzzled for a moment, but then his face cleared, and with a laugh he continued:

"That's so. You mean the few elderly gentlemen who wore, or, rather, used them as specifics for weak eyesight. Whether the wearing of earrings does really benefit the eyes I do not know. But I am assured that 50 years ago it was an article of unquestionable faith with very many people; in consequence of which you would meet occasional men wearing them, of which number there still remain survivals."

Mr. P.'s store is a well-patronized establishment upon one of New York's popular avenues, and he has built up a fine and steady local trade among the middle classes, who dwell in all directions for blocks surrounding his section. Which is relevent to what follows:

"For the past 15 years," said he, "I have not sold more than that number of pairs of carrings. And these were almost all sold to Italian or Russian-Hebrew women—at any rate, to women of forcign birth or extraction. Now, my patrons are not leaders of fashion. In fact, a fashion is about a season old before I have any call for it to speak of. Yet within the past two months I have sold eight pairs of earrings, and three of them during the last week. Of course, knowing by observation and experience, to anticipate what there will be a demand for, I have been prepared for a revival in demand.

"The most striking fact in connection with these three sales is that they were all of one design—just like this pair," and Mr. P—— selected from his show case drops in design, large loops of plain gold about three-quarters of an inch in diameter.

Mr. P——'s experience accords with that of most others, for upon inquiry many dealers said that the sale of earrings was greatly increasing. At one of the Broadway stores in the classic regions known as "The Rialto," and where the patrons and customers are a composite of "swells," "mummers," sports *et id omne gens,* yet all of whom would be classified as liberal "spenders," and who are ever in the forefront as exponents of ultra style, the following statement was made:

"Earrings? Sure! They're coming in again with a rush. We have been laying in a large and varied line of them, as you can see, and although the screw styles have the call as yet over the drop styles, I should not be at all surprised if, before another year, we would find a large sale for even the most cumbrous design of the latter kinds.

"And bracelets are coming in again, too, one of the most favored patterns being an oval band, both in plain polished gold and in various designs, many with inlaid gems. Oh, yes, broad bands sell, too. In fact, everything novel and beautiful seems to find a customer this season. Never since I remember saw a season with as much promise as this. We do not need to exercise half the circumspection and judgment in selecting our stock that we have always had to do heretofore. Our great problem this Fall seems to be to get our orders filled, —have to be after the jobbers and manufacturers all the time.

"More satisfactory than the usual way, you say? That's true. Still it is no fun to feel that you may be losing sales, and at unusually good margins at that, simply because you cannot get the goods that you ordered and that ought long ago to have been delivered. That is the way, we now stand, in spite of the stock we have already been able to lay in, on bacelets and on earrings."

THE WANDERER."

George King, a negro, was recently arrested in Hot Springs, Ark., accused of looting the retail jewelry store of George H. Campbell, of that place, last January.
